### **COVID-19**

The impact of the coronavirus outbreak was profound across all aspects of society. In developed economies, it is clear that the worst of the impact is now over. However, there is an expectation that seasonal peaks and new variants could give rise to renewed travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery and supply chain disruptions which will create ongoing challenges. Widescale and comprehensive vaccination programmes have been put in place in many countries which have had a positive effect. Nevertheless, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this in turn may continue to impact investments held by each sub-fund.

### **Russia-Ukraine conflict**

Certain financial markets have fallen due primarily to geopolitical tensions arising from Russia's invasion of Ukraine and the impact of the subsequent range of sanctions, regulations and other measures which impaired normal trading in Russian securities. The Manager continues to monitor investment performance in line with the sub-funds' investment objectives, and the operations of the sub-funds and the publication of NAVs are continuing.

## Report on the Audit of the Financial Statements

### Opinion

#### *What we have audited*

- the statement of financial position as at 31 December 2022;
- the statement of comprehensive income for the relevant periods;
- the statement of changes in net assets attributable to unitholders for the relevant periods;
- the statement of cash flows for the relevant periods; and
- the notes to the financial statements, which include significant accounting policies and other explanatory information.

#### *Our opinion*

In our opinion, the financial statements give a true and fair view of the financial position of each of the Sub-Funds as at 31 December 2022, and of each of their financial transactions and each of their cash flows for the year/period then ended in accordance with International Financial Reporting Standards ("IFRSs").

### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### *Independence*

We are independent of the Sub-Funds in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

### Emphasis of Matter

We draw your attention to Note 2 to the financial statements, which states that the Manager has decided to terminate the iShares MSCI Emerging Asia ETF. As a result, the financial statements of the iShares MSCI Emerging Asia ETF have not been prepared on a going concern basis of accounting, and are prepared in accordance with the basis set out in Note 2. Our opinion is not modified in respect of this matter.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters identified in our audit are summarised as follows:

# Independent Auditor's Report

To the Unitholders of iShares Core MSCI China ETF, iShares FTSE China A50 ETF, iShares Core S&P BSE SENSEX India ETF, iShares Core MSCI Asia ex Japan ETF, iShares MSCI Emerging Asia ETF, iShares Core CSI 300 ETF, iShares Core MSCI Taiwan ETF, iShares NASDAQ 100 ETF, iShares Core Hang Seng Index ETF, iShares MSCI Emerging Markets ETF (HK), iShares Hang Seng TECH ETF, iShares China Government Bond ETF and iShares Short Duration China Policy Bank Bond ETF (continued)

## Key Audit Matter

Existence and valuation of investments

The investments held by each of the Sub-Fund's as at 31st December 2022 mainly comprised of equities, including exchange traded funds, and/or debt securities in their respective financial statements, which were valued as follows:

iShares Core MSCI China ETF	Listed equities: HK\$5,946,862,021
iShares FTSE China A50 ETF	Listed equities: RMB14,897,879,284
iShares Core S&P BSE SENSEX India ETF	Listed equities: US\$85,321,012
iShares Core MSCI Asia ex Japan ETF	Listed equities: US\$1,619,284,605
iShares MSCI Emerging Asia ETF	Listed equities: HK\$79,345,940
iShares Core CSI 300 ETF	Listed equities: RMB461,551,482
iShares Core MSCI Taiwan ETF	Listed equities: US\$45,112,728
iShares NASDAQ 100 ETF	Listed equities: US\$37,607,455
iShares Core Hang Seng Index ETF	Listed equities: HK\$1,017,338,478
iShares MSCI Emerging Markets ETF (HK)	Listed equities: US\$13,711,464
iShares Hang Seng TECH ETF	Listed equities: HK\$11,376,490,371
iShares China Government Bond ETF	Debt securities: RMB3,371,445,921
iShares Short Duration China Policy Bank Bond ETF	Debt securities: RMB209,187,929

We focused on the existence and valuation of the investments because the investments represented the principal element of each of the Sub-Fund's net asset value as at 31st December 2022. In addition, we also focused on the valuation of listed equities that have had their trading suspended as at 31st December 2022 because the judgements made by the Manager in determining their fair values involved a higher degree of subjectivity.

Refer to note 12 to the financial statements.

## How our audit addressed the Key Audit Matter

Our work included an assessment of the key controls of the trustee and its affiliates, as applicable, over the existence and valuation of the investments, which included the following:

1. We developed an understanding of the control objectives and related controls relevant to the Sub-Funds by obtaining the reports provided by the trustee setting out the controls in place at that trustee and its affiliates, as applicable, and that included an independent service auditor's assurance report over the design and operating effectiveness of those controls.
2. We evaluated the tests undertaken by the service auditor and the results of the tests undertaken and the opinions formed by the service auditor on the design and operating effectiveness of the controls, to the extent relevant to our audit of the Sub-Funds.

