

Handelsbanken Global Småbolag Index Criteria

Management Report

Investment Focus

The fund is an index fund and its objective is to track the performance of the Solactive ISS ESG Screened Paris Aligned Developed Markets Small Cap Index NTR as closely as possible. The fund is passively managed. Fund returns are determined by how the fund's investments in equities increase or decrease in value. The index will be replicated through optimized physical replication, which means that the fund invests directly in a larger selection of the equities included in the index. Tracking error is expected to be less than 0.5% under normal market conditions. The management fee, as well as customer flows, index rebalancing and corporate events result in transaction costs for the fund, which are not present in the index. These are the main factors that impact the fund's ability to replicate the index. The index is reinvested, i.e., distributions paid for equities included in the index are reinvested in the index after tax adjustments. The aim of the index is to reflect the performance of small caps worldwide in the developed equity markets, excluding those companies that do not meet the sustainability requirements of the index. The sustainability requirements in the index aim to reduce carbon emissions. The companies in the index are selected and weighted in such a manner that the index portfolio's emissions of greenhouse gases are aligned with the long-term global warming targets in the Paris Agreement. The sustainability requirements in the index also provide for the exclusion of companies involved in verified violations of international norms, companies that cause significant harm to environmental goals, as well as companies that are active within controversial sectors. The fund can invest in derivative instruments as part of the fund's investment focus. However, the use of derivative instruments is of such a nature that it only has a marginal impact on the fund's risk level. Additional information about the sustainability work, the share class designation in parentheses and the management in relation to the fund's benchmark index, may be found in the prospectus.

Activity level

The fund strives to keep deviations from the index as low as possible. The index will be replicated through optimized physical replication, which means that the fund invests directly in the majority of the equities included in the index. Management fees, customer flows, index rebalancing and company events result in fees and transaction costs for the fund. However, these costs are not charged to the index. The above factors result in fewer deviations from the index.

The activity level in a fund is calculated through the use of the tracking error measurement. Tracking error is defined as the volatility in the difference between the fund's returns and the returns of the benchmark index. Tracking error is calculated according to industry standards, is based on the monthly data and reflects the past 24 months. A higher deviation in returns from the benchmark index gives a higher tracking error. The level of the tracking error differs between different types of funds (actively-managed funds, index funds, etc.) and fund categories (e.g., equities or fixed income), given that the risk levels of the underlying markets differ from each other. The selection of the benchmark index is of importance for the level of the tracking error. In the selection of an index our ambition has been to obtain an index that is as relevant as possible in relation to the fund's long-term investment focus. We have therefore selected a benchmark index that is sustainability-oriented and thus more concentrated/"narrower" than the "broader", non-exclusive index.

Explanation of achieved active risk

The fund's tracking error is in line with the expected results for the

management of the fund.

The fund changed its index in 2021 and therefore the historical returns prior to this are compared to an index that was used previously.

Portfolio

The fund rose by 12.8% in 2023*.

The three largest holdings in the fund at year-end were: Monolithic Power Systems, PTC and Molina Healthcare. The largest sectors in the fund were: Manufacturing, Financial and Insurance Activities, Information and Communication. The fund tracks an index that is aligned with the Paris Agreement's climate targets, i.e., EU Paris Aligned Benchmarks. This development is an important step in the journey to attain the Management Company's goals for net zero emissions in our portfolios by 2040, as well as to align all of our managed capital in accordance with the Paris Agreement's targets.

* The fund may have additional share classes, the concerned share class is stated in the Fund facts. Refer to fund statistics for comparable index.

Significant risks

The fund is an equity fund which means a higher risk, but also the potential for a higher return. The fund's investments are made globally, with some concentration in equities listed in the US. Fund investments are allocated across companies in several sectors or branches, which reduces the risk in the fund. Given that the fund's investments are made in foreign equities denominated in a currency other than the fund's base currency, an investment in the fund is associated with currency risk. Given that the fund consists of different share classes, the changes in exchange rates can result in a differentiation in the value and the risk classification between different share classes depending on the type of currency in which the share class is traded. The fund's investment focus entails exposure to smaller companies that frequently have lower liquidity. In general, the variation in liquidity is considered to be higher relative to the equity market overall. This can impact the fund's ability to manage significant outflows at a relatively low cost.

The fund may invest in derivatives as part of its investment focus to increase returns in the fund and to create leverage. The volume of trading is limited where applicable and is expected to have a marginal impact on the fund's risk profile.

The sustainability risk, i.e., an environmental-, social- or corporate governance-related event or condition that could cause an actual or potential significant adverse impact on a company's value, is managed through the inclusion of companies based on sustainability analyses, exclusion, as well as engagement in the form of dialogue and active corporate governance. The sustainability risks are systematically measured and followed up by the Management Company. If a sustainability risk occurs, it can have an actual or potential adverse impact on the value of an investment. Examples of sustainability risks include the consequences of environmental degradation (e.g., ban that requires the adaptation or sale of business operations, lower demand, difficulties in obtaining financing or physical risks that deplete resources and natural disasters), the consequences of human rights violations, workers' rights, equality, corruption and bribes, as well as the consequences of inadequate corporate governance. Accordingly, environmental-, social-, and governance-related events can arise from a company's own business operations as well as from events that occur independently of the company.

The sustainability risk in the fund is measured using Sustainability's methodology to assess sustainability risks. During the year, the overall

sustainability risk for the fund is considered to be medium and is 21,59 on a scale of 0 to 100.

Trading with derivatives

According to the fund rules, the fund may trade with derivatives as part of its investment focus. The fund did use this option during 2023. The fund has the option of lending securities. The fund did use this option during 2023. The fund may use other techniques and instruments. The fund did not use this option during 2023.

- Highest leverage during the financial year 1.6%
- Lowest leverage during the financial year 0.0%
- Average leverage during the financial year 0.8%

Information

The fund promotes environmental or social characteristics. The appendix to this annual report includes the detailed sustainability-related disclosures that shall be provided by the fund pursuant to Article 9 in the EU regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

In light of ambiguities in the Sustainable Finance Disclosure Regulation (SFDR), we changed the reporting in our Paris-aligned index funds from Article 9.3 to Article 8 as a precautionary measure on 30 December 2022. However, in April 2023 the EU Commission clarified that index funds that track a registered EU benchmark for alignment with the Paris Agreement (i.e., Paris-aligned benchmark) will meet the disclosure requirements as Article 9.3 funds. Following the clarification, the Management Company has been reporting our Paris-aligned index funds as Article 9.3 funds as of 12 May 2023.

Since the changes in tax regulations for Swedish funds (2012) and due to developments within the area of taxation, it is unclear how foreign distributions will be taxed. More information about foreign withholding taxes can be found at the end of this report.

Information on remuneration to employees can be found at the end of this report and at www.handelsbankenfonder.se, under Follow our work/Policies, guidelines and other information.

Shareholder commitments

Based on the Management Company's Policy for shareholder engagement and responsible investment and the Management Company's Voting policy, the Management Company carries out voting at shareholders' meetings, nomination committee work and dialogues held in-house with the portfolio companies or in collaboration with others. The Management Company's work in nomination committees is also regulated by the Guidelines for nomination committee work. It is our view that this work will improve governance and reduce sustainability risks in the portfolio companies, which in turn will result in positive value growth.

The Management Company ensures that relevant information is available as a basis for analysis and voting decisions. This information is provided through analyses from proxy advisors, as well as through market information, third-party analyses or contact with the company. The Management Company then makes independent decisions on those issues where voting or other decisions are to be taken.

The Management Company primarily votes at the general meetings where the funds own a minimum of 0.5% of the votes, where the companies constitute significant holdings in each fund, where the Management Company determines that a specific engagement effort is necessary in accordance with the Management Company's established sustainability

objectives and commitments, at companies with which the Management Company holds dialogues in which the subject of the dialogue will be presented for a decision at the general meeting, at shareholders' meetings where relevant sustainability issues will be presented for a decision, as well as at other general meetings that address principal or controversial issues. The Management Company determines which equities will be lent. For example, equity lending does not occur in companies in which the Management Company has a seat on the nomination committee. In each individual case, the Management Company makes an assessment of whether or not an equity loan will be withdrawn. Securities lending revenues for the fund are weighed against opportunities for shareholder engagement at the general meeting.

Handelsbanken Fonder participates in all nomination committees where we have a sufficiently large ownership to be offered a seat. However, nomination committees are not common outside of the Nordics and the board composition can only be impacted by voting at the shareholders' meetings.

