

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers II Germany Government Bond 7-10 Swap UCITS ETF

Share Class: 1D (ISIN: LU0730820569), (WKN: DBX0MJ), (Currency: EUR)

a sub fund of Xtrackers II. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the IBOXX € GERMANY 7-10[®] INDEX (Index).

The Index reflects certain types of tradable debt (bonds) denominated in Euro or pre-Euro currencies issued by the German government having a maturity of seven to ten years. The composition of the Index is rebalanced according to a pre-set methodology.

The Index is comprised solely of bonds. For bonds to be included in the Index on a monthly rebalancing date, they must on the relevant rebalancing date, have a remaining time to maturity of at least seven years and up to ten years. The bonds must have a fixed rate of interest and must be part of an issue of debt which has at least €2 billion outstanding. Each bond is weighted in the Index, according to its outstanding amount.

The Index is calculated on a total return basis which means that amounts equivalent to interest payments on the bonds are reinvested in the Index. The Index is sponsored by Markit Indices Limited and reviewed and rebalanced monthly. Real time Index and bond prices are published by Deutsche Börse.

To achieve the aim, the Fund will buy bonds and/or invest in cash deposits and enter into financial contract(s) (derivative(s)) with Deutsche Bank relating to the bonds/deposits and a portfolio of bonds aimed at replicating the performance of the Index, in order to obtain the return on the Index.

Dividends may be paid on your shares, the amount of which will be determined at the discretion of the board of directors of the Fund.

You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund does not invest directly in the components of the Index and its returns will be dependent on the performance of the bonds and/or cash deposits and the performance of the derivatives used.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for

example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Asset Management entities and related companies may act in several roles in relation to the Fund such as distributor, derivative counterparty and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund is exposed to bond market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.

The Fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment. More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charges	0.15%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the Fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the year ending October 2017. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2012 and the share class was launched in 2012.

Past performance has been calculated in EUR.