We also performed the following tests:

1. We tested the existence of investments by obtaining direct confirmations from the Sub-Funds' custodians and agreeing the Sub-Funds' holdings of investments to those confirmations. No material exceptions were identified from our testing.
2. For the marketable listed equities and/or debt securities held by each of the Sub-Funds, we agreed their valuations by comparing the pricing used by the Sub-Funds to external pricing sources as at 31st December 2022. No material exceptions were identified from our testing.
3. For any suspended listed equities held by the Sub-Funds, where material, we (i) obtained an understanding of how management have fair valued the investments, (ii) performed independent research on the company and industry, (iii) assessed the underlying assumptions and valuation inputs for each suspended stock valuation, and (iv) evaluated the reasonableness of the assumptions and inputs. No material exceptions were identified from our testing.

# Independent Auditor's Report

To the Unitholders of iShares Core MSCI China ETF, iShares FTSE China A50 ETF, iShares Core S&P BSE SENSEX India ETF, iShares Core MSCI Asia ex Japan ETF, iShares MSCI Emerging Asia ETF, iShares Core CSI 300 ETF, iShares Core MSCI Taiwan ETF, iShares NASDAQ 100 ETF, iShares Core Hang Seng Index ETF, iShares MSCI Emerging Markets ETF (HK), iShares Hang Seng TECH ETF, iShares China Government Bond ETF and iShares Short Duration China Policy Bank Bond ETF (continued)

## Other Information

The Manager and the Trustee (the "Management") of the Sub-Funds are responsible for the other information. The other information comprises all of the information included in the annual report other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## Responsibilities of Management for the Financial Statements

The Management of the Sub-Funds is responsible for the preparation of the financial statements that give a true and fair view in accordance with IFRSs, and for such internal control as the Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Management of the Sub-Funds is responsible for assessing the Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Management either intends to liquidate the Sub-Funds or to cease operations, or has no realistic alternative but to do so.

In addition, the Management of the Sub-Funds is required to ensure that the financial statements have been properly prepared in accordance with the relevant disclosure provisions of the Trust Deed dated 16th November 2001, as amended ("Trust Deed") and the relevant disclosure provisions of Appendix E of the Code on Unit Trusts and Mutual Funds issued by the Hong Kong Securities and Futures Commission (the "SFC Code").

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable

assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. In addition, we are required to assess whether the financial statements of the Sub-Funds have been properly prepared, in all material respects, in accordance with the relevant disclosure provisions of the Trust Deed and the relevant disclosure provisions of Appendix E of the SFC Code.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Sub-Funds' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Management.
- Conclude on the appropriateness of the Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Sub-Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Sub-Funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Management with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Management, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## **2 Summary of Significant Accounting Policies**

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### (a) Basis of preparation

The financial statements of the Sub-Funds have been prepared in accordance with International Financial Reporting Standard ("IFRS"). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and liabilities (including derivative financial instruments) at fair value through profit or loss.

As referred to Note 1, the Manager has decided to terminate the MSCI Emerging Asia ETF. As a result, the financial statements of the MSCI Emerging Asia ETF for the year from 1st January 2022 to 31st December 2022 have not been prepared on a going concern basis. The Trustee and the Manager have assessed that the values of all assets and liabilities of the MSCI Emerging Asia ETF at the reporting date approximate their net realizable value, and therefore no changes to accounting policies or adjustments have been made in the financial statements of the MSCI Emerging Asia ETF in order to reflect the fact that it will be able to realize its assets or to extinguish its liabilities in the normal course of business.

# Notes to the Financial Statements (continued)

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Manager and the Trustee (collectively, the "Management") to exercise their judgment in the process of applying the Sub-Funds' accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 3.

The SENSEX India ETF meets the definition of an investment entity as defined by IFRS 10 and is required to account for the investment in its subsidiary, the Mauritius Subsidiary, (up until 14th December 2021) at fair value through profit or loss. As such, the consolidated financial statements have not been prepared by the SENSEX India ETF. The financial statements of the SENSEX India ETF are the only financial statements presented by the SENSEX India ETF. Please refer to note 2(b) for details.

## Standards and amendments to existing standards effective 1st January 2022

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on 1st January 2022 that have a material effect on the financial statements of the Sub-Funds.