Within its shareholder engagement, Handelsbanken Fonder conducts engagement dialogues with companies to encourage the company to enhance its sustainability work as well as with companies that we believe are not compliant with the international norms and conventions respected by the Management Company.

Engagement work is conducted primarily through direct dialogues between Handelsbanken Fonder and the companies, joint dialogues together with other investors, as well as in collaborations and initiatives with focus on specific sustainability issues.

There have been no conflicts of interest between the Management Company and the portfolio companies in conjunction with the fund's investments. Information about how the Management Company in general addresses conflicts of interest that may arise in conjunction with the fund's investments is available in the Management Company's Policy for shareholder engagement and responsible investment.

Read more about Handelsbanken Fonder's approach to ownership issues and about the Management Company's guidelines for responsible investment in the Company's Policy for shareholder engagement and responsible investment, the Management Company's Voting policy and the Guidelines for nomination committee work, which are available at handelsbanken.se/sv/om-oss/svenska-dotterbolag/handelsbanken-fonder/our-work.

The sustainability-related disclosures included as an appendix to the annual report provide additional information about the engagement work in the form of dialogue and corporate governance that has been undertaken by the Management Company during the year on behalf of the funds.

Fund performance*

* The graph is indexed with starting value 100. Performance is shown in the fund's base currency. The fund may have several share classes.

ANNEX V

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852.

Product name: Handelsbanken Global Småbolag Index Criteria

Legal entity identifier: 549300M3FT0YPIOB9559

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective : 76.91%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
<input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective : 3.92%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund's objective is to reduce the emissions of carbon and other greenhouse gases and it attains this by tracking a Paris Aligned Benchmark (PAB index) during the reference period. The index consists of a registered EU reference value for alignment with the Paris Agreement pursuant to Regulation (EU) 2016/1011 (the Benchmark Regulation) and is an index with specific sustainability requirements. The sustainability requirements in the index aim to reduce the emissions of carbon and other greenhouse gases. The companies in the index are selected and weighted in such a manner that the index portfolio's greenhouse gas emissions are aligned with the long-term targets in the Paris Agreement.

The fund company reports the fund in accordance with Article 9(3) of Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector (SFDR).

The fund's proportion of sustainable investments in 2023 totaled 80.82%, based on an average of the results of the fund's sustainable investments per quarter. It should be noted that the fund company reported the fund pursuant to Article 8 until 12 May 2023 due to ambiguities in the Sustainable Finance Disclosure Regulation (SFDR). In April 2023, the EU Commission provided a clarification, which states that index funds that track a registered EU reference value for alignment with the Paris Agreement (so-called Paris Aligned Benchmark) fulfill the requirement for reporting as Article 9.3 funds. As a result, the fund is considered to fulfill the requirement for sustainable investments at the product level instead of an assessment of what constitutes a sustainable investment made at the company level.

The fund's reporting of the proportion of sustainable investments for the year is calculated as an average of the results per quarter, and thereby differs from the fund's level of sustainable investments at the close of 2023. The total figure for 2023 is based on the following quarterly figures: Q1 2023: 25,9%; Q2 2023: 99,3%; Q3 2023: 99,1%; Q4 2023: 99,0%.

Through these sustainable investments, the fund contributed to the following objectives:

Environmental objectives defined in the EU Taxonomy with technical screening criteria
Climate change mitigation.

Other environmental objectives

Achieving Sustainable Agriculture and Forestry (SDG 2 & 15), Conserving Water (SDG 6), , Contributing to Sustainable Energy Use (SDG 7), Promoting Sustainable Buildings (SDG 11), Optimizing Material Use (SDG 12), Mitigating Climate Change (SDG 13), Preserving Terrestrial Ecosystems (SDG 15).

Social objectives

Alleviating Poverty (SDG 1), Providing Basic Services (SDG 1, 8, 9, 10 & 11), Combating Hunger and Malnutrition (SDG 2), Ensuring Health (SDG 3), Delivering Education (SDG 4), Attaining Gender Equality (SDG 5), Safeguarding Peace (SDG 16).

● *How did the sustainability indicators perform?*

Metric	Value 2023	Value 2022
Share of sustainable investments (%)	80.82%	27.71%
Carbon footprint (Scope 1,2,3) (tCO ₂ eq/EURm)	471.25	488.83
GHG Intensity (Scope 1, 2, 3) (tCO ₂ eq/EURm)	1,070.17	1,118.27
UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (%)	0.00%	0.00%
Share of investments in companies that are active within the fossil fuels sector (%)	0.75%	0.70%

● *...and compared to previous periods?*

The fund company does not invest in companies deemed to have verified violations of the UN Global Compact and the OECD Guidelines for Multinational Enterprises, nor does the fund company make investments with exposure to banned or controversial weapons or companies with revenue in excess of 5% that is derived from activities (production/distribution) linked to weapons and military equipment, alcohol, tobacco, cannabis, pornography, commercial gambling and fossil fuels, with the exception of any investments in approved transition companies. In exceptional cases, an existing holding can obtain a modified analysis, in which case the holding will be sold as soon as possible, although an exposure may exist during the short period between the changed signal and the sale.

Refer to the table above for a comparison to previous periods.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Through the application of the principles stated below, the sustainable investments have been ensured to not cause significant harm to any environmental or social sustainable investment objective during the reference period.

For this fund, which has the objective at the fund level of reducing carbon emissions and other greenhouse gases, the fund company ensures this in its index methodology by fulfilling all of, and in some cases exceeding, the obligatory requirements established for a Paris Aligned Benchmark.

Accordingly, the fund's investee companies apply the following principles:

- Exclusion criteria for companies with activities linked to controversial sectors as well as specific PAI-indicators, such as fossil fuels and controversial weapons.
- Exclusion criteria for companies with confirmed violations of international norms and conventions.
- Exclusion criteria for companies that cause significant harm to one or several environmental objectives linked to mitigation of climate change, adaptation to climate change, sustainable use and protection of water and marine resources, transition to a circular economy, prevention and reduction of environmental pollution, protection and restoration of biodiversity and ecosystems.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors are taken into account by integrating and considering the companies' emissions of carbon and other greenhouse gases in the index methodology and thereby in the portfolio composition. This is done to attain the objective of a reduction in the emissions of carbon and other greenhouse gases. Through screening and exclusion, the fund and its index exclude issuers linked to controversial sectors as well as issuers with confirmed violations of international norms and conventions, such as the UN Global Compact and the OECD Guidelines for Multinational Enterprises. The fund company manages its sustainability risks and possible principle adverse impacts on sustainability factors through engagement in the form of dialogue.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This has been ensured through the application of the fund company's exclusion strategy in the index methodology.

How did this financial product consider principal adverse impacts on sustainability factors?

By meeting the requirements for sustainable investments at the product level pursuant to Regulation (EU) 2016/1011 (the Benchmark Regulation), the fund considers principal adverse impacts on sustainability factors through the regulations applied for the fund's Paris Aligned Benchmark index.

Some of the adverse impacts are managed through exclusion within the scope of the fund's index methodology. The aim is to ensure that no companies are involved in activities with an increased risk of having an adverse impact on sustainability factors. This applies to activities regarding the production and distribution of banned weapons, nuclear weapons, weapons and military equipment, alcohol, tobacco, cannabis, pornography, commercial gambling, fossil fuels, as well as companies that violate international norms and conventions related to human rights, the environment, labor law or combating corruption and bribery. Any deviations are managed through exclusion. Exclusions are built into the fund's index methodology and monitoring relating to the fund's exclusion strategy occurs regularly as well as at the time of the investment.

The indicators that have been analyzed for the fund are disclosed below:

Adverse sustainability indicator & metric	Value 2023	% coverage 2023	Value 2022	% coverage 2022
1.1 GHG Emissions - Scope 1 GHG emissions (tCO ₂ eq)	31,332.99	98.81%	23,440.00	99.26%

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector/Industry code	Sector/Industry name	Sum
A	Agriculture, Forestry and Fishing	0.16%
01	Crop and animal production, hunting and related service activities	0.06%
02	Forestry and logging	0.09%

96	Personal service activities	0.32%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The companies have, where possible, started to report the extent to which their operations are compatible with the EU taxonomy. In addition to reported data, estimated data is available. The fund company has made assessments that this estimated data can be considered sufficiently reliable to be used to assess whether the company contributes to an environmental goal defined in the EU taxonomy and can on this basis be considered a sustainable investment in line with SFDR article 2 (17).

In the fund company's taxonomy reporting, only the taxonomy compatibility reported by the companies themselves is reported. The fund's share of taxonomy-compliant investments for 2023 amounted to 0.17% based on the companies' turnover.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?¹**

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

• **What was the share of investments made in transitional and enabling activities?**

The fund's share of taxonomy-compliant investments for 2023 amounted to 0.02% in transition activities and 0.05% in enabling activities.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

In 2023, the fund's proportion of taxonomy-aligned investments totaled 0.17%

In 2022, the fund did not report any taxonomy-aligned investments since companies had not typically begun to report on the extent to which their activities were aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund is able to invest in economic activities that currently cannot be classified as aligned with the EU Taxonomy. This occurs, among other reasons, due to the environmental objectives currently not having complete technical screening criteria and due to the access to reported data from companies being insufficient.

At the end of the reference period, the fund had 76.57% of sustainable investments with an environmental objective not aligned with the EU Taxonomy.

Additionally, the fund had 0.33% of sustainable investments that the fund company, based on estimated and/or reported data, deems as contributing to an environmental objective aligned with the EU Taxonomy (but which cannot with sufficient certainty be classified as compatible with the EU Taxonomy as such).

What was the share of socially sustainable investments?

During the reference period, the fund had 3.92% of sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

During the reference period, the fund held cash for liquidity and risk management. No environmental or social safeguards have been deemed necessary for this position.

What actions have been taken to attain the sustainable investment objective during the reference period?

Target for reducing carbon emissions

The fund is managed in line with an index that is a registered EU benchmark for alignment with the Paris Agreement (so-called Paris Aligned Benchmark or “PAB Index”), pursuant to Regulation (EU) 2016/1011 (the Benchmark Regulation). The fund and the composition of its index aim to reduce the emissions of carbon and other greenhouse gases. The companies in the fund and index are chosen and weighted in such a way that the index portfolio’s greenhouse gas emissions are aligned with the long-term global warming targets of the Paris Agreement. This means the following:

The index must have a greenhouse gas intensity measured as emissions of greenhouse gases according to Scope 1, 2 and 3, which is at least 55% lower than the greenhouse gas intensity of the reference portfolio and must also show a reduction in the greenhouse gas intensity of at least 7% annually.

The total exposure to the sectors listed as “high climate impact sectors” in Sections A-H and Section L of Annex I to Regulation (EC) No. 1893/2006 (5) of the European Parliament and of the Council must correspond, at a minimum, to the total exposure to these sectors in the reference portfolio. The requirement is established in order to ensure that the index provides a realistic picture of the real economy, including the sectors that need to actively reduce their greenhouse gas emissions in order to achieve the targets of the Paris Agreement.

Within the framework of the index methodology, companies are rewarded if they set targets for greenhouse gas emission reductions that are both clearly established and publicly disclosed (“Science Based Targets”) and/or companies that, via their products and services, positively contribute to the attainment of the environmental objectives of Agenda 2030.

Exclusions

During the reference period, the fund has been managed in line with its exclusion strategy, i.e., potential companies that no longer meet the fund’s sustainability requirements during this period have been divested.

Significant changes were made to the portfolio (rebalancing) on two occasions during the reference period to meet the requirement regarding carbon reduction as well as other requirements in the regulations for Paris Aligned Benchmarks.

Asset stewardship

The fund company and the portfolio manager have conducted active asset stewardship during the reference period in order to improve upon the portfolio companies’ sustainability efforts, reduce sustainability risks and to handle and reduce potential risks regarding adverse impacts for sustainability factors.

Engagement

During the reference period, the fund company carried out direct engagement between the fund company and companies 199 times. 35 of these were dialogues with companies that had holdings in this fund on the balance day. These dialogues aim to support the continuous improvement of the companies’ sustainability efforts and include questions regarding how to handle the company’s sustainability risks, the prevention of adverse impacts as well as contributions to sustainable development. The dialogues can also be reactive/incident based.

In addition to direct dialogues, the fund company has taken part in collaborative engagements during the reference period, where 388 companies have been addressed together with other investors. 31 of these were dialogues with companies that had holdings in this fund on the balance day.

The fund company has carried out engagement activities by participating in initiatives, investor statements and networks during the reference period.

Voting at shareholders' meetings

As a part of the fund company's asset stewardship, the fund company voted at 170 shareholders' meetings during the reference period on behalf of the fund.

Nomination committees

The fund company has through its ownership share taken part in 68 nomination committees and worked to put forward proposals for boards with expertise and diversity. Among these, the fund had holdings in 16 of these companies on the balance day.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

• *How did the reference benchmark differ from a broad market index?*

Target for reducing carbon emissions: The fund is managed in accordance with an index that is a registered EU benchmark for alignment with the Paris Agreement (so-called Paris Aligned Benchmark or PAB Index), pursuant to Regulation (EU) 2016/1011 (the Benchmark Regulation). The fund and the composition of its index aim for a reduction to the emissions of carbon and other greenhouse gases. The companies in the fund and index are selected and weighted in such a manner that the index portfolio's greenhouse gas emissions are aligned with the long-term global warming targets of the Paris Agreement. This means the following:

- The index must have a greenhouse gas intensity, measured as emissions of greenhouse gases according to Scope 1, 2 and 3, which is at least 55% lower than the greenhouse gas intensity of the reference portfolio, and it must also show a reduction in greenhouse gas intensity of at least 7% annually.

- The total exposure to the sectors listed as high climate impact sectors in

Sections A-H and Section L of Annex I to Regulation (EC) No. 1893/2006 (5) of the European Parliament and of the Council must correspond, at a minimum, to the total exposure to these sectors in the reference portfolio. The requirement is established in order to ensure that the index provides a realistic picture of the real economy, including the sectors that need to actively reduce their greenhouse gas emissions in order to achieve the targets in the Paris Agreement.

- Within the framework of the index methodology, companies are rewarded if they set Science Based Targets, meaning targets for a reduction in greenhouse gas emissions that are both clearly established and publicly disclosed, and/or companies that, via their products and services, positively contribute to the attainment of the environmental objectives in Agenda 2030.

Furthermore, the index has exclusion criteria regarding the production and distribution of controversial weapons, nuclear weapons, military equipment, alcohol,

tobacco, cannabis, pornography, commercial gambling, fossil fuels, as well as companies with confirmed violations of international norms and conventions related to human rights, the environment, employee rights or anti-corruption and anti-bribery. The index also has exclusion criteria for companies that cause significant harm to one or more environmental objectives related to mitigation of climate change, adaptation to climate change, sustainable use and protection of water and marine resources, transition to a circular economy, prevention and reduction of environmental pollution, as well as protection and restoration of biodiversity and ecosystems.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

The fund is compared to a broad, global, market cap-weighted smallcap index. As for the requirement for an annual carbon reduction of at least 7%, this is calculated according to the fund's index methodology in November and May.

The presentation of the follow-up occurs in the fund's benchmark statement under the headings "ADDITIONAL DISCLOSURE ON 'EU CLIMATE TRANSITION BENCHMARK' OR 'EU PARIS-ALIGNED BENCHMARKS'" as well as "DISCLOSURE OF THE ALIGNMENT WITH THE OBJECTIVES OF THE PARIS AGREEMENT".

https://www.solactive.com/wp-content/uploads/solactiveip/en/Benchmark_Statement_DE000SL0JZF1.pdf

The sustainability indicators of the fund and the index as well as the fund's performance relative to a broad market index are reported below.

- ***How did this financial product perform compared with the reference benchmark?***

The fund is an index fund managed in line with its reference benchmark (Solactive ISS ESG Screened Paris Aligned Developed Markets Small Cap Index NTR). This means that the fund's performance with regard to the sustainability indicators in all essential aspects are consistent with the reference benchmark's corresponding performance.

- ***How did this financial product perform compared with the broad market index?***

	Handelsbanken Global Småbolag Index Criteria	Broad market index
Share of sustainable investments (%)	80,82%	24,19%
Carbon footprint (Scope 1,2,3) (tCO ₂ eq/EURm)	471,25	1 557,45
Greenhouse gas emissions (Scope 1,2,3) (tCO ₂ eq/EURm)	1 070,17	1 559,66
Share of investments in companies that are active within the fossil fuels sector (%)	0,75%	6,43%
Share of investments in investee companies that have been involved in violations of the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (%)	0,00%	0,06%

Information from Handelsbanken Fonder AB

Corporate Governance

Handelsbanken Fonder exercises an active ownership role. The purpose is to participate so that the Company takes decisions that lead to a sustainable and positive value growth, which in turn benefit our unit holders. We view our ownership role from a long-term perspective, given that changes in companies often take time to implement. As a guideline for our actions, the Board of Directors of Handelsbanken Fonder has adopted a Policy for shareholder engagement and responsible investments. Our work is also guided by those principles established in the Swedish Corporate Governance Code. The Management Company's work in nomination committees is also regulated by the Guidelines for nomination committees.

