

Amundi ETF

Key Investor Information

This document provides with key investor information about this Fund. It is not a marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI ETF SHORT MSCI USA DAILY UCITS ETF

ISIN code: (A/D) FR0010791194

This Fund is managed by Amundi, an Amundi Group company.

Objectives and Investment Policy

Classification by the French Market Regulator (AMF): Diversified.

Tracking method: Swap-based replication.

By subscribing to AMUNDI ETF SHORT MSCI USA DAILY UCITS ETF, you are investing in a strategy index-tracking Fund, the objective of which is to track, as closely as possible, the performance of the MSCI USA Short Daily strategy index ("the Strategy Index"), whether the Strategy Index rises or falls. The target for maximum tracking error between changes in the Fund's net asset value and that of the Strategy Index is 2%.

The euro-denominated Strategy Index with gross dividends reinvested is calculated and published in real time by index provider MSCI.

You are exposed to the exchange rate risk between the currency in which the stocks in the Strategy Index is denominated and the currency of the Fund.

The MSCI USA Short Daily Strategy Index tracks the performance of a strategy which consists of inverting the exposure to the euro-denominated MSCI Europe. As a result, it offers inverse exposure - upwards or downwards - to the changes in the euro-denominated MSCI USA index, less the one-day shorting costs for the MSCI USA index with gross dividends reinvested portfolio. Thus, if the MSCI USA index climbs, the Fund's net asset value will fall and vice-versa. The inverse performance effect is daily. The performance of the short index over a period longer than 1 day can therefore differ by -1 time the performance of the long index over the same period (see example below). The equities in the MSCI USA Index are leading securities traded on the US market.

More information about the composition of the Strategy Index and its operating rules is available in the prospectus and at msci.com.

The Strategy Index is available in real time via Reuters (.dMIUS00000SEU) and Bloomberg (M2USSHRT).

The Fund seeks to achieve its objective by: (i) entering into a Total Return Swap (a financial derivative instrument, the "TRS"), and (ii) investing in a diversified portfolio of equities (the "Portfolio"). The performance of the Portfolio will be exchanged for the performance of the Strategy Index in accordance with the terms of the TRS.

Through the Portfolio, you will be permanently invested at a level of at least 75% in stocks eligible for the Plan d'Epargne en Actions (PEA, tax wrapper reserved to residents in France).

The Fund's net profit and net realised capital gains are reinvested or redistributed each year at the discretion of the Management Company.

You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

This Fund's risk category reflects the market risk of the international stocks in which it is invested and the index inverse performance strategy.

The initial capital invested is not guaranteed.

Historical data such as that used to calculate the synthetic indicator may not be a reliable indicator of the future risk profile of the Fund. The risk category associated with this Fund is not guaranteed and may evolve over time.

The lowest category does not mean "risk free."

Particular risks for the Fund not included in these indicator are:

- Counterparty risk: this is the risk of default by a market operator, including a total return swap counterparty, that prevents it from honouring its obligations to the Fund.
- Complex products such as derivatives are used to obtain a daily performance opposite to that of the MSCI USA index.

The occurrence of one of these risks may decrease the net asset value of your portfolio.

Charges

The charges and fees paid are used to cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0
Exit charge	0
The percentage indicated is the maximum that can be deducted from your capital before it is invested (entry) or redeemed (exit).	
Charges taken from the Fund over a year	
Ongoing charges	0.35% of average net assets
Charges taken from the Fund under certain specific conditions	
Performance fee	0

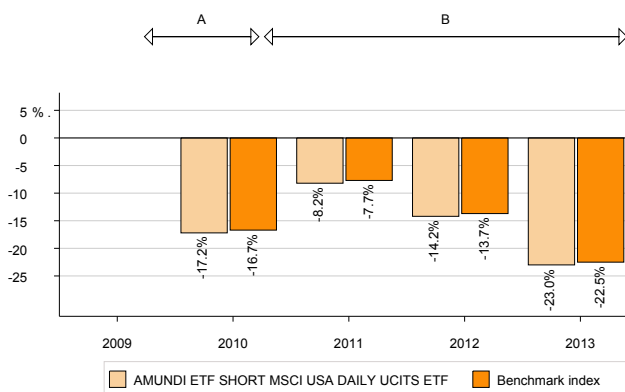

Purchases and sales on the secondary market do not incur any entry or exit fees. However, in addition to the fees shown, other fees may apply such as brokerage fees or stock exchange fees, over which the Management Company has no control.

The **ongoing charges** are based on the figures for the prior year ended 31 December 2013. This percentage may vary year on year. It excludes:

- Performance fees,
- portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another Fund.

For more information about the charges of this Fund, please refer to the "Costs and Fees" section of the Fund's prospectus, which is available at amundiETF.com.

Past performance

Performance is not constant over time and is no guarantee of future performance.

The year-on-year performances presented on this chart are calculated after deduction of all fees charged by the Fund.

The Fund was launched on 22 September 2009.

The reference currency is the euro.

The benchmark index is: MSCI USA Short Daily.

A: The reference currency of the index is the US dollar.

B: The reference currency of the index is the euro.