## New standards, amendments and interpretations effective after 1st January 2022 and have not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1st January 2022, and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Sub-Funds.

### (b) Investment entity

Up until 14th December 2021, the SENSEX India ETF has multiple unrelated investors and indirectly holds multiple investments through the Mauritius Subsidiary. The subsidiary has been removed from the investment strategy of the SENSEX India ETF on 14th December 2021. Ownership interests in the SENSEX India ETF are in the form of redeemable units which are classified as equity in accordance with IAS 32 and which are exposed to variable returns from changes in the fair value of the SENSEX India ETF's net assets. In 2021, the SENSEX India ETF has been deemed to meet the definition of an investment entity per IFRS 10 as the following conditions exist:

- (i) The SENSEX India ETF has obtained funds for the purpose of providing investors with investment management services.
- (ii) The SENSEX India ETF's business purpose, which was communicated directly to investors, is investing solely for returns from capital appreciation and investment income, through the Mauritius Subsidiary. The Mauritius Subsidiary was set up to hold Indian securities and IAPs on behalf of the SENSEX India ETF.

- (iii) The performance of investments made through the Mauritius Subsidiary is measured and evaluated on a fair value basis.

Although the SENSEX India ETF does not meet all of the typical characteristics of an investment entity (namely, the SENSEX India ETF does not have multiple investments), Management believes it is nevertheless an investment entity because it was formed in conjunction with the Mauritius Subsidiary and effects multiple investments through the Mauritius Subsidiary (up until 14th December 2021).

As such, consolidated financial statements have not been prepared by the SENSEX India ETF in 2021. In these non-consolidated financial statements, the SENSEX India ETF's investment in its subsidiary is accounted for at fair value through profit or loss. Movement in the fair value of the Mauritius Subsidiary's portfolio and corresponding movements in the fair value of the Mauritius Subsidiary may expose the SENSEX India ETF to a loss (up until 14th December 2021).

### (c) Investments

#### (i) Classification

##### (I) Assets

The Sub-Funds classify their investments based on both the Sub-Funds' business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The contractual cash flows of the Fund's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. The Sub-Funds have not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. Investments are classified as financial assets at fair value through profit or loss.

Derivative contracts that have a positive fair value are presented as assets at fair value through profit or loss.

##### (II) Liabilities

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

As such, the Sub-Funds classify all of its investment portfolio as financial assets or liabilities at fair value through profit or loss.

The Sub-Funds' policy require the Manager to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

# Notes to the Financial Statements (continued)

## (ii) Recognition/derecognition

Purchases and sales of investments are accounted for on the trade date basis - the date on which the Sub-Funds commit to purchase or sell the investment. Investments are derecognized when the rights to receive cash flows from the investments have expired or the Sub-Funds have transferred substantially all risks and rewards of ownership.

## (iii) Measurement

Investments are initially recognized at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Subsequent to initial recognition, all investments are measured at fair value. Realized and unrealized gains and losses on investments are recognized in the Statement of Comprehensive Income in the period in which they arise.

## (iv) Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of investments traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the reporting date. The Sub-Funds use last traded market price to determine the fair valuation of investments, where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Management will determine the point within the bid-ask spread that is most representative of fair value.

In the case of CAAPs held by the China A50 ETF and CSI 300 ETF and IAPs held by the SENSEX India ETF, such investments have only nominal exercise prices. Their fair value is based on the quoted market prices of the securities underlying the CAAPs and IAPs. For the years ended 31st December 2022 and 2021, the SENSEX India ETF did not hold any IAPs. For the years ended 31st December 2022 and 2021, China A50 ETF and CSI 300 ETF did not hold any CAAPs.

Investments that are not listed on an exchange or are thinly traded are valued by using quotes from brokers or based on the Manager's judgments and estimates.

Up until 14th December 2021, the SENSEX India ETF's investment in the Mauritius Subsidiary and the underlying investments held by the Mauritius Subsidiary have been designated at fair value through profit or loss at inception as they are managed as portfolio and their performance evaluated on a fair value basis in accordance with the SENSEX India ETF's offering document.

The Mauritius Subsidiary is fair valued based on its latest net asset value as reported by its administrator.

## (v) Transfers between levels of the fair value hierarchy

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the reporting period.

## (d) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position where the Sub-Funds currently have a legally enforceable right to set-off the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Sub-Funds or the counterparty.

## (e) Amounts due from and to brokers

Amounts due from and to brokers represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively. The amounts due from brokers balance is held for collection.

