### Premier Miton Multi-Asset Global Growth Fund – Class C Shares

A sub-fund of Premier Miton Multi-Asset Funds

Class C Income Shares, ISIN no.GB00B7ZTRZ49 (representative share class) & Class C Accumulation Shares, ISIN no.GB00BTHH0G25

Authorised Corporate Director - Premier Portfolio Managers Ltd.

## Objectives and investment policy

The objective of the Fund is to provide capital growth over the long term.

The Fund will invest in collective investment schemes including open-ended investment companies, closed end investments companies (including investment trusts). These will invest in a broad range of underlying assets which will include bonds, company shares, property, alternative investments, money market instruments cash and cash deposits.

The Fund is actively managed which means that the fund manager will manage and adapt the portfolio depending on their assessment of the broad economic environment and market conditions.

When allocating to different asset classes and selecting investments, the fund manager will assess the broad economic environment, focusing on areas such as economic growth, inflation expectations and the outlook for interest rates. The fund manager will then analyse the individual investments to ensure they are suitable for inclusion in the Fund.

Within each asset class there will be sub-sectors, for example bonds will include those issued by governments and companies. Company shares will be spread across different geographic regions, industry sectors and sizes of company. Shares in property companies may include those focussed on offices, retail or industrial property across the UK. Alternative investments may have a range of underlying assets including commodities and bond-like loans. It is expected that in most market conditions company shares will have the largest allocation.

The Fund may invest in derivatives and forward transactions for efficient portfolio management and investment purposes, including hedging.

The minimum recommended holding term is at least five years. This does not mean that the Fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

#### Terms explained:

**Accumulation shares:** any income made by the Fund will be reinvested to grow the value of your investment.

**Income shares:** any income made by the Fund will be paid out to you.

**Funds:** a general term used to describe collective investment schemes, such as unit trusts, open-ended investment companies and closed-ended investment companies.

**Structured investments:** are typically investments which are linked to the performance of one or more underlying instruments or assets such as securities, currencies and other financial instruments. They frequently provide an augmented fixed return in exchange for accepting a degree of risk, for instance to market falls or gains.

## Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The Fund is ranked as 5 because funds and portfolios holding similar assets have experienced medium to high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The underlying assets held by the funds in which the Fund invests are predominantly equities which, as an asset class, tend to experience higher return volatility than bonds or money market instruments.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Liquidity risk:** during difficult market conditions some underlying securities, such as emerging market equities, may become more difficult to sell at a desired price. Some securities may have special liquidity arrangements within their documentation which allow them to temporarily suspend redemption; the Fund does not currently hold any securities which have suspended redemptions.
- **Operational risk:** arising from underlying investments in overseas markets, in particular emerging markets, which may not have the same level of safekeeping and other controls as more developed markets.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
