

Invesco Global Investment Grade Corporate Bond Fund

31 December 2024

Important Information

- The Fund invests primarily in investment grade corporate bonds and intends to achieve, in the medium to long term, a competitive overall investment return with relative security of capital in comparison to equities.
- Investors should note the liquidity risk, concentration risk of investing in investment grade corporate bonds, volatility risk, risk associated with investments in debt instruments with loss-absorption features including senior non-preferred debts, contingent convertible bonds which are subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events and may result in a significant or total reduction in the value of such instruments, currency exchange risk, RMB currency and conversion risks of RMB hedged share classes, credit rating risk, general investment risk.
- Investment in bonds or other fixed income securities is subject to (a) interest rate risk and (b) credit risk (including default risk, downgrading risk and liquidity risk).
- Financial derivative instruments (FDI) may be used for efficient portfolio management and hedging purpose and for investment purposes. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. As a result of the use of FDI for investment purposes, investors should note the additional/high leverage risk. Also, the active FDI positions implemented by the Fund may not be correlated with its underlying securities positions held by the Fund which may lead to a significant or total loss to the Fund.
- For certain share class(es), the Fund may at discretion pay dividend out of capital and/or effectively out of capital, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share in respect of such share class after the monthly distribution date. (Note 1)
- In addition, investors of Monthly Distribution-1 share classes that are currency hedged (MD-1 hedged) should be aware of the uncertainty of relative interest rates. The net asset value of the MD-1 hedged may fluctuate and may significantly differ from other share class due to fluctuation of the interest rate differential between the currency in which the MD-1 hedged is denominated and the base currency of the Fund and may result in a greater erosion of capital than other non-hedged share class. (Note 2)
- The value of the Fund can be volatile and could go down substantially.
- Investors should not base their investment decision on this material alone.

Objectives and investment strategy

The Fund intends to achieve, in the medium to long term, a competitive overall investment return with relative security of capital in comparison to equities. The Fund will invest at least two thirds of its NAV in investment grade corporate bonds

Yield	%
Gross Current Yield	4.56
Gross Redemption Yield	4.92

The current yield of a bond fund is the weighted average current yield of underlying bonds in gross in the portfolio. Current yield of an individual bond refers to the annual interest divided by the market price of a bond. The figure is not the dividend yield received by the investors and is subject to change from time to time. For annualized dividend yield, please refer to Distribution information.
