KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

You are investing in a sub-fund of Schroder International Selection Fund (the “Company”). The Company is an umbrella structured open-ended investment company with limited liability in Luxembourg, organised as a “société anonyme” and qualifies as a Société d’Investissement à Capital Variable (“SICAV”) under Part I of the law on undertakings for collective investment dated 17 December 2010, as amended from time to time.

The Fund aims to provide income and capital growth by investing in fixed and floating rate securities issued by governments and companies worldwide. The Fund aims to mitigate losses in falling markets. The mitigation of losses cannot be guaranteed.

If you are a holder of Distribution Shares, you may receive dividends in the form of cash in the relevant Class currency.

Accumulation Shares accumulate net income received from the Fund’s investments, meaning it is kept in the Fund and its value is reflected in the price of the Shares.

Hedged Classes aim to provide you with the performance returns of the Fund’s investments in the Fund’s base currency (USD) by reducing the effects of exchange rate fluctuations between the relevant Class currency and the Fund’s base currency.

Refer to the “Important Information”, “The Fund”, “The Sub-Funds” and “Investment Objectives and Strategies / Product Suitability” sections of the Prospectus for further information on features of the product.

¹ The Prospectus is available for collection from Schroder Investment Management (Singapore) Ltd or any of its appointed distributors during usual office hours or accessible at <http://www.schroders.com.sg>.

Investment Strategy

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate investment grade and high yield securities issued by governments, government agencies, supra-nationals and companies worldwide, including emerging market countries.

Refer to the “Investment Objectives and Strategies / Product Suitability” section of the Prospectus for further information on the investment strategy of the Fund.

The Fund may invest:

- in excess of 50% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor’s or any equivalent grade of other credit rating agencies for rated bonds and implied Schrodgers ratings for non-rated bonds);
- up to 20% of its assets in asset-backed securities and mortgage-backed securities;
- up to 10% of its assets in convertible bonds (including contingent convertible bonds); and
- up to 10% of its assets in open-ended Investment Funds;

The Investment Manager aims to mitigate losses by diversifying the Fund’s asset allocation away from areas of the market identified as having a high risk of material negative return.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I of the Luxembourg Prospectus).

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than Bloomberg Barclays Multiverse ex Treasury A+ to B- USD Hedged index, based on the Investment Manager’s rating system. More details on the investment process used to achieve this can be found in the “Fund Characteristics” section set out in the Fund’s details in Appendix III of the Luxembourg Prospectus.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment and your principal may be at risk:

Refer to the “Risk Factors, Investments, Derivatives and Supplementary Information” section of the Prospectus for further information on risks of the product.

Market and Credit Risks

You are exposed to market risk.

- The value of investments by the Fund may go up or down due to changing economic, political or market conditions, or due to an issuer’s individual situation.

You are exposed to credit risk.

- A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Liquidity Risks

You are exposed to liquidity risk.

- There is no secondary market for the Fund. All redemption requests should be made to the distributor of the Fund through whom you had originally purchased the Shares. The liquidity of the Fund may be limited if a significant portion of the assets of the Fund is to be sold to meet redemption requests in a short time frame.

Product-Specific Risks

You are exposed to asset-backed / mortgaged-backed securities risk.

- Mortgage or asset-backed securities may not receive the full amounts owed to them by underlying borrowers.

You are exposed to currency risk.

- The Fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

You are exposed to derivatives risk.

- The Fund may use derivatives as part of the investment process. The use of futures, options, warrants, forwards, swaps or swap options involves increased risk.

You are exposed to emerging and frontier markets risk.

- Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

You are exposed to sustainability risk.

- The Fund may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities or dispose of certain holdings that do not align with its sustainability criteria, and may underperform other funds that do not apply similar criteria to their investments.

You are exposed to high yield bond risk.

- High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

You are exposed to interest rate risk.

- A rise in interest rates generally causes bond prices to fall.

You are exposed to leverage risk.

- The Fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

You are exposed to distribution policy risk (only applicable to Distribution Classes).

- In respect of a Distribution Class with fixed dividends, fixed dividends may be paid out of capital if investment income is less than the fixed dividend amount.
- In respect of a Distribution Class with variable dividends, the dividends are paid out of capital rather than out of investment income. Capital growth will be reduced and in periods of low growth, capital erosion may occur.
- Where dividends are paid out of capital of a Distribution Class, this will reduce the net asset value of the Distribution Class.

You may redeem Shares by completing a share redemption form ("Redemption Request") and submitting it to the relevant distributor through whom you originally purchased the Shares.

The directors of the Company reserve the right not to accept instructions to redeem (or switch) of more than 10% of the total value of the Shares in issue of the Fund on a Dealing Day. In these circumstances, the redemption of part or all Shares in excess of 10% will be deferred until the next Dealing Day.

The redemption proceeds are usually paid to you within 6 Business Days following the receipt of the Redemption Request by the Transfer Agent provided that the directors of the Company reserve the right to extend the period of payment of the redemption proceeds to such period, not exceeding 30 calendar days.

Your exit price is determined as follows:
