

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Corporate Bond Fund I-Class

I-Class Accumulation Units, ISIN: GB00B743QD80

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

To provide income with the prospect of capital growth, in order to achieve a return, net of fees, higher than the IA £ Corporate Bond Sector average over the long term (at least five years).

Policy

At least 70% of the Fund is invested in fixed interest securities issued by companies based anywhere in the world. Up to 30% of the Fund may be invested in other assets, including open-ended funds (including funds managed by Jupiter and its associates), cash and near cash.

Strategy

The portfolio construction process starts with a macroeconomic analysis which determines the willingness to take credit or duration risk, the broad asset allocation of the strategy as well as the geographic areas of focus. The team of credit analysts screens the global credit universe within Developed and Emerging markets to find credits that offer an attractive forward-looking return considering the risk assessment. The fund manager seeks to maintain a diverse portfolio of investments.

Benchmarks

Target benchmark - IA £ Corporate Bond Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. The Fund is classified in the IA £ Corporate Bond Sector.

Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market.

Any income arising in relation to this share class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- There is a risk that companies providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.
- Bonds are very sensitive to interest rate changes and it is possible that bond issuers will not pay interest or return the capital promised. Bonds can also be 'downgraded' by ratings agencies. All of these events can reduce the value of bonds held by the Fund and therefore impact performance.
- The Fund Manager has the power to invest in high yield bonds (a type of bond which has a low or no rating from a credit rating agency). While such bonds may offer a higher income the interest paid on them and their capital value is at greater risk, particularly during periods of changing market conditions. The Fund can also invest in other types of non-rated bonds.
- In difficult market conditions, reduced liquidity in bond markets may make it harder for the manager to sell assets at the quoted price. This could have a negative impact on the value of your investment. In extreme market conditions, certain assets may become hard to sell in a timely manner or at a fair price. This could affect the Fund's ability to meet investors' redemption requests upon demand.
- The Fund has the ability to use derivatives for efficient portfolio management purposes. Investments in financial derivative instruments used for efficient portfolio management can introduce leverage risks and negatively impact performance.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.49%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure excludes the costs of buying or selling assets for the Fund (unless those assets are shares of another fund). A change to the Fund's charging structure took effect on 29/05/2020. The ongoing charges figure with effect from that date is fixed. The annual report and accounts for the Fund will include details of the exact charges made.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

Past performance