These amounts are recognized initially at fair value and subsequently measured at amortized cost. At each reporting date, the Sub-Funds shall measure the loss allowance on amounts due from broker at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Sub-Funds shall measure the loss allowance at an amount equal to 12-month expected credit losses. Significant known financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganization, and default in payments are all considered indicators that a loss allowance may be required. If the credit risk increases to the point that it is considered to be credit impaired, interest income will be calculated based on the gross carrying amount adjusted for the loss allowance. For the purposes of measurement for presentation in the financial statements, a significant increase in credit risk is defined by the Manager as any contractual payment which is more than 30 days past due and any contractual payment which is more than 90 days past due is considered credit impaired. Management has measures in place to monitor exposures and increase in credit risk.

## (f) Dividend income and bank interest income

Dividend income is recorded on an ex-dividend basis. Dividend income on equity securities where no ex-dividend date is quoted is accounted for when the Sub-Funds' right to receive payment is established.

Interest income from bank balances is recognized in the Statement of Comprehensive Income on a time proportionate basis using the effective interest method.

# Notes to the Financial Statements (continued)

## (g) Distributions to Unitholders

Distributions to Unitholders are recognized in the Statement of Changes in Net Assets Attributable to Unitholders when they are approved by the Manager.

## (h) Expenses

Expenses are accounted for on an accrual basis.

## (i) Cash and cash equivalents

Cash and cash equivalents includes cash at bank and bank deposits with maturity of three months or less from the date of placement that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

## (j) Translation of foreign currencies

### Functional and presentation currency

#### MSCI China ETF, MSCI Emerging Asia ETF, Hang Seng ETF and Hang Seng TECH ETF

Items included in the financial statements are measured using the currency of the primary economic environment in which the Sub-Funds operate (the "functional currency"). The performance of the Sub-Funds are measured and reported to the unitholders in Hong Kong dollar. The Management considers the Hong Kong dollar as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The financial statements are presented in Hong Kong dollar, which is each Sub-Fund's functional and presentation currency.

#### China A50 ETF, CSI 300 ETF, CGB ETF and Policy Bank Bond ETF

Items included in the financial statements are measured using the currency of the primary economic environment in which the Sub-Funds operate (the "functional currency"). The performance of the Sub-Funds are measured and reported to the unitholders in Renminbi ("RMB"). The Management considers the RMB as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The financial statements are presented in RMB, which is each Sub-Fund's functional and presentation currency.

#### SENSEX India ETF, MSCI Asia ex Japan ETF, MSCI Taiwan ETF, NASDAQ 100 ETF and MSCI Emerging Markets ETF (HK)

Items included in the financial statements are measured using the currency of the primary economic environment in which the Sub-Funds operate (the "functional currency"). The performance of the Sub-Funds are measured and reported to the unitholders in the United States dollar ("US dollar"). The Management considers the US dollar as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The financial statements are presented in US dollar, which is each Sub-Fund's functional and presentation currency.

### Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the year end date. Foreign exchange gains and losses arising from translation are included in the Statement of Comprehensive Income.

Foreign exchange gains and losses relating to cash and cash equivalents are presented in the Statement of Comprehensive Income within "Net foreign currency gain/(loss)". Foreign exchange gains and losses relating to financial assets and liabilities carried at fair value through profit or loss are presented in the Statement of Comprehensive Income within "Net gain/(loss) on financial assets at fair value through profit or loss".

## (k) Redeemable units

The Sub-Funds issue redeemable units, which are redeemable at the holder's option. These units represent puttable financial instruments of the Sub-Funds. The Sub-Funds classify their puttable financial instruments as equity in accordance with IAS 32 (Amendment), "Financial instruments: Presentation" as those puttable financial instruments meet all the following criteria.

- the puttable financial instruments entitle the holder to a pro-rata share of net asset value;
- the puttable financial instruments are the most subordinated units in issue and unit features are identical;
- there are no contractual obligations to deliver cash or another financial asset; and
- the total expected cash flows from the puttable financial instrument over their life are based substantially on the profit or loss of the Sub-Funds.

Units are issued and redeemed at the holder's option at prices based on the Sub-Funds' net asset value per unit at the time of issue or redemption. The Sub-Funds' net asset value per unit is calculated by dividing the net assets attributable to unitholders by the total number of outstanding units. In accordance with the Prospectus of the Sub-Funds, investment positions are valued based on the official closing price for the purpose of determining the net asset value per unit for subscriptions and redemptions.

