## **Additional Unaudited Appendix**

### **Sustainable Finance Disclosure Regulation (“SFDR”) Disclosures**

#### **Article 6**

The sub-funds listed below are financial products that neither promote environmental and/or social characteristics nor have a sustainable investment objective within the meaning of the articles 8 and 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Nevertheless, they follow sectorial exclusion policies covering controversial weapons, soft commodities, climate risks, and ecosystem protection & deforestation. In 2022, AXA IM extended this policy to cover investments incorporating significant land use controversies and responsible for biodiversity loss in relation to soy, cattle and timber.

AXA WF Chorus Equity Market Neutral  
AXA WF Chorus Multi Strategy  
AXA WF US Dynamic High Yield Bonds

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS - ACT BIODIVERSITY

**Legal entity identifier:** 213800NEL6BAVXHBH781

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a Sustainable Investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs and acting positively for the biodiversity by reducing or limiting negative impact of human’s activities on biodiversity, and by applying an impact approach.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Product & services score on SDG 6, 12, 14, 15

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicator mentioned below:

| Sustainability KPI Name                      | Value | Benchmark | Coverage |
|--|-------|-----------|----------|
| Product & services score on SDG 6,12, 14, 15 | 1.64  | -0.13     | 94.54%   |

● **... And compared to previous periods?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period. The PAI indicators measures given here reflect the Financial Product’s assets as of 30/12/2022.

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider’s screening framework and excludes any companies that have been assessed as “non-compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units   | Measurement |
|---|--|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 3: GHG intensity of investee companies                               | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 4: Exposure to companies active in the fossil fuel sector            | % of investments  |             |

|   |   |  |  |
|---|---|--|--|
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources                      |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments                               |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments                               |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments                               |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

| Top investments                   | Sector  | Proportion | Country |
|-----------------------------------|---|------------|---------|
| DEERE & CO XNYS USD               | Manufacture of agricultural and forestry machinery                              | 5.44%      | US      |
| AGILENT TECHNOLOGIES INC XNYS USD | Manufacture of instruments and appliances for measuring, testing and navigation | 4.5%       | US      |
| DARLING INGREDIENTS INC XNYS USD  | Processing and preserving of meat   | 4.46%      | US      |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

|                                       |  |       |    |
|---------------------------------------|--|-------|----|
| XYLEM INC XNYS USD                    | Manufacture of other pumps and compressors   | 4.38% | US |
| THERMO FISHER SCIENTIFIC INC XNYS USD | Manufacture of instruments and appliances for measuring, testing and navigation          | 4.24% | US |
| DANAHER CORP XNYS USD                 | Manufacture of instruments and appliances for measuring, testing and navigation          | 4.15% | US |
| KONINKLIJKE DSM NV XAMS EUR           | Manufacture of other chemical products n.e.c.  | 3.99% | NL |
| REPUBLIC SERVICES INC XNYS USD        | Collection of non-hazardous waste  | 3.71% | US |
| MONDI PLC XLON GBP                    | Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 3.45% | GB |
| EVOQUA WATER TECHNOLOGIES CO XNYS USD | Manufacture of other special-purpose machinery n.e.c.                                    | 3.3%  | US |
| BALL CORP XNYS USD                    | Manufacture of light metal packaging   | 3.1%  | US |
| VERALLIA XPAR EUR                     | Manufacture of hollow glass  | 3.08% | FR |
| TRIMBLE INC XNGS USD                  | Manufacture of instruments and appliances for measuring, testing and navigation          | 3.06% | US |
| KERRY GROUP PLC-A XDUB EUR            | Manufacture of other food products n.e.c.  | 3%    | IE |
| ECOLAB INC XNYS USD                   | Manufacture of other chemical products n.e.c.  | 2.98% | US |

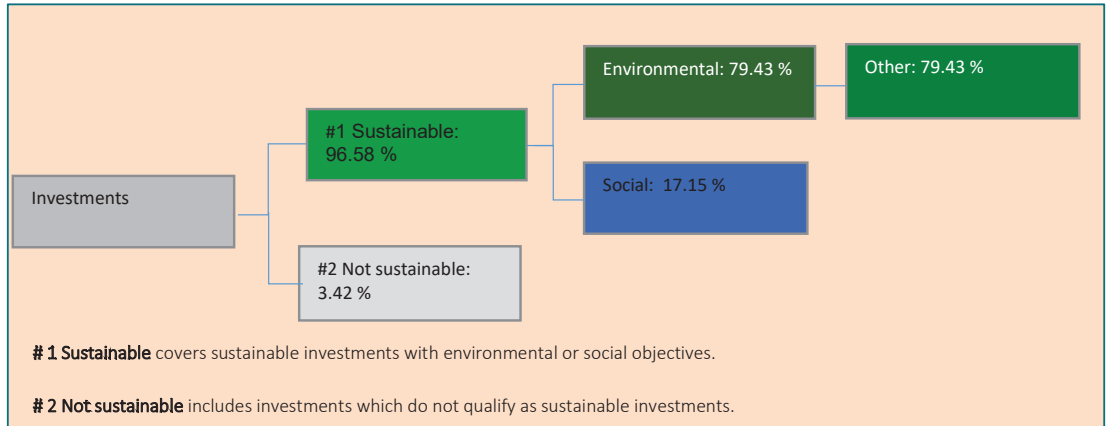

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation?*

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of instruments and appliances for measuring, testing and navigation          | 20.14%     |
| Manufacture of other chemical products n.e.c.  | 11.46%     |
| Manufacture of other special-purpose machinery n.e.c.                                    | 8.91%      |
| Manufacture of agricultural and forestry machinery                                       | 8.27%      |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 6.33%      |
| Collection of non-hazardous waste  | 5.66%      |
| Manufacture of other food products n.e.c.  | 4.89%      |
| Manufacture of paper and paperboard  | 4.58%      |
| Processing and preserving of meat  | 4.46%      |
| Manufacture of other pumps and compressors   | 4.38%      |
| Manufacture of light metal packaging   | 3.1%       |
| Manufacture of hollow glass  | 3.08%      |
| Technical testing and analysis   | 2.47%      |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

|   |       |
|---|-------|
| Manufacture of metal structures and parts of structures                 | 2.46% |
| Waste collection, treatment and disposal activities, materials recovery | 1.63% |
| Water collection, treatment and supply                                  | 1.58% |
| Mining of other non-ferrous metal ores                                  | 1.52% |
| Retail sale of cosmetic and toilet articles in specialised stores       | 1.45% |
| Retail sale via mail order houses or via Internet                       | 1.05% |
| Production of electricity   | 0.92% |
| Web portals   | 0.91% |
| Manufacture of other organic basic chemicals                            | 0.75% |

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product is not considering the “do not significantly harm” criteria of the EU Taxonomy.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?

- Yes :
- In fossil gas     In nuclear energy
- No

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 79.43 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

**What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 17.15 % of sustainable investments with a social objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under “not sustainable” represented 3.42 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference sustainable benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS - ACT CLEAN ECONOMY

**Legal entity identifier:** 213800YSFEN3TI97J121

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?   |  |
|---|--|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>  | <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>  |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 88.25%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> | <input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 8.09%</b>   | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a Sustainable Investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs with a focus on environmental themes, by applying an impact approach.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Carbon Delta Technology Opportunity (1.5C)

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicator mentioned below:

| Sustainability KPI Name                    | Value | Benchmark | Coverage |
|--|-------|-----------|----------|
| Carbon Delta Technology Opportunity (1.5C) | 24.65 | 4.27      | 97.96%   |

● **... And compared to previous periods?**

Not applicable.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period. The PAI indicators measures given here reflect the Financial Product’s assets as of 30/12/2022.

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider’s screening framework and excludes any companies that have been assessed as “non-compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units   | Measurement |
|---|--|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 3: GHG intensity of investee companies                               | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 4: Exposure to companies active in the fossil fuel sector            | % of investments  |             |

|   |   |  |  |
|---|---|--|--|
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources                      |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments                               |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments                               |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments                               |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

| Top investments                       | Sector  | Proportion | Country |
|---------------------------------------|---|------------|---------|
| NEXTERA ENERGY INC XNYS USD           | Electricity, gas, steam and air conditioning supply   | 4.36%      | US      |
| DEERE & CO XNYS USD                   | Manufacture of agricultural and forestry machinery    | 3.71%      | US      |
| EVOQUA WATER TECHNOLOGIES CO XNYS USD | Manufacture of other special-purpose machinery n.e.c. | 3.59%      | US      |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

|                                       |   |       |    |
|---------------------------------------|---|-------|----|
| SCHNEIDER ELECTRIC SE XPAR EUR        | Manufacture of electric motors, generators and transformers                     | 3.49% | FR |
| DARLING INGREDIENTS INC XNYS USD      | Processing and preserving of meat   | 3.32% | US |
| WASTE CONNECTIONS INC XTSE CAD        | Collection of non-hazardous waste   | 3.19% | US |
| THERMO FISHER SCIENTIFIC INC XNYS USD | Manufacture of instruments and appliances for measuring, testing and navigation | 3.05% | US |
| AMERESCO INC-CL A XNYS USD            | Construction of utility projects for electricity and telecommunications         | 2.95% | US |
| SIEMENS AG-REG XETR EUR               | Manufacture of electrical equipment   | 2.83% | DE |
| FIRST SOLAR INC XNGS USD              | Manufacture of other electrical equipment                                       | 2.81% | US |
| XYLEM INC XNYS USD                    | Manufacture of other pumps and compressors                                      | 2.69% | US |
| INFINEON TECHNOLOGIES AG XETR EUR     | Manufacture of electronic components  | 2.54% | DE |
| IBERDROLA SA XMAD EUR                 | Production of electricity   | 2.38% | ES |
| TAIWAN SEMICONDUCTOR-SP ADR XNYS USD  | Manufacture of other special-purpose machinery n.e.c.                           | 2.25% | TW |
| KONINKLIJKE DSM NV XAMS EUR           | Manufacture of other chemical products n.e.c.                                   | 2.17% | NL |

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation?*

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Manufacture of instruments and appliances for measuring, testing and navigation | 10.34%     |
| Manufacture of other electrical equipment                                       | 8.53%      |
| Manufacture of other chemical products n.e.c.                                   | 7.08%      |
| Manufacture of other special-purpose machinery n.e.c.                           | 6.16%      |
| Collection of non-hazardous waste   | 5.6%       |
| Manufacture of electronic components  | 5.39%      |
| Manufacture of electric motors, generators and transformers                     | 4.79%      |
| Construction of utility projects for electricity and telecommunications         | 4.7%       |
| Production of electricity   | 4.59%      |
| Electricity, gas, steam and air conditioning supply                             | 4.36%      |
| Manufacture of agricultural and forestry machinery                              | 3.71%      |
| Processing and preserving of meat   | 3.32%      |
| Manufacture of electrical equipment   | 2.83%      |
| Manufacture of other pumps and compressors                                      | 2.69%      |

|  |       |
|--|-------|
| Manufacture of other food products n.e.c.  | 2.14% |
| Manufacture of electrical and electronic equipment for motor vehicles                    | 2.06% |
| Waste collection, treatment and disposal activities, materials recovery                  | 2.03% |
| Manufacture of engines and turbines, except aircraft, vehicle and cycle engines          | 1.75% |
| Renting and operating of own or leased real estate                                       | 1.71% |
| Construction of other civil engineering projects n.e.c.                                  | 1.62% |
| Manufacture of light metal packaging   | 1.61% |
| Manufacture of other parts and accessories for motor vehicles                            | 1.6%  |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 1.54% |
| Architectural and engineering activities, technical testing and analysis                 | 1.51% |
| Engineering activities and related technical consultancy                                 | 1.4%  |
| Distribution of electricity  | 1.32% |
| Manufacture of computer, electronic and optical products                                 | 1.22% |
| Crop and animal production, hunting and related service activities                       | 1.13% |
| Manufacture of motor vehicles  | 1.06% |
| Mining of other non-ferrous metal ores   | 0.95% |
| Manufacture of other organic basic chemicals   | 0.8%  |
| Manufacture of batteries and accumulators  | 0.46% |

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product is not considering the “do not significantly harm” criteria of the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### activities that comply with EU Taxonomy<sup>3</sup>?

Yes :  In fossil gas  In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 88.25 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above.

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 8.09 % of sustainable investments with a social objective.

### What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “not sustainable” represented 3.65 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

### What actions have been taken to attain the sustainable investment objective during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS – ACT DYNAMIC GREEN BONDS

**Legal entity identifier:** 213800MBHN2GOTB7P804

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?  |  |
|--|--|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>   | <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>  |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 93.55%</b> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> | <input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 0.35%</b>  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a sustainable investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs, and/or by applying an impact approach with a focus to financing the transition to a more sustainable and low carbon economy.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Percentage of Green Bonds

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.
3. **Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**
  - a. GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as “sustainable investments” under AXA IM’s SFDR framework.
  - b. With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability LinkedBonds that get a positive or neutral opinion from AXA IM’s internal analysis process are considered as “sustainable investments”. This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer’s sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target’s ambition, (iii) bond characteristics and (iv) sustainability performance target’s monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives. It has considered the climate adaptation and the climate mitigation objectives.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicators mentioned below:

| Sustainability KPI Name | Value               | Benchmark | Coverage |
|-------------------------|---------------------|-----------|----------|
| %Green Bonds            | 96 % of Green Bonds |           | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

|   |   |  |  |
|---|---|--|--|
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score         | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average |  |
| SDG no significantly negative score         | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period. The PAI indicators measures given here reflect the Financial Product’s assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider’s screening framework and excludes any companies that have been assessed as “non-compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units                   | Measurement |
|---|--|-------------------------|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes           |             |
| Ecosystem protection & Deforestation policy |  |                         |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon |             |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

|   |   |   |  |
|---|---|---|--|
| Ecosystem protection & Deforestation policy   |   | dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |  |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |  |
| Ecosystem protection & Deforestation policy   |   |   |  |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |  |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

| Top investments                    | Sector  | Proportion | Country |
|------------------------------------|---|------------|---------|
| OBL 0 - 10/10/2025                 | General public administration activities                                | 4.43%      | DE      |
| FRTR 0.1% - 25/07/2038 CPI         | General public administration activities                                | 2.88%      | FR      |
| INGREN 5.375% - 29/04/2024 Call    | Construction of utility projects for electricity and telecommunications | 2.16%      | MU      |
| VOVCAB 2.5% - 07/10/2027 Call      | Manufacture of motor vehicles   | 2.1%       | SE      |
| INRCIN 3.835% - 13/12/2027         | Freight rail transport  | 2.06%      | IN      |
| KPN 6% Var - 21/09/2027 Perp       | Wireless telecommunications activities                                  | 1.89%      | NL      |
| IBESM 3.25% Var - 12/11/2024 Perp  | Electricity, gas, steam and air conditioning supply                     | 1.87%      | NL      |
| BBVASM 6% Var - 15/01/2026 Perp    | Other monetary intermediation   | 1.83%      | ES      |
| SABSM 2.625% Var - 24/03/2026 Call | Other monetary intermediation   | 1.82%      | ES      |
| INCLEN 4.5% - 18/04/2027 Call      | Production of electricity   | 1.78%      | MU      |
| INDOIS 4.7% - 06/06/2032           | General public administration activities                                | 1.76%      | ID      |
| TENN 2.374% Var - 22/07/2025 Perp  | Distribution of electricity   | 1.75%      | NL      |
| CMPCCI 4.375% - 04/04/2027         | Manufacture of paper and paperboard                                     | 1.74%      | CL      |
| AIB 2.875% Var - 30/05/2031 Call   | Other monetary intermediation   | 1.73%      | IE      |
| MYTIL 2.25% - 30/10/2026           | Production of electricity   | 1.71%      | GR      |

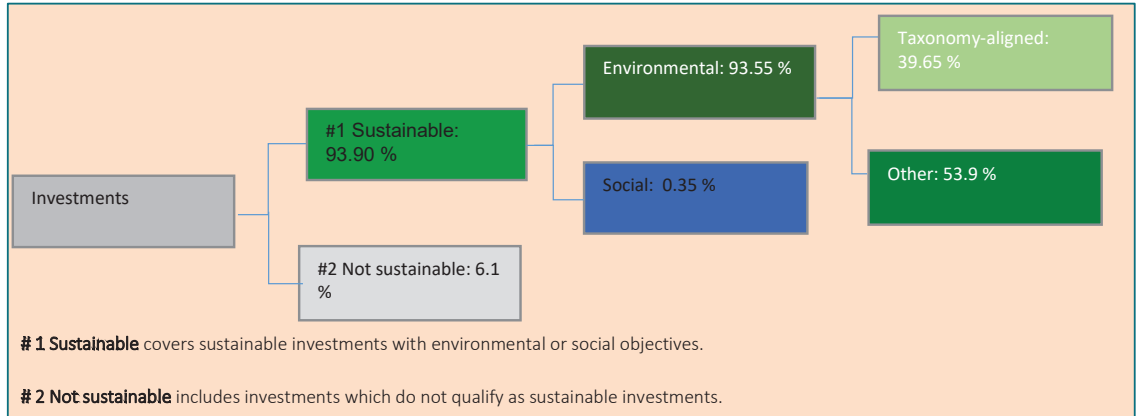

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

- *What was the asset allocation?*

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

● ***In which economic sectors were the investments made?***

Financial product’s investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation   | 22.91%     |
| General public administration activities                                | 16.47%     |
| Production of electricity   | 10.87%     |
| Electricity, gas, steam and air conditioning supply                     | 8.6%       |
| Life insurance  | 5.25%      |
| Renting and operating of own or leased real estate                      | 5.22%      |
| Manufacture of motor vehicles   | 3.84%      |
| Wireless telecommunications activities                                  | 2.73%      |
| Hotels and similar accommodation  | 2.61%      |
| Wired telecommunications activities                                     | 2.34%      |
| Distribution of electricity   | 2.3%       |
| Construction of utility projects for electricity and telecommunications | 2.16%      |
| Freight rail transport  | 2.06%      |
| Manufacture of paper and paperboard                                     | 1.74%      |
| Transmission of electricity   | 1.62%      |
| Manufacture of electronic components                                    | 1.32%      |

|   |       |
|---|-------|
| Collection of non-hazardous waste   | 1.24% |
| Waste collection, treatment and disposal activities, materials recovery           | 1.23% |
| Manufacture of light metal packaging  | 1.15% |
| Manufacture of other pumps and compressors  | 1.1%  |
| Manufacture of other parts and accessories for motor vehicles                     | 1.07% |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 1.01% |
| Non-life insurance  | 0.7%  |
| Water collection, treatment and supply  | 0.46% |

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives. It has considered the climate adaptation and the climate mitigation objectives.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?**

Yes :

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 53.90 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

**What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 0.35 % of sustainable investments with a social objective.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under “not sustainable” represented 6.1 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference sustainable benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS - ACT EUROZONE IMPACT

**Legal entity identifier:** 2138003LLF1182XFON77

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?   |  |
|---|--|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>  | <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>  |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 58.75%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> | <input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 39.25%</b>  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a Sustainable Investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs, by applying an impact approach.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Carbon intensity
- Women on Board

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicator mentioned below:

| Sustainability KPI Name | Value  | Benchmark   | Coverage |
|-------------------------|--|---|----------|
| Carbon intensity        | 168.8 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 240.09 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 99.99%   |
| Women on Board          | 42.84% of women on board   | 40.77% of women on board  | 99.43%   |

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **... And compared to previous periods?**

Not applicable.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues.

Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period.

---

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

The PAI indicators measures given here reflect the Financial Product’s assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider’s screening framework and excludes any companies that have been assessed as “non-compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units   | Measurement |
|---|--|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 3: GHG intensity of investee companies                               | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy |  |   |             |

|   |   |  |  |
|---|---|--|--|
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments                               |  |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources                      |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments                               |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments                               |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments                               |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

| Top investments             | Sector  | Proportion | Country |
|-----------------------------|---|------------|---------|
| ASML HOLDING NV<br>XAMS EUR | Manufacture of other special-purpose machinery n.e.c. | 7.03%      | NL      |
| SIEMENS AG-REG<br>XETR EUR  | Manufacture of electrical equipment                   | 4.21%      | DE      |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

|                                    |   |       |    |
|------------------------------------|---|-------|----|
| BNP PARIBAS XPAR EUR               | Other monetary intermediation                               | 3.98% | FR |
| L'OREAL XPAR EUR                   | Manufacture of perfumes and toilet preparations             | 3.74% | FR |
| SCHNEIDER ELECTRIC SE XPAR EUR     | Manufacture of electric motors, generators and transformers | 3.59% | FR |
| AIR LIQUIDE SA XPAR EUR            | Manufacture of industrial gases                             | 3.57% | FR |
| ESSILORLUXOTTICA XPAR EUR          | Manufacture of medical and dental instruments and supplies  | 3.34% | FR |
| IBERDROLA SA XMAD EUR              | Production of electricity                                   | 3.33% | ES |
| NESTE OYJ XHEL EUR                 | Manufacture of refined petroleum products                   | 3.12% | FI |
| ERSTE GROUP BANK AG XWBO EUR       | Other monetary intermediation                               | 2.53% | AT |
| COMPAGNIE DE SAINT GOBAIN XPAR EUR | Manufacture of other non-metallic mineral products          | 2.5%  | FR |
| FINECOBANK SPA MTAA EUR            | Other monetary intermediation                               | 2.42% | IT |
| INTESA SANPAOLO MTAA EUR           | Other monetary intermediation                               | 2.22% | IT |
| RELX PLC XAMS EUR                  | Other information service activities n.e.c.                 | 2.14% | GB |
| PRYSMIAN SPA MTAA EUR              | Manufacture of electrical equipment                         | 2.1%  | IT |

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation?*

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

**Asset allocation** describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 11.16%     |
| Manufacture of other special-purpose machinery n.e.c.                    | 8.1%       |
| Manufacture of electrical equipment                                      | 6.31%      |
| Manufacture of other chemical products n.e.c.                            | 5.06%      |
| Production of electricity  | 4.38%      |
| Manufacture of medical and dental instruments and supplies               | 3.87%      |
| Manufacture of perfumes and toilet preparations                          | 3.74%      |
| Manufacture of electric motors, generators and transformers              | 3.59%      |
| Manufacture of industrial gases  | 3.57%      |
| Manufacture of refined petroleum products                                | 3.12%      |
| Manufacture of other food products n.e.c.                                | 2.8%       |
| Manufacture of other non-metallic mineral products                       | 2.5%       |
| Architectural and engineering activities, technical testing and analysis | 2.33%      |
| Other software publishing  | 2.31%      |

|  |       |
|--|-------|
| Other information service activities n.e.c.  | 2.14% |
| Construction of utility projects for electricity and telecommunications                  | 2.09% |
| Other food service activities  | 2.06% |
| Manufacture of pharmaceutical preparations   | 2.01% |
| Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres         | 1.94% |
| Activities of holding companies  | 1.71% |
| Manufacture of electronic components   | 1.69% |
| Manufacture of machinery and equipment n.e.c.  | 1.65% |
| Manufacture of motor vehicles  | 1.61% |
| Research and experimental development on biotechnology                                   | 1.56% |
| Wireless telecommunications activities   | 1.48% |
| Technical testing and analysis   | 1.42% |
| Water collection, treatment and supply   | 1.42% |
| Manufacture of electric domestic appliances  | 1.39% |
| Life insurance   | 1.34% |
| Transmission of electricity  | 1.24% |
| Manufacture of paper and paperboard  | 1.21% |
| Accounting, bookkeeping and auditing activities, tax consultancy                         | 1.19% |
| Computer programming activities  | 1.11% |
| Advertising agencies   | 1.05% |
| Publishing activities  | 0.98% |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 0.88% |
| Manufacture of motor vehicles, trailers and semi-trailers                                | 0.84% |
| Retail sale of clothing in specialised stores  | 0.83% |
| Manufacture of electric lighting equipment   | 0.81% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment              | 0.78% |

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

|   |       |
|---|-------|
| Construction of other civil engineering projects n.e.c. | 0.69% |
| Trusts, funds and similar financial entities            | 0.04% |

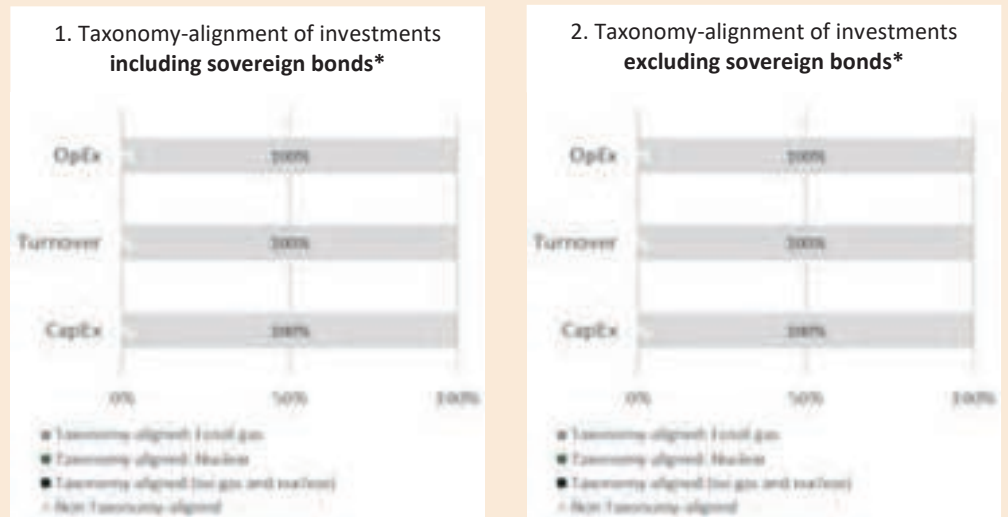

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product is not considering the “do not significantly harm” criteria of the EU Taxonomy.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?

- Yes :
- In fossil gas     In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

*\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 58.75 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

**What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 39.25 % of sustainable investments with a social objective.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under “not sustainable” represented 2 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing

more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS - ACT FACTORS - CLIMATE EQUITY FUND

**Legal entity identifier:** 213800KYJJ744RJXUS49

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?   |  |
|---|--|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>  | <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>  |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 64.80%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> | <input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 33.01%</b>  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks to achieve a sustainable investment objective by gaining exposure to companies helpful to the mitigation of climate change or energy transition towards greener sources in order to progressively align with the objectives of the Paris Agreement, complemented by offsetting fully or partially the carbon emissions of the Financial Product.

The product aims to achieve a reduction in carbon emissions by investing in companies which offer solutions supporting the transition to a lower-carbon economy, as well as in companies which demonstrate a robust decarbonization strategy with SBTi certified targets.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Carbon intensity

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicator mentioned below:

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 145.37 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 119.53 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 98.55%   |

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **... And compared to previous periods?**

Not applicable.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues.

Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period.

---

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider's screening framework and excludes any companies that have been assessed as "non-compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units   | Measurement |
|---|--|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 3: GHG intensity of investee companies                               | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy |  |   |             |

|   |   |  |  |
|---|---|--|--|
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments                               |  |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources                      |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments                               |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments                               |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments                               |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

| Relevant AXA IM policies                    | PAI indicator  | Units                   | Measurement |
|---|--|-------------------------|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes           |             |
| Ecosystem protection & Deforestation policy |  |                         |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon |             |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

|   |   |   |  |
|---|---|---|--|
| Ecosystem protection & Deforestation policy   |   | dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |  |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |  |
| Ecosystem protection & Deforestation policy   |   |   |  |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |  |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |  |

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

**Asset allocation** describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of basic pharmaceutical products   | 8.02%      |
| Other software publishing  | 6.58%      |
| Manufacture of communication equipment   | 5.78%      |
| Production of electricity  | 4.72%      |
| Non-life insurance   | 4.12%      |
| Manufacture of electrical equipment  | 3.79%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 3.65%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 3.57%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 3.28%      |
| Manufacture of motor vehicles  | 3.27%      |
| Manufacture of food products   | 3.13%      |
| Manufacture of engines and turbines, except aircraft, vehicle and cycle engines        | 3.09%      |
| Wireless telecommunications activities   | 2.74%      |
| Computer programming, consultancy and related activities                               | 2.73%      |
| Renting and operating of own or leased real estate                                     | 2.55%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 2.48%      |
| Freight rail transport   | 2.33%      |
| Wholesale of pharmaceutical goods  | 2.31%      |
| Other information service activities n.e.c.  | 2.1%       |
| Manufacture of other non-metallic mineral products n.e.c.                              | 2.06%      |
| Manufacture of other chemical products n.e.c.  | 1.89%      |
| Manufacture of other non-metallic mineral products                                     | 1.62%      |
| Other monetary intermediation  | 1.62%      |

|   |       |
|---|-------|
| Administration of financial markets   | 1.56% |
| Electricity, gas, steam and air conditioning supply                                   | 1.54% |
| Manufacture of other special-purpose machinery<br>n.e.c.                              | 1.2%  |
| Other credit granting   | 1.17% |
| Manufacture of computers and peripheral equipment                                     | 1.1%  |
| Manufacture of ovens, furnaces and furnace burners                                    | 1%    |
| Reinsurance   | 0.87% |
| Manufacture of electric motors, generators and<br>transformers                        | 0.83% |
| Manufacture of electronic components  | 0.81% |
| Manufacture of consumer electronics   | 0.75% |
| Manufacture of rusks and biscuits, manufacture of<br>preserved pastry goods and cakes | 0.71% |
| Manufacture of soft drinks, production of mineral<br>waters and other bottled waters  | 0.68% |
| Management of real estate on a fee or contract basis                                  | 0.61% |
| Manufacture of luggage, handbags and the like,<br>saddlery and harness                | 0.51% |
| Wired telecommunications activities   | 0.5%  |
| Retail trade, except of motor vehicles and<br>motorcycles                             | 0.44% |
| Manufacture of magnetic and optical media   | 0.44% |
| Manufacture of condiments and seasonings  | 0.43% |
| Construction of residential and non-residential<br>buildings                          | 0.43% |
| Civil engineering   | 0.42% |
| Mining of other non-ferrous metal ores  | 0.41% |
| Collection of non-hazardous waste   | 0.38% |
| Life insurance  | 0.36% |
| Research and experimental development on<br>biotechnology                             | 0.36% |
| Manufacture of plastic packing goods  | 0.36% |

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

|  |       |
|--|-------|
| Manufacture of perfumes and toilet preparations                                  | 0.35% |
| Manufacture of medical and dental instruments and supplies                       | 0.35% |
| Retail sale of clothing in specialised stores                                    | 0.35% |
| Manufacture of light metal packaging   | 0.34% |
| Manufacture of other parts and accessories for motor vehicles                    | 0.34% |
| Distribution of electricity  | 0.3%  |
| Security and commodity contracts brokerage                                       | 0.28% |
| Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres | 0.27% |
| Manufacture of soap and detergents, cleaning and polishing preparations          | 0.26% |
| Retail sale of audio and video equipment in specialised stores                   | 0.21% |
| Web portals  | 0.18% |
| Manufacture of footwear  | 0.16% |
| Other processing and preserving of fruit and vegetables                          | 0.12% |
| Activities of holding companies  | 0.12% |
| Specialist medical practice activities   | 0.12% |
| Manufacture of electric domestic appliances                                      | 0.11% |
| Manufacture of electrical and electronic equipment for motor vehicles            | 0.11% |
| Manufacture of macaroni, noodles, couscous and similar farinaceous products      | 0.11% |
| Satellite telecommunications activities  | 0.11% |
| Manufacture of wearing apparel   | 0.1%  |
| Manufacture of musical instruments   | 0.1%  |
| Computer consultancy activities  | 0.1%  |
| Retail sale via mail order houses or via Internet                                | 0.1%  |
| Agents involved in the sale of food, beverages and tobacco                       | 0.09% |

