# **Key Investor Information**

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

# **Jupiter UK Special Situations Fund I-Class**

I-Class Accumulation Units, ISIN: GB00B4KL9F89, (also representative of I-Class Income Units, ISIN: GB00B66H8P73 at launch date 19/09/2011). The Manager is Jupiter Unit Trust Managers Limited.

## Objectives and investment policy

The Fund objective is to provide a return, net of fees, higher than that provided by the FTSE All-Share Index over the long term (at least five years).

At least 70% of the Fund is invested in shares of companies based in the UK (i.e. companies domiciled, headquartered or which conduct a majority of their business activity, in the UK). Up to 30% of the Fund may be invested in other assets, including shares of other companies (which may be based anywhere in the world), open-ended funds (including funds managed by Jupiter and its associates), cash and near cash.

The fund manager will apply a disciplined, repeatable process to identify shares of companies which are considered to be undervalued and demonstrate strong balance sheets.

The Fund will tend to invest in a carefully selected number of companies where the manager has the highest conviction.

Target benchmark - FTSE All Share Index

The FTSE All Share Index is an industry standard index and is one of the leading representations of UK stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark - IA UK All Companies Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA UK All Companies Sector.

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective: this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

If you select Accumulation Units any income payable by the Fund will be automatically reinvested and reflected in the price of the units. If you select Income Units any income payable by the Fund will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

# **Risk and reward profile**

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk					Тур		er rewards higher risk	-
	◀							•
	1	2	3	4	5	6	7	

The lowest category does not mean 'no risk'.

- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- The Fund tends to invest in fewer companies and may be more volatile than a broadly diversified one.

### Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