An essential channel is the regular contacts that our portfolio managers have with those companies in which we invest or intend to invest. This provides a very good opportunity to present our views on the performance demonstrated by the companies. We emphasize good corporate governance, sustainability and transparency at the companies in which we invest.

Handelsbanken Fonder AB participates in a number of nomination committees where we have a sufficiently large ownership to be able to influence the recommendations to the composition of the board of directors. The board shall have extensive and relevant competence and its composition shall be characterized by different perspectives. We work actively for a more equal distribution of genders in the boards. The management companies ambition is to vote at the annual general meetings where we have significant ownership and where our votes could impact the course of events, which is normally over approximately 0.5 per cent of the votes.

We participate in a substantial number of annual meetings each year, in the Nordics, but also in other countries where we have a substantial ownership. In some cases, companies request a dialogue with shareholders prior to a proposal being presented at the annual meeting to gain support for the proposal by the major shareholders.

Handelsbanken Fonder AB participates in such discussions to the extent we have been invited and presents our views that aim at achieving a favourable result for unit holders.

The Management Company's Policy for shareholder engagement and responsible investments is available on our website at: <https://www.handelsbanken.se/sv/om-oss/svenska-dotterbolag/handelsbanken-fonder/our-work>.

Responsible Investments

Handelsbanken Fonder's vision is to create financial wealth and planetary health through sustainable investments. In order to clarify our path to achieving this, we have established sustainability goals, constituting part of Handelsbanken Group's obligations under the UN Principles for Responsible Banking, which the Bank signed in 2019, and the fund company's obligations according to the Net Zero Asset Managers (NZAM) initiative. The purpose of setting quantitative goals is to ensure measurable results, and also allow our stakeholders to follow our development. The goals encompass all of our funds, and relate to two main areas.

Paris-aligned investment portfolios

- 50 per cent reduction in our funds' emission intensity by 2030.
- doubling of investments in climate-related solutions by 2030.

Increase our contribution to the 2030 Agenda for Sustainable Development

- increase the proportion of sustainable investment by 30 per cent by 2025.
- increase engagement activities with a positive outcome every year until 2025.

Handelsbanken Fonder's sustainability work is guided by our Policy for shareholder engagement and responsible investment. The Policy describes the starting point for integration of sustainability, our undertakings in terms of Global Compact, the Principles for

Responsible Investment (PRI) and international norms and conventions. It also describes the methods for sustainability applied in the asset management and principles of our corporate governance. Read more about this in the reports for each individual fund and in the Management Company's Policy for shareholder engagement and responsible investments that is available at: <https://www.handelsbanken.se/sv/om-oss/svenska-dotterbolag/handelsbanken-fonder/our-work>.

Accounting and valuation principles

The Annual Report is drawn up in accordance with generally accepted accounting principles. The accounting principles for the securities funds are based on the Swedish Investment Funds Act (2004:46) and on the Alternative Investment Fund Managers Act (2013:561) for our non-UCITS funds, ESMA's guidelines. The principles are also based on the Swedish Investment Fund Association's Guidelines for Key Ratio Accounting of Swedish UCITS and non-UCITS funds as well the Financial Supervisory Authority's regulations regarding Swedish UCITS funds (FFFS 2013:9) and the Financial Supervisory Authority's regulations regarding alternative investment fund managers (FFFS 2013:10) for our non-UCITS funds. Further, applicable provisions in the Swedish Accounting Act are also applied. Accounting is based on the transaction date.

Valuation principles

Financial instruments, assets and liabilities are valued at market value.

Equities and equity-related instruments are valued primarily at the official closing price, thereafter at the latest trading price from the same day as the time of the valuation.

Interest-bearing securities are valued primarily at the bid price. Swedish government bonds and covered bonds are valued primarily at the median mid-yield.

Interest rate and currency derivatives that are not exchange-traded are valued in accordance with generally-accepted valuation models.

In the event a reliable price is unavailable, alternatively the instrument is not regularly traded, a valuation model can be utilized. This also applies when an instrument that is normally valued through the use of a market price is no longer deemed to have a reliable price.

Financial instruments, assets and liabilities that are revalued to the fund's portfolio currency are recalculated based on the official closing exchange rate on the balance sheet date.

Foreign withholding taxes

Due to the changes in the tax regulations for Swedish funds on January 1, 2012, as well as the developments within taxation, there is significant uncertainty with regard to the application of withholding taxes on equity distributions. This can result in both higher revenues and increased expenses regarding withholding taxes in funds with foreign holdings. The revenues or expenses will be reported when received or paid, respectively. The distributions will be reported in the amount actually received, although it cannot be ruled out that the withholding taxes can be revised, which would result in an additional withholding tax on the previously received distributions made in the fund. A remittance (repayment of withholding tax paid) is reported when received. With regard to restitution for certain funds and from certain countries, e.g., Denmark and Finland, the principle of reporting restitution when received or paid can be waived if there are tax and reporting grounds for doing so.

More information

You will find the complete information brochure with fund rules, fact sheets and current share price performance on our website at www.handelsbanken.se/funds. For further information on the subscription and redemption of fund units, please contact your local Handelsbanken branch office.

Remuneration for employees at Handelsbanken Fonder AB

The principles for employee remuneration at Handelsbanken Fonder AB (hereinafter "the Management Company") have remained unchanged for many years. The Management Company has a low risk tolerance, and this shall also be reflected in our view on remuneration. The Management Company also views the employment of its staff from a long-term perspective. Salary growth and other remuneration varies over an employee's tenure with the Management Company. The total remuneration is a contributing factor to the Management Company's growth in competitiveness and profitability and enables the Management Company to attract, retain and develop competent employees, and also ensures that competence development and succession planning are well-functioning.

Remuneration includes a base salary, salary allowances, customary fringe benefits, occupational pension, possible allocation within the scope of the profit-sharing plan Oktogonen, as well as possible allocation in the form of other variable remuneration to certain employee groups. Salary is determined on a local basis in accordance with Handelsbanken Group's (referred below as "the Group") decentralized work practices and is based on the following predetermined salary factors: the nature of the work and level of complexity, competence, performance capacity and work results achieved, leadership for those who have responsibility for the development of staff, supply and demand for a specific type of competence on the regional market as well as serving as the bearer of Handelsbanken's corporate culture.

Variable remuneration in the Management Company consists of two components: variable remuneration within the scope of the Group's common profit-sharing plan, Oktogonen, which includes all of the employees in the Management Company; and variable remuneration external to this system that covers employees in certain positions. Variable remuneration in addition to Oktogonen is applied within the Management Company when such remuneration is an established market practice and is thereby necessary to attain the Company's business targets. Variable remuneration shall be applied with great caution so as not to impact the desired risk profile of the Management Company or result in inconsistencies between the business activities and the risk profiles of the funds, the fund rules, the discretionary mandate, or the internal and external rules applicable to fund management. The Board of Directors for the Management Company determines the definitive amount of the variable remuneration after taking into consideration the decision made by the Central Board of Directors of Svenska Handelsbanken AB (PLC) for the total allocation of variable remuneration. The remuneration reported in the table Employee remuneration, is based on the Management Company's Remuneration Policy.

Remuneration Policy

The principles for the remuneration system of the Management Company are established in a remuneration policy decided by the Board of Directors of the Management Company. The Management Company's Remuneration Policy is based on the remuneration policy applicable to the Group but has been adapted to the Management Company's specific business activities. Matters that concern the remuneration policy are prepared by a specially-appointed remuneration committee within the Board prior to a decision by the Board of Directors.

The Board's remuneration committee consists of the Board members Lars Seiz (committee chairman) and Helen Fasth Gillstedt. The composition and work of the committee are regulated in greater detail by the Board's rules of procedure, in addition to that which is stated in the remuneration policy. The remuneration committee has access to the information that may be required to carry out its tasks. The remuneration committee meets a minimum of three times per year.