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product is not considering the “do not significantly harm” criteria of the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?**

Yes :

In fossil gas

In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 100% of the total investments.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Npt applicable.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 64.80 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

**What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 33.01 % of sustainable investments with a social objective.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under “not sustainable” represented 2.19 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

**How did this financial product perform compared to the reference sustainable benchmark?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Did this financial product have a sustainable investment objective?  |   |
|--|---|
| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ___%                   | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 28.06% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ___%                           | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product uses an 'extra-financial indicator improvement' approach, and outperformed Carbon intensity by at least 30% compared to its Benchmark index composed of 75% J. P. Morgan Corporate Emerging Market Bond Index Broad Diversified + 25% J. P. Morgan Emerging Market Bond Index Global Diversified during the reference period.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 193.92 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 688.91 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 91.05%   |
| Water intensity         | 6485.75Thousands of cubic meters for corporates   | 37094.33Thousands of cubic meters for corporates  | 71.61%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3.Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability LinkedBonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact ’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2022-12-30

| Top investments                 | Sector                                   | Proportion | Country |
|---------------------------------|--|------------|---------|
| T 2.875% - 31/10/2023           | General public administration activities | 5.38%      | US      |
| IVYCST 6.375% - 03/03/2028 Sink | General public administration activities | 2.27%      | CI      |
| COLOM 2.625% - 15/03/2023 Call  | General public administration activities | 2.2%       | CO      |
| DOMREP 5.5% - 27/01/2025        | General public administration activities | 2.1%       | DO      |

|  |   |       |    |
|--|---|-------|----|
| AXA WF Asian Short Duration Bonds M Capitalisation | Trusts, funds and similar financial entities          | 2.07% | LU |
| PARGUY 4.7% - 27/03/2027                           | General public administration activities              | 1.69% | PY |
| DPWDU 3.908% - 31/05/2023                          | Service activities incidental to water transportation | 1.63% | KY |
| CELARA 3.875% - 02/11/2027 Call                    | Manufacture of pulp                                   | 1.61% | CL |
| CHILE 3.125% - 27/03/2025                          | General public administration activities              | 1.56% | CL |
| BVTSJ 3.625% - 23/09/2026 Call                     | Other business support service activities n.e.c.      | 1.54% | GB |

| COSTAR 4.25% - 26/01/2023                          | General public administration activities              | 1.43% | CR |
| PUMAFN 5% - 24/01/2026 Call                        | Manufacture of refined petroleum products             | 1.42% | LU |
| AXA WF Asian High Yield Bonds M Capitalisation USD | Trusts, funds and similar financial entities          | 1.42% | LU |
| T 4.25% - 30/09/2024                               | General public administration activities              | 1.42% | US |

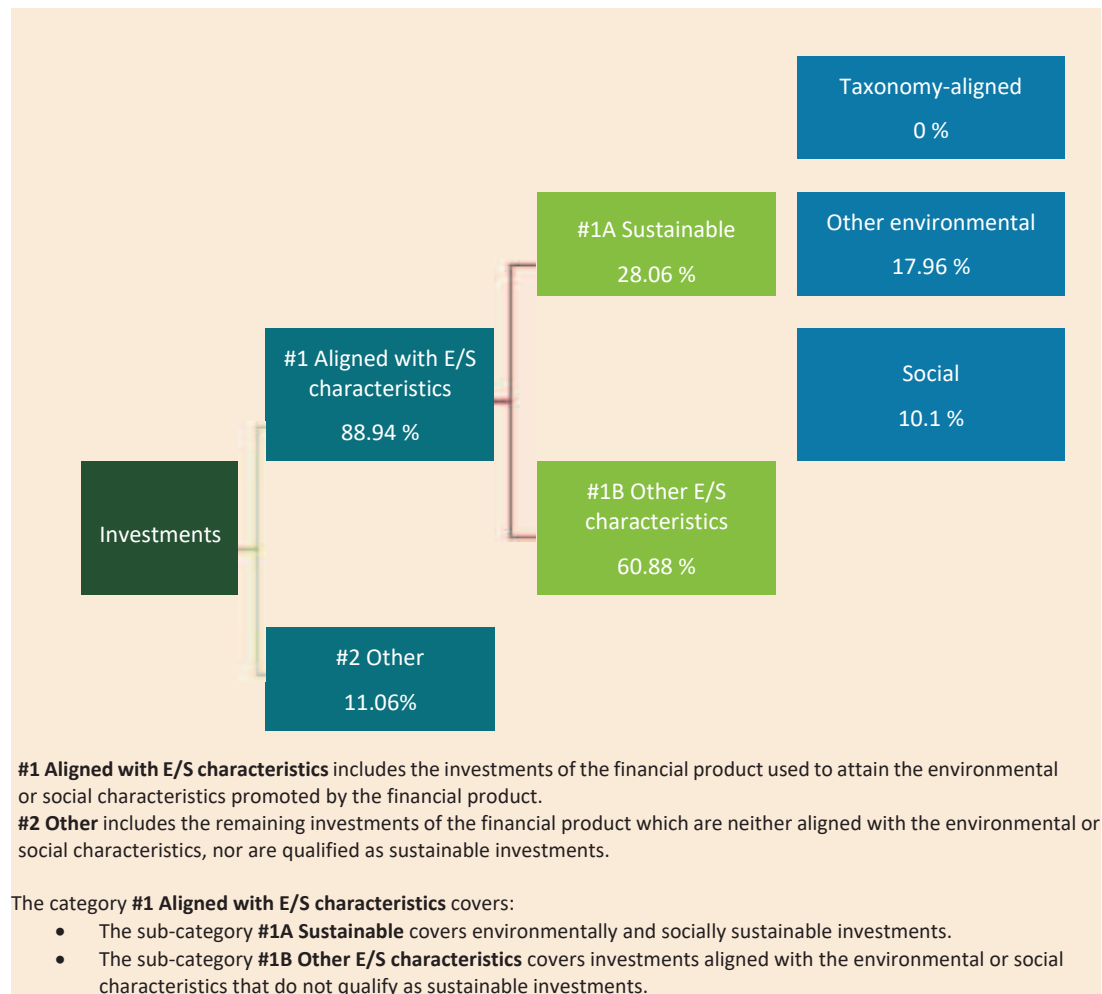

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| General public administration activities                                | 44.33%     |
| Other monetary intermediation   | 10.5%      |
| Production of electricity   | 4.06%      |
| Mining of other non-ferrous metal ores                                  | 3.88%      |
| Trusts, funds and similar financial entities                            | 3.49%      |
| Renting and operating of own or leased real estate                      | 3.45%      |
| Construction of utility projects for electricity and telecommunications | 2.69%      |
| Manufacture of refined petroleum products                               | 2.33%      |
| Other business support service activities n.e.c.                        | 2%         |
| Manufacture of paper and paperboard                                     | 1.7%       |
| Water collection, treatment and supply                                  | 1.68%      |
| Financial leasing   | 1.68%      |
| Service activities incidental to water transportation                   | 1.63%      |
| Manufacture of pulp   | 1.61%      |
| Wired telecommunications activities                                     | 1.4%       |
| Web portals   | 1.28%      |
| Wireless telecommunications activities                                  | 1.27%      |
| Freight rail transport  | 1.17%      |
| Activities of holding companies   | 1.15%      |
| Manufacture of other parts and accessories for motor vehicles           | 1.01%      |
| Retail trade, except of motor vehicles and motorcycles                  | 0.9%       |
| Support activities for other mining and quarrying                       | 0.9%       |
| Manufacture of motor vehicles   | 0.81%      |
| Other credit granting   | 0.75%      |
| Manufacture of perfumes and toilet preparations                         | 0.63%      |
| Manufacture of other special-purpose machinery n.e.c.                   | 0.58%      |
| Raising of poultry  | 0.51%      |
| Retail sale via mail order houses or via Internet                       | 0.42%      |
| Extraction of crude petroleum and natural gas                           | 0.41%      |
| Activities of extraterritorial organisations and bodies                 | 0.41%      |
| Manufacture of food products  | 0.39%      |
| Other retail sale in non-specialised stores                             | 0.36%      |

|   |       |
|---|-------|
| Electricity, gas, steam and air conditioning supply | 0.27% |
| Manufacture of textiles                             | 0.19% |
| Other   | 0.11% |
| Repair and installation of machinery and equipment  | 0.06% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

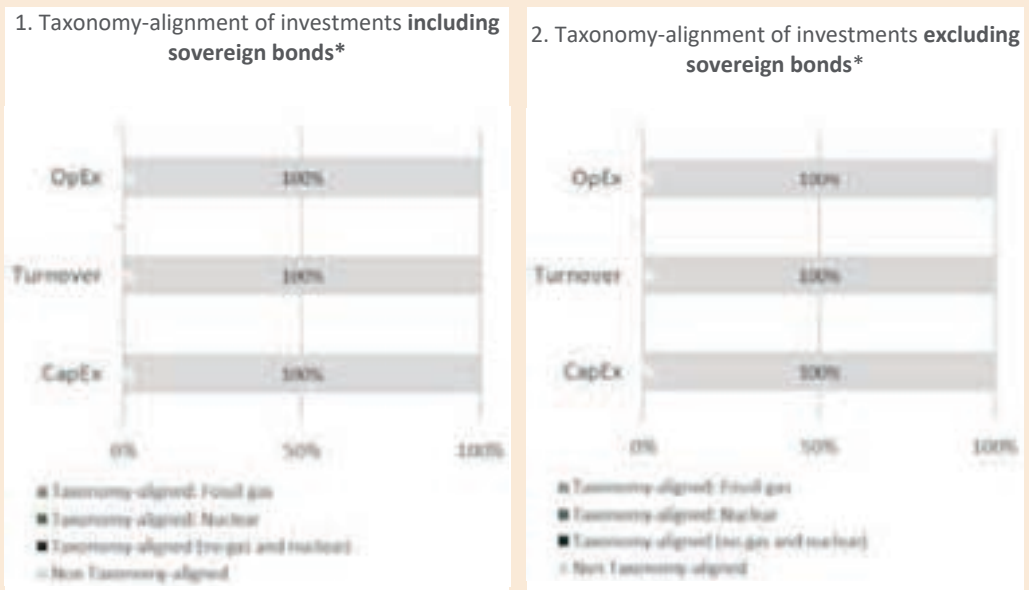

- Yes  
 In fossil gas  In nuclear energy
- No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

**What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 17.96% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 10.1% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 11.06% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether

Not applicable.

the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS – ACT GREEN BONDS

**Legal entity identifier:** 21380049TNZVOFLO2707

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?  |  |
|--|--|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>   | <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>  |

| <input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 1.04%</b>  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a sustainable investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs, and/or by applying an impact approach with a focus to financing the transition to a more sustainable and low carbon economy.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Percentage of Green Bonds

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.
3. **Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**
  - a. GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as “sustainable investments” under AXA IM’s SFDR framework.
  - b. With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability LinkedBonds that get a positive or neutral opinion from AXA IM’s internal analysis process are considered as “sustainable investments”. This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer’s sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target’s ambition, (iii) bond characteristics and (iv) sustainability performance target’s monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives. It has considered the climate adaptation and the climate mitigation objectives.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicators mentioned below:

| Sustainability KPI Name | Value               | Benchmark           | Coverage |
|-------------------------|---------------------|---------------------|----------|
| %Green Bonds            | 96 % of Green Bonds | 98 % of Green Bonds | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

|   |   |  |  |
|---|---|--|--|
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score         | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average |  |
| SDG no significantly negative score         | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period. The PAI indicators measures given here reflect the Financial Product’s assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider’s screening framework and excludes any companies that have been assessed as “non-compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units                   | Measurement |
|---|--|-------------------------|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes           |             |
| Ecosystem protection & Deforestation policy |  |                         |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon |             |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

|   |   |   |  |
|---|---|---|--|
| Ecosystem protection & Deforestation policy   |   | dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |  |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |  |
| Ecosystem protection & Deforestation policy   |   |   |  |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |  |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

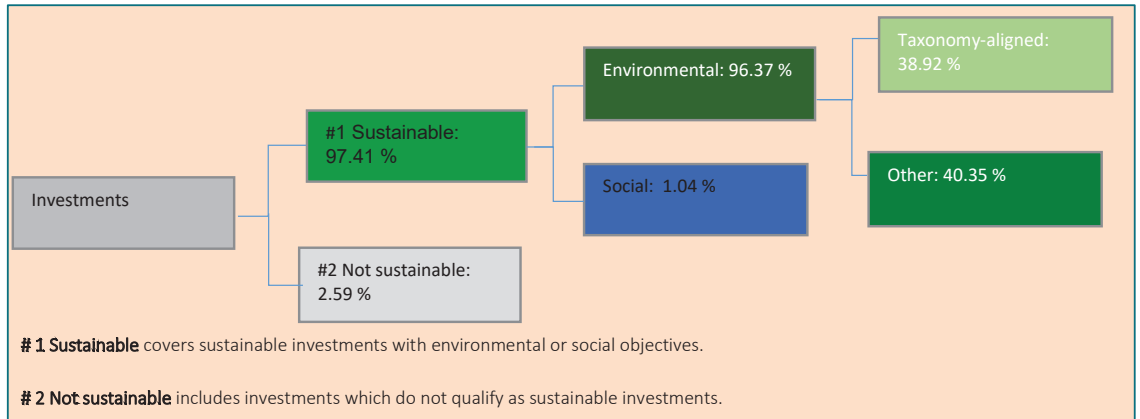

| Top investments                    | Sector  | Proportion | Country |
|------------------------------------|---|------------|---------|
| DBR 0 - 15/08/2050                 | General public administration activities                | 2.4%       | DE      |
| FRTR 1.75% - 25/06/2039            | General public administration activities                | 2.06%      | FR      |
| DBR 0 - 15/08/2031                 | General public administration activities                | 2.02%      | DE      |
| NGGLN 1.96% - 27/06/2030 Call      | Electricity, gas, steam and air conditioning supply     | 0.88%      | US      |
| EIB 3.3% - 03/02/2028              | Activities of extraterritorial organisations and bodies | 0.85%      | LU      |
| FRTR 0.1% - 25/07/2038 CPI         | General public administration activities                | 0.84%      | FR      |
| FERROV 0.375% - 25/03/2028         | Passenger rail transport, interurban                    | 0.84%      | IT      |
| EDPPL 1.7% Var - 20/07/2080 Call   | Electricity, gas, steam and air conditioning supply     | 0.75%      | PT      |
| KFW 0.875% - 15/09/2026            | Other monetary intermediation                           | 0.69%      | DE      |
| BTPS 1.5% - 30/04/2045             | General public administration activities                | 0.67%      | IT      |
| EU 2.75% - 04/02/2033              | Activities of extraterritorial organisations and bodies | 0.67%      | BE      |
| BGB 1.25% - 22/04/2033             | General public administration activities                | 0.64%      | BE      |
| ISPIM 4.75% - 06/09/2027           | Other monetary intermediation                           | 0.64%      | IT      |
| CMPCCI 4.375% - 04/04/2027         | Manufacture of paper and paperboard                     | 0.63%      | CL      |
| SABSM 5.125% Var - 10/11/2028 Call | Other monetary intermediation                           | 0.63%      | ES      |

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

### ● In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation   | 22.84%     |
| General public administration activities  | 19.39%     |
| Electricity, gas, steam and air conditioning supply                               | 8.2%       |
| Renting and operating of own or leased real estate                                | 8.14%      |
| Activities of extraterritorial organisations and bodies                           | 7.14%      |
| Production of electricity   | 5.45%      |
| Distribution of electricity   | 3.38%      |
| Service activities incidental to land transportation                              | 2.62%      |
| Wireless telecommunications activities  | 2.11%      |
| Manufacture of motor vehicles   | 2.11%      |
| Transmission of electricity   | 1.95%      |
| Life insurance  | 1.8%       |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 1.64%      |

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Asset allocation** describes the share of investments in specific assets.

|  |       |
|--|-------|
| Trusts, funds and similar financial entities                                       | 1.47% |
| Land transport and transport via pipelines   | 1.35% |
| Passenger rail transport, interurban   | 0.99% |
| Water collection, treatment and supply   | 0.85% |
| Non-life insurance   | 0.72% |
| Wired telecommunications activities  | 0.65% |
| Manufacture of paper and paperboard  | 0.63% |
| Fund management activities   | 0.58% |
| Manufacture of wearing apparel   | 0.57% |
| Distribution of gaseous fuels through mains  | 0.54% |
| Hotels and similar accommodation   | 0.51% |
| Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes | 0.49% |
| Manufacture of ovens, furnaces and furnace burners                                 | 0.47% |
| Collection of non-hazardous waste  | 0.4%  |
| Financial leasing  | 0.4%  |
| Manufacture of basic pharmaceutical products                                       | 0.36% |
| Other postal and courier activities  | 0.33% |
| Manufacture of other organic basic chemicals                                       | 0.3%  |
| Freight rail transport   | 0.3%  |
| Reinsurance  | 0.29% |
| Manufacture of electronic components   | 0.28% |
| Urban and suburban passenger land transport  | 0.26% |
| Manufacture of chemicals and chemical products                                     | 0.18% |
| Manufacture of medical and dental instruments and supplies                         | 0.17% |
| Construction of residential and non-residential buildings                          | 0.13% |

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives. It has considered the climate adaptation and the climate mitigation objectives.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?**

- Yes :  
 In fossil gas  In nuclear energy  
 No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 40.35 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 1.04 % of sustainable investments with a social objective.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under “not sustainable” represented 2.59 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

## How did this financial product perform compared to the reference sustainable benchmark?

The Financial Product has designated the ICE BofA Green Bond Index as its Benchmark to meet its sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

The Benchmark is aligned with the sustainable investment objective of the Financial Product, as it tracks the performance of securities issued for qualified "green" purposes which must have a clearly designated use of proceeds solely applied toward projects or activities that promote climate change mitigation or adaptation or other environmental sustainability purposes as outlined by the ICMA Green Bond Principles.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Fund's objective is to invest at least 75% of its net asset in Green bonds. Compared to its benchmark, the fund is less exposed to Green bonds but invest, for the remaining part, in Sustainability and/or social bonds.

- **How did this financial product perform compared with the reference benchmark?**

|   | <i>Financial Product</i> | <i>Benchmark</i>   |
|---|--------------------------|--------------------|
| <i>Sustainability Indicator Performance</i> | 96% of green bonds       | 98% of green bonds |

- **How did this financial product perform compared with the broad market index?**

|   | <i>Financial Product</i> | <i>Broad Market Index - Global non sovereign index</i> |
|---|--------------------------|--|
| <i>Sustainability indicator Performance</i> | 96% of green bonds       | 3% of green bonds                                      |

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS – ACT MULTI ASSET OPTIMAL IMPACT

**Legal entity identifier:** 213800JXTZ2GEXH1UT05

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a sustainable investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs and by investing across a broad range of asset classes in securities demonstrating a positive social and environmental impact.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Carbon Delta Technology Opportunity (1.5C)

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.
3. **Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**
  - a. GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
  - b. With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives. It has considered the climate adaptation and the climate mitigation objectives.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicators mentioned below:

| Sustainability KPI Name                    | Value | Benchmark | Coverage |
|--|-------|-----------|----------|
| Carbon Delta Technology Opportunity (1.5C) | 21.61 | 8.91      | 93.74%   |

● **... And compared to previous periods?**

Not applicable.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

|   |   |  |  |
|---|---|--|--|
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score         | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average |  |
| SDG no significantly negative score         | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period. The PAI indicators measures given here reflect the Financial Product’s assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider’s screening framework and excludes any companies that have been assessed as “non-compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units                   | Measurement |
|---|--|-------------------------|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes           |             |
| Ecosystem protection & Deforestation policy |  |                         |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon |             |

|   |   |   |  |
|---|---|---|--|
| Ecosystem protection & Deforestation policy   |   | dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |  |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |  |
| Ecosystem protection & Deforestation policy   |   |   |  |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |  |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members                                  |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

| Top investments                       | Sector  | Proportion | Country |
|---------------------------------------|---|------------|---------|
| XYLEM INC XNYS USD                    | Manufacture of other pumps and compressors                                      | 2.22%      | US      |
| HDFC BANK LTD-ADR XNYS USD            | Other monetary intermediation   | 2.1%       | IN      |
| CARRIER GLOBAL CORP XNYS USD          | Manufacture of ovens, furnaces and furnace burners                              | 1.77%      | US      |
| DARLING INGREDIENTS INC XNYS USD      | Processing and preserving of meat   | 1.75%      | US      |
| THERMO FISHER SCIENTIFIC INC XNYS USD | Manufacture of instruments and appliances for measuring, testing and navigation | 1.67%      | US      |
| TAIWAN SEMICONDUCTOR MANUFAC XTAI TWD | Manufacture of other special-purpose machinery n.e.c.                           | 1.63%      | TW      |
| VESTAS WIND SYSTEMS A/S XCSE DKK      | Manufacture of engines and turbines, except aircraft, vehicle and cycle engines | 1.55%      | DK      |
| VEOLIA ENVIRONNEMENT XPAR EUR         | Water collection, treatment and supply  | 1.53%      | FR      |
| TRIMBLE INC XNGS USD                  | Manufacture of instruments and appliances for measuring, testing and navigation | 1.51%      | US      |
| VERBUND AG XWBO EUR                   | Production of electricity   | 1.51%      | AT      |
| DANAHER CORP XNYS USD                 | Manufacture of instruments and appliances for measuring, testing and navigation | 1.48%      | US      |
| BECTON DICKINSON AND CO XNYS USD      | Manufacture of medical and dental instruments and supplies                      | 1.37%      | US      |

|   |  |       |    |
|---|--|-------|----|
| UPM-KYMMENE OYJ<br>XHEL EUR                 | Manufacture of paper<br>and paperboard | 1.37% | FI |
| CAPITEC BANK<br>HOLDINGS LTD XJSE<br>ZAR    | Other monetary<br>intermediation       | 1.33% | ZA |
| BANK RAKYAT<br>INDONESIA PERSER<br>XIDX IDR | Other monetary<br>intermediation       | 1.27% | ID |

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation                           | 22.84%     |
| General public administration activities                | 19.39%     |
| Electricity, gas, steam and air conditioning supply     | 8.2%       |
| Renting and operating of own or leased real estate      | 8.14%      |
| Activities of extraterritorial organisations and bodies | 7.14%      |
| Production of electricity                               | 5.45%      |
| Distribution of electricity                             | 3.38%      |

|  |       |
|--|-------|
| Service activities incidental to land transportation                               | 2.62% |
| Wireless telecommunications activities   | 2.11% |
| Manufacture of motor vehicles  | 2.11% |
| Transmission of electricity  | 1.95% |
| Life insurance   | 1.8%  |
| Manufacture of soft drinks, production of mineral waters and other bottled waters  | 1.64% |
| Trusts, funds and similar financial entities                                       | 1.47% |
| Land transport and transport via pipelines   | 1.35% |
| Passenger rail transport, interurban   | 0.99% |
| Water collection, treatment and supply   | 0.85% |
| Non-life insurance   | 0.72% |
| Wired telecommunications activities  | 0.65% |
| Manufacture of paper and paperboard  | 0.63% |
| Fund management activities   | 0.58% |
| Manufacture of wearing apparel   | 0.57% |
| Distribution of gaseous fuels through mains  | 0.54% |
| Hotels and similar accommodation   | 0.51% |
| Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes | 0.49% |
| Manufacture of ovens, furnaces and furnace burners                                 | 0.47% |
| Collection of non-hazardous waste  | 0.4%  |
| Financial leasing  | 0.4%  |
| Manufacture of basic pharmaceutical products                                       | 0.36% |
| Other postal and courier activities  | 0.33% |
| Manufacture of other organic basic chemicals                                       | 0.3%  |
| Freight rail transport   | 0.3%  |
| Reinsurance  | 0.29% |
| Manufacture of electronic components   | 0.28% |
| Urban and suburban passenger land transport  | 0.26% |

|  |       |
|--|-------|
| Manufacture of chemicals and chemical products             | 0.18% |
| Manufacture of medical and dental instruments and supplies | 0.17% |
| Construction of residential and non-residential buildings  | 0.13% |

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives. It has considered the climate adaptation and the climate mitigation objectives.

#### Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?

- Yes :
- In fossil gas     In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 50.47 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

**What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 26.78 % of sustainable investments with a social objective.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under “not sustainable” represented 12.52 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their

production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

### How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: AXA WORLD FUNDS - ACT SOCIAL BONDS

Legal entity identifier: 213800CLRMMQHNGESG95

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?   |  |
|---|--|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>  | <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>  |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 14.85%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> | <input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 80.53%</b>  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a sustainable investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs, and/or by applying an impact approach contributing to financing projects demonstrating a positive social impact.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Carbon intensity
- Women on Board

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.
3. **Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**
  - a. GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as “sustainable investments” under AXA IM’s SFDR framework.
  - b. With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability LinkedBonds that get a positive or neutral opinion from AXA IM’s internal analysis process are considered as “sustainable investments”. This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer’s sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target’s ambition, (iii) bond characteristics and (iv) sustainability performance target’s monitoring & reporting.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicators mentioned below:

| Sustainability KPI Name | Value   | Benchmark  | Coverage |
|-------------------------|---|--|----------|
| Women on board          | 37.82 % of women on board   | 34.31 % of women on board  | 93.06%   |
| Carbon Intensity        | 97.55CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 208.26CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 94.3%    |

● **... And compared to previous periods?**

Not applicable.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy                          | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|  | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy  | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score                                  | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies,   |             |

|  |   |  |  |
|--|---|--|--|
| emissions and energy consumption) <sup>1</sup> |   | per high impact climate sector                                   |  |
| Ecosystem Protection & Deforestation policy    | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score            | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average |  |
| SDG no significantly negative score            | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

|                                     |   |  |  |
|-------------------------------------|---|--|--|
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments                               |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period. The PAI indicators measures given here reflect the Financial Product’s assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider’s screening framework and excludes any companies that have been assessed as “non-compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies | PAI indicator | Units | Measurement |
|--------------------------|---------------|-------|-------------|
|--------------------------|---------------|-------|-------------|

|   |   |   |  |
|---|---|---|--|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |  |
| Ecosystem protection & Deforestation policy   |   |   |  |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |  |
| Ecosystem protection & Deforestation policy   |   |   |  |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |  |
| Ecosystem protection & Deforestation policy   |   |   |  |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |  |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

| Top investments                    | Sector  | Proportion | Country |
|------------------------------------|---|------------|---------|
| UNEDIC 0.01% - 25/05/2031          | Non-life insurance                                      | 4.68%      | FR      |
| EU 0 - 04/10/2030                  | Activities of extraterritorial organisations and bodies | 4.54%      | BE      |
| NWG 0.75% Var - 15/11/2025 Call    | Other monetary intermediation                           | 1.25%      | GB      |
| CHILE 0.555% - 21/01/2029 Call     | General public administration activities                | 1.25%      | CL      |
| MS 0.864% Var - 21/10/2025 Call    | Security and commodity contracts brokerage              | 1.23%      | US      |
| PSOEN 3.75% - 04/06/2030           | Book publishing   | 1.17%      | GB      |
| SOCGEN 5.25% Var - 06/09/2032 Call | Trusts, funds and similar financial entities            | 1.17%      | FR      |
| BFCM 4% - 21/11/2029               | Other monetary intermediation                           | 1.15%      | FR      |
| ANZ 1.125% Var - 21/11/2029 Call   | Other monetary intermediation                           | 1.15%      | AU      |
| BAC 1.486% Var - 19/05/2024 Call   | Other monetary intermediation                           | 1.15%      | US      |
| COE 0 - 15/04/2028                 | Activities of extraterritorial organisations and bodies | 1.14%      | FR      |
| CHILE 2.55% - 27/07/2033 Call      | General public administration activities                | 1.14%      | CL      |
| CABKSM 0.75% Var - 26/05/2028 Call | Other monetary intermediation                           | 1.13%      | ES      |
| PFE 2.625% - 01/04/2030 Call       | Manufacture of basic pharmaceutical products            | 1.11%      | US      |

|                                   |                               |      |    |
|-----------------------------------|-------------------------------|------|----|
| STANLN 0.9% Var - 02/07/2027 Call | Other monetary intermediation | 1.1% | GB |
|-----------------------------------|-------------------------------|------|----|

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation?*

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

### ● *In which economic sectors were the investments made?*

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation                              | 28.3%      |
| General public administration activities                   | 17.65%     |
| Activities of extraterritorial organisations and bodies    | 16.03%     |
| Non-life insurance   | 9.7%       |
| Renting and operating of own or leased real estate         | 4.12%      |
| Life insurance   | 3.32%      |
| Manufacture of basic pharmaceutical products               | 2.52%      |
| Electricity, gas, steam and air conditioning supply        | 2.37%      |
| Trusts, funds and similar financial entities               | 1.99%      |
| Renting and leasing of trucks                              | 1.86%      |
| Manufacture of medical and dental instruments and supplies | 1.69%      |

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

|  |       |
|--|-------|
| Transmission of electricity                            | 1.66% |
| Other credit granting                                  | 1.58% |
| Security and commodity contracts brokerage             | 1.23% |
| Book publishing  | 1.17% |
| Wireless telecommunications activities                 | 0.97% |
| Other postal and courier activities                    | 0.91% |
| Research and experimental development on biotechnology | 0.86% |
| Manufacture of other chemical products n.e.c.          | 0.84% |
| Manufacture of cement                                  | 0.68% |
| Operation of dairies and cheese making                 | 0.55% |

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product is not considering the “do not significantly harm” criteria of the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?**

- Yes :
- In fossil gas     In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

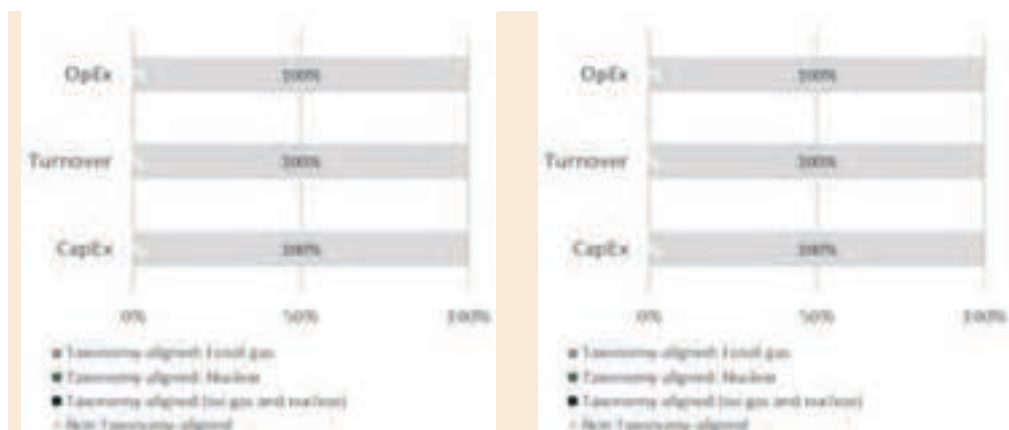

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

This graph represents 100% of the total investments.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 14.85 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

**What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 80.53 % of sustainable investments with a social objective.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under “not sustainable” represented 4.62 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,

- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

### What actions have been taken to attain the sustainable investment objective during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference sustainable benchmark?

The Financial Product has designated the ICE Social Bond index as a reference benchmark to meet its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

The Benchmark is aligned with the sustainable investment objective of the Financial Product, as it tracks the performance of securities issued for qualified “social” purposes which must have a clearly designated use of proceeds solely applied toward projects or activities that promote social sustainability purposes as outlined by the ICMA Green and Social Bond Principles (“GSBP”)

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Compared to its benchmark, the fund outperformed the Women on Board sustainability indicator, whereas the benchmark outperformed the Financial Product on the carbon intensity indicator.