## (l) Transaction costs

Transactions costs are costs incurred to acquire/dispose financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, brokers and dealers. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

# Notes to the Financial Statements (continued)

## (m) Taxation

### Withholding tax

The Sub-Funds currently incur withholding tax imposed by certain countries on investment income. Such income is recorded gross of withholding tax in the Statement of Comprehensive Income. Withholding tax is included as taxation in the Statement of Comprehensive Income.

### Capital gains tax

The tax expense for capital gains tax for the period comprises current and deferred taxes. Tax is recognized in the Statement of Comprehensive Income, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current tax charge is calculated on the basis of the tax laws enacted or substantively enacted by the end of the reporting period in the countries where the Sub-Funds operate and generate taxable income. Management periodically evaluates positions taken with respect to situations in which applicable tax regulation is subject to interpretation or judgment. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of reporting period and are expected to apply when the related deferred tax asset is realized or the deferred tax liability is settled.

Deferred tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same tax authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

## (n) Changes to presentation and comparative information

When the presentation or classification of items in the financial statements is amended, comparative amounts have been updated to conform with the current year's presentation or classification.

## 3 Critical Accounting Estimates and Judgements

The preparation of financial statements in conformity with IFRS requires the Management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are outlined below.

### (a) Functional Currency

#### MSCI China ETF, MSCI Emerging Asia ETF, Hang Seng ETF and Hang Seng TECH ETF

Management considers the Hong Kong dollar to be the currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The Hong Kong dollar is the currency in which the Sub-Funds measure their performance and report their results, as well as the currency in which the Sub-Funds determine the net asset value per unit at the time of issue or redemption. This determination also considers that the Sub-Funds are all listed on SEHK and their units are quoted in Hong Kong dollar.

#### China A50 ETF, CSI 300 ETF, CGB ETF and Policy Bank Bond ETF

Management considers the RMB to be the currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The RMB is the currency in which the Sub-Funds measure their performance and report their results, as well as the currency in which the Sub-Funds determine the net asset value per unit at the time of issue or redemption. This determination also considers that the Sub-Funds are all listed on SEHK and their units are quoted in RMB.

#### SENSEX India ETF, MSCI Asia ex Japan ETF, MSCI Taiwan ETF, NASDAQ 100 ETF and MSCI Emerging Markets ETF (HK)

Management considers the US dollar to be the currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The US dollar is the currency in which the Sub-Funds measure their performance and report their results, as well as the currency in which the Sub-Funds determine the net asset value per unit at the time of issue or redemption. This determination also considers that the Sub-Funds are all listed on SEHK and their units are quoted in US dollar.

# Notes to the Financial Statements (continued)

## (b) Fair value of securities not quoted in an active market

The fair value of such securities not quoted in an active market may be determined by the Management using reputable pricing sources (such as pricing agencies). Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. The Management would exercise judgment and estimates on the quantity and quality of pricing sources used. Where no market data is available, the Management may value positions using their own models, which are usually based on valuation methods and techniques generally recognized as standard within the industry. The inputs into these models include earning multiples and discounted cash flows. The models used to determine fair values are validated and periodically reviewed by experienced personnel at the Manager.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require the Management to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

The determination of what constitutes “observable” requires significant judgment by the Management. The Management considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

### India Capital Gains Tax ("CGT")

The SENSEX India ETF invests substantially all of its assets directly in India-listed securities as a Foreign Portfolio Investor ("FPI") registered with the Securities and Exchange Board of India. MSCI Asia ex Japan ETF also invests directly in India-listed securities as a FPI.

The Sub-Funds are subject to long term capital gains on listed equities (assets held for 12 months prior to sale) exceeding INR100,000 at an effective rate of 11.96% including surcharge and cess. The Sub-Funds are subject to short term capital gains (assets held for 12 months or less prior to sale) at effective rates of 17.94% or 35.88%, including surcharge and cess, depending on if the transaction was subject to Securities Transaction Tax or not. Realised losses can be set off against certain realised gains, as applicable under Indian tax law.

# Notes to the Financial Statements (continued)

Up until 14th December 2021, the SENSEX India ETF invested in Indian listed securities through a Mauritius Subsidiary which had obtained a tax residence certification from the Mauritius Revenue Authority and was eligible for benefits under the double taxation treaty between Mauritius and India (“the tax treaty”).

Realised capital gains taxes are settled after each disposal, and in regards to unrealised gains, the Manager established a provisioning policy which requires the Sub-Funds investing directly into Indian securities to provide for unrealized capital gains tax as a deferred tax liability, calculating the tax on the assumption that securities had been sold at the year end date, at the year end price.

