WAVERTON
INVESTMENT FUNDS

Waverton Global Equity Fund
a sub fund of Waverton Investment Funds plc
The Management Company of the Fund is Bridge Fund Management Limited

Class A Stg£
ISIN: IE00B1RMYD64

Objectives and Investment Policy

The Fund aims to achieve growth on your investment by investing in a focussed list of shares in companies worldwide.

The Fund will invest at least two thirds of its assets (excluding cash) in ordinary shares and preferred shares. A preferred share typically pays dividends at a specified rate and has preference over ordinary shares in dividends and the liquidation of assets.

The Fund may invest up to one third of its assets (excluding cash) in bonds convertible into shares and in other interest-bearing securities. Such bonds may be issued by governments, international bodies or companies rated, or deemed to be of, investment grade or better. A rating agency gives an investment grade rating when it believes that there is a relatively low risk that the issuer of a bond will be unable to make payments.

The Fund may invest up to 10% of its assets in other funds, of which up to 5% of its assets may be invested in funds investing in equity markets globally.

The Fund may invest no more than 20% of its assets in companies in emerging market countries.

At times, the Fund may also invest in cash and cash-like instruments.

The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). The Fund may do so in order to manage the Fund more efficiently (e.g., reducing risks or costs or generating additional growth or income).

For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at www.waverton.co.uk.

You may sell your shares on any working day (generally, a day on which banks in Dublin and London are open).

The Fund declares dividends semi-annually (generally, on 30 April and 31 October each year). Unless you request cash payment, your dividends will be paid in the form of additional shares in the Fund.

The Fund is actively managed and uses the MSCI AC World Index (in GBP) (the "Benchmark") for performance comparison purposes only. The Fund does not seek to track its Benchmark and so has discretion as to the investments it may make. While a proportion of the Fund may be components of, and have similar weightings to, the Benchmark, the Investment Manager may or may not invest in assets which are not included in the Benchmark or with weightings different to that of the Benchmark. There can be no guarantee that the Fund will match or exceed the performance of the Benchmark.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

Lower risk ← → **Higher risk**

Typically lower rewards — **Typically higher rewards**

1	2	3	4	5	**6**	7

The risk category is based on historical data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The numerical scale is complex. For example, 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 fund is not a risk-free investment – the risk of losing your money may be small, but the chance of making gains is also limited.

The Fund is in its risk category as shown above as it typically produces higher rewards than other funds (such as money market funds) and is higher risk as a result of investing in the shares of companies worldwide.

Risks materially relevant to the Fund which may not be adequately captured by the indicator:

- **Investment risk:** the Fund may not achieve its investment objective and the value of shares in the Fund may fall.
- **Currency risk:** the Fund invests in assets which are priced in currencies other than the Fund's base currency (British Pounds). Changes in exchange rates may lead to fluctuations in the value of your investment. The Fund may use techniques to try to limit currency exchange risk.
- **Derivatives risk:** the value of a derivative depends primarily on the performance of the underlying asset. A small movement in the value of the underlying asset may cause a large movement in the value of the derivative. The Fund is exposed to the risk that the other party to the derivative will not meet its obligations.
- **Emerging market risk:** the Fund may invest part of its assets in emerging market countries. Such investments may be subject to greater risk than investments in developed markets due to possible political, economic, corporate governance, legal, market, accounting, custody and other risks.

See also the description of risks applicable to the Fund in "Risk Factors" in the Fund's prospectus.