- **How did this financial product perform compared with the reference benchmark?**

|  | <i>Financial Product</i>  | <i>Benchmark</i>  |
|--|---|---|
| <i>Sustainability Indicator Performance – Women on Board</i>   | 37.82 % of women on board   | 36.63 % of women on board   |
| <i>Sustainability Indicator Performance – Carbon intensity</i> | 97.55CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 38.01CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign |

● **How did this financial product perform compared with the broad market index?**

|  | <i>Financial indicator</i>  | <i>Broad Market Index</i>  |
|--|---|--|
| <i>Sustainability Indicator Performance – Women on Board</i>   | 37.82 % of women on board   | 34.31 % of women on board  |
| <i>Sustainability Indicator Performance – Carbon intensity</i> | 97.55CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 208.26CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign |

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS - ACT SOCIAL PROGRESS

**Legal entity identifier:** 213800Z5DWFODAPKIC63

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?  |  |
|--|--|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>   | <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>  |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 6.33%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> | <input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 89.85%</b>   | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a sustainable investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs and that create financial and societal value by fostering social progress.

In line with this sustainable investment objective, the Financial Product seeks to deliver a positive and measurable impact on society, and more specifically targets the areas of social progress such as

housing and essential infrastructure, financial and technology inclusion, healthcare solutions, well-being and safety, education and entrepreneurship through the support of the United Nations Sustainable Development Goals (SDGs) in their social dimension.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Social Product & Services Score

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicator mentioned below:

| Sustainability KPI Name         | Value | Benchmark | Coverage          |
|---------------------------------|-------|-----------|-------------------|
| Social Product & Services score | 3.51  | 0.96      | 89.7606869189488% |

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **... And compared to previous periods?**

Not applicable

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested,  |             |

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

|                                 |
|---------------------------------|
| expressed as a weighted average |
|---------------------------------|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider's screening framework and excludes any companies that have been assessed as "non-compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units   | Measurement |
|---|--|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         |  |   |             |

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

|   |   |  |  |
|---|---|--|--|
| Ecosystem protection & Deforestation policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue          |  |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments                               |  |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources                      |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments                               |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments                               |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments                               |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

### What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

| Top investments             | Sector                                       | Proportion | Country |
|-----------------------------|--|------------|---------|
| ASTRAZENECA PLC<br>XLON GBP | Manufacture of basic pharmaceutical products | 3.22%      | GB      |

|   |   |       |    |
|---|---|-------|----|
| AIA GROUP LTD XHKG HKD                  | Life insurance  | 2.9%  | HK |
| CSL LTD XASX AUD                        | Research and experimental development on biotechnology                | 2.68% | AU |
| STRYKER CORP XNYS USD                   | Manufacture of medical and dental instruments and supplies            | 2.66% | US |
| DEXCOM INC XNGS USD                     | Manufacture of medical and dental instruments and supplies            | 2.5%  | US |
| MSA SAFETY INC XNYS USD                 | Manufacture of tools  | 2.49% | US |
| JOHNSON CONTROLS INTERNATIONAL XNYS USD | Manufacture of ovens, furnaces and furnace burners                    | 2.46% | US |
| UNICHARM CORP XTKS JPY                  | Manufacture of household and sanitary goods and of toilet requisites  | 2.42% | JP |
| INTUITIVE SURGICAL INC XNGS USD         | Manufacture of medical and dental instruments and supplies            | 2.41% | US |
| NATIONAL VISION HOLDINGS INC XNGS USD   | Other retail sale of new goods in specialised stores                  | 2.38% | US |
| CENTENE CORP XNYS USD                   | Non-life insurance  | 2.31% | US |
| GENTEX CORP XNGS USD                    | Manufacture of electrical and electronic equipment for motor vehicles | 2.28% | US |
| ETSY INC XNGS USD                       | Retail sale via mail order houses or via Internet                     | 2.27% | US |
| INTUIT INC XNGS USD                     | Other software publishing   | 2.27% | US |
| PLANET FITNESS INC - CL A XNYS USD      | Fitness facilities  | 2.26% | US |

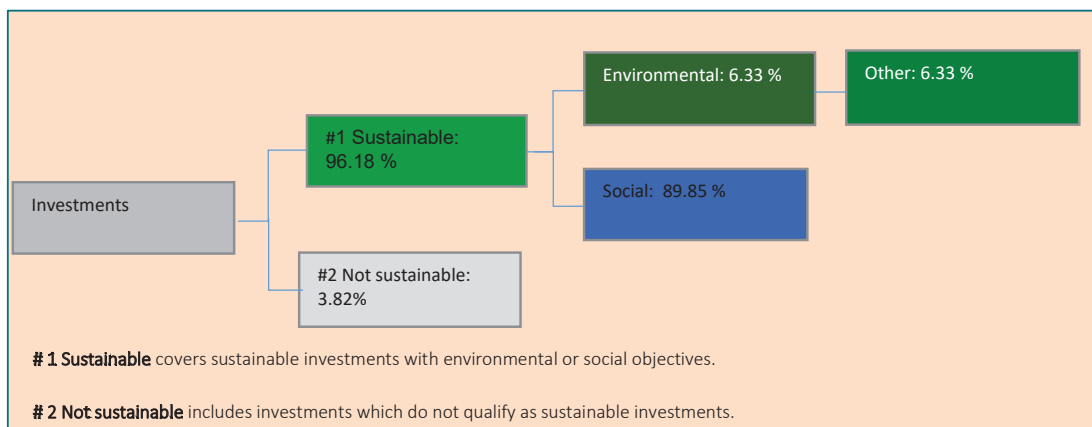

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation?*

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 8.41%      |
| Manufacture of medical and dental instruments and supplies                             | 7.58%      |
| Other monetary intermediation  | 7.2%       |
| Education  | 6.82%      |
| Research and experimental development on biotechnology                                 | 5.77%      |
| Life insurance   | 4.08%      |
| Manufacture of electrical and electronic equipment for motor vehicles                  | 4%         |
| Other activities auxiliary to financial services, except insurance and pension funding | 3.8%       |
| Technical testing and analysis   | 3.76%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 3.57%      |

|   |       |
|---|-------|
| Manufacture of basic pharmaceutical products                            | 3.22% |
| Construction of utility projects for electricity and telecommunications | 2.93% |
| Renting and operating of own or leased real estate                      | 2.78% |
| Manufacture of tools  | 2.49% |
| Manufacture of ovens, furnaces and furnace burners                      | 2.46% |
| Manufacture of household and sanitary goods and of toilet requisites    | 2.42% |
| Other retail sale of new goods in specialised stores                    | 2.38% |
| Non-life insurance  | 2.31% |
| Retail sale via mail order houses or via Internet                       | 2.27% |
| Fitness facilities  | 2.26% |
| Manufacture of other chemical products n.e.c.                           | 2.23% |
| Other cleaning activities   | 2.11% |
| Manufacture of other special-purpose machinery n.e.c.                   | 2.06% |
| Manufacture of pharmaceutical preparations                              | 2.04% |
| Manufacture of other food products n.e.c.                               | 1.88% |
| Retail sale of medical and orthopaedic goods in specialised stores      | 1.83% |
| Construction of residential and non-residential buildings               | 1.71% |
| Other human health activities   | 1.63% |
| Manufacture of soap and detergents, cleaning and polishing preparations | 1.54% |
| Private security activities   | 1.47% |
| Manufacture of electric motors, generators and transformers             | 0.97% |

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product is not considering the “do not significantly harm” criteria of the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

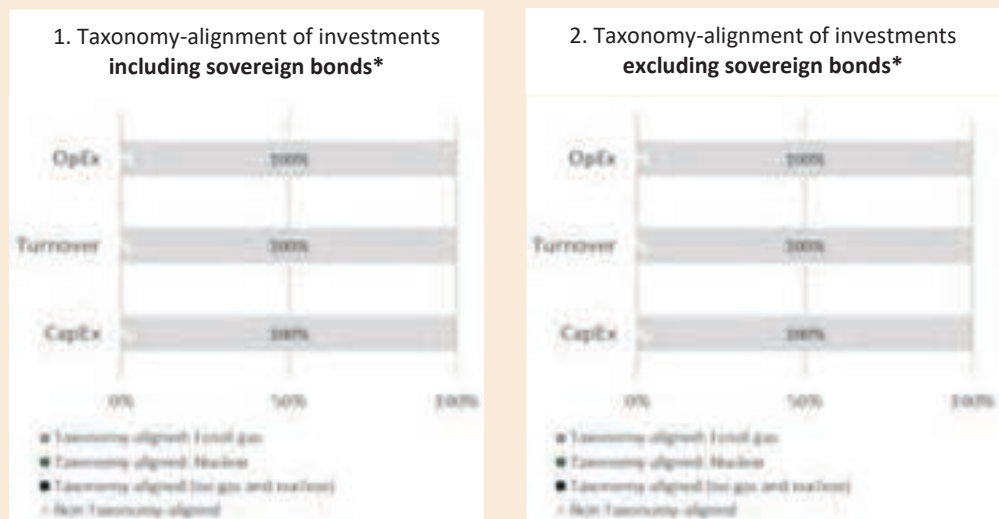

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?**

Yes :  In fossil gas  In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 6.33 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 89.85% of sustainable investments with a social objective.

### What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “not sustainable” represented 3.82 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

### What actions have been taken to attain the sustainable investment objective during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**How did this financial product perform compared to the reference sustainable benchmark?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AXA WORLD FUNDS - ACT HUMAN CAPITAL

**Legal entity identifier:** 2138002K7PEDAMUO9B79

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?   |  |
|---|--|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>  | <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>  |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 40.35%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> | <input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> |
| <input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 56.41%</b>  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

### To what extent was the sustainable investment objective of this financial product met?

The Financial Product seeks a sustainable investment objective to advance the United Nations Sustainable Development Goals (SDGs) with a focus on the social themes by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs and that create financial and societal value and by applying an impact approach with a focus on Human capital management.

The Financial Product has met its sustainable investment objective for the reference period by investing in companies considering their:

- Human capital score

The financial product has met its sustainable investment objectives by investing in companies assessed as sustainable through the following dimension:

1. **UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a. the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b. using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. **Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the sustainable objective of the Financial Product has been measured with the sustainability indicator mentioned below:

| Sustainability KPI Name | Value | Benchmark | Coverage |
|-------------------------|-------|-----------|----------|
| Human Capital Score     | 5.7   | 5.24      | 100%     |

● **... And compared to previous periods?**

Not applicable

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The application of the Do No Significant Harm Principle for the sustainable investments the Financial Product made means that the following companies cannot qualify as sustainable if they met any of the criteria listed below:

- The issuer causes harm along any of the SDGs when one of its SDG scores is below – 5 based on a quantitative database from external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer is in AXA IM’s sectorial and ESG standards ban lists (as described below), which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer has a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology. The ESG score is based on ESG scoring from external data provider as primary inputs assessing data points across Environment, Social and Governance (ESG) dimensions. AXA IM analysts can complement with a fundamental and documented ESG analysis in case of lack of coverage or disagreement on the ESG rating provided that it is approved by AXA IM dedicated internal governance body.

Indicators for principal adverse impacts on sustainability factors were considered, including through the application of AXA IM’s exclusion and stewardship policies.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Where relevant, Stewardship policies are an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors.

Voting at general meetings is also an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies | PAI indicator | Units | Measurement |
|--------------------------|---------------|-------|-------------|
|--------------------------|---------------|-------|-------------|

<sup>1</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |  |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

AXA IM relies on an third-party data provider, notably for the PAI indicators included above. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report’s reference period. The PAI indicators measures given here reflect the Financial Product’s assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

<sup>2</sup> The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM relies on an external provider’s screening framework and excludes any companies that have been assessed as “non-compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Financial Product took into consideration the following Principal Adverse Impact indicators as presented below:

| Relevant AXA IM policies                    | PAI indicator  | Units   | Measurement |
|---|--|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 3: GHG intensity of investee companies                               | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 4: Exposure to companies active in the fossil fuel sector            | % of investments  |             |

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

|   |   |  |  |
|---|---|--|--|
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources                      |  |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments                               |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments                               |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments                               |  |

AXA IM relies on an third-party data provider, notably for PAI indicators. The data used is the data available at the time of reporting and can therefore reflect a prior reference period. The data comes either from disclosures made by investee companies or from estimations. It is currently not possible, from a technical standpoint, for AXA IM to distinguish reference periods or the level of estimation of data in this reporting.

Please note that these indicators have been published for information purposes only, as SFDR Level 2 requirements entered into force on 01/01/2023, after this report's reference period. The PAI indicators measures given here reflect the Financial Product's assets as of 30/12/2022.

AXA IM may, in particular with the aim of improving data quality, change third party data providers at any time and at its own discretion. This may lead to changes on the data used for the same instruments or investments in future reporting.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

| Top investments           | Sector   | Proportion | Country |
|---------------------------|--|------------|---------|
| ASR NEDERLAND NV XAMS EUR | Life insurance   | 3.62%      | NL      |
| SPIE SA XPAR EUR          | Architectural and engineering activities, technical testing and analysis | 3.4%       | FR      |
| EIFFAGE XPAR EUR          | Construction of residential and non-residential buildings                | 3.11%      | FR      |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30/12/2022

|   |   |       |    |
|---|---|-------|----|
| FINECOBANK SPA<br>MTAA EUR                      | Other monetary<br>intermediation  | 2.94% | IT |
| ARCADIS NV XAMS<br>EUR                          | Architectural and<br>engineering activities,<br>technical testing and<br>analysis | 2.88% | NL |
| ERSTE GROUP BANK<br>AG XWBO EUR                 | Other monetary<br>intermediation  | 2.77% | AT |
| INFRASTRUTTURE<br>WIRELESS ITAL MTAA<br>EUR     | Construction of utility<br>projects for electricity<br>and telecommunications     | 2.62% | IT |

| BELIMO HOLDING AG-<br>REG XSWX CHF              | Manufacture of ovens,<br>furnaces and furnace<br>burners                          | 2.22% | CH |

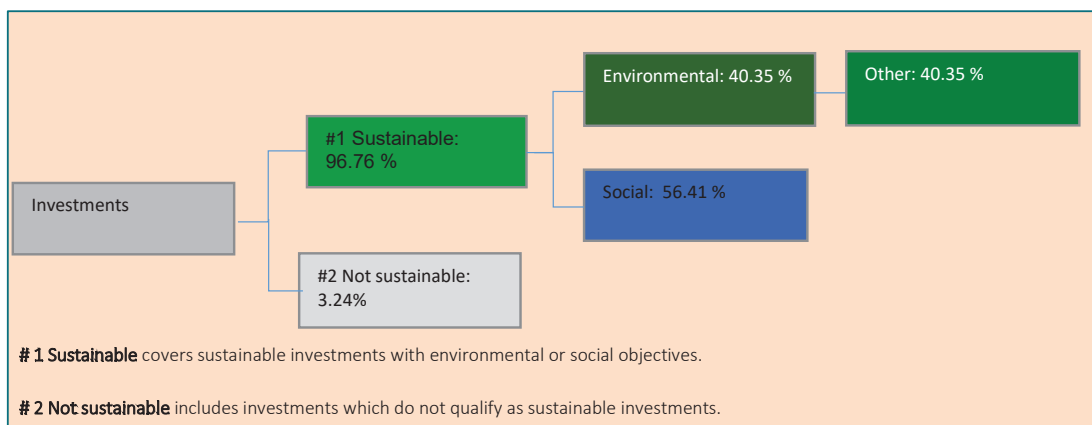

**Asset allocation**  
describes the share  
of investments in  
specific assets.

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation?*

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 8.07%      |
| Architectural and engineering activities, technical testing and analysis | 6.27%      |
| Life insurance   | 6.05%      |
| Construction of residential and non-residential buildings                | 4.2%       |
| Renting and operating of own or leased real estate                       | 4.03%      |
| Manufacture of other chemical products n.e.c.                            | 3.98%      |
| Wholesale trade, except of motor vehicles and motorcycles                | 3.85%      |
| Construction of utility projects for electricity and telecommunications  | 2.62%      |
| Manufacture of electrical equipment                                      | 2.57%      |
| Production of electricity  | 2.49%      |
| Trusts, funds and similar financial entities                             | 2.44%      |
| Other software publishing  | 2.38%      |
| Manufacture of other special-purpose machinery n.e.c.                    | 2.38%      |
| Retail trade, except of motor vehicles and motorcycles                   | 2.34%      |
| Manufacture of wearing apparel   | 2.29%      |

|   |       |
|---|-------|
| Manufacture of basic pharmaceutical products                                    | 2.25% |
| Manufacture of ovens, furnaces and furnace burners                              | 2.22% |
| Manufacture of pharmaceutical preparations                                      | 2.17% |
| Wireless telecommunications activities  | 2.08% |
| Manufacture of machinery and equipment n.e.c.                                   | 2.05% |
| Support activities for petroleum and natural gas extraction                     | 1.94% |
| Water collection, treatment and supply  | 1.93% |
| Manufacture of motor vehicles, trailers and semi-trailers                       | 1.91% |
| Wholesale of chemical products  | 1.9%  |
| Wholesale of pharmaceutical goods   | 1.88% |
| Activities of holding companies   | 1.87% |
| Manufacture of food products  | 1.86% |
| Book publishing   | 1.84% |
| Civil engineering   | 1.82% |
| Computer programming activities   | 1.75% |
| Manufacture of paper and paperboard   | 1.67% |
| Manufacture of machinery for paper and paperboard production                    | 1.67% |
| Manufacture of instruments and appliances for measuring, testing and navigation | 1.6%  |
| Manufacture of medical and dental instruments and supplies                      | 1.55% |
| Other publishing activities   | 1.46% |
| Manufacture of lifting and handling equipment                                   | 1.37% |
| Manufacture of electric domestic appliances                                     | 1.23% |
| Technical testing and analysis  | 1%    |
| Computer programming, consultancy and related activities                        | 0.95% |
| Manufacture of builders ware of plastic   | 0.87% |
| Manufacture of refined petroleum products                                       | 0.64% |

|   |       |
|---|-------|
| Manufacture of batteries and accumulators | 0.56% |
|---|-------|

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product is not considering the “do not significantly harm” criteria of the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy<sup>3</sup>?**

Yes :  In fossil gas  In nuclear energy

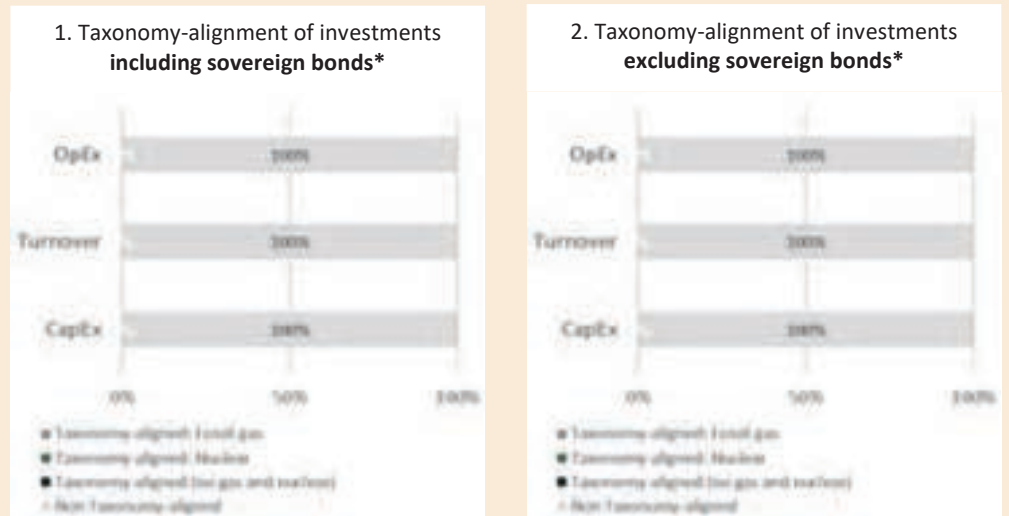

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 40.35 % for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

**What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 56.41% of sustainable investments with a social objective.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under “not sustainable” represented 3.24 % of the Net Asset Value of the product.

The “not sustainable” assets may have consisted in, as defined in the precontractual annex:

- derivatives used in hedging strategies or used for liquidity management purpose and,
- cash and cash equivalent investments (being bank deposit, eligible money market instruments and money market funds) used for managing the liquidity of the Financial Product

Environmental or social safeguards are applied and assessed on all “Not Sustainable” assets except on (i) non single name derivatives and (ii) on cash and cash equivalent investments described above.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

**How did this financial product perform compared to the reference sustainable benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 83.43% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 150.47 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 199.18 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 99.83%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the

Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments          | Sector  | Proportion | Country |
|--------------------------|---|------------|---------|
| ASML HOLDING NV XAMS EUR | Manufacture of other special-purpose machinery n.e.c. | 4.5%       | NL      |
| BP PLC XLON GBP          | Manufacture of refined petroleum products             | 4.48%      | GB      |

|   |  |       |    |
|---|--|-------|----|
| UBS GROUP AG-REG XSWX CHF                       | Other activities auxiliary to financial services, except insurance and pension funding | 3.95% | CH |
| AXA IM EURO LIQUIDITY SRI Capitalisation EUR pf | Trusts, funds and similar financial entities   | 3.83% | FR |
| NESTLE SA-REG XSWX CHF                          | Manufacture of food products   | 3.83% | CH |
| ASTRAZENECA PLC XLON GBP                        | Manufacture of basic pharmaceutical products   | 3.81% | GB |
| ROCHE HOLDING AG-GENUSSCHEIN XSWX CHF           | Manufacture of basic pharmaceutical products   | 3.71% | CH |
| BNP PARIBAS XPAR EUR                            | Other monetary intermediation  | 3.67% | FR |
| DEUTSCHE TELEKOM AG-REG XETR EUR                | Wireless telecommunications activities   | 3.63% | DE |
| NOVO NORDISK A/S-BXCSE DKK                      | Manufacture of basic pharmaceutical products   | 3.4%  | DK |
| ASHTREAD GROUP PLC XLON GBP                     | Rental and leasing activities  | 2.75% | GB |
| SCHNEIDER ELECTRIC SE XPAR EUR                  | Manufacture of electric motors, generators and transformers                            | 2.56% | FR |
| STELLANTIS NV XPAR EUR                          | Manufacture of motor vehicles  | 2.41% | NL |
| LVMH MOET HENNESSY LOUIS VUI XPAR EUR           | Manufacture of luggage, handbags and the like, saddlery and harness                    | 2.36% | FR |
| SSE PLC XLON GBP                                | Production of electricity  | 2.29% | GB |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of basic pharmaceutical products   | 10.92%     |
| Trusts, funds and similar financial entities   | 7.75%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 6.94%      |
| Other monetary intermediation  | 6.68%      |
| Manufacture of refined petroleum products  | 5.43%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 4.5%       |
| Manufacture of motor vehicles  | 3.92%      |
| Manufacture of food products   | 3.83%      |
| Production of electricity  | 3.69%      |
| Wireless telecommunications activities   | 3.63%      |
| Non-life insurance   | 2.85%      |
| Rental and leasing activities  | 2.75%      |
| Manufacture of electric motors, generators and transformers                            | 2.56%      |
| Manufacture of luggage, handbags and the like, saddlery and harness                    | 2.36%      |
| Distilling, rectifying and blending of spirits   | 2.11%      |
| Manufacture of machinery for mining, quarrying and construction                        | 2.02%      |
| Other postal and courier activities  | 1.97%      |
| Manufacture of industrial gases  | 1.88%      |
| Publishing of journals and periodicals   | 1.87%      |
| Other food service activities  | 1.86%      |
| Advertising agencies   | 1.75%      |
| Manufacture of other food products n.e.c.  | 1.73%      |
| Manufacture of other chemical products n.e.c.  | 1.72%      |
| Manufacture of electrical equipment  | 1.68%      |
| Other human health activities  | 1.56%      |
| Construction of utility projects for electricity and telecommunications                | 1.52%      |
| Research and experimental development on biotechnology                                 | 1.46%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 1.44%      |
| Other information service activities n.e.c.  | 1.41%      |

|   |       |
|---|-------|
| Computer programming activities                 | 1.37% |
| Other software publishing                       | 1.04% |
| Manufacture of perfumes and toilet preparations | 1.02% |
| Security systems service activities             | 0.91% |
| Manufacture of electric domestic appliances     | 0.64% |
| Manufacture of other pumps and compressors      | 0.63% |
| Manufacture of electronic components            | 0.61% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria

● **What was the share of investments made in transitional and enabling activities?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 40.22% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 43.21% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.52% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <span style="color: green;">●●</span> <input type="checkbox"/> YES   | <span style="color: green;">●</span> <input checked="" type="checkbox"/> NO  |
|--|--|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 52.5% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective  |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product uses an 'extra-financial indicator improvement' approach, and outperformed Carbon intensity by at least 20% compared to its Benchmark ICE BofA European Currency High Yield Hedged EUR index during the reference period.

| Sustainability KPI Name | Value  | Benchmark   | Coverage |
|-------------------------|--|---|----------|
| Carbon intensity        | 91.24 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 303.12 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 90.11%   |
| Water intensity         | 694.25Thousands of cubic meters for corporates   | 23961.24Thousands of cubic meters for corporates  | 90.11%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a   |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
|                                     |  | weighted average   |  |
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                     | Sector   | Proportion | Country |
|-------------------------------------|--|------------|---------|
| ISPIM 5.148% - 10/06/2030           | Other monetary intermediation  | 2.35%      | IT      |
| IGT 3.5% - 15/06/2026 Call          | Gambling and betting activities  | 2.35%      | US      |
| TELEFO 2.875% Var - 24/06/2027 Perp | Wired telecommunications activities  | 2.27%      | NL      |
| IRM 3.875% - 15/11/2025 Call        | Renting and operating of own or leased real estate                                       | 2.19%      | GB      |
| CTLT 2.375% - 01/03/2028 Call       | Other human health activities  | 2.09%      | US      |
| SESGFP 5.625% Var - 29/01/2024 Perp | Wireless telecommunications activities   | 2.07%      | LU      |
| DB 5.625% Var - 19/05/2031 Call     | Other monetary intermediation  | 2.04%      | DE      |
| VOD 3.1% Var - 03/01/2079 Call      | Wireless telecommunications activities   | 2.04%      | GB      |
| CCK 3.375% - 15/05/2025 Call        | Manufacture of other articles of paper and paperboard                                    | 2.04%      | FR      |
| PAPREC 4% - 31/03/2025 Call         | Collection of non-hazardous waste  | 2.03%      | FR      |
| TITIM 2.375% - 12/10/2027 Call      | Wired telecommunications activities  | 1.98%      | IT      |
| ELISGP 2.875% - 15/02/2026 Call     | Other business support service activities n.e.c.   | 1.98%      | FR      |
| SIGCBL 2.125% - 18/06/2025 Call     | Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 1.96%      | LU      |
| LKQ 3.875% - 01/04/2024 Call        | Manufacture of motor vehicles, trailers and semi-trailers                                | 1.88%      | IT      |
| INTRUM 3.125% - 15/07/2024 Call     | Other monetary intermediation  | 1.87%      | SE      |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 13.25%     |
| Renting and operating of own or leased real estate                                       | 6.37%      |
| Wired telecommunications activities  | 5.96%      |
| Wireless telecommunications activities   | 5.91%      |
| Other human health activities  | 5.29%      |
| Satellite telecommunications activities  | 5.29%      |
| Manufacture of motor vehicles  | 4.63%      |
| Other software publishing  | 4.36%      |
| Manufacture of other chemical products n.e.c.  | 4.07%      |
| Other business support service activities n.e.c.   | 3.64%      |
| Manufacture of motor vehicles, trailers and semi-trailers                                | 2.77%      |
| Gambling and betting activities  | 2.35%      |
| Trusts, funds and similar financial entities   | 2.33%      |
| Manufacture of other articles of paper and paperboard                                    | 2.04%      |
| Collection of non-hazardous waste  | 2.03%      |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 1.96%      |
| Computer programming, consultancy and related activities                                 | 1.85%      |
| Manufacture of light metal packaging   | 1.84%      |
| Life insurance   | 1.83%      |
| Research and experimental development on biotechnology                                   | 1.8%       |
| Web portals  | 1.79%      |
| Warehousing and support activities for transportation                                    | 1.5%       |
| Service activities incidental to land transportation                                     | 1.36%      |
| Other  | 1.34%      |
| Retail trade, except of motor vehicles and motorcycles                                   | 1.29%      |
| Architectural and engineering activities, technical testing and analysis                 | 1.29%      |
| Renting and leasing of cars and light motor vehicles                                     | 1.29%      |
| Repair of other equipment  | 1.29%      |
| Other retail sale of new goods in specialised stores                                     | 1.28%      |
| Construction of utility projects for electricity and telecommunications                  | 1.26%      |

|   |       |
|---|-------|
| Manufacture of air and spacecraft and related machinery       | 1.26% |
| Civil engineering   | 1.18% |
| Manufacture of wearing apparel                                | 1.17% |
| Manufacture of batteries and accumulators                     | 1.15% |
| Manufacture of other parts and accessories for motor vehicles | 1.02% |
| Other retail sale in non-specialised stores                   | 0.98% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully

- **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 20.97% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 31.53% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 3.81% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

 **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.16% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 7.17 Score over max 10 | 6.67 Score over max 10 | 98.86%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### **Environment:**

| <b>Relevant AXA IM policies</b>   | <b>PAI indicator</b>  | <b>Units</b>  | <b>Measurement</b> |
|---|---|---|--------------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |                    |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |                    |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |                    |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |                    |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |                    |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |                    |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |                    |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |                    |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |                    |