The Management Company's Remuneration Policy is reviewed annually or as necessary. The development of the proposal for the remuneration policy as well as the analysis of the risks associated with variable remuneration have followed the work within the Group and have involved the relevant representatives in the Management Company from senior management, the Compliance and Risk Control functions as well as the Management Company's Human Resources function. The Management Company's current remuneration policy is based on the risk analysis prepared by the Management Company's Risk Control function.

The CEO and relevant Heads within the Management Company are responsible for identifying, evaluating and limiting remuneration risks as well as proposing the format of the remuneration system in line with the Management Company's view on risks and the long term.

The Risk Control and Compliance functions are responsible for identifying, monitoring, analyzing and reporting key risks with the remuneration system. The responsibilities of the control functions and the information concerning the remuneration risks are specified further in the Board of Director's instructions for each function.

The responsibility of the Internal Auditing function and information about the remuneration system are provided in what is stated in general in the Board of Director's instructions for the internal audit.

Variable remuneration

Variable remuneration within the Management Company (hereinafter "variable remuneration"), apart from the common Group profit-sharing plan Oktogonen (hereinafter "Oktogonen"), is only applicable when such remuneration is an established market practice and is necessary to reach the Company's business objectives. The Management Company's senior management group, excluding some of the leading portfolio managers, including staff within the Management Company's Compliance and Risk Control functions receive, apart from Oktogonen, only fixed remuneration. This also applies to employees within the administration function and fund administration. The only category of staff entitled to variable remuneration other than Oktogonen are the portfolio managers and assistant portfolio managers of actively-managed equity- and fixed income funds. This means that portfolio managers of passive funds and asset allocation funds, apart from Oktogonen, are only entitled to receive fixed remuneration.

The principles for variable remuneration adopted by the Management Company are established to reflect the Management Company's risk tolerance, to counteract excessive risk taking and be consistent with the current risk profiles of the funds (which are determined in the Management Company's instructions for risk management), fund rules, discretionary mandate as well as internal and external rules and regulations, without impacting the Management Company's ability to attract and retain competent personnel.

The Management Company's assessment with regard to provisions and allocations of variable remuneration to the established remuneration pool within the Management Company is based on risk-adjusted performance measures as well as current and future risks that are taken into account during this assessment. Results are charged with costs for capital. The risks in the business operations consist primarily of major market downturns, significant outflows from the funds and operational risks in the business operations.

In the preparation of the supporting documentation for decisions with regard to provisions and allocations of variable remuneration, the Management Company's results bear the relevant costs for the risks to which the Management Company is exposed, including the costs required by the Management Company to retain extra assets in accordance with the Alternative Investment Fund Managers Act (AIFMD 2013:561) to cover potential liability risks due to error or negligence in the business operations carried out as supported by the aforementioned legislation.

Given that the results upon which the variable remuneration is based bear the actual costs for the capital required for the business operations, it is ensured that the remuneration levels are consistent with the overall objectives of the Management Company.

Variable remuneration within the Management Company is based on the Group's salary-setting model and the factors upon which salary is based. In addition to the salary factors, there are also factors specific to the business, with particular emphasis placed on sound risk-taking, observance of good order and compliance.

The assessment for the allocation of the variable remuneration is based on the results and performance of the Management Company and individuals during the assessment period. The individual assessment is based on financial and non-financial criteria. The individual's performance is taken into account relative to the benchmark and the products of comparable competitors. An allocation will be made if a provision for variable remuneration has been decided by the Board of the Management Company and the Central Board. The Human Resources department compiles an annual analysis to identify those employees with work tasks that have a significant impact on the risk profile of the Management Company or a managed fund (risk-takers). All employees subject to variable remuneration, apart from Oktogonen, are included in the definition of "Risk-taker" and are subject to the rules regarding the deferral of remuneration. Variable remuneration consists only of fund units. The individuals entitled to this remuneration receive one-half of the variable remuneration in fund units within the funds managed by them (weighted equally if several funds are managed) and one-half in fund units in a number of funds that represent the total assets under management in the Management Company.

The parameters that are the basis for the decision on the amount of the deferred variable remuneration are based on the risks in the business operations and the size of the variable remuneration. The Management Company defers 40 – 60 percent of the variable remuneration over a minimum period of three years. In accordance with the Management Company's policy, the variable remuneration may not exceed 100 percent of the fixed remuneration. The established rules for the deferral of variable remuneration apply to all affected staff and managers.

An assessment is conducted annually during the deferral period to determine whether the remuneration shall be adjusted downward or discontinued entirely. The remuneration will be discontinued or adjusted downward in the event that losses as well as higher risks and expenses arise during the deferral period, which includes taking into account the staff's compliance to external and internal rules. The discontinuation or downward adjustment shall also occur in the event that payment cannot be justified when taking into account the Management Company's financial situation or if the Central Board has made a recommendation for the discontinuation or downward adjustment. Both the deferred variable remuneration and the portion of the variable remuneration that is not deferred are subject to a retention period of one year. No downward adjustment or discontinuation assessments will be conducted during the retention period. The ownership rights to the units will be passed on to the individuals entitled to remuneration at the conclusion of the retention period.

Specific information regarding Oktogonen

The Group's rules regarding Oktogonen apply, with the necessary changes, to all personnel in the Management Company, with the exception of specially-regulated personnel (senior management, risk-takers and employees with particularly high remuneration). The Group's rules provide for the payment of a cash allocation in the case when Handelsbanken has higher profitability than the average for comparable competitors in the bank's home markets and after an overall assessment of the bank's performance by the Central Board.

The following is applicable for specially-regulated personnel who instead receive other remuneration than a direct cash allocation:

- Senior management: the entire Oktogonen remuneration for each individual within management, with the exception of some of the leading portfolio managers, shall consist of an allocation fund that has been selected by the Management Company's Board of Directors. The entire remuneration shall be deferred for a period of up to four years, during which downward adjustment or discontinuation assessments shall be conducted.
- Specially-regulated personnel who fall within the scope of other variable remuneration (actively-managed equity and fixed income fund managers): the rules applicable to other variable remuneration shall be applied to the Oktogonen allocation, including deferral, retention, allocation in certain specific funds and downward adjustment/discontinuation.
- The fund managers of allocation funds or passive funds: the entire Oktogonen remuneration for each fund manager shall consist of an allocation fund that has been selected by the Management Company's Board of Directors. The entire remuneration shall be deferred for a period of up to four years, during which downward adjustment or discontinuation assessments shall be conducted.

Sustainability-related disclosures

Pursuant to the provisions in Article 5 of the European Parliament and of the Council Regulation 2019/2088/EU on sustainability-related disclosures in the financial services sector (SFDR), a fund management company shall state how the remuneration policy is consistent with the requirement for the integration of sustainability risks. Sustainability risks refer to an environmental, social or corporate governance related event or circumstance that, should it occur, would have an actual or potential significant adverse impact on the investment value. Sustainability risks are taken into consideration within the scope of the remuneration system primarily through the Management Company's fund management – in accordance with the fund rules, the Prospectus and the Management Company's Policy for Shareholder Engagement and Responsible Investment – by regularly taking sustainability risks into account in the fund management and by evaluating the fund managers' performance against indexes that include sustainability requirements. In addition, there is also the condition that variable remuneration to fund managers consists of fund units in funds that regularly integrate sustainability risks into its fund management pursuant to SFDR. Sustainability risks are also taken into consideration within the scope of the salary factors. Sustainability risks that are addressed incorrectly can result in lower remuneration (both fixed and variable remuneration) or a downward adjustment/discontinuation of variable remuneration.

