

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers MSCI Emerging Markets UCITS ETF

Share Class: 1C (ISIN: IE00BTJRMP35), (WKN: A12GVR), (Currency: USD)

a sub fund of Xtrackers (IE) plc. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance before fees and expenses of the MSCI Total Return Net Emerging Markets Index (Index) which is designed to reflect the performance of the shares of certain companies in global emerging market countries as determined by MSCI.

The companies comprising the Index are large and medium sized companies based on the combined value of a company's readily available shares as compared to other companies. A company's weighting in the Index depends on its relative size. The Index aims to represent 85% of the readily available shares in each industry sector in the global emerging markets.

The underlying constituents of the Index are listed in multiple currencies.

The Index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax.

The Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions. The Index is calculated in US Dollars on a daily basis.

To achieve the aim, the Fund will attempt to replicate or track the Index, before fees and expenses, by holding all (or a representation of) the securities that comprise the Index as determined by the Sub-Portfolio Manager of the Fund.

The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund.

No dividends will be paid on your shares.

You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will attempt to replicate the performance of the Index less costs, but your investment is not expected to match the performance of the Index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the Fund's performance to be substantially different from the performance of the Index.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

Deutsche Asset Management entities and related companies may act in several roles in relation to the Fund such as distributor, securities lending agent and management company which may involve conflicts of interest.

The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.

Settlement of buy or sell transactions for the Fund may be delayed and there may be uncertainty about the ownership of the Fund's investments. The custodian may not in certain circumstances be liable to the Fund for its acts and omissions or those to whom it delegates custody of the Fund's investments.

The Index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances.

The Index may also be subject to disruption or adjustment events which may prevent its calculation or lead to adjustments to the rules of the Index which may cause your investment to suffer losses.

The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the constituents to which the performance of the Fund is linked.

The Fund may invest in securities in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at the worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

The Fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the Fund will pay the transaction costs related to their subscriptions and redemptions. The ongoing charges figure shown here is an estimate of the charges as there is insufficient historical data. It excludes portfolio transaction costs and performance fees, if any. The Fund's annual report for each financial year will include detail on the exact charges made. More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.
Entry charge	None	
Exit charge	None	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		
Charges taken from the Fund over a year		
Ongoing charges	0.20%	
Charges taken from the Fund under certain specific conditions		
Performance fee	None	

To the extent the Fund undertakes securities lending to reduce costs, the Fund will ultimately be allocated 70% of the associated revenue generated, Deutsche Asset Management (UK) Limited, as Sub-Portfolio Manager, will be allocated 15%, and Deutsche Bank AG, as securities lending agent, will be allocated 15%. To facilitate this, the Fund will initially receive 85% of the associated revenue generated from which Deutsche Asset Management (UK) Limited will receive its allocation. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Past Performance

There is insufficient data to provide a useful indication of past performance to investors.

Please be aware that past performance is not a reliable indicator of future results.

The Fund was launched in 2017 and the share class was launched in 2017.
