TB Amati UK Smaller Companies B Acc

TB Amati UK Smaller Companies Fund, a sub-fund of the TB Amati Investment Funds B Accumulation, ISIN: GB00B2NG4R39
The Authorised Corporate Director of this Fund is: T. Bailey Fund Services Limited.

Objectives and investment policy

The Fund aims to provide long term capital growth over periods of 5 years or longer.

At least 80% of the Fund will typically be invested in shares, equity-related securities or bonds in or issued by UK smaller companies. For these purposes, UK companies are companies incorporated or domiciled in the UK, or companies that are listed in the UK and have the majority of their economic activity in the UK. Smaller companies are companies which form the bottom 10% of the UK equity market by market capitalisation.

The Fund may also invest (up to 20%) in shares, equity-related securities or bonds in or issued by companies which are not UK smaller companies, money market instruments, cash or near cash. There may be occasions when the Investment Manager chooses to hold large degrees in these asset classes in order to protect returns in certain market conditions (e.g. severe market downturns).

Up to 10% of the Fund may be invested in collective investment schemes (which may include those managed or operated by the ACD and its associates).

The Fund is actively managed, taking into account the Investment Manager's views on growth opportunities and prevailing market conditions.

Derivatives may be used for Efficient Portfolio Management purposes to reduce risk or cost or to generate additional capital or income.

The Fund is not managed to generate an income. Any income arising from the Fund is reinvested. In other words all units are accumulation units.

Investors can redeem units on demand, at the daily valuation point of 12 noon (UK time) when this is a normal business day in the UK.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The Fund is in the above risk category because it invests in shares.
- Smaller companies' securities are often traded less frequently than those of larger companies, this means they may be more difficult to buy and sell. Their prices may also be subject to short term swings.
- The lowest category does not mean a fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.
- There is no guarantee that the Fund will meet its stated objectives.
- The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.