In preparing these financial statements, Management has made certain assumptions and used various estimates concerning the tax exposure which is dependent on what might happen in the future. The resulting accounting estimates may not equal the related actual results. The Manager will continue to monitor and review the impact of India tax law changes on the MSCI Asia ex Japan ETF and SENSEX India ETF.

## India Withholding Tax on Dividends

Dividends received from an Indian company are taxed in the hands of the shareholder at applicable tax rates. For non-resident shareholders, a withholding tax rate of 20% (2021: 20%) will be levied on dividends received. Since MSCI Asia ex Japan ETF and SENSEX India ETF are subject to the Double Taxation Avoidance Agreement between Hong Kong and India, the effective tax rate is reduced to 5% (2021: 5%).

The tables below show the movement in current tax recoverable arising from overpaid dividend withholding tax, and deferred tax liabilities arising from CGT for the SENSEX India ETF and MSCI Asia ex Japan ETF during the years ended 31st December 2022 and 2021:

## Mauritius Income Tax

Up until 14th December 2021, the taxation of income and capital gains of the Mauritius Subsidiary is subject to the fiscal law and practice of Mauritius and the countries in which the Mauritius Subsidiary invests.

The Mauritius Subsidiary is centrally managed and controlled from Mauritius and is therefore a tax resident in Mauritius. Capital gains from the sales of units and securities are exempted from Mauritius tax and any dividend paid by the Mauritius Subsidiary to its shareholder are exempt in Mauritius from any withholding tax.

The Mauritius Subsidiary, under current laws and regulations, is liable to pay income tax on its net income (if any) at the rate of 15% for the financial year ended 31st December 2021. However, the Mauritius Subsidiary is entitled to a tax credit equivalent to the higher of the actual foreign tax suffered or 80% of the Mauritius tax on its foreign source income, thus reducing its maximum effective tax rate to 3%. A company holding at least 5% of share capital of an Indian company and receiving dividends may claim a credit for tax paid by the Indian company on its profit out of which the dividends were distributed including the DDT.

# Notes to the Financial Statements (continued)

Mauritius introduced new tax measures in the Finance Act 2018. Effective 1st January 2019, an 80% partial exemption will be available on certain income including foreign sourced dividend, subject to certain conditions. The above deemed foreign tax credit of 80% will continue to apply until 30th June 2021 for the Mauritius Subsidiary under the grandfathering provisions.

The foregoing is based on current interpretation and practice and is subject to any future changes in Indian and Mauritian tax laws.

The MOF and State Taxation Administration ("STA") jointly issued Circular [2018] No. 108 ("Circular 108"), dated 7th November 2018, providing foreign institutional investors temporary exemption from WIT and VAT with respect to interest income from non-government bonds in the domestic bond market for the period from 7th November 2018 to 6th November 2021. The temporary exemption was extended to 31st December 2025 under the Public Notice [2021] No.34 ("Public Notice 34") issued on 22nd November 2021.

## PRC Capital Gains Tax

Generally under the PRC Corporate Income Tax Law, investors will be liable to pay PRC tax on capital gains realized from the trading of PRC securities.

### MSCI China ETF, MSCI Asia ex Japan ETF, Hang Seng ETF and Hang Seng TECH ETF

The Sub-Funds invest in Chinese securities (including H-shares, Red Chips and P Chips) listed on the SEHK, B-shares of Chinese securities listed on the Shanghai Stock Exchange and the Shenzhen Stock Exchange and depositary receipts.

No provision was made for taxation from capital gains derived from sale of these securities in the financial statements as the Manager believes that the Sub-Funds can sustain a position for not filing a tax return based on the existing tax regulations and that the enforcement of PRC tax on the capital gains is not probable.

### MSCI China ETF, China A50 ETF, MSCI Asia ex Japan ETF, MSCI Emerging Asia ETF and CSI 300 ETF

The Sub-Funds invest in China A-Shares through a combination of the Manager's QFII and RQFII license quotas and Stock Connect. Pursuant to Circulars 79, 81 and 127, the Manager realigned the provisioning policy of the Sub-Funds in respect of their direct A-Shares investments. As such, the Sub-Funds do not currently provision for unrealized capital gains, or for capital gains realized on or after 17th November 2014.

In preparing these financial statements, Management has made certain assumptions and used various estimates concerning the tax exposure which is dependent on what might happen in the future. The resulting accounting estimates may not equal the related actual results.

## (ii) Interest Rate Risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flow.

As at 31st December 2022 and 2021, interest rate risk for all Sub-Funds except the CGB ETF and Policy Bank Bond ETF, arises only from bank balances which are reset from time to time. As these interest bearing assets are short-term in nature, the Manager considers that changes in their fair value and future cash flows in the event of a change in market interest rates will not be material. Therefore, no sensitivity analysis has been disclosed for these bank balances.

