Man GLG Income Fund Professional Income Shares (Class D)

(ISIN:GB00B0117D35) Man GLG Income Fund (the 'Fund') is a sub-fund of Man UK ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to achieve a level of income (gross of fees) above the FTSE All Share Total Return Index ("FTSE Index") over 1 year rolling period and to outperform (gross of fees) the FTSE Index over the long-term (over 5 year rolling periods). To achieve this objective, the Fund will invest at least 80% of its assets, directly or indirectly, in equities that either have: (i) their registered office in the UK; (ii) carry out a predominant proportion of their business activity in the UK market; and/or (iii) are listed on a UK stock exchange.
- The Fund may invest in equities which are equities other than those meeting the criteria described above, American Deposit Receipts ('ADR') and other equity linked instruments including (without limitation) exchange traded or "over the counter" (traded via broker-dealer network) financial derivative instruments (instruments whose prices are dependent on one or more underlying asset) such as stock options, equity swaps and contracts for differences. The Fund may also invest in transferable money market securities (including certificates of deposit, commercial paper and bankers acceptances), fixed and floating rate government and corporate bonds, bonds convertible into common stock, preferred shares and other fixed income investments. Furthermore, the Fund may also hold liquid assets such as time deposits and may use currency transactions, including forward currency contracts, currency swaps and foreign currencies to alter the exposure characteristics of the transferable securities held by the Fund. Fixed income investments may be issued by any government, company or international agency.
- The Investment Adviser uses the FTSE Index as a guide for selecting assets for the Fund, however the Fund is actively managed, meaning that the Investment Adviser will use its expertise to pick investments to achieve the Fund's objective. The Investment Adviser seeks to identify companies trading below the Investment Adviser's estimation of the value of their tangible assets (physical and measurable assets that are used in a company's operations such as property, plant, and equipment) or their replacement cost, or whose profit streams (which focuses on the cash generated for shareholders) the Investment Adviser considers to be undervalued.
- *Use of financial derivative instruments ("FDI")*. The Fund may use FDI extensively to achieve the investment objective and for efficient portfolio management purposes to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- *Benchmarks*. The Fund is managed with reference to benchmarks. The Fund's performance targets (as detailed above) have been chosen on the basis that the ACD considers them to set a reasonable performance target for the Fund to achieve, taking into account a number of factors including (for instance): (i) the investment strategy pursued by the Investment Adviser, and (ii) the assets in which the Fund will principally invest. Whilst the Investment Adviser may deviate from the FTSE Index, in terms of holdings selection, the index is used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- *Dealing*. Shares can be bought and sold on each Dealing Day, as detailed in the Fund prospectus.
- *Investment Horizon*: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- *Treatment of income*. Income earned on investments will be distributed to investors as an income payment.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) the use of FDI may result in increased leverage (investing borrowed money). These risks may lead to significant losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.
- The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.