#### **Social and Governance:**

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                              | Sector  | Proportion | Country |
|--|---|------------|---------|
| BKGLN 2.5% - 11/08/2031 Call                 | Construction of residential and non-residential buildings | 0.82%      | GB      |
| AXA WF ACT Social Bonds M Capitalisation EUR |   | 0.81%      | LU      |

|                                    |  |       |    |
|------------------------------------|--|-------|----|
| BPCEGP 5.25% - 16/04/2029          | Other monetary intermediation  | 0.8%  | FR |
| BABLN 1.375% - 13/09/2027 Call     | Warehousing and support activities for transportation                | 0.8%  | GB |
| BCICI 2.875% - 14/10/2031 Call     | Other monetary intermediation  | 0.8%  | CL |
| AEMSPA 1% - 02/11/2033 Call        | Production of electricity  | 0.78% | IT |
| GWILN 2.95% - 29/07/2026 Call      | Renting and operating of own or leased real estate                   | 0.78% | RO |
| WBD 4.279% - 15/03/2032 Call       | Motion picture, video and television programme production activities | 0.76% | US |
| BKIR 0.375% Var - 10/05/2027 Call  | Other monetary intermediation  | 0.75% | IE |
| ULFP 3.5% - 15/06/2029 Call        | Renting and operating of own or leased real estate                   | 0.75% | US |
| STLA 2.691% - 15/09/2031 Call      | Manufacture of motor vehicles  | 0.74% | US |
| TRTN 3.25% - 15/03/2032 Call       | Rental and leasing activities  | 0.74% | US |
| COF 2.359% Var - 29/07/2032 Call   | Other credit granting  | 0.73% | US |
| KBCBB 0.375% Var - 16/06/2027 Call | Other monetary intermediation  | 0.73% | BE |
| BNCHIL 2.99% - 09/12/2031 Call     | Other monetary intermediation  | 0.73% | CL |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation   | 21.45%     |
| Renting and operating of own or leased real estate                                | 7.01%      |
| Life insurance  | 4.35%      |
| Wireless telecommunications activities  | 3.63%      |
| Electricity, gas, steam and air conditioning supply                               | 3.03%      |
| Trusts, funds and similar financial entities                                      | 2.91%      |
| Manufacture of refined petroleum products   | 2.74%      |
| Manufacture of household and sanitary goods and of toilet requisites              | 2.69%      |
| Non-life insurance  | 2.53%      |
| Manufacture of motor vehicles   | 2.06%      |
| Production of electricity   | 2.03%      |
| Distribution of gaseous fuels through mains                                       | 1.97%      |
| Manufacture of electrical equipment   | 1.78%      |
| Wholesale of pharmaceutical goods   | 1.63%      |
| Manufacture of basic pharmaceutical products                                      | 1.48%      |
| Other credit granting   | 1.4%       |
| Security and commodity contracts brokerage  | 1.35%      |
| Manufacture of electronic components  | 1.32%      |
| Manufacture of food products  | 1.32%      |
| Motion picture, video and television programme production activities              | 1.29%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 1.24%      |
| Distribution of electricity   | 1.22%      |
| Retail sale of hardware, paints and glass in specialised stores                   | 1.21%      |
| Other postal and courier activities   | 1.13%      |
| Freight rail transport  | 1.1%       |
| Other information service activities n.e.c.                                       | 1.06%      |
| Other software publishing   | 1.06%      |
| Other human health activities   | 0.89%      |
| Construction of residential and non-residential buildings                         | 0.82%      |
| Other   | 0.81%      |
| Warehousing and support activities for transportation                             | 0.8%       |

|  |       |
|--|-------|
| Rental and leasing activities  | 0.74% |
| Advertising agencies   | 0.73% |
| Other retail sale in non-specialised stores  | 0.72% |
| Transmission of electricity  | 0.72% |
| General public administration activities   | 0.71% |
| Manufacture of fertilisers and nitrogen compounds  | 0.71% |
| Other activities auxiliary to financial services, except insurance and pension funding   | 0.7%  |
| Civil engineering  | 0.7%  |
| Retail trade, except of motor vehicles and motorcycles                                   | 0.7%  |
| Manufacture of ceramic sanitary fixtures   | 0.69% |
| Manufacture of electric domestic appliances  | 0.67% |
| Manufacture of paper and paperboard  | 0.67% |
| Manufacture of electrical and electronic equipment for motor vehicles                    | 0.65% |
| Manufacture of medical and dental instruments and supplies                               | 0.64% |
| Manufacture of electric motors, generators and transformers                              | 0.62% |
| Manufacture of pulp  | 0.61% |
| Manufacture of air and spacecraft and related machinery                                  | 0.6%  |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 0.59% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment              | 0.59% |
| Retail sale of clothing in specialised stores  | 0.58% |
| Treatment and disposal of non-hazardous waste  | 0.57% |
| Manufacture of other chemical products n.e.c.  | 0.56% |
| Manufacture of plastic packing goods   | 0.56% |
| Transport via pipeline   | 0.55% |
| Activities of holding companies  | 0.54% |
| Service activities incidental to air transportation                                      | 0.52% |
| Manufacture of beer  | 0.52% |
| Collection of non-hazardous waste  | 0.52% |
| Activities of insurance agents and brokers   | 0.51% |
| Manufacture of chemicals and chemical products   | 0.51% |

|   |       |
|---|-------|
| Manufacture of instruments and appliances for measuring, testing and navigation | 0.5%  |
| Manufacture of wearing apparel  | 0.48% |
| Wired telecommunications activities   | 0.43% |
| Web portals   | 0.4%  |
| Satellite telecommunications activities   | 0.19% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully

**What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 33.49% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 32.67% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 4.03% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 99.09% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: \_\_\_%

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Responsible Consumption and Production

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name                | Value | Benchmark | Coverage |
|--|-------|-----------|----------|
| Responsible Consumption and Production | 2.59  | 0.01      | 100%     |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments          | Sector   | Proportion | Country |
|--------------------------|--|------------|---------|
| BEST BUY CO INC XNYS USD | Retail sale of audio and video equipment in specialised stores | 3.27%      | US      |
| DEERE & CO XNYS USD      | Manufacture of agricultural and forestry machinery             | 3.18%      | US      |

|                                     |  |       |    |
|-------------------------------------|--|-------|----|
| AGILENT TECHNOLOGIES INC XNYS USD   | Manufacture of instruments and appliances for measuring, testing and navigation          | 3.17% | US |
| PROCTER & GAMBLE CO/THE XNYS USD    | Manufacture of household and sanitary goods and of toilet requisites                     | 3.13% | US |
| HP INC XNYS USD                     | Manufacture of computers and peripheral equipment  | 2.85% | US |
| WASTE CONNECTIONS INC XNYS USD      | Collection of non-hazardous waste  | 2.67% | US |
| SONOCO PRODUCTS CO XNYS USD         | Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 2.64% | US |
| BALL CORP XNYS USD                  | Manufacture of light metal packaging   | 2.6%  | US |
| APPLE INC XNGS USD                  | Manufacture of communication equipment   | 2.55% | US |
| AURUBIS AG XETR EUR                 | Copper production  | 2.54% | DE |
| REPUBLIC SERVICES INC XNYS USD      | Collection of non-hazardous waste  | 2.53% | US |
| DARLING INGREDIENTS INC XNYS USD    | Processing and preserving of meat  | 2.45% | US |
| UNITED RENTALS INC XNYS USD         | Rental and leasing activities  | 2.45% | US |
| CAMPBELL SOUP CO XNYS USD           | Other processing and preserving of fruit and vegetables                                  | 2.43% | US |
| SCHNITZER STEEL INDS INC-A XNGS USD | Waste collection, treatment and disposal activities, materials recovery                  | 2.11% | US |

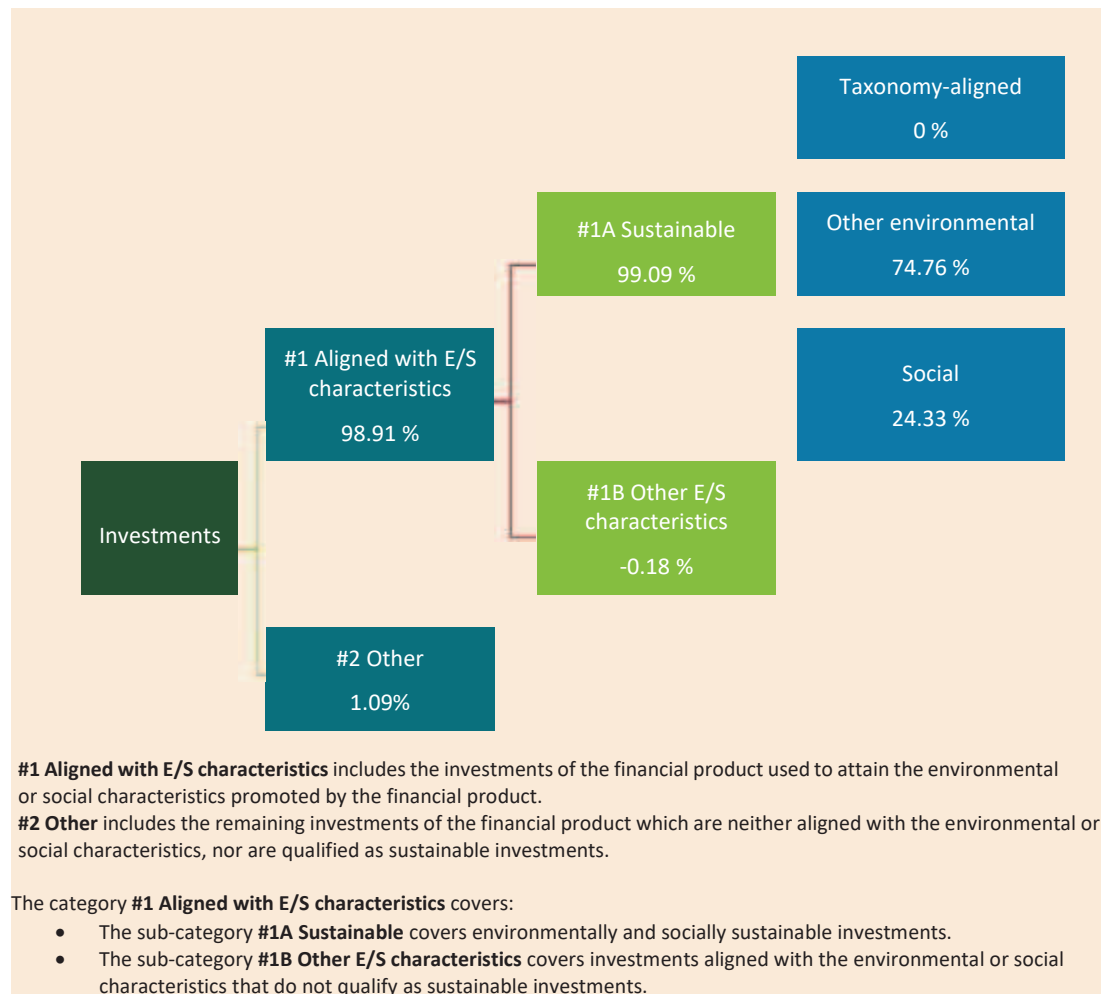

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of household and sanitary goods and of toilet requisites                     | 8.03%      |
| Manufacture of instruments and appliances for measuring, testing and navigation          | 7.51%      |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 6.99%      |
| Collection of non-hazardous waste  | 5.75%      |
| Other software publishing  | 4.56%      |
| Waste collection, treatment and disposal activities, materials recovery                  | 4.1%       |
| Retail sale of audio and video equipment in specialised stores                           | 3.27%      |
| Manufacture of agricultural and forestry machinery                                       | 3.18%      |
| Manufacture of motor vehicles  | 3.1%       |
| Manufacture of office and shop furniture   | 2.98%      |
| Manufacture of paper and paperboard  | 2.95%      |
| Manufacture of computers and peripheral equipment  | 2.85%      |
| Manufacture of light metal packaging   | 2.6%       |
| Manufacture of communication equipment   | 2.55%      |
| Copper production  | 2.54%      |
| Processing and preserving of meat  | 2.45%      |
| Rental and leasing activities  | 2.45%      |
| Other processing and preserving of fruit and vegetables                                  | 2.43%      |
| Manufacture of other chemical products n.e.c.  | 2.43%      |
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel              | 1.99%      |
| Manufacture of wearing apparel   | 1.75%      |
| Production of electricity  | 1.75%      |
| Manufacture of hollow glass  | 1.63%      |
| Manufacture of other food products n.e.c.  | 1.56%      |
| Retail sale of clothing in specialised stores  | 1.1%       |
| Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes       | 1.09%      |
| Manufacture of electronic components   | 1.06%      |
| Manufacture of footwear  | 1.05%      |
| Other food service activities  | 0.97%      |

|   |       |
|---|-------|
| Manufacture of soap and detergents, cleaning and polishing preparations     | 0.97% |
| Manufacture of refined petroleum products                                   | 0.93% |
| Manufacture of other special-purpose machinery n.e.c.                       | 0.92% |
| Wholesale trade, except of motor vehicles and motorcycles                   | 0.79% |
| Research and experimental development on biotechnology                      | 0.79% |
| Manufacture of plastic packing goods  | 0.74% |
| Manufacture of perfumes and toilet preparations                             | 0.73% |
| Distribution of gaseous fuels through mains                                 | 0.72% |
| Manufacture of food products  | 0.69% |
| Distribution of electricity   | 0.68% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment | 0.67% |
| Engineering activities and related technical consultancy                    | 0.66% |
| Wholesale of chemical products  | 0.61% |
| Retail trade, except of motor vehicles and motorcycles                      | 0.6%  |
| Water collection, treatment and supply                                      | 0.56% |
| Other manufacturing n.e.c.  | 0.51% |
| Operation of dairies and cheese making                                      | 0.44% |
| Technical testing and analysis  | 0.43% |
| Wired telecommunications activities   | 0.33% |
| Wireless telecommunications activities                                      | 0.3%  |
| Retail sale via mail order houses or via Internet                           | 0.26% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

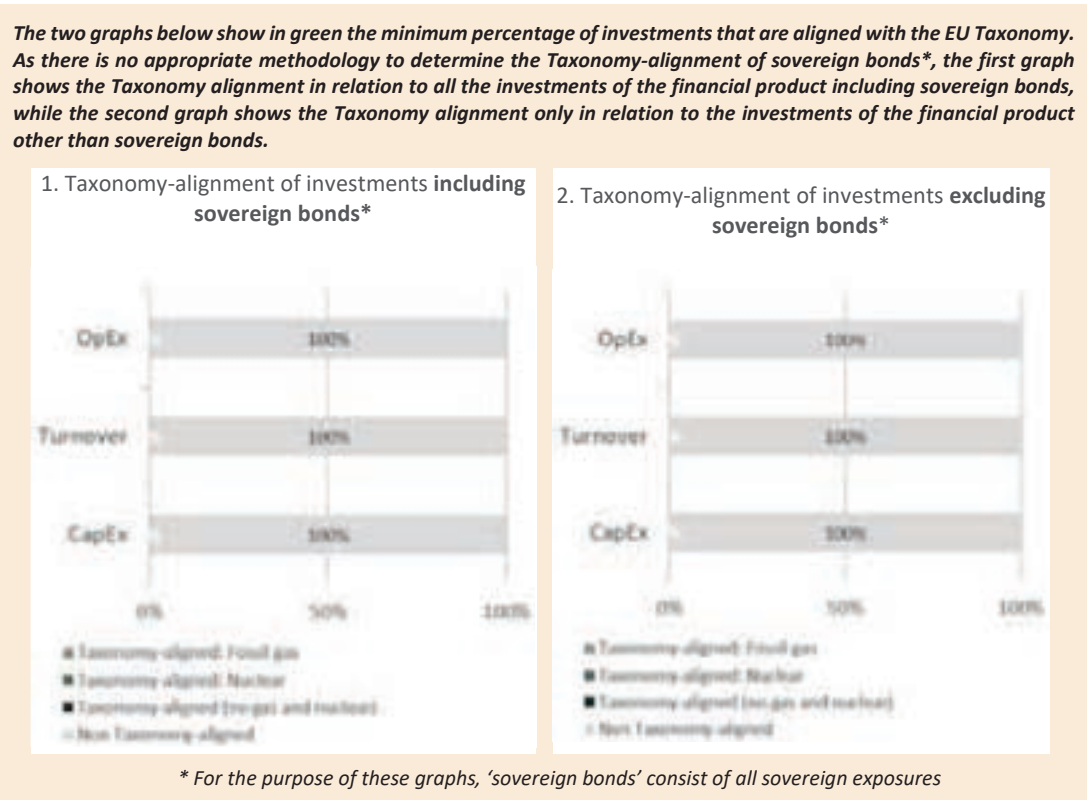

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**  
 The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**  
 Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**  
 The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 74.76% for this Financial Product during the reference period.  
 Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 24.33% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 1.09% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 50.79% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product uses an 'extra-financial indicator improvement' approach, and outperformed Carbon intensity by at least 20% compared to its Benchmark Bloomberg US Corporate Investment Grade index during the reference period.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 109.44 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 312.16 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 96.82%   |
| Water intensity         | 1147.05Thousands of cubic meters for corporates   | 34779.96Thousands of cubic meters for corporates  | 96.82%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3.Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability LinkedBonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a   |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
|                                     |  | weighted average   |  |
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                     | Sector   | Proportion | Country |
|-------------------------------------|--|------------|---------|
| BAC 2.456% Var - 22/10/2025 Call    | Other monetary intermediation  | 2.51%      | US      |
| T 5.15% - 15/11/2046 Call           | Wireless telecommunications activities   | 1.8%       | US      |
| JPM 3.509% Var - 23/01/2029 Call    | Other monetary intermediation  | 1.69%      | US      |
| GS 1.948% Var - 21/10/2027 Call     | Security and commodity contracts brokerage   | 1.64%      | US      |
| SCHW 2.9% - 03/03/2032 Call         | Other activities auxiliary to financial services, except insurance and pension funding | 1.49%      | US      |
| ABIBB 5.55% - 23/01/2049 Call       | Manufacture of beer  | 1.47%      | US      |
| NACN 0.55% Var - 15/11/2024 Call    | Other monetary intermediation  | 1.46%      | CA      |
| HLNLN 3.375% - 24/03/2027 Call      | Manufacture of household and sanitary goods and of toilet requisites                   | 1.43%      | US      |
| TFC 6.123% Var - 28/10/2033 Call    | Other monetary intermediation  | 1.4%       | US      |
| BMY 4.25% - 26/10/2049 Call         | Manufacture of basic pharmaceutical products   | 1.39%      | US      |
| MS 0.864% Var - 21/10/2025 Call     | Security and commodity contracts brokerage   | 1.37%      | US      |
| RABOBK 1.106% Var - 24/02/2027 Call | Other monetary intermediation  | 1.34%      | NL      |
| BPCEGP 2.045% Var - 19/10/2027 Call | Other monetary intermediation  | 1.32%      | FR      |
| BFCM 4.524% - 13/07/2025            | Other monetary intermediation  | 1.31%      | FR      |
| JXN 2.65% - 21/06/2024              | Life insurance   | 1.31%      | US      |

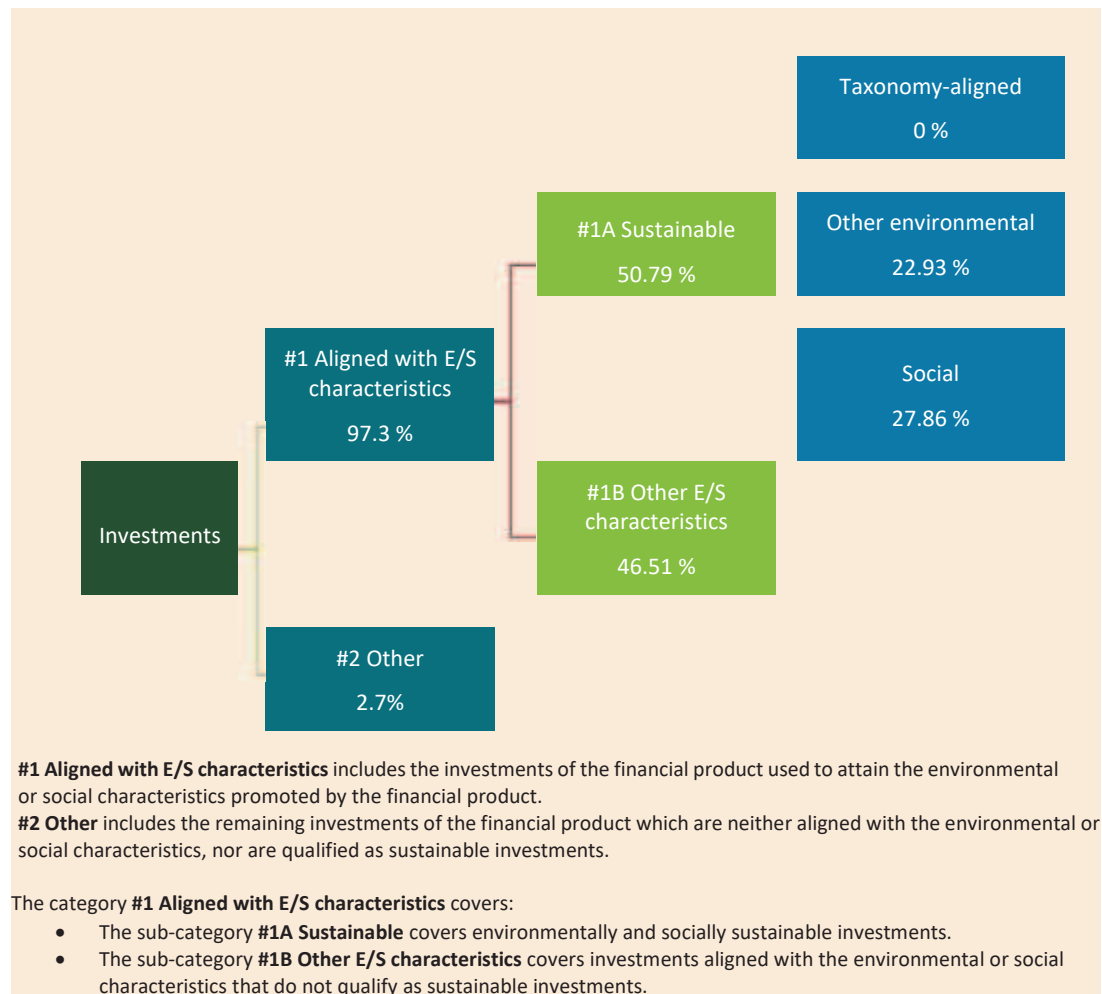

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 27.01%     |
| Security and commodity contracts brokerage   | 4.21%      |
| Wireless telecommunications activities   | 4.05%      |
| Life insurance   | 3.86%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 3.8%       |
| Renting and operating of own or leased real estate                                     | 3.69%      |
| Transport via pipeline   | 3.27%      |
| Non-life insurance   | 3.14%      |
| Manufacture of basic pharmaceutical products   | 2.99%      |
| Manufacture of motor vehicles  | 2.37%      |
| Retail sale of hardware, paints and glass in specialised stores                        | 2.04%      |
| Trusts, funds and similar financial entities   | 2%         |
| Manufacture of soft drinks, production of mineral waters and other bottled waters      | 1.68%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 1.54%      |
| Manufacture of games and toys  | 1.53%      |
| Wholesale of pharmaceutical goods  | 1.49%      |
| Manufacture of beer  | 1.47%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 1.43%      |
| Motion picture, video and television programme production activities                   | 1.39%      |
| Manufacture of electronic components   | 1.32%      |
| Other information service activities n.e.c.  | 1.32%      |
| Renting and leasing of trucks  | 1.25%      |
| Manufacture of medical and dental instruments and supplies                             | 1.24%      |
| Manufacture of agricultural and forestry machinery                                     | 1.23%      |
| Satellite telecommunications activities  | 1.23%      |
| General public administration activities   | 1.06%      |
| Service activities incidental to land transportation                                   | 1.06%      |
| Manufacture of computers and peripheral equipment                                      | 1.02%      |
| Financial leasing  | 1.01%      |

|   |       |
|---|-------|
| Packaging activities  | 0.97% |
| Manufacture of communication equipment                                      | 0.96% |
| Manufacture of plastic packing goods  | 0.9%  |
| Manufacture of food products  | 0.86% |
| Production of meat and poultry meat products                                | 0.85% |
| Freight rail transport  | 0.84% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment | 0.77% |
| Treatment and disposal of non-hazardous waste                               | 0.75% |
| Manufacture of chemicals and chemical products                              | 0.68% |
| Hospital activities   | 0.68% |
| Activities of holding companies   | 0.65% |
| Rental and leasing activities   | 0.61% |
| Accounting, bookkeeping and auditing activities, tax consultancy            | 0.6%  |
| Manufacture of margarine and similar edible fats                            | 0.57% |
| Research and experimental development on biotechnology                      | 0.55% |
| Retail trade, except of motor vehicles and motorcycles                      | 0.55% |
| Wired telecommunications activities   | 0.52% |
| Other manufacturing n.e.c.  | 0.52% |
| Restaurants and mobile food service activities                              | 0.52% |
| Manufacture of other chemical products n.e.c.                               | 0.45% |
| Agents involved in the sale of food, beverages and tobacco                  | 0.36% |
| Retail sale of medical and orthopaedic goods in specialised stores          | 0.36% |
| Manufacture of machinery and equipment n.e.c.                               | 0.34% |
| Collection of non-hazardous waste   | 0.23% |
| Reinsurance   | 0.19% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 22.93% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 27.86% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 2.7% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 32.67% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product uses an 'extra-financial indicator improvement' approach, and outperformed Carbon intensity and Water intensity by at least 30% compared to its Benchmark ICE BofA US High Yield index during the reference period.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 150.07 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 379.17 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 94.47%   |
| Water intensity         | 1868.34Thousands of cubic meters for corporates   | 24853.92Thousands of cubic meters for corporates  | 94.47%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3.Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer fell within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a   |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
|                                     |  | weighted average   |  |
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                 | Sector   | Proportion | Country |
|---------------------------------|--|------------|---------|
| OUT 5% - 15/08/2027 Call        | Advertising agencies   | 1.28%      | US      |
| CLVTSC 4.875% - 01/07/2029 Call | Other software publishing  | 1.19%      | US      |
| ENR 4.75% - 15/06/2028 Call     | Manufacture of batteries and accumulators  | 1.18%      | US      |
| ACIW 5.75% - 15/08/2026 Call    | Other software publishing  | 1.17%      | US      |
| NCR 5% - 01/10/2028 Call        | Manufacture of computers and peripheral equipment                                      | 1.15%      | US      |
| HQY 4.5% - 01/10/2029 Call      | Other activities auxiliary to financial services, except insurance and pension funding | 1.14%      | US      |
| THC 4.875% - 01/01/2026 Call    | Hospital activities  | 1.13%      | US      |
| DY 4.5% - 15/04/2029 Call       | Construction of utility projects for electricity and telecommunications                | 1.1%       | US      |
| WCC 7.25% - 15/06/2028 Call     | Manufacture of electrical equipment  | 1.1%       | US      |
| MATW 5.25% - 01/12/2025 Call    | Manufacture of other articles of paper and paperboard                                  | 1.08%      | US      |
| ZIGGO 6% - 15/01/2027 Call      | Satellite telecommunications activities  | 1.05%      | NL      |
| UIS 6.875% - 01/11/2027 Call    | Computer programming, consultancy and related activities                               | 1.04%      | US      |
| NSM 5.75% - 15/11/2031 Call     | Other monetary intermediation  | 1.03%      | US      |
| TGNA 5% - 15/09/2029 Call       | Publishing of newspapers   | 1.01%      | US      |
| ZMINFO 3.875% - 01/02/2029 Call | Other software publishing  | 1.01%      | US      |

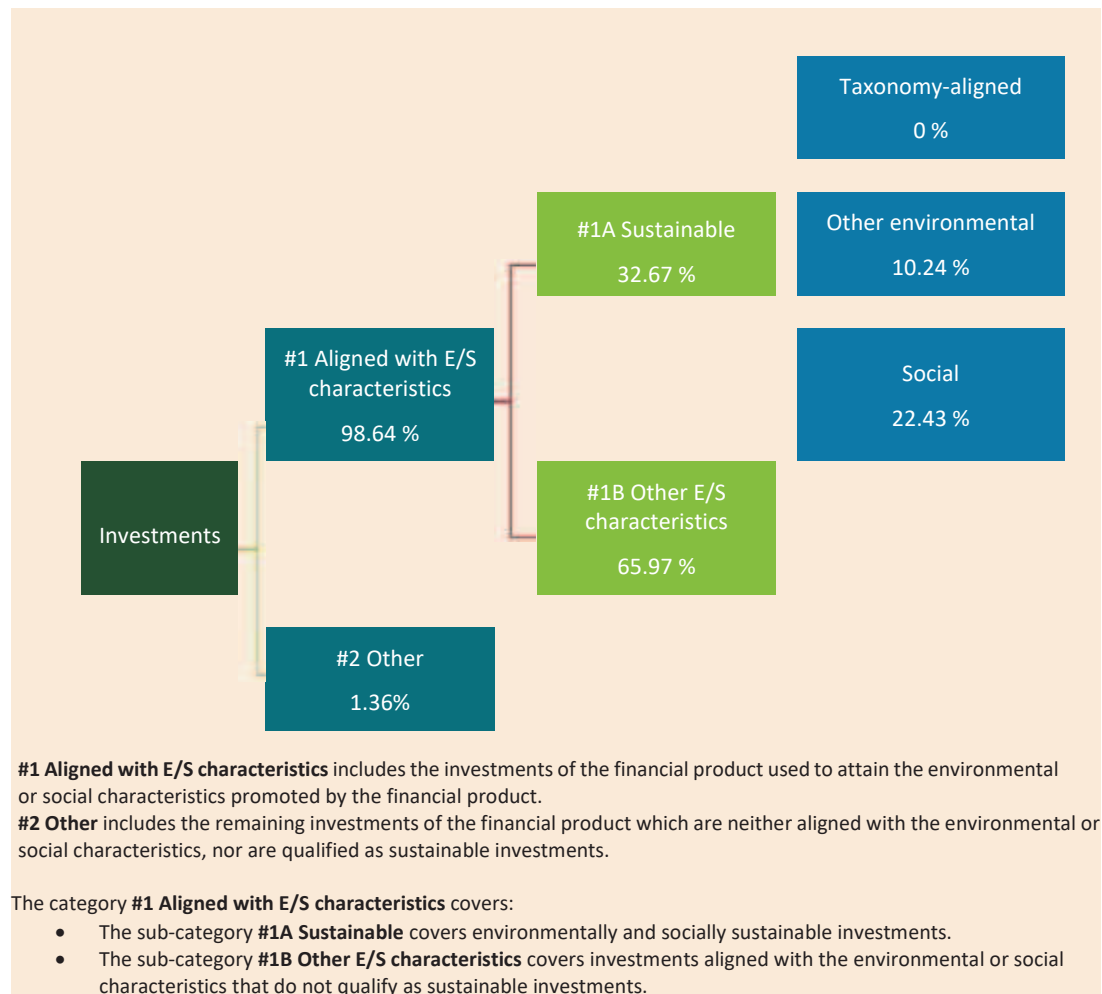

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 8.19%      |
| Satellite telecommunications activities  | 4.03%      |
| Renting and operating of own or leased real estate                                     | 3.77%      |
| Manufacture of other articles of paper and paperboard                                  | 3.53%      |
| Private security activities  | 3.2%       |
| Other monetary intermediation  | 3.02%      |
| Transport via pipeline   | 2.88%      |
| Other human health activities  | 2.88%      |
| Wired telecommunications activities  | 2.86%      |
| Manufacture of other chemical products n.e.c.  | 2.71%      |
| Manufacture of communication equipment   | 2.35%      |
| Manufacture of basic pharmaceutical products   | 2.35%      |
| Manufacture of electrical equipment  | 2.28%      |
| Restaurants and mobile food service activities   | 2.23%      |
| Agents involved in the sale of food, beverages and tobacco                             | 2.2%       |
| Computer programming, consultancy and related activities                               | 2.2%       |
| Manufacture of batteries and accumulators  | 2.05%      |
| Television programming and broadcasting activities                                     | 1.96%      |
| Manufacture of computers and peripheral equipment                                      | 1.94%      |
| Hospital activities  | 1.83%      |
| Rental and leasing activities  | 1.79%      |
| Other credit granting  | 1.63%      |
| Gambling and betting activities  | 1.62%      |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics        | 1.6%       |
| Publishing of newspapers   | 1.48%      |
| Manufacture of light metal packaging   | 1.47%      |
| Support activities to performing arts  | 1.41%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 1.36%      |
| Other food service activities  | 1.35%      |
| Other manufacturing n.e.c.   | 1.34%      |
| Manufacture of grain mill products   | 1.34%      |

|   |       |
|---|-------|
| Advertising agencies  | 1.28% |
| Manufacture of other builders' carpentry and joinery                    | 1.24% |
| Manufacture of motor vehicles   | 1.13% |
| Construction of utility projects for electricity and telecommunications | 1.1%  |
| Accommodation   | 1.06% |
| Manufacture of plastic packing goods                                    | 0.96% |
| Wireless telecommunications activities                                  | 0.94% |
| Wholesale trade, except of motor vehicles and motorcycles               | 0.93% |
| Sea and coastal passenger water transport                               | 0.89% |
| Sale of cars and light motor vehicles                                   | 0.89% |
| Manufacture of other special-purpose machinery n.e.c.                   | 0.87% |
| Wholesale of chemical products  | 0.84% |
| Real estate activities  | 0.83% |
| Manufacture of pesticides and other agrochemical products               | 0.83% |
| Research and experimental development on biotechnology                  | 0.82% |
| Hotels and similar accommodation  | 0.78% |
| Manufacture of other organic basic chemicals                            | 0.76% |
| Web portals   | 0.72% |
| Motion picture, video and television programme production activities    | 0.72% |
| Manufacture of condiments and seasonings                                | 0.69% |
| Processing and preserving of meat                                       | 0.66% |
| Manufacture of hollow glass   | 0.65% |
| Retail sale of automotive fuel in specialised stores                    | 0.61% |
| Other information service activities n.e.c.                             | 0.55% |
| Manufacture of underwear  | 0.55% |
| Manufacture of games and toys   | 0.45% |
| Manufacture of cement   | 0.43% |
| Manufacture of air and spacecraft and related machinery                 | 0.39% |
| Manufacture of other tanks, reservoirs and containers of metal          | 0.32% |
| Manufacture of other food products n.e.c.                               | 0.31% |
| Book publishing   | 0.28% |

|  |       |
|--|-------|
| Manufacture of sports goods  | 0.26% |
| Manufacture of household and sanitary goods and of toilet requisites | 0.25% |
| Manufacture of footwear  | 0.23% |
| Manufacture of food products   | 0.22% |
| Manufacture of electronic components                                 | 0.2%  |
| Printing and reproduction of recorded media                          | 0.2%  |
| Support activities for petroleum and natural gas extraction          | 0.18% |
| Manufacture of builders ware of plastic                              | 0.07% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