Employee remuneration at Handelsbanken Fonder AB

The information below refers to the 2023 operational year	2023	2022
1. Number of employees receiving fixed or variable remuneration payments during the financial year: <i>Information reported refers to every individual who was employed and received fixed or variable remuneration at some time during the year (number of individuals)</i> Total remuneration - of wich fixed remuneration 132 442 tkr - of wich variable remuneration 14 590 tkr	128 persons 147 032 tkr	126 persons
2. The total amount of remuneration paid to specially regulated staff during the financial year distributed by the categories of employees as stated in FFFS 2013:9 Chapter 1, § 9, second paragraph 34*,	112 931 tSEK	98 028 tSEK
- Executive Management Group: <i>The total remuneration paid to members of the Executive management group, that reports directly to CEO, is reported here.</i>	27 556 tSEK	28 371 tSEK
- Employees in senior strategic positions: <i>Those holding strategic positions are included in the Executive management group.</i>	3 274 tSEK	2 808 tSEK
- Employees with responsibility for control functions: <i>The Head of Risk Management is included in the Executive management group.</i>	0 tSEK	0 tSEK
- Risk-takers: <i>The total remuneration paid to the risk-takers who are not included in the categories above are reported here. All of the fund managers in the Management Company.</i>	71 451 tSEK	56 947 tSEK
- Employees with total remuneration that amounts to, or exceeds, the total remuneration of any of the Group executives: <i>Employees that are not classified under any of the categories above but who earn in line with the lowest paid Executive management group member are reported here.</i>	10 650 tSEK	9 902 tSEK
3. Method for the calculation of remuneration and benefits to employees (FFFS 2013:9 and 2013:10): <i>Remuneration and benefits to employees are regulated by the Management Company's remuneration rules, refer above under the heading, Remuneration to employees at Handelsbanken Fonder AB.</i>		
4. The results of the reviews referred to in the Swedish Financial Supervisory Authority regulation regarding investment funds, FFFS 2013:9, Chapter 8a, §16, as well as any deviations that have arisen from the remuneration policy: <i>Risk Control have reviewed the application of the remuneration policy and have not identified any significant risks or deviations in its application. Compliance in general is deemed to be good.</i>		
* The total amount of remuneration consists of payment in both Swedish kronor and euros, exchange rate as of 31 December 2023.		

Definitions

Fund statistics

Average fund capital – Calculated as the mean value of the fund's net asset value during the year (or that portion of the year during which the fund existed). The fund's net asset value is calculated on a daily basis.

Average yearly return, 2, 5 and 10 years, respectively – The fund's average effective annual yield during the last 2, 5 or 10 years, respectively.

Collected management costs in % of average fund capital – Actual management fees collected. Expenses are calculated daily and represent costs for management, administration, marketing and distribution. Expressed in percent of the average fund capital and calculated on a rolling 12-month basis.

Costs for monthly savings SEK 100 – Total costs charged to a unit holder who had SEK 100 invested on the first banking day of each month during the year and retained the investment throughout the year. Calculated for the full year only and for funds and share classes that have existed during the full year. The corresponding amount for funds with EUR as the base currency is EUR 10. The corresponding amount for funds with NOK as the base currency is NOK 100.

Costs for one-time subscription SEK 10 000 – Total costs charged to a unit holder who had SEK 10 000 invested in the fund at the beginning of the year and retained the investment throughout the year. Calculated for the full year only and for funds and share classes that have existed during the full year. The corresponding amount for funds with EUR as the base currency is EUR 1 000. The corresponding amount for funds with NOK as the base currency is NOK 10 000.

Dividends per unit – The Management Company determines the amount of the dividend to be paid to fund unit holders of the distribution share class on an annual basis. Distributions are paid to those fund unit holders registered for distribution shares on the distribution date determined by the Management Company.

Duration – The duration of a fund is a measure of how sensitive the fund is to changes in interest rates. Simply stated, it is the weighted average of the residual maturity in the fund's investments. Measured in years or months.

Fund capital – The fund's net asset value on the closing date for the respective year.

Fund's total net flow – Subscriptions less redemptions in the fund, excluding reinvested dividends and any flows from mergers.

Index – The index used by the fund as its benchmark.

Index incl. dividends – Performance of the fund's benchmark during the respective year. Performance is expressed in percent and is converted to the currency for each share class in those cases where the index is published in another currency. The table shows the index including dividends.

Management fees and other administrative or operating costs – From the 1 of January management fees and other administrative or operating costs replace ongoing charges. The cost measurement includes management fee and refer to the ongoing costs in the fund, excluding transaction costs for securities, interest expenses, transaction-related tax expenses and any performance-based fees.

When the fund engages in security lending, 80% of the revenue earnings derived from the lending agreement is allocated to the fund whilst the remaining 20% is allocated to the securities lending agent. Given that the revenue allocation agreement increases the fund's costs, the remuneration paid to the securities lending agent will be included in the management fees and other administrative or operating costs.

The measure is based on the fees deducted from the fund during the period. It is expressed as a percentage of the average fund capital and calculated on a rolling 12-month basis.

A supplement for the underlying fund's most recently available management fees and other administrative or operating costs, after deducting for discounts received, will be added for funds that invest in other funds.

Net asset value – Net asset value expressed as the rate prevailing on the balance sheet date for the respective year.

Number of units – The number of outstanding units on the last banking day for the respective year. Reported in thousandths of units.

Other assets in the balance sheet contain receivables for unsettled trades, received after balance sheet date. This applies to both sold securities and issued fund shares.

Other costs in the income statement include transaction costs, taxes and bank costs.

Other financial costs in the income statement include expenses for security lending.

Other financial income in the income statement includes premiums for securi-

ty lending and discounts for management costs in underlying funds.

Other income in the income statement refers to money paid back for bank charges and taxes.

Other liabilities in the balance sheet contain liabilities for unsettled trades, paid after balance sheet date. This applies to both purchased securities and redemption of fund shares.

Other techniques and instruments – Techniques and instruments used to improve the effectiveness of fund management refers to the following: techniques and instruments are attributable to transferable securities and money market instruments used in a cost-effective manner to lower risks and expenses or to increase returns in the fund with a risk level that is consistent with the fund's risk profile and applicable rules for the distribution of risk. Example of techniques and instruments include securities lending and agreements on the repurchase of securities sold, i.e., repos and reverse repo transactions.

Risk – The calculation of the fund's risk is the same for all EU member states. 1 is for the lowest risk (small price fluctuations) and 7 is for the highest risk (risk for substantial price fluctuations). The classification is based on the standard deviation (volatility) for the fund, calculated using the unit values over a five-year period. If five years of performance is not available, the standard deviation for the relevant comparable index or other benchmark will be used. Risk describes primarily market risk and currency risk.

Share classes – A fund can have several share classes. Different share classes have different conditions, e.g., currency, with dividends or without, management fee or an initial minimum subscription amount. Fund capital is the same for the share classes and therefore information refers to the fund as a whole unless stated otherwise. Fund units within each individual share class are the same size and have the same rights to the assets included in the fund. The distribution in a distribution share class impacts the relationship between the value of units that are non-distribution and the value of the units that are distribution, with the value of the distribution fund units decreasing in relation to the size of the distribution.

Share of turnover conducted via closely related securities companies – The proportion of fund purchases and sales of financial instruments conducted by Handelsbanken in terms of value. Expressed in percent of the fund's total turnover.

Share of turnover conducted between funds managed by the same fund management company – The proportion of fund purchases and sales of financial instruments conducted on behalf of the securities fund from another fund managed by the same fund management company. Expressed in percent of the fund's total turnover.

Total returns – Reports how the value of a unit has changed during the respective year. If the fund has paid dividends during the year the change in value has been calculated as though the dividend or contribution before tax was added back on the distribution date. Annual return is measured in percent from the date of the previous year's closing date to the closing date for the respective year. Returns for the semi-annual review are reported for the first half of the current year.

Transaction costs – Expressed partly as an amount and partly as a percentage of the value of the financial instruments turned over. The value refers to the overall market value, but for futures and future related instruments the value refers to the exposure value. Calculated on a rolling 12-month basis. Reported in the Income Statement under the heading "Other expenses". Examples of transaction costs are courtage and derivative costs.

Turnover rates (general principle) – The fund's turnover rate calculated, on the one hand, as the ratio between the lowest total amount for securities purchased or sold during the year and, on the other hand, as the average fund capital during the same period. With regard to equity funds, fixed income securities with a residual maturity of a maximum of 397 days at the time of acquisition are excluded from purchased or sold securities. The turnover rate is reported as the number of times turned over per year and is calculated on a rolling 12-month basis.

Turnover rate (leveraged funds) – If a fund has traded with derivative instruments during the period and the turnover calculation conducted in accordance with the general principle makes the turnover information appear misleading, the fund's turnover rate is also calculated by decreasing the total of purchased and sold financial instruments during the period by the total of the subscribed and redeemed units in the fund. This amount is divided by the fund's average fund capital during the period. Negative turnover arises when the total amount for purchased and sold fund units exceeds the total amount for purchased and sold derivatives.

Key figures for risk follow-up

In order to obtain relevant comparisons, dividends have been reinvested in the funds and their respective benchmarks. All key figures have also been calculated on the basis of the Annual effective yields. The values for the past two years have been used for the majority of the funds. A risk forecast has been made for more recent funds, with fund holdings as of balance sheet date as the basis. In these cases, historical data for relevant reference portfolios is used for the calculation of the risk forecast.

