

Key Investor Information Document

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

Sparinvest SICAV - Emerging Markets Corporate Value Bonds EUR W R

ISIN LU1616402399

This Fund is managed by Sparinvest S.A., a subsidiary of Sparinvest Holdings SE.

Objectives & Investment Policy

The Fund invests over the long term at least 2/3 of its total net assets in emerging markets high yield corporate bonds and/or investment grade corporate bonds rated Baa3/BBB- or better.

The Fund invests in contingent convertibles (less than 10% of the total net assets) and may hold financial instruments other than bonds (i.e. equities and equity-like securities) acquired in the context of the restructuring of an issuing company or another corporate event.

The strategy focuses primarily on bonds issued by companies with strong balance sheets that offers an attractive yield due to mispricing by the market. In addition and to a smaller extent, the strategy focuses on generating excess return from investing in either smaller issues or issuers and from investing in bonds the market finds less attractive.

The Fund normally uses currency derivatives to protect the portfolio against currency fluctuations.

As an investor in this Fund you get diversification and professional management of your investments. Sparinvest monitors your investments for you.

You can buy and sell your shares on Luxembourg full bank business days.

The Share Class' currency is EUR. The Fund's reference currency is EUR.

The Share Class is accumulating, i.e. income generated by the Fund will be reinvested to grow the value of your investments.

Risk and Reward Profile

The risk/reward indicator shows the relation between risk and return. Category 1 does not mean a risk free investment.

The ranking on the scale is determined by the fluctuations in the value of the Fund over the past five years. Large fluctuations result in higher risk and a ranking to the right on the scale. Small fluctuations result in lower risk and a ranking to the left on the scale.

The Fund is rated 4. The Fund is in this specific category due to the nature of its investments, meaning that the historical returns the SRRI is based on, has shown a level of volatility higher than 5% but less than 10%.

The risk category is not guaranteed and may change over time as historical data does not necessarily give a reliable indication of the future risk profile of the Fund.

When investing in this Fund you need to take the following risk factors into account:

* Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-

worthiness of the issuer. The risk of default is usually greatest with bonds that are classed as sub-investment grade.

* Derivative for hedging purpose: The use of derivatives for hedging in a rising market may restrict potential gains.

* Emerging market risk: A fund which invests in emerging markets rather than more developed countries may encounter difficulties when buying and selling investments. Emerging markets are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

* High yield bonds risk: The Fund may invest in sub-investment grade bonds. These bonds may produce a higher level of income than investment grade bonds but at a higher risk to your capital.

* Liquidity risk: The portfolio value can be affected by liquidity issues. In periods with fiscal- and market turmoil the value of less liquid assets can be affected by changes in the market pricing of liquidity risk. This can become an issue in periods with large redemptions in the Fund.

The above mentioned list of risk factors is not exhaustive. Other factors may influence the pricing of the underlying securities and therefore the value of the Fund's investments.

Sparinvest SICAV - Emerging Markets Corporate Value Bonds EUR W R