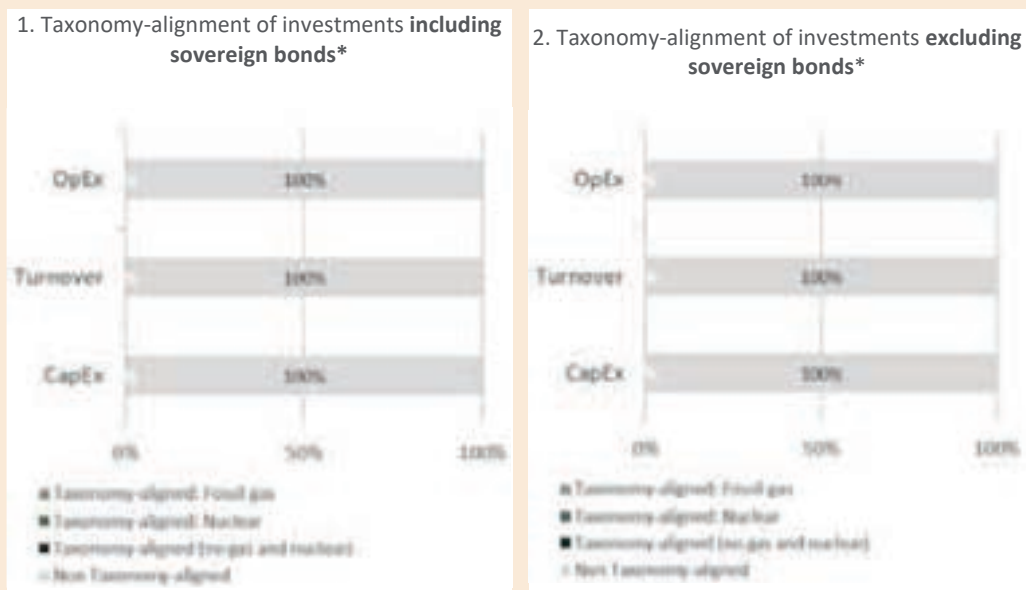

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 10.24% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 22.43% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 1.36% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production

derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 31.03% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 5.26 Score over max 10 | 4.63 Score over max 10 | 87.52%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                   | Sector  | Proportion | Country |
|-----------------------------------|---|------------|---------|
| NWSZF 5.75% Var - 31/01/2024 Perp | Construction of residential and non-residential buildings | 2.88%      | HK      |
| ANZ 6.742% - 08/12/2032           | Other monetary intermediation                             | 2.67%      | AU      |
| ICBCAS 3.2% Var - 24/09/2026 Perp | Other monetary intermediation                             | 2.57%      | CN      |
| CATHAY 4.875% - 17/08/2026        | Passenger air transport                                   | 2.24%      | HK      |

|                                    |  |       |    |
|------------------------------------|--|-------|----|
| CHALUM 5% Var - 21/05/2023 Perp    | Architectural and engineering activities, technical testing and analysis | 2.09% | CN |
| VIETNM 4.8% - 19/11/2024           | General public administration activities                                 | 2.05% | VN |
| MINTTB 3.1% Var - 29/06/2023 Perp  | Hotels and similar accommodation   | 2.04% | TH |
| CHOHIN 5.7% Var - 15/07/2024 Perp  | Other monetary intermediation  | 1.99% | HK |
| SIASP 3% - 20/07/2026 Call         | Passenger air transport  | 1.96% | SG |
| FWDINS 5.5% Var - 01/08/2023 Perp  | Life insurance   | 1.94% | HK |
| BHARTI 5.65% Var - 15/01/2025 Perp | Wired telecommunications activities                                      | 1.92% | IN |
| MEDCIJ 6.75% - 30/01/2025 Call     | Extraction of crude petroleum and natural gas                            | 1.88% | SG |
| COGARD 7.25% - 08/04/2026 Call     | Renting and operating of own or leased real estate                       | 1.84% | CN |
| C O - 25/07/2024 Conv              | Security and commodity contracts brokerage                               | 1.79% | CN |
| BBTNIJ 4.2% - 23/01/2025           | Trusts, funds and similar financial entities                             | 1.76% | ID |

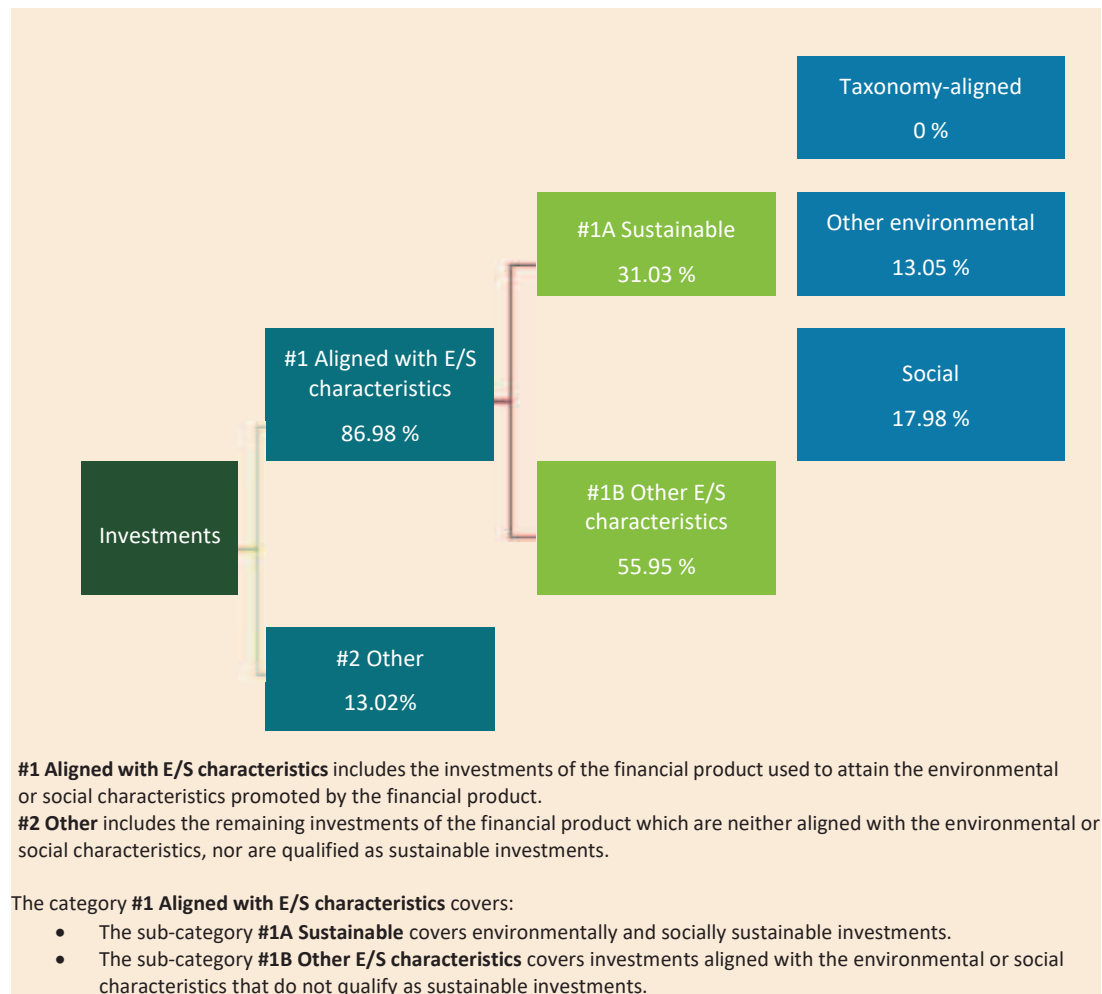

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation   | 20.83%     |
| Renting and operating of own or leased real estate                          | 18.58%     |
| Gambling and betting activities   | 6.28%      |
| Passenger air transport   | 5.06%      |
| General public administration activities                                    | 5%         |
| Hotels and similar accommodation  | 4.63%      |
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel | 3.77%      |
| Production of electricity   | 3.3%       |
| Wired telecommunications activities   | 3.21%      |
| Construction of residential and non-residential buildings                   | 2.88%      |
| Life insurance  | 2.4%       |
| Extraction of crude petroleum and natural gas                               | 2.27%      |
| Construction of utility projects for electricity and telecommunications     | 2.24%      |
| Architectural and engineering activities, technical testing and analysis    | 2.09%      |
| Wireless telecommunications activities                                      | 2.01%      |
| Security and commodity contracts brokerage                                  | 1.79%      |
| Trusts, funds and similar financial entities                                | 1.76%      |
| Service activities incidental to water transportation                       | 1.62%      |
| Distribution of gaseous fuels through mains                                 | 1.31%      |
| Service activities incidental to air transportation                         | 1.2%       |
| Non-life insurance  | 1.18%      |
| Distribution of electricity   | 1%         |
| Computer consultancy activities   | 0.86%      |
| Civil engineering   | 0.81%      |
| Wholesale of textiles   | 0.75%      |
| Web portals   | 0.55%      |
| Manufacture of communication equipment                                      | 0.51%      |
| Financial leasing   | 0.49%      |
| Manufacture of cement   | 0.45%      |
| Activities of holding companies   | 0.32%      |
| Other credit granting   | 0.24%      |

|   |       |
|---|-------|
| Manufacture of other chemical products n.e.c. | 0.2%  |
| Other retail sale in non-specialised stores   | 0.2%  |
| Water collection, treatment and supply        | 0.18% |
| Manufacture of textiles                       | 0.03% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

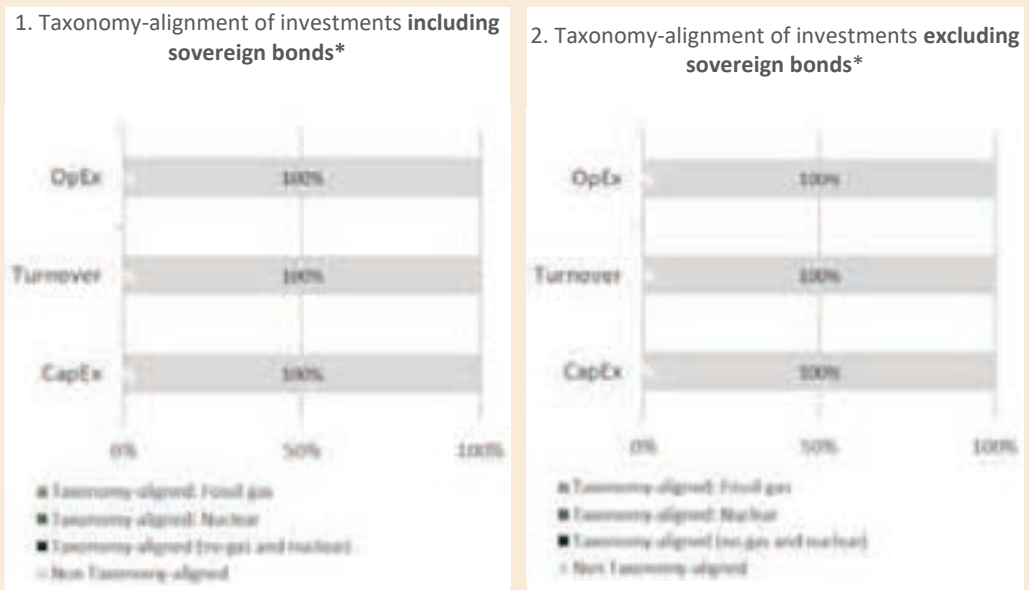

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies.  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

**What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 13.05% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 17.98% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 13.02% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether

Not applicable.

the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ___%                   | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 18.81% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ___%                           | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 5.42 Score over max 10 | 4.73 Score over max 10 | 89.4%    |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                   | Sector  | Proportion | Country |
|-----------------------------------|---|------------|---------|
| T 0.125% - 31/08/2023             | General public administration activities            | 5.2%       | US      |
| MINTTB 3.1% Var - 29/06/2023 Perp | Hotels and similar accommodation                    | 2.6%       | TH      |
| HKAA 2.1% Var - 08/03/2026 Perp   | Service activities incidental to air transportation | 2.39%      | HK      |
| SIASP 3% - 20/07/2026 Call        | Passenger air transport                             | 2.34%      | SG      |

|                                     |   |       |    |
|-------------------------------------|---|-------|----|
| KOHNPW 4.25% - 27/07/2027           | Production of electricity                             | 2.27% | KR |
| KOMRMR 3.25% - 17/04/2024           | Other mining and quarrying n.e.c.                     | 2.27% | MX |
| CDBFLC 2.875% Var - 28/09/2030 Call | Financial leasing                                     | 2.16% | CN |
| COFCHK 4.625% - 12/11/2023          | Food and beverage service activities                  | 2.15% | VG |
| CCBL 3.5% - 16/05/2024              | Financial leasing                                     | 2.1%  | IE |
| CASHLD 4% Var - 12/07/2026 Perp     | Wired telecommunications activities                   | 1.98% | HK |
| PSASP 2.125% - 05/09/2029 Call      | Service activities incidental to water transportation | 1.82% | SG |
| EXIMBK 3.875% - 12/03/2024          | Other monetary intermediation                         | 1.78% | IN |
| ICBCIL 3.625% - 19/05/2026          | Financial leasing                                     | 1.71% | CN |
| BBTNIJ 4.2% - 23/01/2025            | Trusts, funds and similar financial entities          | 1.66% | ID |
| OCBCSP 1.832% Var - 10/09/2030 Call | Other monetary intermediation                         | 1.61% | SG |

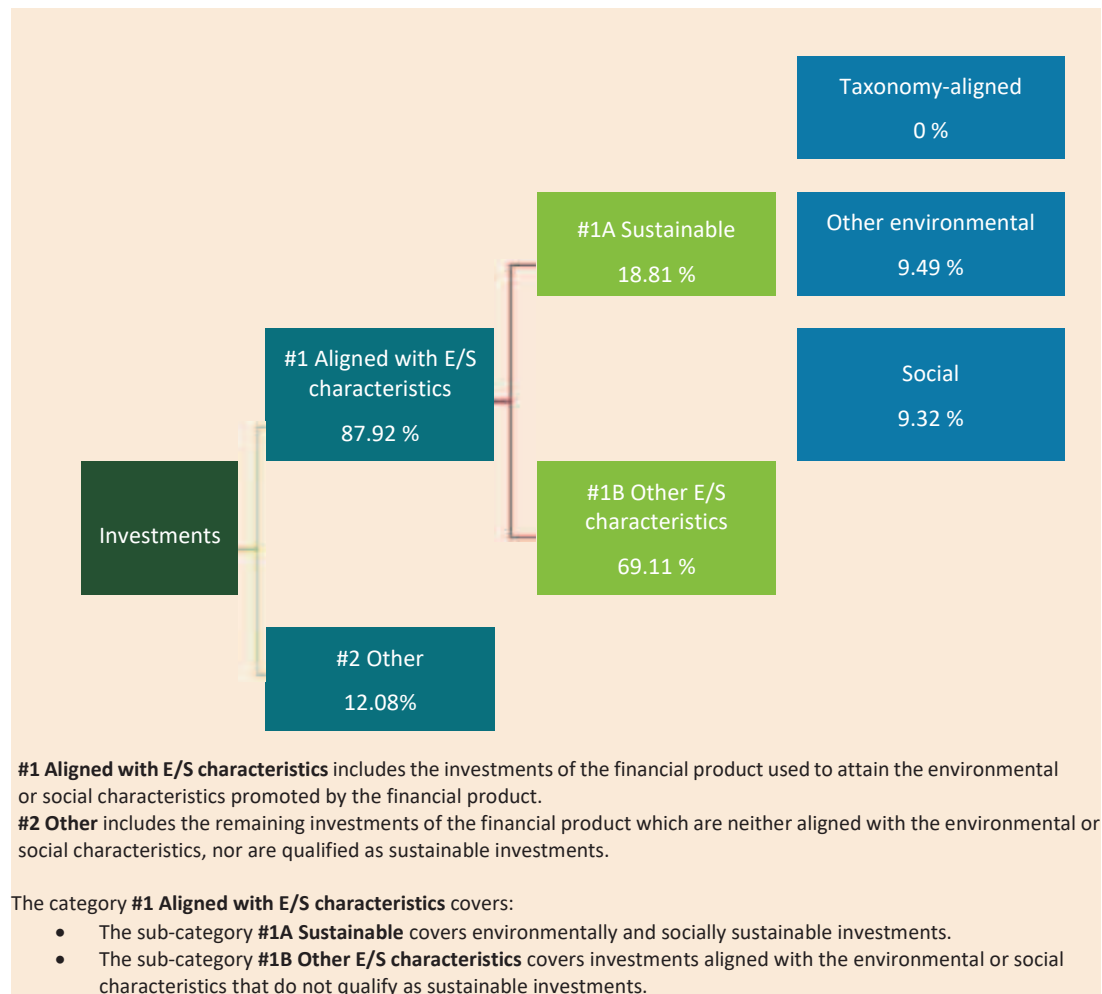

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 25.35%     |
| General public administration activities                                 | 10.26%     |
| Financial leasing  | 8.59%      |
| Hotels and similar accommodation   | 4.3%       |
| Passenger air transport  | 3.78%      |
| Service activities incidental to air transportation                      | 3.4%       |
| Renting and operating of own or leased real estate                       | 3.38%      |
| Production of electricity  | 3.35%      |
| Distribution of gaseous fuels through mains                              | 3.08%      |
| Service activities incidental to water transportation                    | 3.02%      |
| Manufacture of refined petroleum products                                | 2.42%      |
| Wired telecommunications activities                                      | 2.33%      |
| Other mining and quarrying n.e.c.  | 2.27%      |
| Food and beverage service activities                                     | 2.15%      |
| Land transport and transport via pipelines                               | 2.02%      |
| Construction of utility projects for electricity and telecommunications  | 2.01%      |
| Manufacture of chemicals and chemical products                           | 1.92%      |
| Non-life insurance   | 1.71%      |
| Trusts, funds and similar financial entities                             | 1.66%      |
| Distribution of electricity  | 1.63%      |
| Wireless telecommunications activities                                   | 1.61%      |
| Life insurance   | 1.36%      |
| Manufacture of air and spacecraft and related machinery                  | 1.32%      |
| Activities of holding companies  | 1.26%      |
| Manufacture of consumer electronics                                      | 1.04%      |
| Security and commodity contracts brokerage                               | 0.96%      |
| Architectural and engineering activities, technical testing and analysis | 0.85%      |
| Manufacture of other chemical products n.e.c.                            | 0.68%      |
| Service activities incidental to land transportation                     | 0.61%      |
| Travel agency activities   | 0.36%      |
| Freight rail transport   | 0.35%      |

|   |       |
|---|-------|
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel | 0.34% |
| Other credit granting   | 0.26% |
| Construction of residential and non-residential buildings                   | 0.2%  |
| Manufacture of other organic basic chemicals                                | 0.16% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

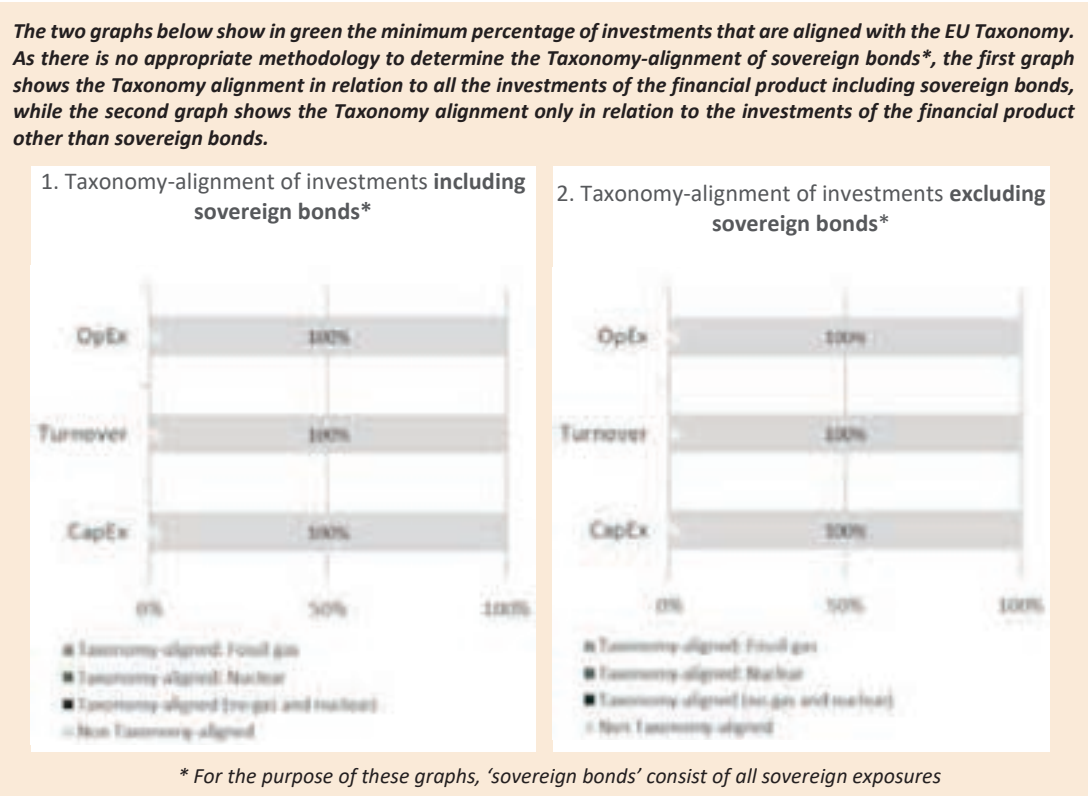

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy
- No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

**What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 9.49% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 9.32% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 12.08% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether

Not applicable.

the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 21.72% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the reference period, the Financial Product has applied a ESG Score Upgrade Approach approach on its investment universe, according to which the ESG scoring of the Financial Product has been higher than the scoring of the investment universe after removing at least the 20% worst ESG Scores, on a weighted average basis.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 5.21 Score over max 10 | 4.05 Score over max 10 | 93.92%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR. Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring. AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG

(on a scale from + 10 corresponding to 'significant contributing impact' to - 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units            | Measurement |
|--|---|------------------|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|                                     |   |   |  |
|-------------------------------------|---|---|--|
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap         | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members          |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                    | Sector  | Proportion | Country |
|------------------------------------|---|------------|---------|
| TENCENT HOLDINGS LTD XHKG HKD      | Web portals                                       | 5.2%       | CN      |
| ALIBABA GROUP HOLDING LTD XHKG HKD | Retail sale via mail order houses or via Internet | 4.57%      | CN      |
| MEITUAN-CLASS B XHKG HKD           | Web portals                                       | 4.54%      | CN      |
| CHINA MERCHANTS BANK-H XHKG HKD    | Other monetary intermediation                     | 3.97%      | CN      |

|                                       |   |       |    |
|---------------------------------------|---|-------|----|
| HAN'S LASER TECHNOLOGY IN-A XSEC CNY  | Wholesale of other machinery and equipment        | 3.74% | CN |
| CHINA LONGYUAN POWER GROUP-H XHKG HKD | Production of electricity                         | 3.72% | CN |
| NETEASE INC XHKG HKD                  | Publishing of computer games                      | 3.57% | CN |
| JD.COM INC - CL A XHKG HKD            | Retail sale via mail order houses or via Internet | 3.29% | CN |
| PING AN INSURANCE GROUP CO-H XHKG HKD | Life insurance                                    | 3.27% | CN |
| WULIANGYE YIBIN CO LTD-A XSEC CNY     | Distilling, rectifying and blending of spirits    | 3.15% | CN |
| FUSHENG PRECISION CO LTD XTAI TWD     | Manufacture of sports goods                       | 3.05% | TW |
| CONTEMPORARY AMPEREX TECHN-A XSEC CNY | Manufacture of batteries and accumulators         | 2.99% | CN |
| YUM CHINA HOLDINGS INC XHKG HKD       | Restaurants and mobile food service activities    | 2.91% | CN |
| UNI-PRESIDENT CHINA HOLDINGS XHKG HKD | Processing of tea and coffee                      | 2.84% | CN |
| HAIER SMART HOME CO LTD-H XHKG HKD    | Manufacture of electric domestic appliances       | 2.76% | CN |

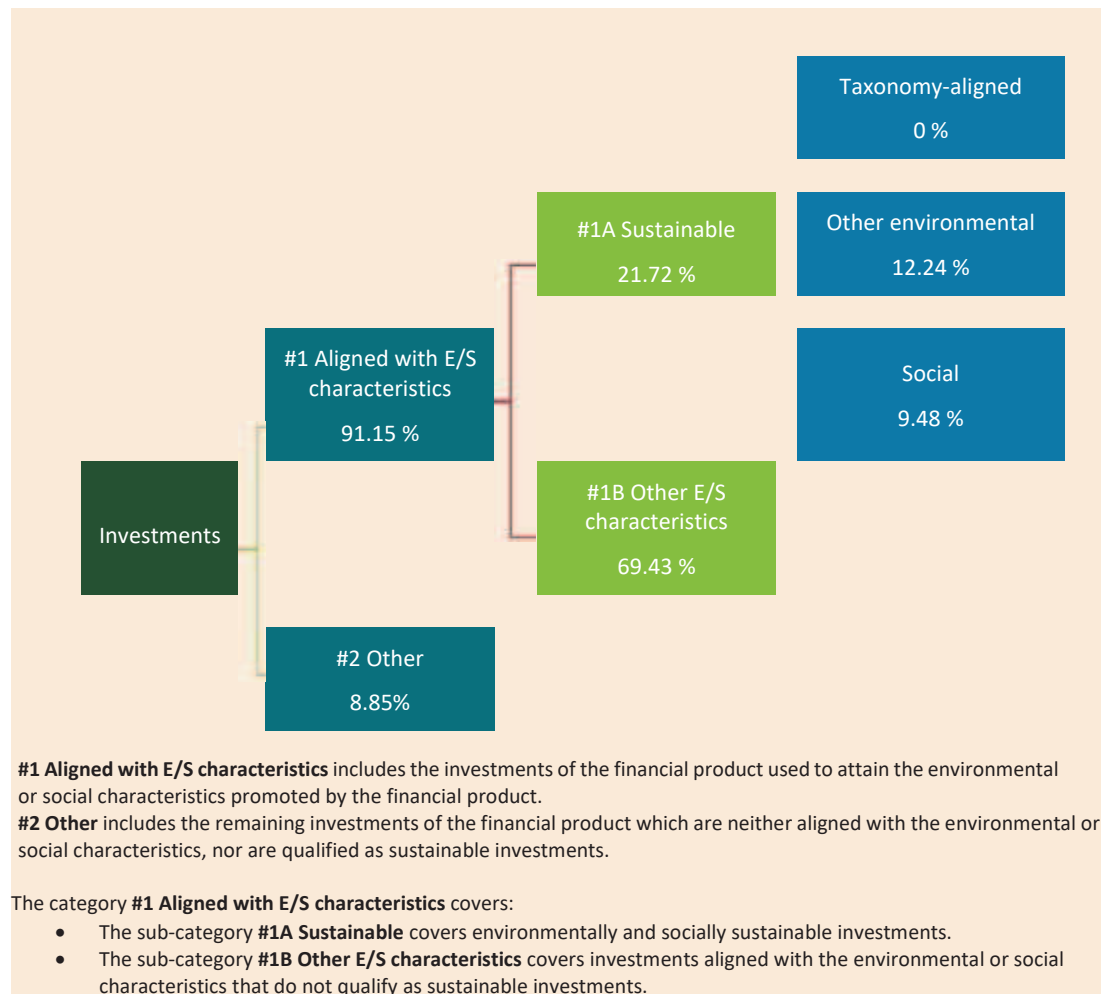

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Web portals   | 10.43%     |
| Other monetary intermediation   | 8.09%      |
| Retail sale via mail order houses or via Internet                                 | 7.86%      |
| Manufacture of other electrical equipment   | 5.01%      |
| Manufacture of batteries and accumulators   | 4.71%      |
| Wholesale of other machinery and equipment  | 3.74%      |
| Production of electricity   | 3.72%      |
| Publishing of computer games  | 3.57%      |
| Life insurance  | 3.27%      |
| Distilling, rectifying and blending of spirits                                    | 3.15%      |
| Manufacture of sports goods   | 3.05%      |
| Restaurants and mobile food service activities                                    | 2.91%      |
| Processing of tea and coffee  | 2.84%      |
| Manufacture of motor vehicles   | 2.81%      |
| Manufacture of electric domestic appliances                                       | 2.76%      |
| Other human health activities   | 2.72%      |
| Manufacture of wearing apparel  | 2.19%      |
| Other retail sale of new goods in specialised stores                              | 2.07%      |
| Manufacture of beer   | 1.91%      |
| Manufacture of electric motors, generators and transformers                       | 1.71%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 1.67%      |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics   | 1.66%      |
| Manufacture of medical and dental instruments and supplies                        | 1.55%      |
| Manufacture of condiments and seasonings  | 1.45%      |
| Manufacture of instruments and appliances for measuring, testing and navigation   | 1.43%      |
| Manufacture of computer, electronic and optical products                          | 1.42%      |
| Administration of financial markets   | 1.4%       |
| Manufacture of other special-purpose machinery n.e.c.                             | 1.26%      |
| Raising of swine/pigs   | 1.22%      |
| Other software publishing   | 1.09%      |

|  |       |
|--|-------|
| Management of real estate on a fee or contract basis   | 1.08% |
| Manufacture of pharmaceutical preparations             | 1.08% |
| Transport via pipeline                                 | 1.02% |
| Financial leasing                                      | 0.95% |
| Wholesale of pharmaceutical goods                      | 0.92% |
| Research and experimental development on biotechnology | 0.87% |
| Manufacture of other chemical products n.e.c.          | 0.72% |
| Hotels and similar accommodation                       | 0.69% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

