CAPITAL

Kames Ethical Cautious Managed Fund

a sub-fund of Kames Capital ICVC

Sterling Class B - Accumulation shares (ISIN: GB00B7V2CD05)

This fund is managed by Kames Capital plc. ("the authorised corporate director (ACD)").

Objectives and investment policy

Objective: provide a combination of income and capital growth over a 7 year period.

Policy: to invest in a diversified portfolio of equities denominated in any currency; and corporate bonds denominated in Sterling and issued anywhere in the world.

The Fund operates an ethical screen which means that the Fund may not invest in particular industries and sectors. In all cases, the investments of the Fund will meet the Fund's predefined ethical criteria. Set out in Appendix D of the Prospectus. The Fund is actively managed and the portfolio may at any one time be allocated more towards equities or bonds depending on the ACD's view on the current market conditions.

Equities will be limited to a maximum of 60% of the Fund's value at all times. At least 80% of equity exposure will be to UK companies which are listed, quoted or traded in UK markets or which have their headquarters or a significant part of their activities in the UK but which may also be quoted on a regulated market outside of the UK.

In relation to investment in equities, the Fund can invest in companies of any market capitalization (small, medium or large) and in a range of industry sectors, subject to the Fund's ethical criteria.

The Fund will typically invest in publicly quoted companies and have a bias towards small and medium companies.

At least 90% of all corporate bond investments will be in investment grade corporate bonds.

Investment grade corporate bonds are bonds issued by companies whose credit rating is deemed to be investment grade, defined as Baa3 or higher by Moody's Investor Services (Moody's) BBB- or higher by Standard & Poor's (S&P) or BBB- or higher by Fitch or its successors or equivalent or, in the case of unrated bonds, are deemed to have an equivalent rating by the ACD.

To the extent that the Fund is not fully invested in the main asset classes listed above, the Fund may also invest in other transferable securities, collective investment schemes (up to 10% of Net Asset Value and which may include schemes managed by the ACD or its affiliates), money market instruments, deposits and cash and near cash. It is intended that investment in any other collective investment schemes will be predominately in approved money market instruments.

Derivatives may be used for efficient portfolio management (including hedging to reduce currency risk).

Non-Sterling equity exposure may or may not be hedged back to Sterling to reduce currency risk.

Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Dealing Day' in the Prospectus Definitions for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

The Fund is not managed in reference to any index or benchmark. It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

Risk and reward profile

1	2	3	4	5	6	7
Lower risk / potentially lower rewards				Higher risk / potentially higher rewards		

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. This Fund has the above risk/reward rating because the prices of shares and bonds can be affected by political or economic events, changes in exchange rates and changes in interest rates.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'.

The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

Credit: An issuer of bonds may be unable to make payments due to the Fund (known as a default). The value of bonds may fall as default becomes more likely. Both default and expected default may cause the Fund's value to fall. High yield bonds generally offer higher returns because of their higher default risk and investment grade bonds generally offer lower returns because of their lower default risk.

Liquidity: The Fund's value may fall if some investments, especially in smaller companies or high yield bonds, become more difficult to trade or value due to market conditions or a lack of supply and demand.

Interest Rate Risk: Bond values are affected by changes in interest rates. When interest rates rise, the value of the Fund is likely to fall.

Full details of risks are disclosed in the section 'Risk Factors' in the Prospectus.