Total risk/Total risk in index is stated as the standard deviation for variations in the monthly yields of the fund/index. The higher the number, the higher the risk.

Tracking error measures the standard deviation of the difference in the yields between the fund and its benchmark (the variation in the relative yields). The historical tracking error indicates how much the fund's yield has deviated from benchmark.

Active return states the annual over- or under effective return attained by the fund in comparison to its benchmark.

Sharpe ratio/Sharpe ratio in index is a measure of the fund/index's return, taking

into consideration the risk of the fund/index. A high return attained at a lower risk is better than an equivalent return attained at a high risk. Calculated, on the one hand, as the ratio between the return, less the risk-free interest (interest on government securities) and, on the other hand, as the total risk of the fund/index. The Sharpe ratio is the most relevant ratio for comparing

Information ratio is a measure of the active returns attained by the fund when deviating from its benchmark. It is the ratio between the active returns and the tracking error. A negative information ratio means that the fund has underperformed its benchmark.

Abbreviations

A number of abbreviations are used for certain securities in the table of contents:

ADR American Depository Receipt	IR Redemption Right
ADS American Depository Share	KV Convertibele
BTA Interim Share	NVDR Non-Voting Depository Receipt
CB Callable Bond	Pref Preference Share
ETF Exchange Traded Fund	SDB Swedish Deposit Certificate
f/r Foreign Registered	TO Warrants
FRN Floating Rate Note	TR Subscription Right
GDR Global Depository Receipt	

Active Share compares the equity fund's holdings with the holdings in its benchmark. The key figures are stated in percent, from 0% (exact same distribution as the index) to 100% (none of the holdings are included in the index). The measurement is calculated as one-half of the sum of the absolute deviations between a securities' weighting in the fund and its weight in the index.

Index shows the average returns on the underlying market in which the fund invests.

Spread exposure is shown for fixed income funds, as of the closing date, and is a measure of credit risk. The spread exposure shows how much the fund will depreciate, in percent of the value of the fund, if the spread

between the value of a fixed income fund and government bonds is doubled. Calculated as capital-weighted credit duration multiplied by the spread of the instrument (differential) compared to the government yield curve.

VaR is a parametric in this case and is calculated in accordance with the covariance method. The covariance matrix is presented by the risk system and is updated on a monthly basis. The confidence level is 95% and the time horizon is one day.

Sustainability Definitions

Clarification of abbreviations and designations in the sustainability report.

Agenda 2030 – was adopted by the UN in 2015 with the aim of achieving long-term sustainable economic, social and environmental development in order to eradicate extreme poverty, to reduce inequality and injustice in the world and to combat climate change. Agenda 2030 contains 17 sustainable development goals (SDG) and 169 targets. The goals are: No poverty; Zero hunger; Good health and well-being; Quality education; Gender equality; Clean water and sanitation; Affordable and clean energy; Decent work and economic growth; Industry, innovation and infrastructure; Reduced inequality; Sustainable cities and communities; Responsible consumption and production; Climate action; Life below water; Life on land; Peace and justice and strong institutions; Partnerships for the goals. For additional information, see globalamalen.se.

CDP – (formerly the Carbon Disclosure Project) is an independent, international non-profit organization that works for disclosure and dialogue related to the environmental impact of companies and making this information available to investors. Over 18,700 companies worldwide measure and report their environmental impact through CDP. CDP acts on behalf of over 680 institutional investors. For additional information, see www.cdp.net.

Climate Action 100+ – Climate Action 100+ is a global collaboration initiative with over 700 global investors as signatories. The aim is to engage those companies with the largest greenhouse gas emissions to take responsibility and drive the clean energy transition. The investors behind the initiative encourage companies to take necessary action on climate change, reduce emissions and increase transparency. For further information, see www.climateaction100.org

Global Impact Investing Network (GIIN) – A global membership network for impact investors to exchange knowledge and tools for impact investment. For additional information, see thegiin.org.

Sustainable investing – Pursuant to the SFDR regulation, a sustainable investment is defined as an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not cause significant harm to any other environmental or social objective, while ensuring that the investee companies follow good governance practices. A description of how these three components are defined by the Management Company is provided in the document SFRD – Definitions and description of methodology, which is available at: [Follow our work | Handelsbanken](#).

Investors Integrity Forum (IIF) – IIF is a forum for investors that is headed by Transparency International Sweden with focus on anti-corruption and regulation compliance. Through IIF, investors are able to gain knowledge and expertise experience from both participating companies and Transparency International's global network. This can relate to questions about an individual market or a specific sector. For further information, see www.transparency.se/investors-integrity-forum.

Carbon footprint – Carbon footprint or climate footprint is a calculation of the total emissions of greenhouse gases that have been caused by an organization, event or product. The carbon footprint is measured in accordance with the Greenhouse Gas Protocol (GHG) that defines three so-called 'scopes' to classify a company's emissions of carbon dioxide and other greenhouse gases. Scope 1: direct emissions (emissions from the company's owned or controlled sources), Scope 2: indirect emissions from consumption of electricity, heat or steam, Scope 3: other indirect emissions, such as emissions from the production at subcontractors, transport by vehicles that are not directly owned by the company, outsourced business activities, waste management and energy usage not covered by Scope 2.

Carbon intensity – Handelsbanken Fonder measures the emissions in relation to EVIC (Enterprise Value Including Cash), a value that is largely governed by the stock market value of the holdings. As a result, the carbon intensity can decrease or increase depending on the market valuation of a company, even though the absolute emissions are the same. The Management Company takes into account both direct and indirect emissions in the companies' value chains, i.e., Scope 1, 2 and 3. It is a challenge to also include Scope 3, since in many cases companies do not report these emissions and use estimates instead

Net zero greenhouse gas emissions – Net zero greenhouse gas emissions means that the greenhouse gas emissions from mankind shall be equivalent to the greenhouse gases taken out of the atmosphere in a process called carbon removal. To attain this, emissions must first be reduced to as close to zero as possible. Any remaining greenhouse gases are balanced with an equivalent amount of carbon storage, such as by reforestation or through direct air capture and carbon storage technologies.

Transition companies – are companies involved in power generation that are considered to be transitioning their business activities to contribute to the attainment of the goals in the Paris Agreement. For additional information, see [Follow our work | Handelsbanken](#).

Paris Agreement – The world's countries came to a new agreement at the climate meeting in Paris in December 2015, which is binding for all countries to apply as of 2020. The governments agreed to hold the increase in the global average temperature to well below 2°C above pre-industrial levels and pursue efforts to limit the temperature increase to 1.5°C above pre-industrial levels.

Principle Adverse Impact Indicators (PAI) – EU regulation SFDR places requirements on fund management companies to take into account PAI, i.e., principal adverse impacts on sustainability factors. A description of how the Management Company takes into account PAI is provided in the document SFRD – Definitions and description of methodology, which is available at: [Follow our work | Handelsbanken](#).

Sustainable Finance Disclosure Regulation – EU-förordning 2019/2088 (Förordning om hållbar EU regulation 2019/2088 (Regulation on sustainability-related disclosures in the financial services sector, SFDR) aims to strengthen consumer protection through enhanced sustainability information. The new regulation places higher demands on fund management companies with regard to the transparent disclosure of sustainability efforts and in this manner makes it easier for consumers to compare financial products and make well-founded investment decisions. For additional information, see the document SFRD – Definitions and description of methodology, which is available at: [Follow our work | Handelsbanken](#).

Sustainable risk – The sustainability risk in the fund is measured using Sustainability's methodology to assess sustainability risks. The sustainability risk in the fund is reported with a number on a scale between 0 - 100. The sustainability risk is defined according to the following scale:

Negligible	Low	Medium	High	Severe
0-10	10-20	20-30	30-40	40+

Taxonomy – The EU taxonomy is a tool for classifying which financial and economic activities are environmentally sustainable. The purpose is to ensure that companies, the financial sector and decision-makers use common guidelines when considering which economic activities are environmentally sustainable. The taxonomy is initially focusing on the climate and environment. As a result, investments that contribute to other sustainability dimensions, such as social factors,

are not currently captured in this framework.

UN PRI – The UN's initiative for responsible investments. The objective is to increase knowledge and understanding about the meaning of sustainable development within the investment industry. We are committed to following PRI's six principles by:

1. Incorporating ESG issues into our investment analysis and decision-making processes.
2. Being active owners and incorporating ESG issues into our ownership policies and practices.
3. Work to secure greater disclosure on environmental and societal issues, as well as on corporate governance at the investee companies.
4. Promoting the implementation of these principles within the investment industry.
5. Collaborating to enhance the effectiveness in implementing the principles.
6. Reporting our activities and progress towards the implementation of the principles.