The CGB ETF and Policy Bank Bond ETF invest primarily in fixed rate debt securities which are subject to interest rate fluctuations. As interest rates rise, prices of fixed income securities may fall and vice versa. The rationale is that as interest rates increase, the opportunity cost of holding a fixed income security increases since investors are able to realize greater yields by switching to other investments that reflect the higher interest rates. The Manager regularly assesses the economic conditions, monitors changes in interest rate outlooks and takes appropriate measures accordingly by discussing with the index provider.

The table below summarizes the CGB ETF and Policy Bank Bond ETF's exposure to interest rate risk for financial assets and liabilities at fair values, categorized by contractual repricing or maturity dates.

## Currency risk of Master ETF

The functional currency of the Master ETF is US dollar. The Master ETF may invest in financial instruments denominated in currencies other than its functional currency. Consequently, the Master ETF is exposed, directly and/or indirectly, to risks that the exchange rate of its functional currency relative to other currencies may change in a manner which has an adverse effect on the value of the portion of the Master ETF's assets which are denominated in currencies other than its own currency.

In addition, the Master ETF may issue share classes denominated in currencies other than the functional currency of the Master ETF.

The Master ETF may engage in foreign currency hedging to minimize the effect of currency movements between the currencies of the investments held by the Master ETF and the Master ETF's functional currency and the Master ETF's currency hedged share classes (if any).

The Investment Manager of the Master ETF would monitor foreign currency risk exposure against pre-determined tolerances and determines when a currency hedge should be reset and the gain or loss arising from such hedge reinvested or settled, while taking into consideration the frequency and associated transaction and reinvestment costs of resetting the currency hedge.

### (iv) Summarized VaR Analysis

Value at Risk ("VaR") is a risk model used to estimate the potential losses that could occur on the Sub-Funds' net asset value position due to movements in interest rates, currency and market prices over a given period and for a specified degree of confidence.

The Management uses VaR analysis and/or tracking error estimates to measure and manage risk as these are commonly used and understood models, and are consistent across different types of asset classes and types of funds. For the purpose of these accounts VaR analysis has been presented. The objective in all cases is to estimate potential losses and manage the downside risk.

The following table summarizes the outputs of the VaR model in relation to interest rate, currency and price risk exposures. The total VaR figures are not the sum of individual risk components as VaR takes into account correlations between different risk factors.

The Management calculates the VaR relative to the Sub-Funds' total value. The analysis implies that the Manager can be 99% confident that the value of the portfolio will not decrease by any more than the figures in the table below over the 20 business day period from 31st December 2022 and 2021.

### Detailed information about the models

There are a number of different VaR models used within the Funds Management industry. The Management uses one or more of ex-ante and ex-post estimates of portfolio risk and the Monte Carlo simulation model depending on the fund type. Models are calculated using historical data and a covariance matrix where applicable.

The models used by the Management have the following features:

- VaR is calculated to a 99 per cent confidence level.
- VaR at a confidence level identifies the maximum expected loss under that confidence level;
- VaR is calculated for a 20 business day holding period. The time horizon of twenty days is selected to coincide with the period used to analyze the portfolio positions. The risk data is examined in various daily, weekly and monthly forums; and

# Notes to the Financial Statements (continued)

- The portfolio VaR is not the simple sum of individual asset standalone VaRs; the correlations among assets in the portfolio are considered.

Although VaR is a valuable risk management tool it should be interpreted, as with all predictive models, with consideration to its assumptions and limitations.

The main assumptions and limitations are listed below:

- Some models assume certain financial variables are normally distributed: The normality assumption allows the Management to scale portfolio risk estimates to the appropriate confidence levels. The normality assumption is derived from statistical analysis for examining sample populations of observations and the implications of not assuming normality would preclude the use of most statistical tools including mainstream commercial models for risk measurement.
- The use of historical returns and correlations between assets would not take into account future potential events: It is a commonly stated and well recognized limitation that past performance is not a reliable indicator of future performance.
- Model risk, in general terms, is a known limitation that includes: the quality or accuracy of the underlying data, where significant events occur within the data, the changing sensitivity of the Sub-Funds' assets to external market factors over time, and appreciating that using only one model may be limiting in itself to obtaining the best understanding of Sub-Funds' risk position.

The Management acknowledges these limitations and thus compares ex-ante and ex-post risk estimates to review expectations versus actual outcomes. Should ex-post values differ significantly from ex-ante returns, an assessment of the reasons for this will be made.

