Man GLG Japan CoreAlpha Fund Professional Accumulation Shares (Class C)

(ISIN:GB00B0119B50) Man GLG Japan CoreAlpha Fund (the 'Fund') is a sub-fund of Man International ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to provide capital growth by outperforming (net of fees) each of (i) TOPIX Total Return Index (GBP) ("TOPIX") and (ii) Russell/Nomura Large Cap Value Total Return Index ("RNLCV"), both converted to sterling, in a rolling five year period.
- The Fund will invest at least 80% of its assets in (i) equities of Japanese companies; or (ii) companies which derive a substantial part of their revenues from activities in Japan. The Fund may also invest in other transferable securities, units or shares in collective investment schemes (which may include those managed by the ACD or one or more of its associates), and money market instruments (securities used by governments, companies and others who wish to borrow money for short periods, usually less than a year). The Fund can hold no more than 10% of its assets in any one body corporate (including collective investment schemes). In exceptional market conditions and/or for liquidity management purposes, the Fund may hold a significant amount (or all) of its net asset value in cash and near cash, deposits and government and public securities.
- The Fund is actively managed, meaning that the Investment Manager will use its expertise to pick investments to achieve the Fund's objective. The Investment Manager selects investments from the largest 300 listed companies by market capitalisation listed on the Tokyo Stock Exchange. The Investment Manager's investment process focuses on selecting stocks which it considers to be undervalued based on their Price to Book ratio (which compares a company's share price with the accounting value of its assets ("PBR")) relative to TOPIX. The Fund has a "Value" bias, as opposed to funds which have a "Growth" bias (i.e. invest in companies with high PBRs). The Investment Adviser considers the sector weighting composition of the Fund against RNLCV's for portfolio construction and typically aims to stay within +/-15% relative to TOPIX.
- The Fund will expect to hold a small number of positions (usually between 35 to 55 positions).
- *Use of financial derivative instruments ("FDI")*. The Fund may use FDI (instruments whose prices are dependent on one or more underlying assets) to achieve the investment objective and for efficient portfolio management to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security. The Fund may use currency transaction and techniques to hedge the Fund's currency exposure where securities held by the Fund are denominated in currencies other than the base currency.
- *Benchmarks*. The Fund is managed with reference to benchmarks. The Fund's performance target (as described above) has been chosen on the basis that the ACD considers it sets a reasonable performance target for the Fund to achieve, taking into account a number of factors including (for instance) the investment strategy pursued by the Investment Adviser and the assets in which the Fund will principally invest. These benchmarks are also used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- *Dealing*. Shares can be bought and sold on each Dealing Day, as detailed in the Fund prospectus.
- *Investment Horizon*: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- *Treatment of income*. Income earned on investments will be added to the value of investors' shares.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default.
- The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.
- The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