UN Global Compact – The UN's initiative in which member companies commit to pursue their business operations responsibly, in line with the Global Compact's ten principles for human rights, employee rights, the environment and anti-corruption.

Policy for shareholder engagement and responsible investment – The guiding principle of Handelsbanken Fonder's work within sustainability is our Policy for shareholder engagement and responsible investment. The Policy describes the basis for the integration of sustainability, our commitments related to the Global Compact, Principles for Responsible Investment (PRI) as well as international norms and conventions. In addition, the Policy describes the sustainability methodologies applied in fund management as well as the principles for our corporate governance work. For more information, see [Follow our work | Handelsbanken](#).

Reporting principles

Number of nomination committees – Nomination committees where the Management Company has participated and presented proposals at the shareholders' meetings during the year. Based on holdings in the fund during the year.

Number of votes at shareholders' meetings – Votes at shareholders' meetings during the year for fund holdings at the time of the shareholders' meeting. Refers to both ordinary annual general meetings and any extraordinary shareholders' meetings.

Direct dialogues – Engagement dialogues that the Management Company pursues through direct contact with the company.

Number of direct dialogues – Based on the fund holdings during the year.

Pooled engagements – Together with other investors through an external party, we participate in dialogues with companies in so-called pooled engagements. The basis for these dialogues is either proactive and target specific thematic areas, or reactive and target companies with suspected or verified violations regarding international norms and conventions within the environment, human rights, employee rights and anti-corruption.

Number of pooled engagements – Based on holdings in the fund as of December 31.

Initiatives and investor campaigns – are often thematic or focus on sustainability issues within a certain sector.

Revisionsberättelse

Till andelsägarna i Värdepappersfond Handelsbanken Global Småbolag Index Criteria, org.nr 515602-9281

Rapport om årsberättelse

Uttalande

Vi har i egenskap av revisorer i Handelsbanken Fonder AB, organisationsnummer 556418-8851, utfört en revision av årsberättelsen för Värdepappersfonden Handelsbanken Global Småbolag Index Criteria för år 2023, med undantag för hållbarhetsinformationen under rubriken "Bilaga innehållande hållbarhetsrelaterade upplysningar" ('hållbarhetsinformationen').

Enligt vår uppfattning har årsberättelsen upprättats i enlighet med lagen om värdepappersfonder samt Finansinspektionens föreskrifter om värdepappersfonder och ger en i alla väsentliga avseenden rättvisande bild av Värdepappersfond Handelsbanken Global Småbolag Index Criteria:s finansiella ställning per den 31 december 2023 och av dess finansiella resultat för året enligt lagen om värdepappersfonder samt Finansinspektionens föreskrifter om värdepappersfonder.

Grund för uttalande

Vi har utfört revisionen enligt International Standards on Auditing (ISA) och god revisionssed i Sverige. Vårt ansvar enligt dessa standarder beskrivs närmare i avsnittet *Revisorns ansvar*. Vi är oberoende i förhållande till fondbolaget enligt god revisorssed i Sverige och har i övrigt fullgjort vårt yrkesetiska ansvar enligt dessa krav.

Vi anser att de revisionsbevis vi har inhämtat är tillräckliga och ändamålsenliga som grund för vårt uttalande.

Annan information än årsberättelsen

Den andra informationen består av hållbarhetsinformationen under rubriken "Bilaga innehållande hållbarhetsrelaterade upplysningar" ('hållbarhetsinformationen'). Det är fondbolaget som har ansvaret för denna andra information.

Vårt uttalande avseende årsberättelsen omfattar inte denna information och vi gör inget uttalande med bestyrkande avseende denna andra information.

I samband med vår revision av årsberättelsen är det vårt ansvar att läsa den information som identifierats ovan och överväga om informationen i väsentlig utsträckning är oförenlig med årsberättelsen. Vid denna genomgång beaktar vi även den kunskap vi i övrigt inhämtat under revisionen samt bedömer om informationen i övrigt verkar innehålla väsentliga felaktigheter.

Om vi, baserat på det arbete som har utförts avseende denna information, drar slutsatsen att den andra informationen innehåller en väsentlig felaktighet, är vi skyldiga att rapportera detta. Vi har inget att rapportera i det avseendet.

Fondbolagets ansvar

Det är fondbolaget som har ansvaret för att årsberättelsen upprättas och att den ger en rättvisande bild enligt lagen om värdepappersfonder samt Finansinspektionens föreskrifter om värdepappersfonder. Fondbolaget ansvarar även för den interna kontroll som det bedömer är nödvändig för att upprätta en årsberättelse som inte innehåller några väsentliga felaktigheter, vare sig dessa beror på oegentligheter eller misstag.

Revisorns ansvar

Våra mål är att uppnå en rimlig grad av säkerhet om huruvida årsberättelsen som helhet inte innehåller några väsentliga felaktigheter, vare sig dessa beror på oegentligheter eller misstag, och att lämna en revisionsberättelse som innehåller våra uttalanden. Rimlig säkerhet är en hög grad av säkerhet, men är ingen garanti för att en revision som utförs enligt ISA och god revisionssed i Sverige alltid kommer att upptäcka en väsentlig felaktighet om en sådan finns. Felaktigheter kan uppstå på grund av oegentligheter eller misstag och anses vara väsentliga om de enskilt eller tillsammans rimligen kan förväntas påverka de ekonomiska beslut som användare fattar med grund i årsberättelsen.

Som del av en revision enligt ISA använder vi professionellt omdöme och har en professionellt skeptisk inställning under hela revisionen. Dessutom:

- identifierar och bedömer vi riskerna för väsentliga felaktigheter i årsberättelsen, vare sig dessa beror på oegentligheter eller misstag, utformar och utför granskningsåtgärder bland annat utifrån dessa risker och inhämtar revisionsbevis som är tillräckliga och ändamålsenliga för att utgöra en grund för våra uttalanden. Risker för att inte upptäcka en väsentlig felaktighet till följd av oegentligheter är högre än för en väsentlig felaktighet som beror på misstag, eftersom oegentligheter kan innefatta agerande i maskopi, förfalskning, avsiktliga utelämnanden, felaktig information eller åsidosättande av intern kontroll.
- skaffar vi oss en förståelse av den del av fondbolagets interna kontroll som har betydelse för vår revision för att utforma granskningsåtgärder som är lämpliga med hänsyn till omständigheterna, men inte för att uttala oss om effektiviteten i den interna kontrollen.
- utvärderar vi lämpligheten i de redovisningsprinciper som används och rimligheten i fondbolagets uppskattningar i redovisningen och tillhörande upplysningar.
- utvärderar vi den övergripande presentationen, strukturen och innehållet i årsberättelsen, däribland upplysningarna, och om årsberättelsen återger de underliggande transaktionerna och händelserna på ett sätt som ger en rättvisande bild.

Vi måste informera fondbolaget om bland annat revisionens planerade omfattning och inriktning samt tidpunkten för den. Vi måste också informera om betydelsefulla iakttagelser under revisionen, däribland de eventuella betydande brister i den interna kontrollen som vi identifierat.

Revisorns yttrande avseende den lagstadgade hållbarhetsinformationen

Det är fondbolaget som har ansvaret för hållbarhetsinformationen under rubriken "Bilaga innehållande hållbarhetsrelaterade upplysningar" och för att den är upprättad i enlighet med lag om värdepappersfonder.

Vår granskning av hållbarhetsinformationen för fonden har skett enligt FAR:s rekommendation RevR 12 Revisorns yttrande om den lagstadgade hållbarhetsrapporten. Detta innebär att vår granskning av hållbarhetsinformationen har en annan inriktning och en väsentligt mindre omfattning jämfört med den inriktning och omfattning som en revision enligt International Standards on Auditing och god revisionssed i Sverige har. Vi anser att denna granskning ger oss tillräcklig grund för vårt uttalande.

Hållbarhetsinformation har lämnats i årsberättelsen.

About risk

Historical yields are not a guarantee of future returns. A fund can both increase and decrease in value and it is not guaranteed that you will recover the entire invested amount. Note that a fund with risk level 5-7, as stated in the fund's fact sheet (KID), can vary greatly in value due to the fund's composition and management methodology. Summary of investors' rights, prospectus, fund rules and KID are available under each fund at handelsbanken.se/funds.