The Sub-Funds' risk is managed with constant review of both performance and risk numbers by the investment professionals within the business. These reviews consist of:

- Weekly meetings between the global members of Risk & Quantitative Analysis ("RQA"). These meetings include RQA Hong Kong.
- Monthly meetings between RQA and the Fund Managers.
- Monthly meetings between RQA and the Chief Investment Officer.
- Ad hoc presentations to the Investment Risk Management Working Group IRMWG to keep IRMWG abreast of RQA processes and latest updates.
- Daily report of performance figures along with a comparison of ex-ante versus ex-post returns sent to RQA London.
- RQA professionals sitting and working closely with the Fund Managers every day.

## (b) Credit and Counterparty Risk

Credit and counterparty risk is the risk that an issuer of a security or counterparty to a transaction will fail to fulfil an obligation or commitment that it has entered into with the Sub-Funds.

Financial assets which potentially cause the Sub-Funds to be subject to concentrations of credit and counterparty risk consist principally of investments issued by IAP Issuers, and bank balances.

The SENSEX India ETF may invest up to 15% of its net asset value in IAPs; with a maximum exposure to any single issuer of 10% of its net asset value. For the years ended 31st December 2022 and 2021, the SENSEX India ETF did not hold any IAPs.

The Manager takes steps to minimize counterparty risk in the Sub-Funds by carrying out the majority of their investment transactions and contractual commitment activities with well established broker-dealers, banks and regulated exchanges with high credit ratings.

All transactions in listed investments are settled or paid for upon delivery using approved and reputable brokers. The risk of default is considered minimal since delivery of investments sold is made only when the Sub-Funds' custodians have received payment. For a purchase, payment is made once the investments have been received by the broker. If either party fails to meet their obligation, the trade will fail.

The following table sets out the net exposure of the Sub-Funds to counterparties as at 31st December 2022 and 2021 respectively together with their credit ratings of senior long-term debt by Standard & Poor's Rating Services:

The Investment Manager reviews the key financial metrics of the issue and structural features of the debt securities in order to calculate the implied ratings for each of these debt securities.

# Notes to the Financial Statements (continued)

The Sub-Funds measure credit risk and expected losses using probability of default, exposure at default and loss given default. Management consider both historical analysis and forward looking information in determining any expected credit loss. As at 31st December 2022 and 2021, all financial assets categorized as amortized cost are held with counterparties with high credit ratings and due to be settled within 3 months. Management consider the probability of default to be close to zero as the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognized based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Sub-Funds.

HSBC Institutional Trust Services (Asia) Limited as well as the Hongkong and Shanghai Banking Corporation Limited also act as a custodian for the Sub-Funds' investments. It is expected that all investments deposited with a custodian will be clearly identified, and segregated, as being assets of the Sub-Funds; the Sub-Funds should not therefore be exposed to credit and counterparty risk with a custodian. However, it may not always be possible to achieve this segregation, so the Sub-Funds' investments may experience increased exposure to credit and counterparty risk associated with the applicable custodian.

## (c) Liquidity Risk

Liquidity risk is the risk that the Sub-Funds may not be able to generate sufficient cash resources to settle their obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

As at 31st December 2022 and 2021, all of the Sub-Funds' financial liabilities are due within twelve months and therefore equal their carrying balances, as the impact of discounting is not significant. As at 31st December 2022 and 2021, each Sub-Fund held financial assets at fair value through profit or loss and other liquid assets as stated in the Statement of Financial Position that are expected to readily generate cash inflows, normally within one month, for managing liquidity risk.

Each of the MSCI China ETF, China A50 ETF, SENSEX India ETF, MSCI Asia ex Japan ETF, MSCI Emerging Asia ETF, CSI 300 ETF, MSCI Taiwan ETF, NASDAQ 100 ETF, Hang Seng ETF, MSCI Emerging Markets ETF (HK), Hang Seng TECH ETF, CGB ETF and Policy Bank Bond ETF invest the majority of their assets in investments that are traded in active markets and can be readily disposed of.

## (d) Fair Value Estimation

The fair value of investments traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the reporting date. Investments that are listed or traded on an exchange are fair valued based on the last traded market prices.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

IFRS 13 requires the Sub-Funds to classify their fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly (level 2).
- Inputs for the asset or liability that are unobservable inputs (level 3).

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgment by the Manager. The Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables analyze within the fair value hierarchy the Sub-Funds' financial assets and liabilities at fair value through profit or loss (by class) measured at fair value at 31st December:
