The Marks and Spencer UK Selection Portfolio

managed by Marks and Spencer Unit Trust Management Limited, part of the HSBC Group

Class:Accumulation
ISIN:GB0005652200

Explanations of definitions used in the Fund objectives and policy in bold, can be found within the definitions document on our website: www.marksandspencer.com/unittrusts.

Objectives and Investment Policy

- The Fund aims to provide **long term** capital **growth** and **income** in the **long term**, (which is five years or more).
- The Fund invests a minimum of 80% of its value in the **shares (equities)** of both large and small UK companies, which can include **preference shares**. UK companies are deemed as those which are domiciled or incorporated in the UK, or which generate 80% of revenue from the UK.
- The Fund may invest up to 20% in **shares** of companies that are listed on a UK stock exchange that are not UK companies (as defined above). The Fund may invest no more than 10% of its value in the **shares** of companies that are neither UK companies nor listed on the UK stock exchange.
- The Fund will hold approximately 35-45 stocks. Further details of the underlying stocks in which the Fund is invested can be obtained from the Manager, and will be disclosed in the annual and half yearly accounts.
- The Fund may invest up to 10% of its assets in other funds.

Use of Benchmarks

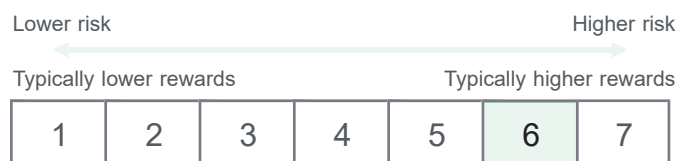

- The Fund is **actively managed** with reference to the FTSE All-Share Index.
- The level of risk the Fund may take is considered relative to the FTSE All-Share Index as part of the portfolio construction process, which means the Fund **returns** are more likely to be closer to the FTSE All-Share Index than a completely **unconstrained fund**.

- The FTSE All-Share Index is also considered as part of our investment risk monitoring process, to check that the overall level of risk taken by the fund manager is not inconsistent with the UK **equities** market.
- The performance of the Fund is therefore shown against the performance of the FTSE All-Share Index. The performance of the Fund may also be shown against the performance of the Investment Association UK All Companies sector for comparison purposes only.

Use of Derivatives

- The Fund may invest in **derivatives** and use borrowing as part of **efficient portfolio management** with a level of risk that is consistent with the overall risk profile of the Fund.
- The Fund does not currently use **derivatives** to reduce the risk of movements in the rate of exchange between Sterling and other currencies in which the Fund's assets may be held. The use of **derivatives** will be consistent with the risk profile of the Fund.
- Income is reinvested.
- You may sell your investment by contacting the Manager during the dealing hours noted in the Prospectus. Your units will be sold at 8am the following Business Day.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 6 because its price or simulated data has shown high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.

- Exchange rate risk** Investing in assets denominated in a currency other than that of the investor's own currency perspective exposes the value of the investment to exchange rate fluctuations.
- Investment leverage risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity risk** Liquidity is a measure of how easily an investment can be converted to cash without a loss of capital and/or income in the process. The value of assets may be significantly impacted by liquidity risk during adverse market conditions.
- Operational risk** The main risks are related to systems and process failures. Investment processes are overseen by independent risk functions which are subject to independent audit and supervised by regulators.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	1.00%
----------------	-------

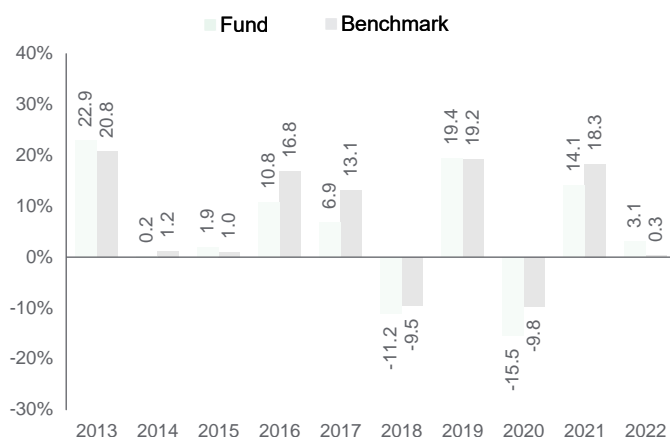

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- There is no entry charge.
- There is no exit charge for withdrawing your investment.
- The ongoing charge figure is an estimate following a change to the charging structure. The Fund's annual report for each financial year will include detail on the exact charges made.

Further information on charges can be found in the Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the Fund value with income reinvested. Past performance takes account of all ongoing charges but not entry and exit charges.
- The past performance of this Fund is calculated in pounds sterling.
- The performance of the Fund is shown against the performance of the FTSE All Share Gross index.
- The Fund was launched and first priced on 30 October 1989.
