ISIN: LU0289524653

## Objectives and Investment Policy

### Objectives

The objective of the Fund is to achieve capital growth.

### Investment Policy

The Fund invests primarily in shares of companies that are either based, or operate predominantly, in Europe (including the United Kingdom).

The Fund will invest at least 75% of its net assets in equities issued by companies which have their head office in the European Union, the United Kingdom, in Norway and Iceland. It is also permitted to invest up to 25% of its total assets in bonds issued by government/supranational organizations worldwide and shares of companies without any geographical restriction.

The Fund may use derivatives (financial instruments whose value is linked to the expected future price movements of the underlying assets). This may be to protect the value of the Fund's assets against market and currency fluctuations and/or, in the short-term, to efficiently invest cash flows.

The Fund is actively managed within its objectives and references the MSCI Europe Net Total Return Index (GBP) for comparative purposes only. There are no restrictions on the extent to which the Fund's portfolio and performance may deviate from that of the

comparative benchmark.

The Fund aims to improve its sustainability profile by integrating and promoting Environmental, Social and Governance ("ESG") characteristics (as defined in Article 8 of the European Sustainable Finance Disclosure Regulation) by assessing and screening shares issued by companies prior to investing.

The Fund will not invest in companies whose business activity (i.e. one that accounts for more than 5% of the relevant company's revenue, unless otherwise specified) involves the following products and services:

controversial weapons (completely excluded); provision or delivery of adult entertainment; production and distribution of palm oil; provision of predatory lending; extraction and production of thermal coal or the generation of power from thermal coal; manufacture and distribution of all tobacco; and provision of unregulated gambling.

The Fund has no specific target industry or sector.

You can buy, sell and switch shares in the Fund on any Luxembourg business day. An instruction received before 14:00 CET will be bought/sold at the price on the next dealing day in Luxembourg.

Any income is reinvested into the Fund.

## Risk and Reward Profile

### Why is this fund in this category?

The risk category is calculated using either historical volatility or the risk limit of the Fund, based upon methods set by European Union rules. It may not be a reliable indicator of the Fund's future risk profile. It is not a measure of capital gain or loss is not guaranteed and may change over time. The lowest risk number does not mean risk free.

The significant use of derivative instruments may generate relatively high levels of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. Such leverage may result in greater fluctuations of the Net Asset Value of the Fund and therefore can result in a loss greater than the amount invested in the derivative itself.

The share class is in the risk category indicated above due to rises and falls of its price or simulated data in the past. Share classes that seek to provide rewards with a low level of volatility are indicated by a 1-2, whereas a 3-5 indicates a medium level of volatility and 6-7 a high level of volatility.

Volatility is influenced by changes in stock market prices, currencies and interest rates, which can be affected unpredictably by diverse factors including political and economic events. Please note that the value of investments and any income you receive from them may go up as well as down. This means that you may not get back your original investment. The Fund does not offer any asset protection guarantees.

The Fund carries a sustainability risk, as defined in the risk profile in the Prospectus.