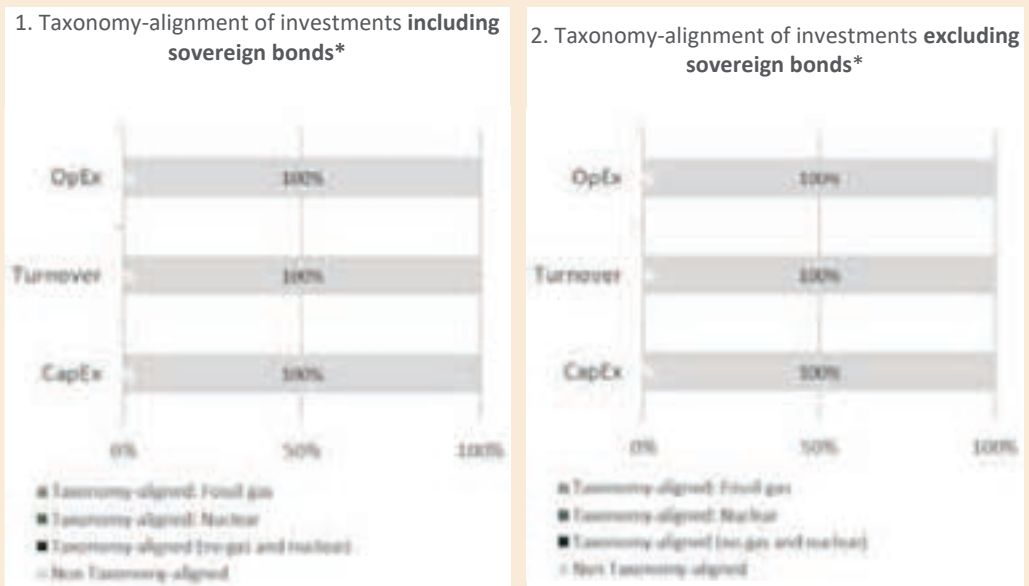

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 12.24% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 9.48% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 8.85% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic

Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO   |
|--|--|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 87.3% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective  |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the reference period, the Financial Product has applied a ESG Score Upgrade Approach approach on its investment universe, according to which the ESG scoring of the Financial Product has been higher than the scoring of the investment universe after removing at least the 20% worst ESG Scores, on a weighted average basis.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.27 Score over max 10 | 3.99 Score over max 10 | 96.02%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer fell within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2022-12-30

| Top investments            | Sector                                     | Proportion | Country |
|----------------------------|--|------------|---------|
| SDBC 3.07% - 24/03/2024    | Other monetary intermediation              | 13.07%     | CN      |
| HKINTL 3% - 30/11/2026     | General public administration activities   | 9.49%      | HK      |
| KFW 2.75% - 03/03/2025     | Other monetary intermediation              | 4.79%      | DE      |
| GUAMET 1.579% - 23/09/2026 | Land transport and transport via pipelines | 3.46%      | VG      |
| SZMETR 3.5% - 02/03/2024   | Land transport and transport via pipelines | 3.27%      | CN      |

|                                |   |       |    |
|--------------------------------|---|-------|----|
| NJMETR 3.48% - 26/04/2024      | Construction of railways and underground railways                       | 3.25% | CN |
| CHGRID 3.32% - 30/03/2023      | Distribution of electricity   | 3.24% | CN |
| JSRALG 2.99% - 19/03/2023      | Construction of railways and underground railways                       | 3.24% | CN |
| RY 4.1% - 16/06/2025           | Other monetary intermediation   | 3.23% | CA |
| SPDBFL 3.38% - 08/07/2024      | Financial leasing   | 3.22% | CN |
| CHENER 4.11% - 29/11/2024      | Construction of utility projects for electricity and telecommunications | 3.21% | CN |
| BOCHKL 2.8% - 09/07/2023       | Other monetary intermediation   | 3.2%  | HK |
| OCBCCN 3.24% - 17/11/2025      | Other monetary intermediation   | 3.18% | CN |
| SHENZH 2.65% - 07/11/2025      | General public administration activities                                | 3.15% | CN |
| CHGRID 3.25% - 07/04/2027 Call | Distribution of electricity   | 3.15% | GB |

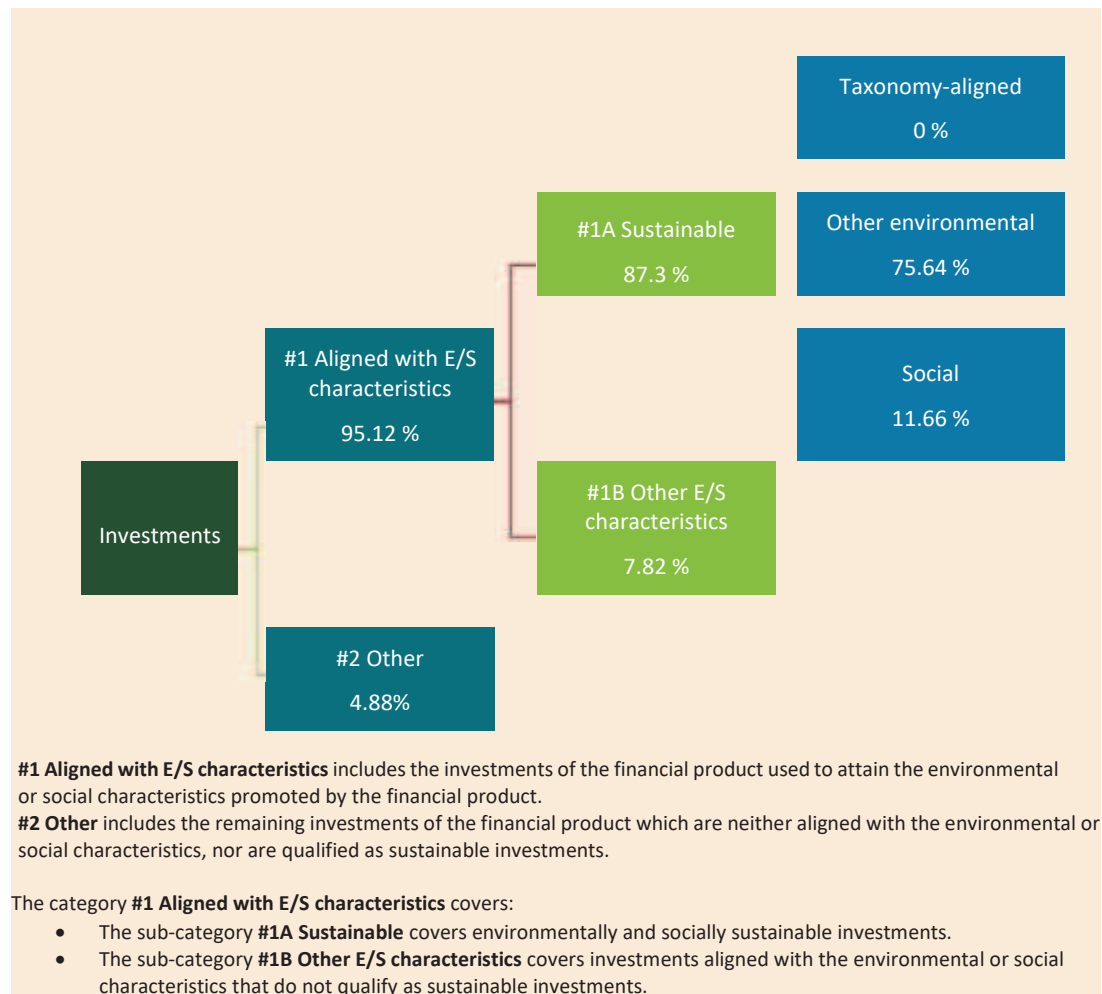

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation   | 38.81%     |
| General public administration activities                                | 15.7%      |
| Land transport and transport via pipelines                              | 6.72%      |
| Construction of railways and underground railways                       | 6.49%      |
| Distribution of electricity   | 6.39%      |
| Renting and operating of own or leased real estate                      | 6.2%       |
| Financial leasing   | 5.92%      |
| Construction of utility projects for electricity and telecommunications | 3.21%      |
| Other credit granting   | 2.05%      |
| Security and commodity contracts brokerage                              | 1.23%      |
| Tertiary education  | 1.15%      |
| Manufacture of motor vehicles   | 1.03%      |
| Activities of holding companies   | 0.98%      |
| Production of electricity   | 0.95%      |
| Distribution of gaseous fuels through mains                             | 0.62%      |
| Manufacture of cement   | 0.49%      |
| Manufacture of electronic components                                    | 0.44%      |
| Water collection, treatment and supply                                  | 0.43%      |
| Construction of residential and non-residential buildings               | 0.4%       |
| Gambling and betting activities   | 0.4%       |
| Service activities incidental to air transportation                     | 0.38%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

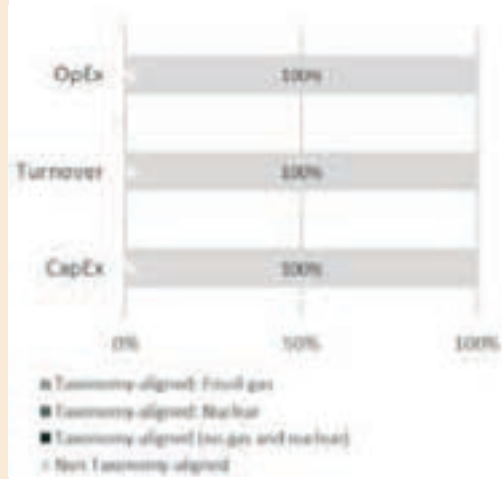

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 75.64% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 11.66% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 4.88% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?  |   |
|--|---|
| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 53.08% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 7.33 Score over max 10 | 6.15 Score over max 10 | 98.7%    |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments           | Sector                                       | Proportion | Country |
|---------------------------|--|------------|---------|
| AWF Eur Inf P MC          | Trusts, funds and similar financial entities | 6.84%      | LU      |
| ISHARES PHYSICAL GOLD ETC | Trusts, funds and similar financial entities | 5.23%      | IE      |
| BTF 0 - 06/09/2023        | General public administration activities     | 3.27%      | FR      |

|  |  |       |    |
|--|--|-------|----|
| AXA WF Dynamic Optimal<br>Income M Capitalisation<br>USD |  | 2.23% | LU |
| NESTLE SA-REG XSWX CHF                                   | Manufacture of food<br>products  | 1.57% | CH |
| PRYSMIAN SPA MTAA EUR                                    | Manufacture of electrical<br>equipment                                     | 1.26% | IT |
| RIO TINTO PLC XLON GBP                                   | Mining of iron ores  | 0.98% | GB |
| VOLVO AB-B SHS XSTO SEK                                  | Manufacture of motor<br>vehicles   | 0.94% | SE |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 19.63%     |
| Trusts, funds and similar financial entities   | 14.54%     |
| General public administration activities   | 3.31%      |
| Manufacture of basic pharmaceutical products   | 3.09%      |
| Manufacture of refined petroleum products  | 3.06%      |
| Manufacture of motor vehicles  | 2.87%      |
| Wireless telecommunications activities   | 2.83%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 2.4%       |
| Other  | 2.33%      |
| Web portals  | 2.32%      |
| Other software publishing  | 2.26%      |
| Electricity, gas, steam and air conditioning supply                                    | 2.16%      |
| Renting and operating of own or leased real estate                                     | 2.13%      |
| Manufacture of medical and dental instruments and supplies                             | 2.1%       |
| Manufacture of food products   | 1.77%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 1.57%      |
| Manufacture of electrical equipment  | 1.38%      |
| Transmission of electricity  | 1.38%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 1.17%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 1.14%      |
| Production of electricity  | 1.13%      |
| Other information service activities n.e.c.  | 1.05%      |
| Manufacture of electric motors, generators and transformers                            | 1.01%      |
| Mining of iron ores  | 0.98%      |
| Distilling, rectifying and blending of spirits   | 0.93%      |
| Mining of other non-ferrous metal ores   | 0.92%      |
| Security and commodity contracts brokerage   | 0.84%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 0.84%      |
| Manufacture of other non-metallic mineral products                                     | 0.8%       |
| Manufacture of other articles of paper and paperboard                                  | 0.77%      |

|   |       |
|---|-------|
| Research and experimental development on biotechnology                            | 0.75% |
| Manufacture of luggage, handbags and the like, saddlery and harness               | 0.7%  |
| Non-life insurance  | 0.64% |
| Computer programming activities   | 0.59% |
| Life insurance  | 0.52% |
| Administration of financial markets   | 0.52% |
| Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres  | 0.49% |
| Retail sale of clothing in specialised stores                                     | 0.47% |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.46% |
| Business and other management consultancy activities                              | 0.45% |
| Support activities for petroleum and natural gas extraction                       | 0.43% |
| Civil engineering   | 0.42% |
| Manufacture of ovens, furnaces and furnace burners                                | 0.41% |
| Manufacture of beer   | 0.39% |
| Other credit granting   | 0.39% |
| Manufacture of industrial gases   | 0.39% |
| Manufacture of other chemical products n.e.c.                                     | 0.38% |
| Manufacture of chemicals and chemical products                                    | 0.37% |
| Manufacture of jewellery and related articles                                     | 0.37% |
| Manufacture of air and spacecraft and related machinery                           | 0.36% |
| Advertising agencies  | 0.35% |
| Wired telecommunications activities   | 0.34% |
| Manufacture of machinery for mining, quarrying and construction                   | 0.33% |
| Manufacture of other organic basic chemicals                                      | 0.33% |
| Manufacture of motor vehicles, trailers and semi-trailers                         | 0.32% |
| Water collection, treatment and supply  | 0.31% |
| Service activities incidental to land transportation                              | 0.3%  |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics   | 0.29% |
| Manufacture of footwear   | 0.28% |
| Distribution of gaseous fuels through mains                                       | 0.27% |

|   |       |
|---|-------|
| Distribution of electricity   | 0.26% |
| Manufacture of musical instruments  | 0.25% |
| Retail sale of audio and video equipment in specialised stores              | 0.23% |
| Manufacture of lifting and handling equipment                               | 0.23% |
| Fitness facilities  | 0.22% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment | 0.21% |
| Printing and reproduction of recorded media                                 | 0.21% |
| Restaurants and mobile food service activities                              | 0.2%  |
| Other postal and courier activities   | 0.2%  |
| Data processing, hosting and related activities                             | 0.19% |
| Hotels and similar accommodation  | 0.19% |
| Manufacture of electronic components  | 0.18% |
| Collection of non-hazardous waste   | 0.18% |
| Service activities incidental to air transportation                         | 0.17% |
| Activities of holding companies   | 0.17% |
| Growing of citrus fruits  | 0.16% |
| Manufacture of cement   | 0.14% |
| Construction of residential and non-residential buildings                   | 0.12% |
| Manufacture of perfumes and toilet preparations                             | 0.12% |
| Wholesale of chemical products  | 0.11% |
| Manufacture of ceramic sanitary fixtures                                    | 0.11% |
| Publishing of computer games  | 0.11% |
| Manufacture of other parts and accessories for motor vehicles               | 0.08% |
| Retail sale via mail order houses or via Internet                           | 0.08% |
| Manufacture of other food products n.e.c.                                   | 0.08% |
| Operation of dairies and cheese making                                      | 0.07% |
| Passenger air transport   | 0.07% |
| Manufacture of agricultural and forestry machinery                          | 0.06% |
| Construction of utility projects for electricity and telecommunications     | 0.06% |
| Other food service activities   | 0.06% |
| Computer programming, consultancy and related activities                    | 0.06% |

|  |       |
|--|-------|

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 26.2% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 26.87% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 19.38% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social

characteristics  
that they  
promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.97% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-Class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value  | Benchmark   | Coverage |
|-------------------------|--|---|----------|
| Carbon intensity        | 33.95 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 238.18 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 99.41%   |
| Water intensity         | 189.61 Thousands of cubic meters for corporates  | 11618.89 Thousands of cubic meters for corporates   | 99.41%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been

- qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                      | Sector   | Proportion | Country |
|--------------------------------------|--|------------|---------|
| VISA INC-CLASS A SHARES XNYS USD     | Other activities auxiliary to financial services, except insurance and pension funding | 4.84%      | US      |
| ACTIVISION BLIZZARD INC XNGS USD     | Publishing of computer games   | 4.41%      | US      |
| BOOKING HOLDINGS INC XNGS USD        | Web portals  | 4.16%      | US      |
| APPLE INC XNGS USD                   | Manufacture of communication equipment   | 4.12%      | US      |
| MICROSOFT CORP XNGS USD              | Other software publishing  | 4.03%      | US      |
| ALPHABET INC-CL C XNGS USD           | Web portals  | 3.83%      | US      |
| SALESFORCE INC XNYS USD              | Other software publishing  | 3.69%      | US      |
| PROLOGIS INC XNYS USD                | Renting and operating of own or leased real estate                                     | 3.55%      | US      |
| ACCENTURE PLC XNYS USD               | Computer programming, consultancy and related activities                               | 3.47%      | IE      |
| FIDELITY NATIONAL INFO SERV XNYS USD | Other activities auxiliary to financial services, except insurance and pension funding | 3.41%      | US      |
| SERVICENOW INC XNYS USD              | Other software publishing  | 3.41%      | US      |
| GOODMAN GROUP XASX AUD               | Renting and operating of own or leased real estate                                     | 3.38%      | AU      |
| WORKDAY INC-CLASS A XNGS USD         | Other software publishing  | 3.37%      | US      |
| GLOBAL PAYMENTS INC XNYS USD         | Other activities auxiliary to financial services, except insurance and pension funding | 3.2%       | US      |
| TENCENT HOLDINGS LTD XHKG HKD        | Web portals  | 3.05%      | CN      |

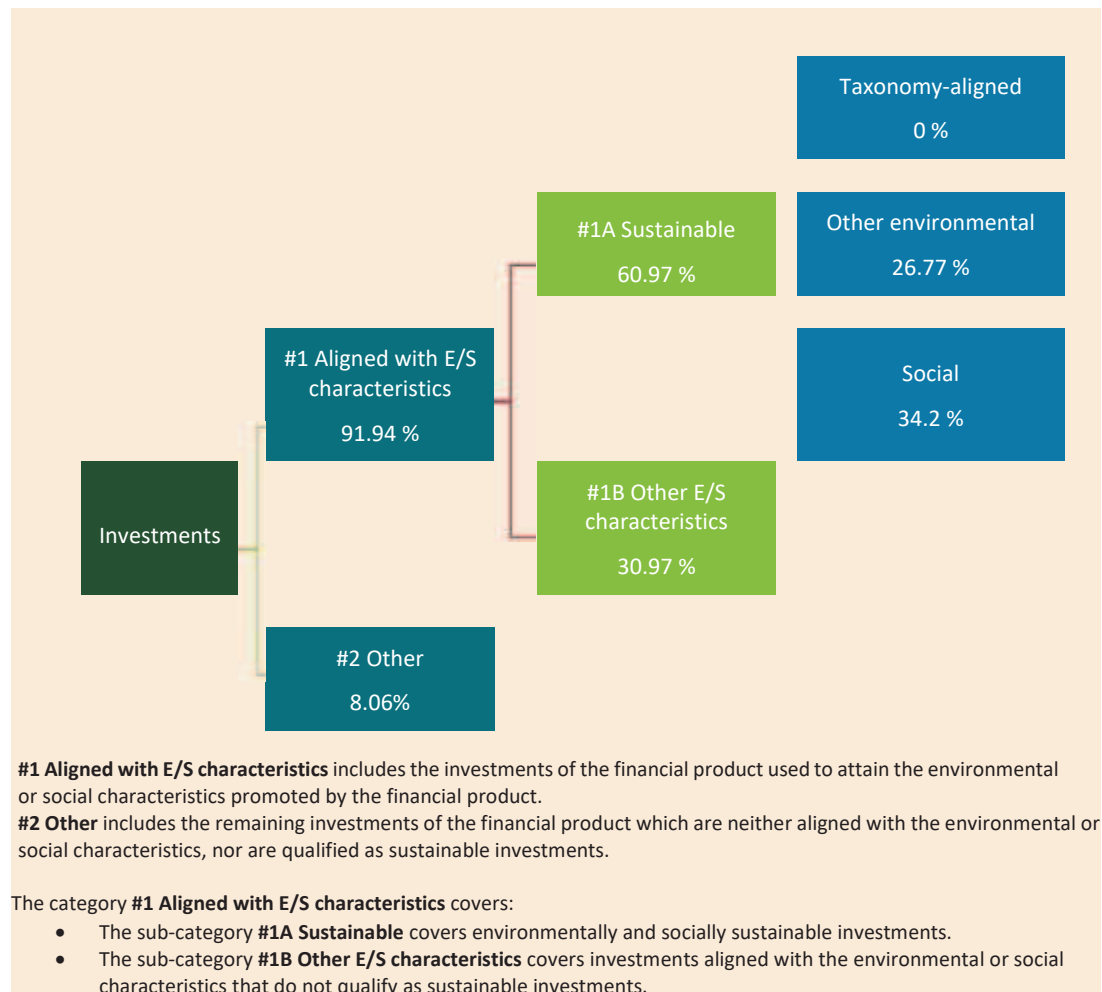

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 34.67%     |
| Web portals  | 18.98%     |
| Other activities auxiliary to financial services, except insurance and pension funding | 13.11%     |
| Renting and operating of own or leased real estate                                     | 9.44%      |
| Computer programming, consultancy and related activities                               | 5.19%      |
| Publishing of computer games   | 4.41%      |
| Manufacture of communication equipment   | 4.12%      |
| Retail sale via mail order houses or via Internet                                      | 2.96%      |
| Computer programming activities  | 2.01%      |
| Other postal and courier activities  | 1.9%       |
| Security systems service activities  | 1.89%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 0.82%      |
| Computer consultancy activities  | 0.51%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 26.77% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 34.2% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 8.06% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.46% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                 | Benchmark              | Coverage |
|-------------------------|-----------------------|------------------------|----------|
| ESG Score               | 6.8 Score over max 10 | 5.54 Score over max 10 | 99.88%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments           | Sector                                       | Proportion | Country |
|---------------------------|--|------------|---------|
| T 1.75% - 15/03/2025      | General public administration activities     | 7.28%      | US      |
| ISHARES PHYSICAL GOLD ETC | Trusts, funds and similar financial entities | 5.96%      | IE      |
| T 1.5% - 29/02/2024       | General public administration activities     | 4.89%      | US      |

|                                       |  |       |    |
|---------------------------------------|--|-------|----|
| AWF Eur Inf P MC                      | Trusts, funds and similar financial entities   | 4.11% | LU |
| APPLE INC XNGS USD                    | Manufacture of communication equipment   | 3.71% | US |
| MICROSOFT CORP XNGS USD               | Other software publishing  | 3.37% | US |
| ALPHABET INC-CL A XNGS USD            | Web portals  | 2.33% | US |
| ROCHE HOLDING AG-GENUSSCHEIN XSWX CHF | Manufacture of basic pharmaceutical products   | 2.01% | CH |
| UNITEDHEALTH GROUP INC XNYS USD       | Non-life insurance   | 1.83% | US |
| JOHNSON & JOHNSON XNYS USD            | Manufacture of basic pharmaceutical products   | 1.61% | US |
| AMAZON.COM INC XNGS USD               | Retail sale via mail order houses or via Internet                                      | 1.44% | US |
| MASTERCARD INC - A XNYS USD           | Other activities auxiliary to financial services, except insurance and pension funding | 1.43% | US |
| T 2.25% - 31/03/2024                  | General public administration activities   | 1.39% | US |
| MARATHON PETROLEUM CORP XNYS USD      | Manufacture of refined petroleum products  | 1.2%  | US |
| YAMANA GOLD INC XNYS USD              | Mining of other non-ferrous metal ores   | 1.19% | CA |

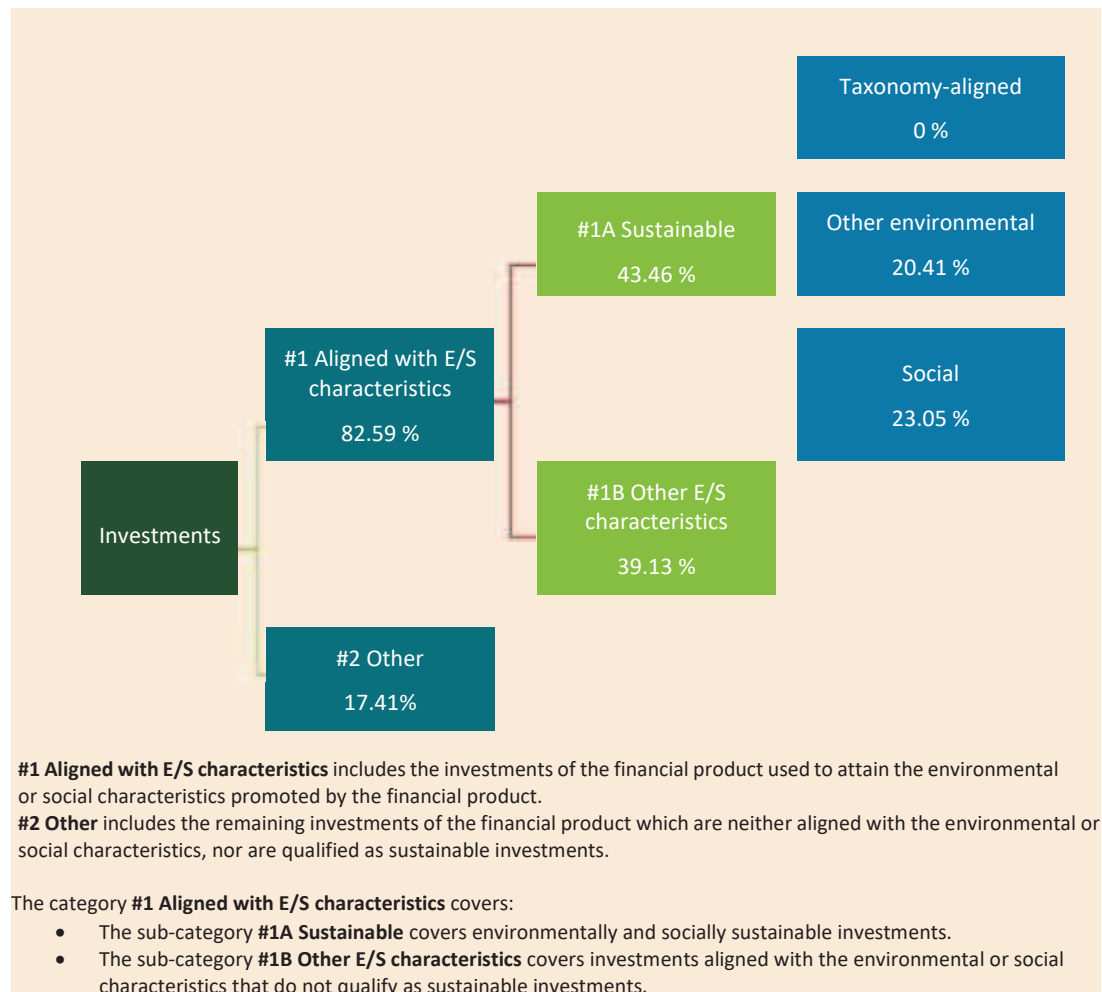

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| General public administration activities   | 13.57%     |
| Trusts, funds and similar financial entities   | 10.35%     |
| Manufacture of basic pharmaceutical products   | 9.36%      |
| Other software publishing  | 6.01%      |
| Mining of other non-ferrous metal ores   | 4.81%      |
| Manufacture of communication equipment   | 4.43%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 3.25%      |
| Web portals  | 2.97%      |
| Other monetary intermediation  | 2.87%      |
| Non-life insurance   | 2.29%      |
| Other information service activities n.e.c.  | 2.08%      |
| Manufacture of electrical equipment  | 1.99%      |
| Manufacture of refined petroleum products  | 1.95%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters      | 1.85%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 1.74%      |
| Electricity, gas, steam and air conditioning supply                                    | 1.6%       |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 1.56%      |
| Retail sale via mail order houses or via Internet                                      | 1.44%      |
| Manufacture of medical and dental instruments and supplies                             | 1.43%      |
| Manufacture of electronic components   | 1.42%      |
| Manufacture of industrial gases  | 1.39%      |
| Renting and operating of own or leased real estate                                     | 1.38%      |
| Distilling, rectifying and blending of spirits   | 1.22%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 1.07%      |
| Satellite telecommunications activities  | 1.02%      |
| Manufacture of motor vehicles  | 0.98%      |
| Manufacture of footwear  | 0.96%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 0.89%      |
| Extraction of crude petroleum and natural gas  | 0.83%      |
| Freight rail transport   | 0.8%       |

|   |       |
|---|-------|
| Support activities for petroleum and natural gas extraction                     | 0.78% |
| Manufacture of lifting and handling equipment                                   | 0.75% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics | 0.7%  |
| Manufacture of ovens, furnaces and furnace burners                              | 0.66% |
| Manufacture of household and sanitary goods and of toilet requisites            | 0.66% |
| Security and commodity contracts brokerage                                      | 0.64% |
| Manufacture of cocoa, chocolate and sugar confectionery                         | 0.57% |
| Administration of financial markets   | 0.57% |
| Other credit granting   | 0.51% |
| Fitness facilities  | 0.48% |
| Fund management activities  | 0.48% |
| Manufacture of perfumes and toilet preparations                                 | 0.47% |
| Computer programming, consultancy and related activities                        | 0.46% |
| Manufacture of musical instruments  | 0.44% |
| Manufacture of chemicals and chemical products                                  | 0.42% |
| Restaurants and mobile food service activities                                  | 0.4%  |
| Research and experimental development on biotechnology                          | 0.4%  |
| Manufacture of agricultural and forestry machinery                              | 0.4%  |
| Motion picture, video and television programme production activities            | 0.33% |
| Manufacture of pesticides and other agrochemical products                       | 0.32% |
| Other postal and courier activities   | 0.3%  |
| Retail sale of clothing in specialised stores                                   | 0.29% |
| Activities of insurance agents and brokers                                      | 0.29% |
| Wholesale of pharmaceutical goods   | 0.27% |
| Copper production   | 0.27% |
| Retail sale of hardware, paints and glass in specialised stores                 | 0.26% |
| Distribution of electricity   | 0.21% |
| Manufacture of other chemical products n.e.c.                                   | 0.18% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

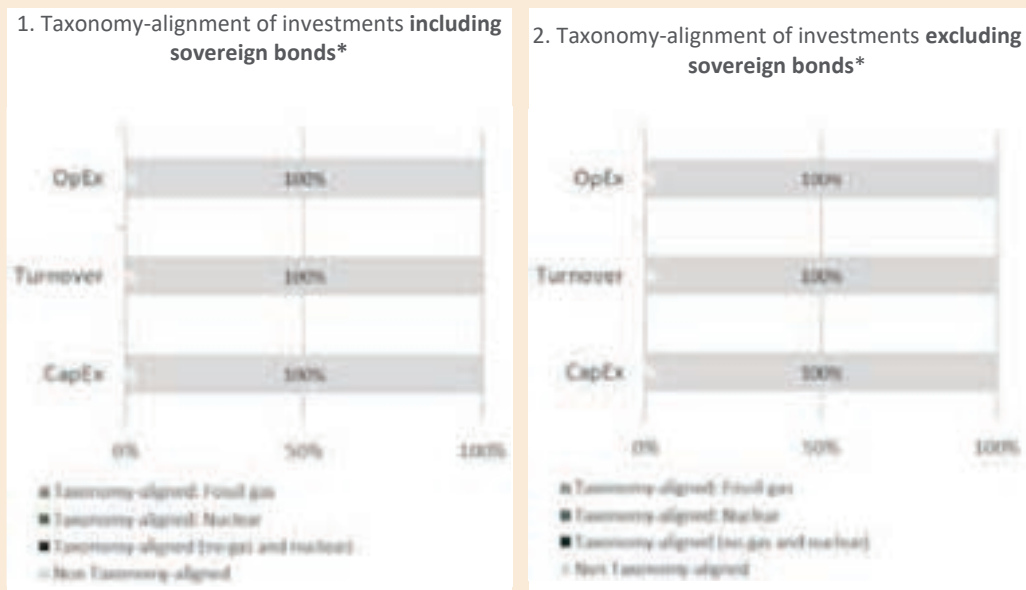

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

- **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 20.41% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 23.05% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 17.41% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.41% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 7.06 Score over max 10 | 6.57 Score over max 10 | 98.59%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                | Sector                                   | Proportion | Country |
|--------------------------------|--|------------|---------|
| FRTR 0.25% - 25/07/2024<br>CPI | General public administration activities | 5.89%      | FR      |
| BTPS 0.9% - 01/04/2031         | General public administration activities | 4.92%      | IT      |

|  |   |       |    |
|--|---|-------|----|
| BTPS 1.35% - 01/04/2030                      | General public administration activities                | 4.17% | IT |
| SPGB 1.95% - 30/07/2030                      | General public administration activities                | 3.37% | ES |
| BGB 0.35% - 22/06/2032                       | General public administration activities                | 3.14% | BE |
| SPGB 0.7% - 30/04/2032                       | General public administration activities                | 2.81% | ES |
| SPGB 0.5% - 31/10/2031                       | General public administration activities                | 2.73% | ES |
| AXA WF ACT Social Bonds M Capitalisation EUR |   | 2.26% | LU |
| IRISH 2.4% - 15/05/2030                      | General public administration activities                | 1.99% | IE |
| FRTR 2.5% - 25/05/2030                       | General public administration activities                | 1.82% | FR |
| EIB 2.75% - 13/09/2030                       | Activities of extraterritorial organisations and bodies | 1.82% | LU |
| NWIDE 2.25% - 25/06/2029                     | Other monetary intermediation                           | 1.39% | GB |
| BNG 0 - 20/01/2031                           | Other monetary intermediation                           | 1.28% | NL |
| ASIA 1.95% - 22/07/2032                      | Activities of extraterritorial organisations and bodies | 1.25% | PH |
| CMCICB 1% - 30/04/2028                       | Other monetary intermediation                           | 1.23% | FR |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| General public administration activities  | 39.6%      |
| Other monetary intermediation   | 19.38%     |
| Activities of extraterritorial organisations and bodies                           | 4.92%      |
| Renting and operating of own or leased real estate                                | 4.49%      |
| Non-life insurance  | 2.84%      |
| Electricity, gas, steam and air conditioning supply                               | 2.77%      |
| Trusts, funds and similar financial entities                                      | 2.38%      |
| Other   | 2.26%      |
| Life insurance  | 1.85%      |
| Service activities incidental to land transportation                              | 1.81%      |
| Manufacture of refined petroleum products   | 1.81%      |
| Manufacture of motor vehicles   | 1.75%      |
| Wireless telecommunications activities  | 1.49%      |
| Production of electricity   | 1.29%      |
| Distribution of electricity   | 1.17%      |
| Manufacture of basic pharmaceutical products                                      | 0.95%      |
| Service activities incidental to air transportation                               | 0.81%      |
| Manufacture of chemicals and chemical products                                    | 0.8%       |
| Manufacture of beer   | 0.75%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment       | 0.75%      |
| Distribution of gaseous fuels through mains                                       | 0.67%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.62%      |
| Wired telecommunications activities   | 0.61%      |
| Manufacture of cement   | 0.57%      |
| Manufacture of other organic basic chemicals                                      | 0.52%      |
| Operation of dairies and cheese making  | 0.45%      |
| Manufacture of other articles of paper and paperboard                             | 0.41%      |
| Water collection, treatment and supply  | 0.36%      |
| Web portals   | 0.34%      |
| Transmission of electricity   | 0.33%      |
| Advertising agencies  | 0.32%      |
| Manufacture of electrical equipment   | 0.26%      |

|  |       |
|--|-------|
| Retail trade, except of motor vehicles and motorcycles               | 0.26% |
| Retail sale of clothing in specialised stores                        | 0.22% |
| Manufacture of household and sanitary goods and of toilet requisites | 0.19% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 22.79% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 26.62% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 4.45% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains

Not applicable.

the  
environmental or  
social  
characteristics  
that they  
promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 41.28% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.79 Score over max 10 | 6.36 Score over max 10 | 99.07%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments        | Sector                                   | Proportion | Country |
|------------------------|--|------------|---------|
| FRTR 4% - 25/04/2055   | General public administration activities | 5.71%      | FR      |
| DBR 4.25% - 04/07/2039 | General public administration activities | 4.76%      | DE      |
| BTPS 4% - 01/02/2037   | General public administration activities | 4.28%      | IT      |

|  |  |       |    |
|--|--|-------|----|
| BTPS 3.1% - 01/03/2040                       | General public administration activities | 4.22% | IT |
| BGB 5% - 28/03/2035                          | General public administration activities | 4.19% | BE |
| SPGB 4.2% - 31/01/2037                       | General public administration activities | 3.98% | ES |
| FRTR 1.75% - 25/06/2039                      | General public administration activities | 3.57% | FR |
| FRTR 0.5% - 25/05/2040                       | General public administration activities | 2.97% | FR |
| SPGB 1.85% - 30/07/2035                      | General public administration activities | 2.74% | ES |
| SPGB 2.7% - 31/10/2048                       | General public administration activities | 2.73% | ES |
| DBR 4.75% - 04/07/2040                       | General public administration activities | 2.65% | DE |
| RAGB 2.4% - 23/05/2034                       | General public administration activities | 2.21% | AT |
| BTPS 2.45% - 01/09/2050                      | General public administration activities | 1.8%  | IT |
| AXA WF ACT Social Bonds M Capitalisation EUR |  | 1.76% | LU |
| BTPS 4.75% - 01/09/2044                      | General public administration activities | 1.35% | IT |

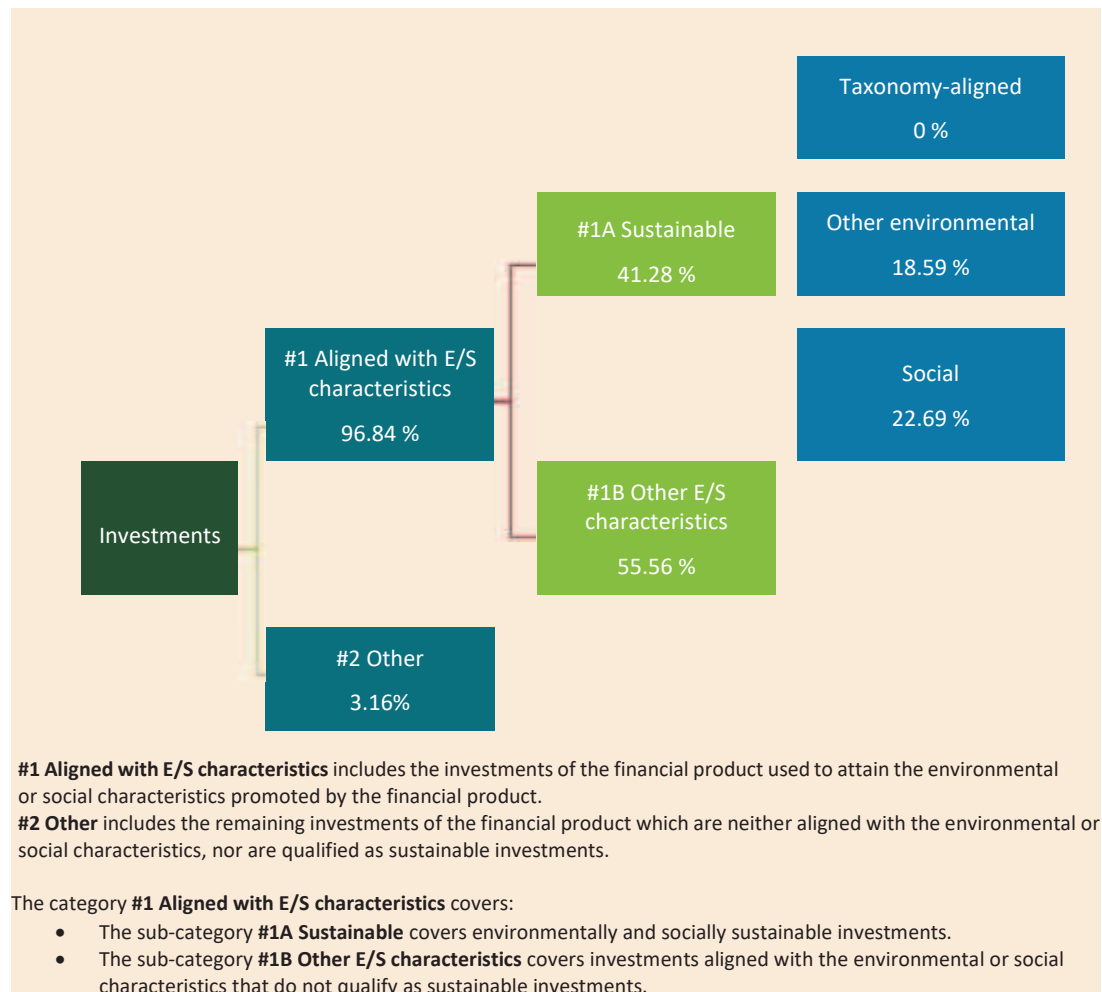

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| General public administration activities                                    | 61.69%     |
| Other monetary intermediation   | 10.04%     |
| Activities of extraterritorial organisations and bodies                     | 7.1%       |
| Renting and operating of own or leased real estate                          | 2.8%       |
| Wireless telecommunications activities                                      | 2.45%      |
| Service activities incidental to land transportation                        | 1.86%      |
| Production of electricity   | 1.83%      |
| Non-life insurance  | 1.76%      |
| Other   | 1.76%      |
| Life insurance  | 1.42%      |
| Electricity, gas, steam and air conditioning supply                         | 1.33%      |
| Manufacture of basic pharmaceutical products                                | 1.14%      |
| Wired telecommunications activities   | 0.87%      |
| Trusts, funds and similar financial entities                                | 0.67%      |
| Manufacture of beer   | 0.59%      |
| Distribution of gaseous fuels through mains                                 | 0.49%      |
| Manufacture of motor vehicles   | 0.48%      |
| Transmission of electricity   | 0.43%      |
| Web portals   | 0.34%      |
| Operation of dairies and cheese making                                      | 0.32%      |
| Manufacture of electrical equipment   | 0.32%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment | 0.32%      |
| Other   | 0%         |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 18.59% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 22.69% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 3.16% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?   |   |
|---|---|
| <span style="color: green;">●●</span> <input type="checkbox"/> YES  | <span style="color: green;">●</span> <input checked="" type="checkbox"/> NO   |
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%   | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 51.53% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy   | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%   | <input checked="" type="checkbox"/> with a social objective   |
| <input type="checkbox"/> It promoted <b>sustainable investments with an environmental objective</b> and while it did not have as its objective a sustainable investment, it had a proportion of 51.53% of sustainable investments | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark             | Coverage |
|-------------------------|------------------------|-----------------------|----------|
| ESG Score               | 7.08 Score over max 10 | 6.6 Score over max 10 | 98.62%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                | Sector                                   | Proportion | Country |
|--------------------------------|--|------------|---------|
| FRTR 0.25% - 25/07/2024<br>CPI | General public administration activities | 5.72%      | FR      |
| BTPS 0 - 15/12/2024            | General public administration activities | 2.56%      | IT      |

|  |   |       |    |
|--|---|-------|----|
| DBR 4.25% - 04/07/2039                       | General public administration activities                | 2.52% | DE |
| BTPS 1.35% - 01/04/2030                      | General public administration activities                | 2.47% | IT |
| FRTR 1.75% - 25/06/2039                      | General public administration activities                | 2.25% | FR |
| AXA WF ACT Social Bonds M Capitalisation EUR |   | 2.13% | LU |
| BTPS 4.5% - 01/03/2026                       | General public administration activities                | 2.1%  | IT |
| BTPS 1.45% - 15/05/2025                      | General public administration activities                | 2.09% | IT |
| SPGB 6% - 31/01/2029                         | General public administration activities                | 1.98% | ES |
| SPGB 4.9% - 30/07/2040                       | General public administration activities                | 1.43% | ES |
| SPGB 1.25% - 31/10/2030                      | General public administration activities                | 1.41% | ES |
| IBRD 0 - 15/01/2027                          | Activities of extraterritorial organisations and bodies | 1.21% | US |
| BTPS 0.95% - 15/09/2027                      | General public administration activities                | 1.2%  | IT |
| ASIA 0 - 24/10/2029                          | Activities of extraterritorial organisations and bodies | 1.11% | PH |
| BPIFRA 0.125% - 26/02/2027                   | General public administration activities                | 0.96% | FR |

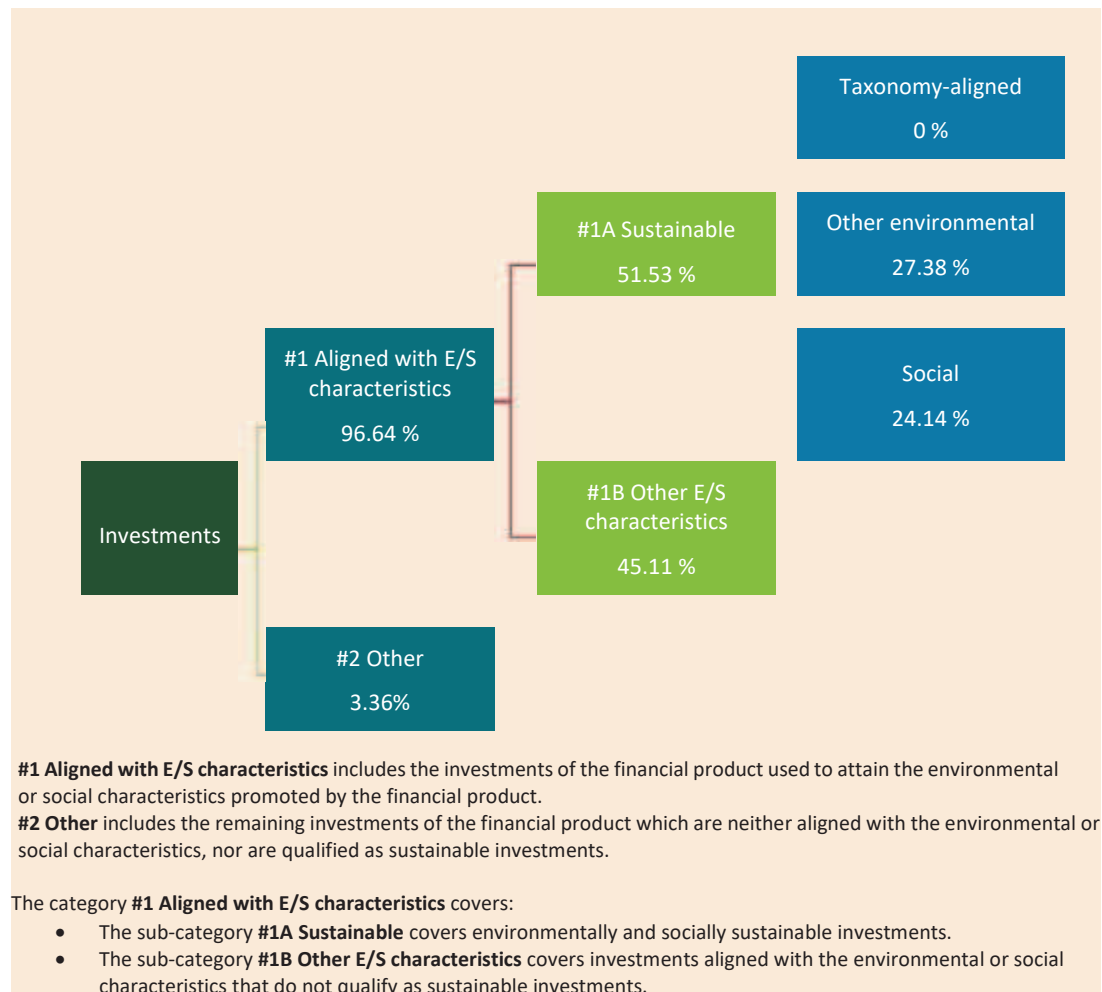

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| General public administration activities  | 46.03%     |
| Other monetary intermediation   | 18.58%     |
| Renting and operating of own or leased real estate                                | 3.97%      |
| Non-life insurance  | 3.61%      |
| Activities of extraterritorial organisations and bodies                           | 2.95%      |
| Electricity, gas, steam and air conditioning supply                               | 2.7%       |
| Other   | 2.13%      |
| Manufacture of motor vehicles   | 1.89%      |
| Wireless telecommunications activities  | 1.76%      |
| Production of electricity   | 1.7%       |
| Life insurance  | 1.39%      |
| Trusts, funds and similar financial entities                                      | 1.27%      |
| Distribution of gaseous fuels through mains                                       | 1%         |
| Service activities incidental to land transportation                              | 0.99%      |
| Wired telecommunications activities   | 0.97%      |
| Manufacture of beer   | 0.96%      |
| Transmission of electricity   | 0.85%      |
| Water collection, treatment and supply  | 0.78%      |
| Security and commodity contracts brokerage  | 0.63%      |
| Land transport and transport via pipelines  | 0.62%      |
| Advertising agencies  | 0.62%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment       | 0.61%      |
| Manufacture of refined petroleum products   | 0.55%      |
| Manufacture of wearing apparel  | 0.45%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.45%      |
| Passenger rail transport, interurban  | 0.44%      |
| Manufacture of basic pharmaceutical products                                      | 0.42%      |
| Operation of dairies and cheese making  | 0.37%      |
| Renting and leasing of cars and light motor vehicles                              | 0.32%      |
| Web portals   | 0.31%      |
| Other business support service activities n.e.c.                                  | 0.29%      |
| Manufacture of electrical equipment   | 0.24%      |

|   |       |
|---|-------|
| Retail sale of clothing in specialised stores | 0.15% |
| Other   | 0%    |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

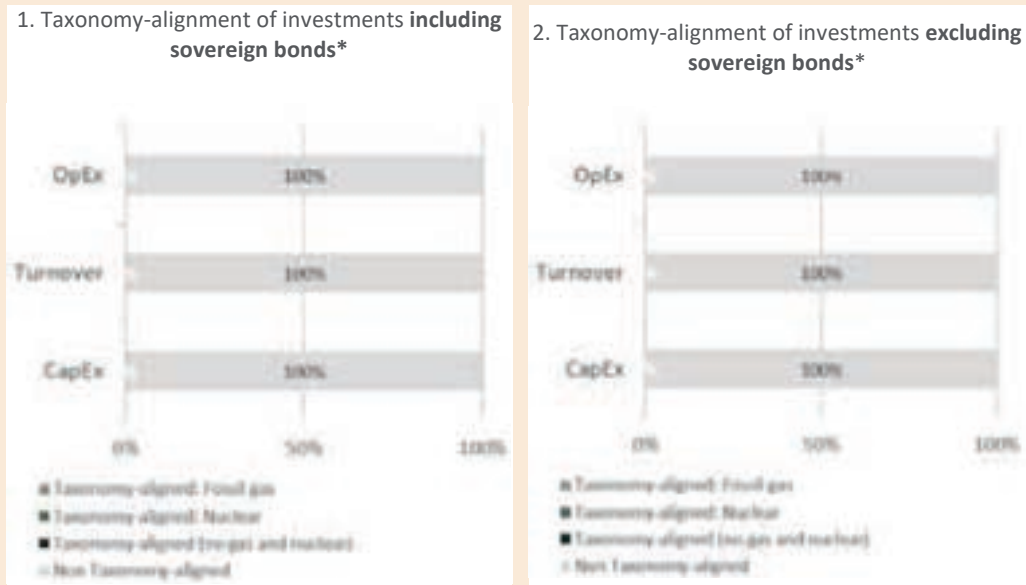

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 27.38% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 24.14% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 3.36% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social

characteristics  
that they  
promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 75.59% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 148.83 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 192.56 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 95.41%   |
| Water intensity         | 13050.17 Thousands of cubic meters for corporates   | 18076.7 Thousands of cubic meters for corporates  | 95.41%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i)

issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies                    | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy                         | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)       | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |

|   |   |  |  |
|---|---|--|--|
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector  | GWh per million EUR of revenue of investee companies, per high impact climate sector |  |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average                     |  |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average                     |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                   | Sector  | Proportion | Country |
|-----------------------------------|---|------------|---------|
| BCP 2.7% - 11/01/2025 Call        | Other monetary intermediation                         | 0.85%      | PE      |
| ASSGEN 2.429% - 14/07/2031 Call   | Life insurance  | 0.84%      | IT      |
| STANLN 0.9% Var - 02/07/2027 Call | Other monetary intermediation                         | 0.84%      | GB      |
| AMCR 1.125% - 23/06/2027 Call     | Manufacture of other articles of paper and paperboard | 0.84%      | GB      |
| KBCBB 0.25% Var - 01/03/2027 Call | Other monetary intermediation                         | 0.84%      | BE      |
| CCAMA 0.75% - 07/07/2028 Call     | Non-life insurance                                    | 0.83%      | FR      |
| SEGPLP 0.875% - 27/05/2029 Call   | Renting and operating of own or leased real estate    | 0.83%      | LU      |
| ANNGR 0.625% - 24/03/2031 Call    | Renting and operating of own or leased real estate    | 0.82%      | DE      |

|                                  |  |       |    |
|----------------------------------|--|-------|----|
| ADPFP 2.75% - 02/04/2030 Call    | Service activities incidental to air transportation        | 0.82% | FR |
| KMI 2.25% - 16/03/2027           | Transport via pipeline                                     | 0.82% | US |
| ALCSW 2.375% - 31/05/2028 Call   | Manufacture of medical and dental instruments and supplies | 0.81% | NL |
| FDX 0.45% - 04/05/2029 Call      | Other postal and courier activities                        | 0.81% | US |
| MCD 1.6% - 15/03/2031 Call       | Restaurants and mobile food service activities             | 0.81% | US |
| CMPCCI 4.375% - 04/04/2027       | Manufacture of paper and paperboard                        | 0.8%  | CL |
| BAC 0.583% Var - 24/08/2028 Call | Other monetary intermediation                              | 0.8%  | US |

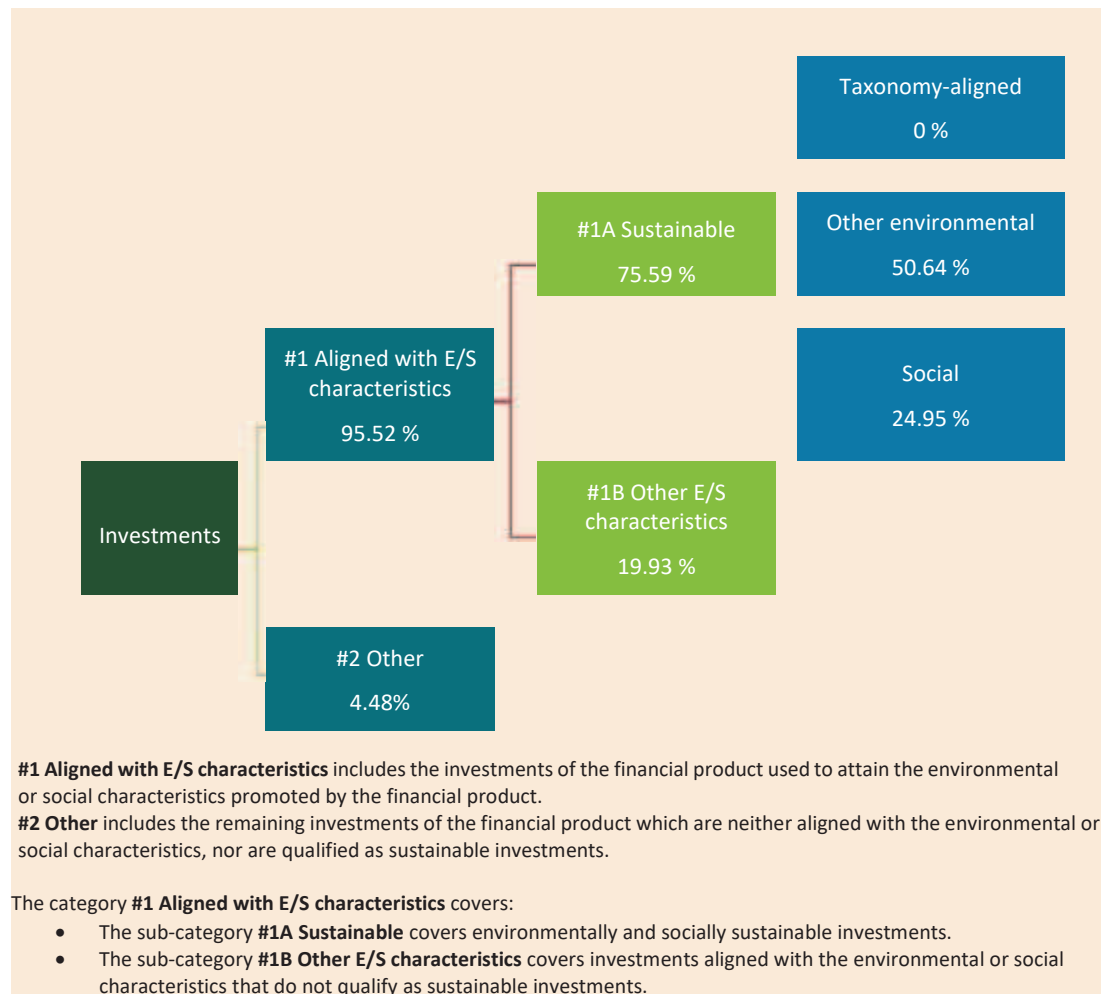

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation   | 23.6%      |
| Renting and operating of own or leased real estate                                | 6.55%      |
| Life insurance  | 4.14%      |
| Manufacture of motor vehicles   | 3.37%      |
| Wireless telecommunications activities  | 3.19%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 2.61%      |
| Manufacture of other chemical products n.e.c.                                     | 2.54%      |
| Manufacture of electrical equipment   | 2.44%      |
| Distribution of gaseous fuels through mains                                       | 2.17%      |
| Production of electricity   | 2.1%       |
| Manufacture of chemicals and chemical products                                    | 2.05%      |
| Electricity, gas, steam and air conditioning supply                               | 2.05%      |
| Manufacture of medical and dental instruments and supplies                        | 2.01%      |
| Distribution of electricity   | 2%         |
| Transmission of electricity   | 1.97%      |
| Other postal and courier activities   | 1.72%      |
| Trusts, funds and similar financial entities                                      | 1.54%      |
| Other information service activities n.e.c.                                       | 1.53%      |
| Manufacture of basic pharmaceutical products                                      | 1.44%      |
| Service activities incidental to air transportation                               | 1.37%      |
| Manufacture of food products  | 1.34%      |
| Research and experimental development on biotechnology                            | 1.17%      |
| Manufacture of beer   | 1.1%       |
| Manufacture of household and sanitary goods and of toilet requisites              | 1.08%      |
| Advertising agencies  | 1.07%      |
| Manufacture of other articles of paper and paperboard                             | 0.84%      |
| Non-life insurance  | 0.83%      |
| Administration of financial markets   | 0.82%      |
| Transport via pipeline  | 0.82%      |
| Restaurants and mobile food service activities                                    | 0.81%      |
| Other software publishing   | 0.8%       |

|  |       |
|--|-------|
| Manufacture of paper and paperboard  | 0.8%  |
| General public administration activities   | 0.8%  |
| Renting and leasing of trucks  | 0.79% |
| Manufacture of other organic basic chemicals   | 0.78% |
| Manufacture of machinery and equipment n.e.c.  | 0.78% |
| Activities of insurance agents and brokers   | 0.78% |
| Retail trade, except of motor vehicles and motorcycles                                 | 0.76% |
| Service activities incidental to land transportation                                   | 0.74% |
| Other  | 0.7%  |
| Support activities for petroleum and natural gas extraction                            | 0.69% |
| Reinsurance  | 0.67% |
| Construction of residential and non-residential buildings                              | 0.67% |
| Manufacture of wearing apparel   | 0.66% |
| Other activities auxiliary to financial services, except insurance and pension funding | 0.65% |
| Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes     | 0.65% |
| Other transportation support activities  | 0.65% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

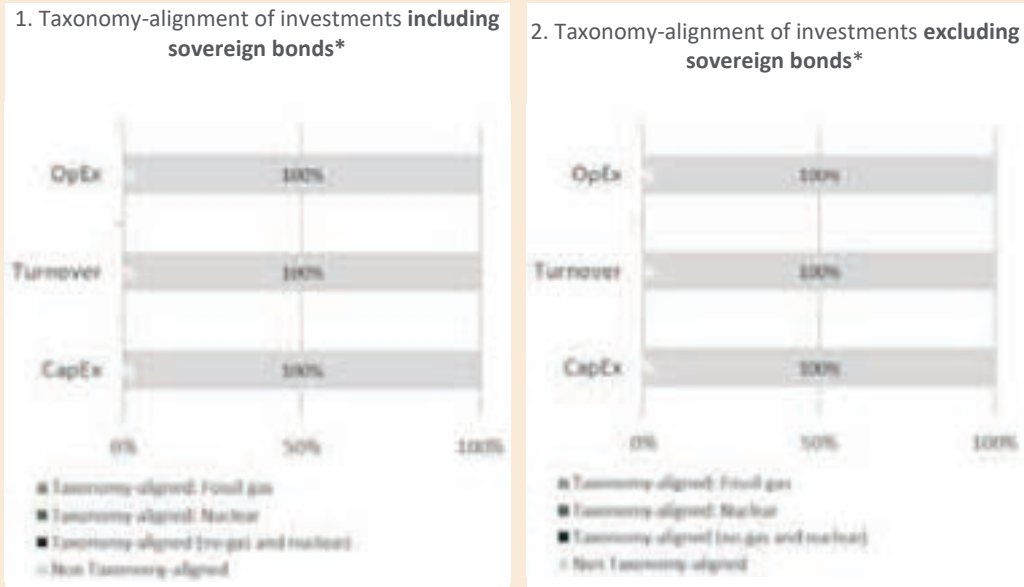

- Yes
- In fossil gas  In nuclear energy
- No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other

**What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 50.64% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 24.95% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 4.48% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics

Not applicable.

that they  
promote.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Did this financial product have a sustainable investment objective?  |   |
|--|---|
| <span style="color: green;">●●</span> <input type="checkbox"/> YES   | <span style="color: green;">●</span> <input checked="" type="checkbox"/> NO   |
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 69.81% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                         |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 7.41 Score over max 10 | 7.33 Score over max 10 | 96.97%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                    | Sector                                       | Proportion | Country |
|--|--|------------|---------|
| AXA IM EURO LIQUIDITY SRI Capitalisation EUR pf    | Trusts, funds and similar financial entities | 2.95%      | FR      |
| AXA WF Euro Credit Total Return M Capitalisation E | Trusts, funds and similar financial entities | 2.88%      | LU      |

|                                    |  |       |    |

| AIB 0.5% Var - 17/11/2027 Call     | Other monetary intermediation                      | 0.65% | IE |
| EDF 4.375% - 12/10/2029 Call       | Production of electricity                          | 0.61% | FR |
| SABSM 2.5% Var - 15/04/2031 Call   | Other monetary intermediation                      | 0.61% | ES |
| VZ 4.25% - 31/10/2030 Call         | Wireless telecommunications activities             | 0.58% | US |

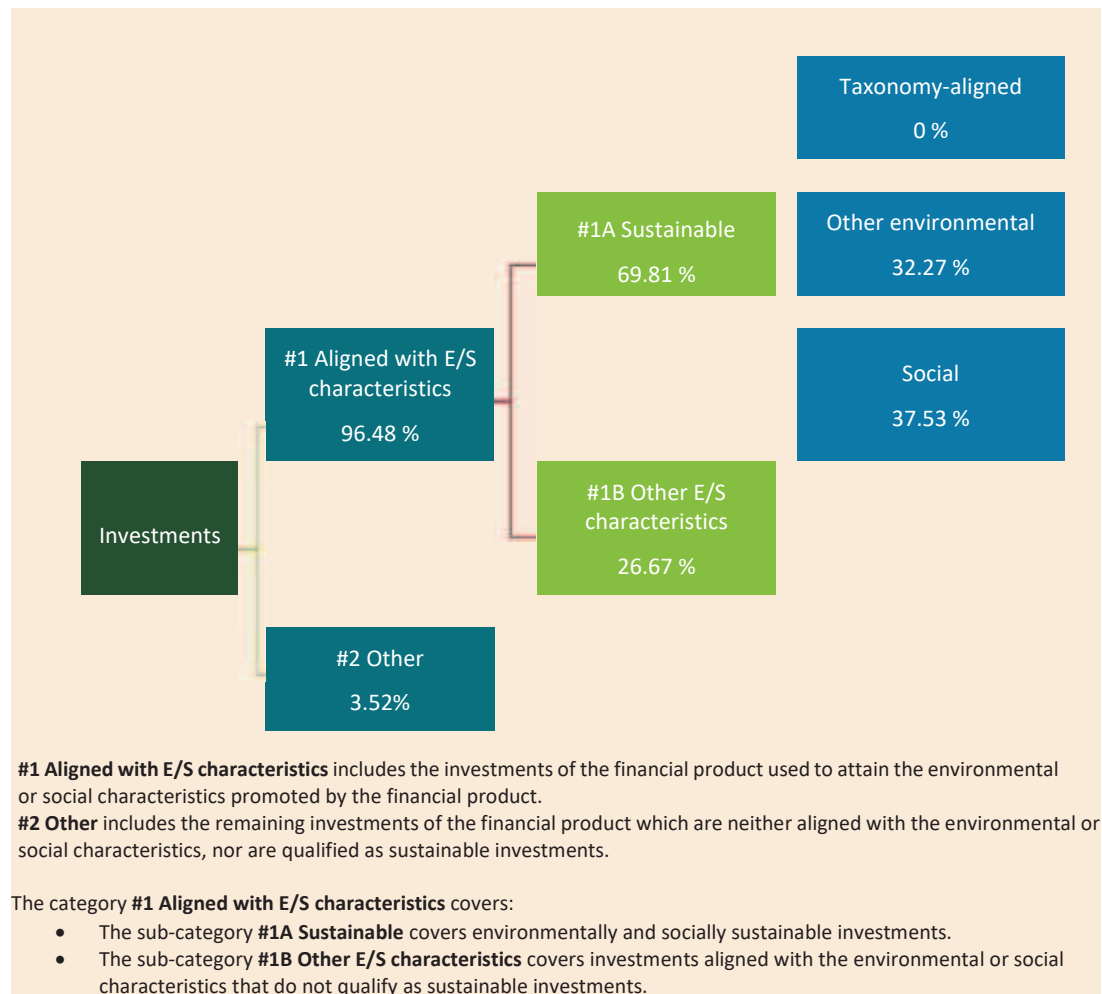

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 35.78%     |
| Renting and operating of own or leased real estate                                     | 10.68%     |
| Trusts, funds and similar financial entities   | 8.3%       |
| Life insurance   | 4.82%      |
| Electricity, gas, steam and air conditioning supply                                    | 3.94%      |
| Production of electricity  | 3.78%      |
| Wireless telecommunications activities   | 3.57%      |
| Manufacture of refined petroleum products  | 3.02%      |
| Manufacture of motor vehicles  | 2.79%      |
| Distribution of gaseous fuels through mains  | 1.51%      |
| Transmission of electricity  | 1.41%      |
| Distribution of electricity  | 1.32%      |
| Non-life insurance   | 1.28%      |
| Service activities incidental to land transportation                                   | 1.12%      |
| Security and commodity contracts brokerage   | 0.96%      |
| Service activities incidental to air transportation                                    | 0.96%      |
| Other credit granting  | 0.9%       |
| Manufacture of basic pharmaceutical products   | 0.88%      |
| Wired telecommunications activities  | 0.85%      |
| Research and experimental development on biotechnology                                 | 0.7%       |
| Other activities auxiliary to financial services, except insurance and pension funding | 0.65%      |
| Other postal and courier activities  | 0.64%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 0.64%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

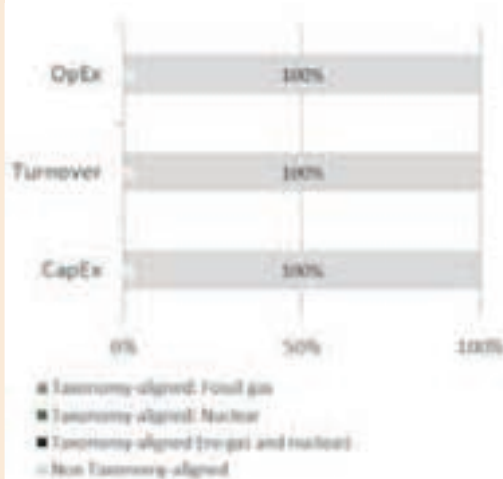

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 32.27% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 37.53% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 3.52% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ___%                   | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 66.78% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ___%                           | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 7.39 Score over max 10 | 7.33 Score over max 10 | 96.81%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                 | Sector                                       | Proportion | Country |
|---|--|------------|---------|
| AXA IM EURO LIQUIDITY SRI Capitalisation EUR pf | Trusts, funds and similar financial entities | 2.19%      | FR      |
| BTF 0 - 22/02/2023                              | General public administration activities     | 1.54%      | FR      |

|  |  |       |    |
|--|--|-------|----|
| ACHMEA 6% Var - 04/04/2043 Call                    | Non-life insurance                                   | 1.22% | NL |
| SRGIM 3.375% - 05/12/2026 Call                     | Distribution of gaseous fuels through mains          | 1.2%  | IT |
| ACAFP 4% Var - 12/10/2026 Call                     | Other monetary intermediation                        | 1.14% | FR |
| VZ 1.625% - 01/03/2024                             | Wireless telecommunications activities               | 1.12% | US |
| AXA WF Euro Credit Total Return M Capitalisation E | Trusts, funds and similar financial entities         | 1.11% | LU |
| BACR 3.375% Var - 02/04/2025 Call                  | Other monetary intermediation                        | 1.07% | GB |
| BNP 0.5% Var - 15/07/2025 Call                     | Other monetary intermediation                        | 1.04% | FR |
| CABKSM 0.625% - 01/10/2024                         | Other monetary intermediation                        | 1.02% | ES |
| T 0.25% - 04/03/2026 Call                          | Wireless telecommunications activities               | 1%    | US |
| ABESM 3.75% - 20/06/2023                           | Service activities incidental to land transportation | 0.96% | ES |
| HEIBOS 2.125% - 05/09/2023 Call                    | Renting and operating of own or leased real estate   | 0.96% | SE |
| SANTAN 3.625% Var - 27/09/2026 Call                | Trusts, funds and similar financial entities         | 0.92% | ES |
| FIREIT 2.195% - 11/09/2025 Call                    | Distribution of gaseous fuels through mains          | 0.89% | IT |

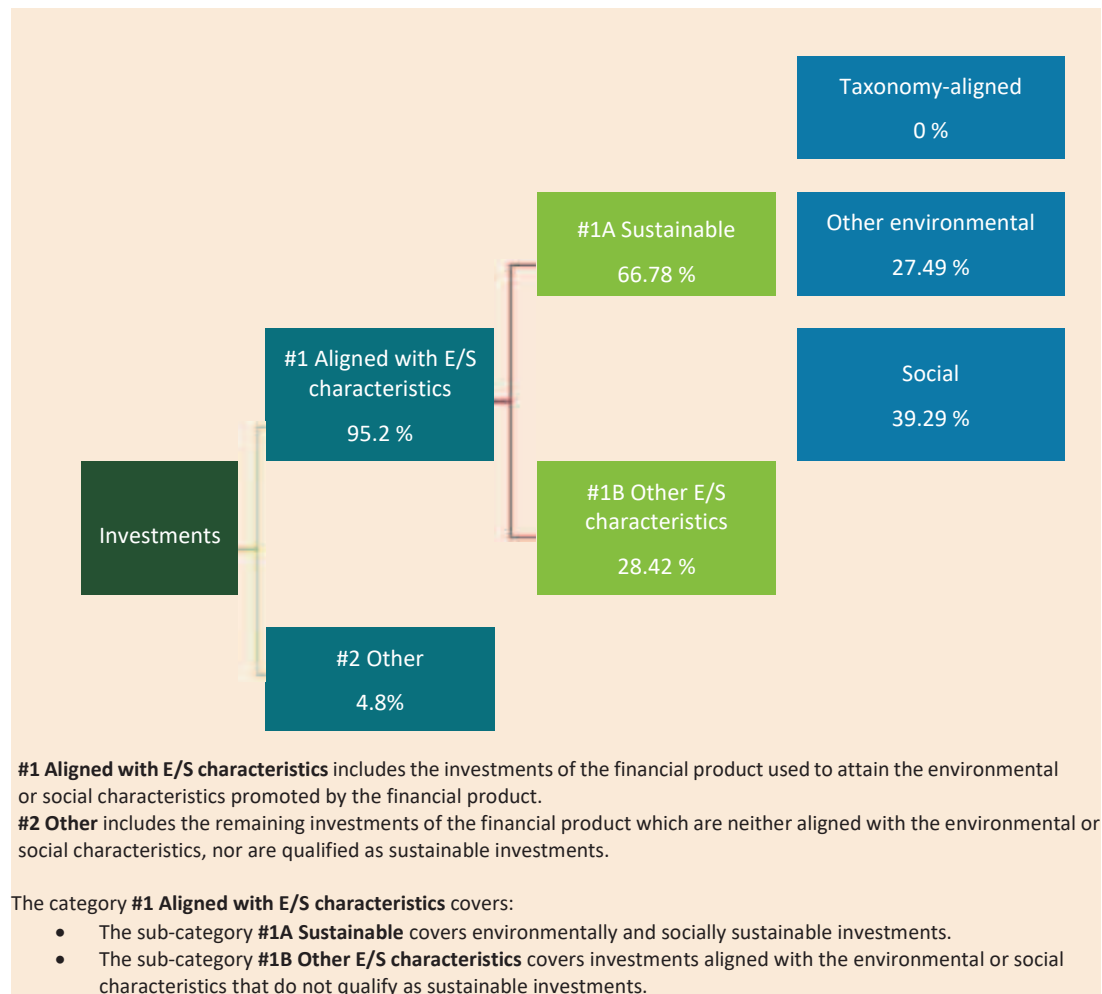

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 34.45%     |
| Trusts, funds and similar financial entities   | 8.35%      |
| Renting and operating of own or leased real estate                                     | 7.31%      |
| Manufacture of motor vehicles  | 6.17%      |
| Wireless telecommunications activities   | 4.98%      |
| Electricity, gas, steam and air conditioning supply                                    | 4.78%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 2.67%      |
| Distribution of gaseous fuels through mains  | 2.66%      |
| Production of electricity  | 2.29%      |
| Manufacture of refined petroleum products  | 2.21%      |
| Security and commodity contracts brokerage   | 2.13%      |
| Manufacture of basic pharmaceutical products   | 1.94%      |
| Life insurance   | 1.84%      |
| General public administration activities   | 1.54%      |
| Service activities incidental to land transportation                                   | 1.36%      |
| Non-life insurance   | 1.32%      |
| Manufacture of beer  | 0.98%      |
| Advertising agencies   | 0.97%      |
| Wired telecommunications activities  | 0.96%      |
| Service activities incidental to air transportation                                    | 0.88%      |
| Web portals  | 0.86%      |
| Distribution of electricity  | 0.76%      |
| Other credit granting  | 0.69%      |
| Satellite telecommunications activities  | 0.68%      |
| Financial leasing  | 0.66%      |
| Passenger air transport  | 0.44%      |
| Manufacture of electrical equipment  | 0.42%      |
| Manufacture of motor vehicles, trailers and semi-trailers                              | 0.39%      |
| Manufacture of electrical and electronic equipment for motor vehicles                  | 0.38%      |
| Restaurants and mobile food service activities   | 0.36%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 0.35%      |
| Manufacture of other non-metallic mineral products                                     | 0.34%      |

|   |       |
|---|-------|
| Passenger rail transport, interurban  | 0.34% |
| Water collection, treatment and supply  | 0.32% |
| Manufacture of electric motors, generators and transformers                       | 0.32% |
| Wholesale trade, except of motor vehicles and motorcycles                         | 0.31% |
| Transmission of electricity   | 0.3%  |
| Manufacture of computers and peripheral equipment                                 | 0.29% |
| Research and experimental development on biotechnology                            | 0.29% |
| Management of real estate on a fee or contract basis                              | 0.28% |
| Manufacture of instruments and appliances for measuring, testing and navigation   | 0.26% |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.25% |
| Land transport and transport via pipelines  | 0.22% |
| Manufacture of tobacco products   | 0.2%  |
| Manufacture of chemicals and chemical products                                    | 0.18% |
| Reinsurance   | 0.17% |
| Other information service activities n.e.c.                                       | 0.15% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 27.49% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 39.29% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 4.8% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <span style="color: green;">●●</span> <input type="checkbox"/> YES   | <span style="color: green;">●</span> <input checked="" type="checkbox"/> NO   |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 59.93% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 7.25 Score over max 10 | 6.64 Score over max 10 | 96.09%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                     | Sector                                    | Proportion | Country |
|-------------------------------------|---|------------|---------|
| DBR 2% - 15/08/2023                 | General public administration activities  | 2.42%      | DE      |
| RBI AV 7.375% Var - 20/12/2032 Call | Other monetary intermediation             | 1.87%      | AT      |
| REPSM 4.5% Var - 25/03/2075 Call    | Manufacture of refined petroleum products | 1.59%      | NL      |

|                                     |  |       |    |
|-------------------------------------|--|-------|----|
| DB 5% Var - 05/09/2030 Call         | Other monetary intermediation                      | 1.38% | DE |
| DEVOBA 7% Var - 15/12/2027 Perp     | Other monetary intermediation                      | 1.37% | NL |
| EDF 4.375% - 12/10/2029 Call        | Production of electricity                          | 1.25% | FR |
| SABSM 2.5% Var - 15/04/2031 Call    | Other monetary intermediation                      | 1.16% | ES |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 45.84%     |
| Renting and operating of own or leased real estate                                     | 13.43%     |
| Life insurance   | 9.32%      |
| Manufacture of refined petroleum products  | 3.92%      |
| Production of electricity  | 3.16%      |
| Wired telecommunications activities  | 2.47%      |
| General public administration activities   | 2.42%      |
| Non-life insurance   | 1.84%      |
| Electricity, gas, steam and air conditioning supply                                    | 1.82%      |
| Wireless telecommunications activities   | 1.75%      |
| Distribution of gaseous fuels through mains  | 1.56%      |
| Trusts, funds and similar financial entities   | 1.11%      |
| Service activities incidental to land transportation                                   | 0.99%      |
| Civil engineering  | 0.75%      |
| Activities of insurance agents and brokers   | 0.7%       |
| Research and experimental development on biotechnology                                 | 0.69%      |
| Transmission of electricity  | 0.61%      |
| Warehousing and support activities for transportation                                  | 0.58%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 0.57%      |
| Manufacture of motor vehicles  | 0.55%      |
| Distribution of electricity  | 0.5%       |
| Construction of utility projects for electricity and telecommunications                | 0.5%       |
| Manufacture of other inorganic basic chemicals   | 0.46%      |
| Reinsurance  | 0.44%      |
| Manufacture of other chemical products n.e.c.  | 0.44%      |
| Service activities incidental to air transportation                                    | 0.42%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 0.38%      |
| Manufacture of builders ware of plastic  | 0.38%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 0.34%      |
| Manufacture of concrete products for construction purposes                             | 0.29%      |

|  |       |
|--|-------|
| Manufacture of other parts and accessories for motor vehicles                            | 0.27% |
| Private security activities  | 0.25% |
| Collection of non-hazardous waste  | 0.22% |
| Manufacture of chemicals and chemical products   | 0.22% |
| Rental and leasing activities  | 0.2%  |
| Other human health activities  | 0.19% |
| Other financial service activities, except insurance and pension funding n.e.c.          | 0.19% |
| Combined facilities support activities   | 0.16% |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 0.09% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 26.63% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 33.3% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 7.31% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 11.91% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.09 Score over max 10 | 6.05 Score over max 10 | 99.82%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                 | Sector                                       | Proportion | Country |
|---|--|------------|---------|
| AXA IM EURO LIQUIDITY SRI Capitalisation EUR pf | Trusts, funds and similar financial entities | 4.06%      | FR      |
| FRTR 0.25% - 25/07/2024 CPI                     | General public administration activities     | 3.7%       | FR      |
| SPGB 4.65% - 30/07/2025                         | General public administration activities     | 3.19%      | ES      |
| BTPS 1.35% - 01/04/2030                         | General public administration activities     | 2.54%      | IT      |

|                         |  |       |    |
|-------------------------|--|-------|----|
| FRTR 0.25% - 25/11/2026 | General public administration activities | 2.25% | FR |
| BTPS 4.5% - 01/03/2026  | General public administration activities | 2.19% | IT |
| FRTR 0.5% - 25/05/2026  | General public administration activities | 2.18% | FR |

| FRTR 4.75% - 25/04/2035 | General public administration activities | 1.78% | FR |
| FRTR 2.5% - 25/05/2030  | General public administration activities | 1.71% | FR |
| BKO 2.2% - 12/12/2024   | General public administration activities | 1.64% | DE |
| FRTR 0 - 25/03/2024     | General public administration activities | 1.59% | FR |
| BTPS 5% - 01/08/2039    | General public administration activities | 1.57% | IT |

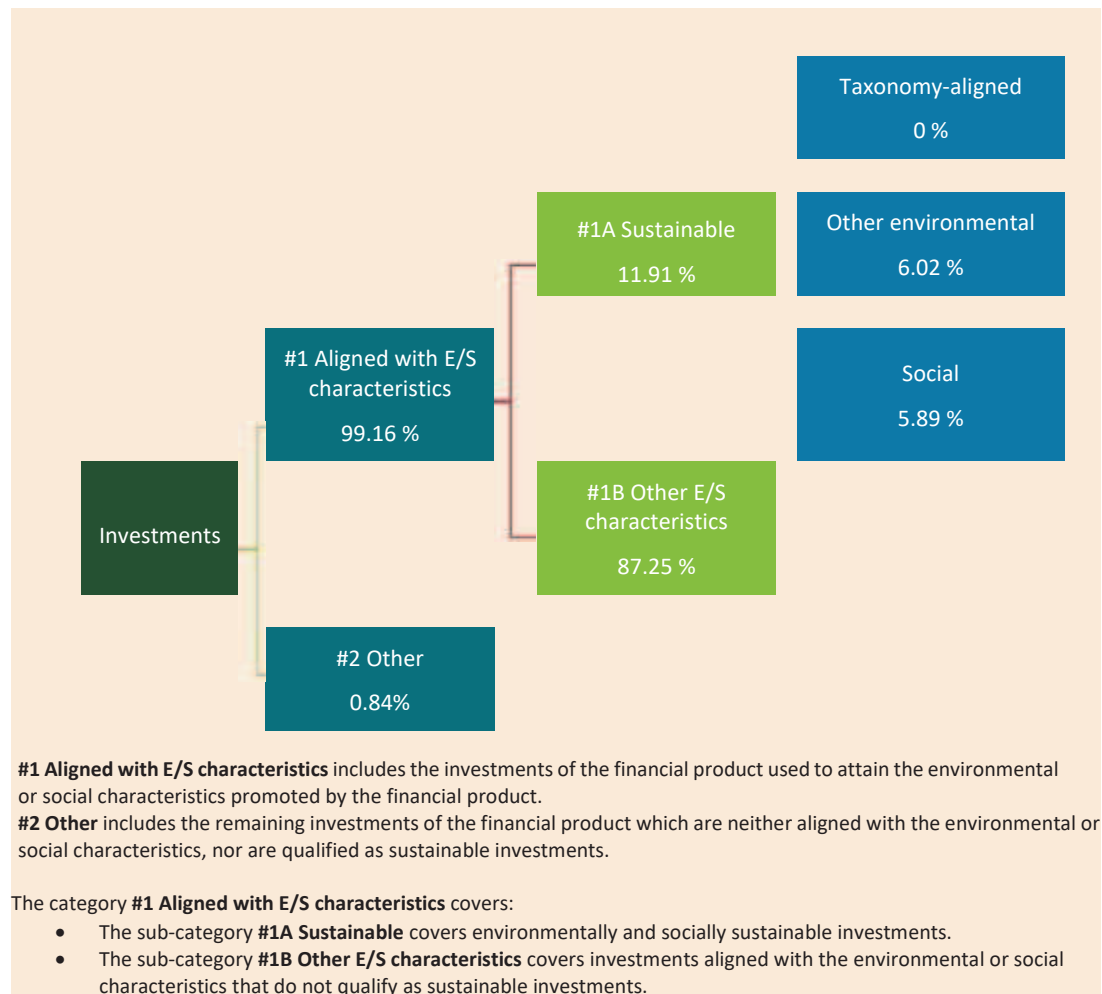

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| General public administration activities  | 89.09%     |
| Trusts, funds and similar financial entities                                    | 4.06%      |
| Other monetary intermediation   | 3.33%      |
| Activities of extraterritorial organisations and bodies                         | 2.62%      |
| Other financial service activities, except insurance and pension funding n.e.c. | 0.9%       |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas  In nuclear energy
- No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 6.02% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 5.89% of sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.84% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 3.28% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 5.85 Score over max 10 | 5.82 Score over max 10 | 99.87%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                | Sector                                   | Proportion | Country |
|--------------------------------|--|------------|---------|
| DBRI 0.5% - 15/04/2030<br>CPI  | General public administration activities | 5.18%      | DE      |
| FRTR 0.7% - 25/07/2030<br>CPI  | General public administration activities | 3.97%      | FR      |
| FRTR 1.85% - 25/07/2027<br>CPI | General public administration activities | 3.76%      | FR      |
| BTPS 1.3% - 15/05/2028<br>CPI  | General public administration activities | 3.72%      | IT      |

|                                 |   |       |    |
|---------------------------------|---|-------|----|
| FRTR 0.25% - 25/07/2024<br>CPI  | General public<br>administration activities | 3.68% | FR |
| SPGBEI 1% - 30/11/2030<br>CPI   | General public<br>administration activities | 3.63% | ES |
| SPGBEI 1.8% - 30/11/2024<br>CPI | General public<br>administration activities | 3.59% | ES |
| BTPS 2.35% - 15/09/2035<br>CPI  | General public<br>administration activities | 3.49% | IT |
| BTPS 2.55% - 15/09/2041<br>CPI  | General public<br>administration activities | 3.37% | IT |
| DBRI 0.1% - 15/04/2046<br>CPI   | General public<br>administration activities | 3.35% | DE |
| SPGBEI 0.7% - 30/11/2033<br>CPI | General public<br>administration activities | 3.34% | ES |
| FRTR 0.1% - 25/07/2031<br>CPI   | General public<br>administration activities | 3.27% | FR |
| BTPS 3.1% - 15/09/2026<br>CPI   | General public<br>administration activities | 3.21% | IT |
| FRTR 1.8% - 25/07/2040<br>CPI   | General public<br>administration activities | 3.19% | FR |
| FRTR 3.15% - 25/07/2032<br>CPI  | General public<br>administration activities | 3.13% | FR |

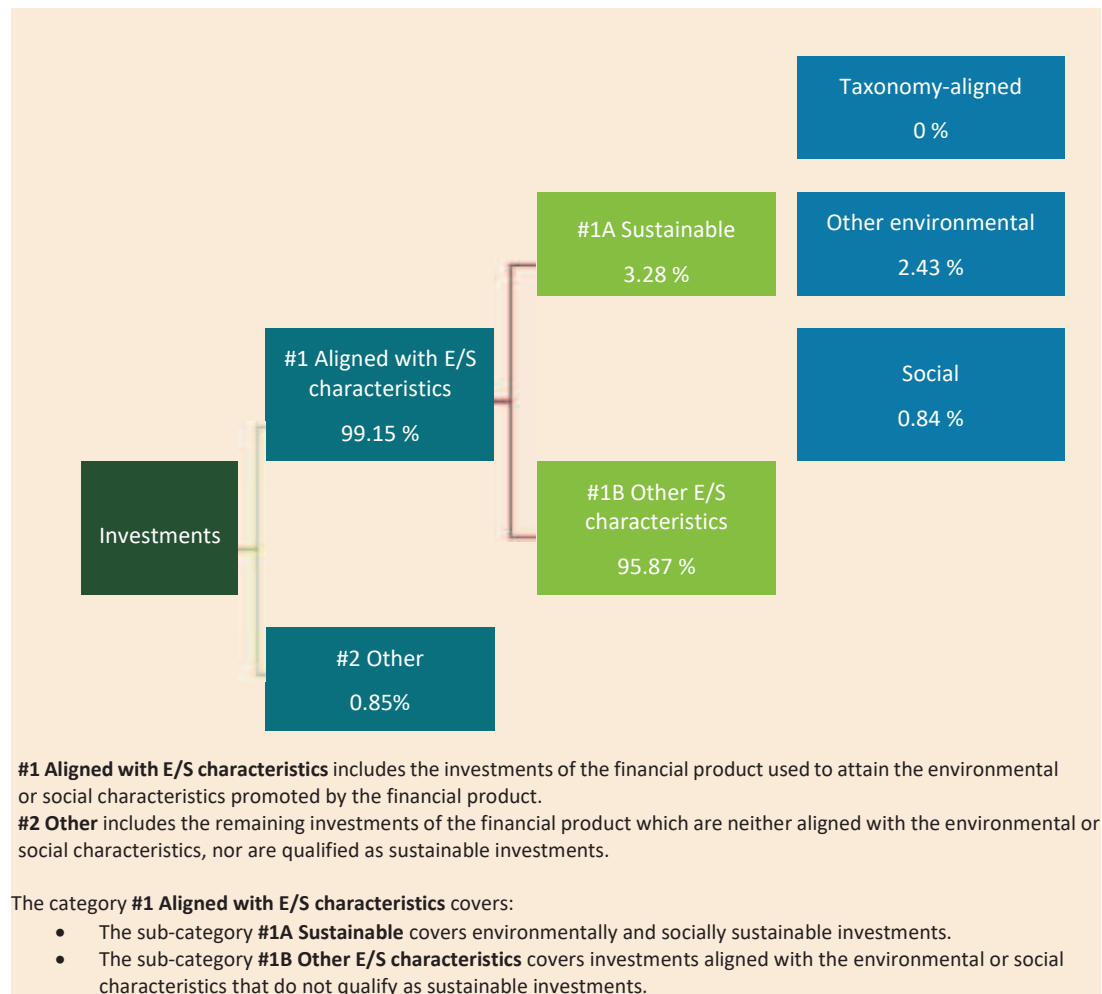

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector                                   | Proportion |
|--|------------|
| General public administration activities     | 97.11%     |
| Trusts, funds and similar financial entities | 2.89%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

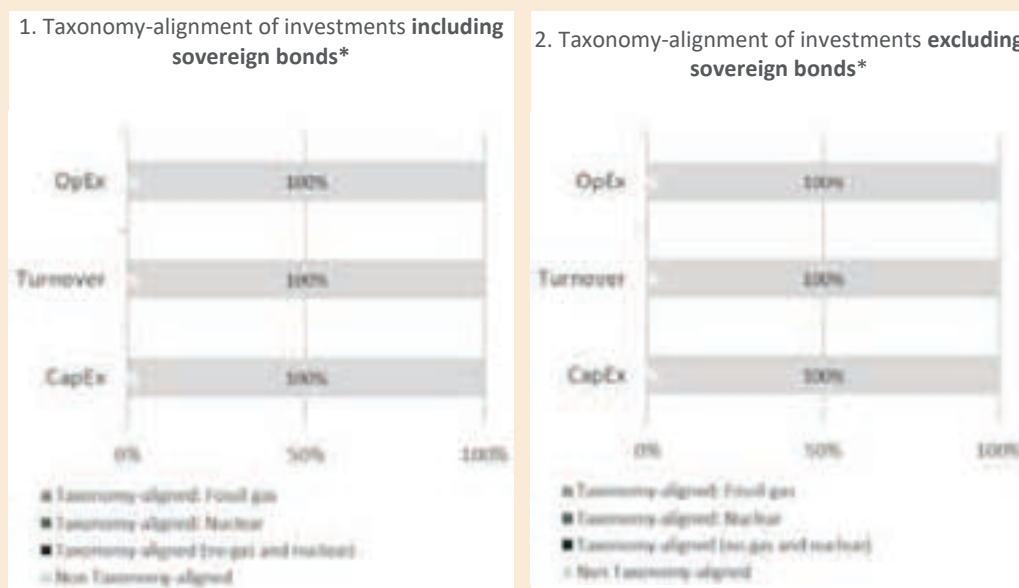

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies.  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 2.43% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 0.84% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.85% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic

Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO   |
|--|--|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ___%                   | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 4.41% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ___%                           | <input checked="" type="checkbox"/> with a social objective  |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.35 Score over max 10 | 6.06 Score over max 10 | 99.73%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                 | Sector                                   | Proportion | Country |
|---------------------------------|--|------------|---------|
| DBRI 0.1% - 15/04/2026<br>CPI   | General public administration activities | 19.89%     | DE      |
| FRTR 1.85% - 25/07/2027<br>CPI  | General public administration activities | 14.8%      | FR      |
| T 4.5% - 30/11/2024             | General public administration activities | 11.72%     | US      |
| UKTI 0.125% - 22/03/2026<br>CPI | General public administration activities | 9.17%      | GB      |

|  |   |       |    |
|--|---|-------|----|
| AXA IM EURO LIQUIDITY<br>SRI Capitalisation EUR pf | Trusts, funds and similar<br>financial entities | 5.89% | FR |
| TII 0.125% - 15/04/2025<br>CPI                     | General public<br>administration activities     | 5.8%  | US |
| UKTI 0.125% - 22/03/2024<br>CPI                    | General public<br>administration activities     | 4.79% | GB |
| TII 2.375% - 15/01/2025<br>CPI                     | General public<br>administration activities     | 4.14% | US |
| BTPS 3.1% - 15/09/2026<br>CPI                      | General public<br>administration activities     | 3.63% | IT |
| FRTR 0.1% - 01/03/2026<br>CPI                      | General public<br>administration activities     | 3.34% | FR |
| BTPS 0.65% - 15/05/2026<br>CPI                     | General public<br>administration activities     | 3.33% | IT |
| TII 0.625% - 15/01/2024<br>CPI                     | General public<br>administration activities     | 2.9%  | US |
| DBRI 0.1% - 15/04/2046<br>CPI                      | General public<br>administration activities     | 2.13% | DE |
| TII 0.125% - 15/04/2027<br>CPI                     | General public<br>administration activities     | 1.72% | US |
| FRTR 0.1% - 01/03/2029<br>CPI                      | General public<br>administration activities     | 1.42% | FR |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| General public administration activities               | 90.3%      |
| Trusts, funds and similar financial entities           | 5.96%      |
| Other monetary intermediation                          | 2.2%       |
| Distribution of gaseous fuels through mains            | 0.71%      |
| Life insurance   | 0.33%      |
| Research and experimental development on biotechnology | 0.2%       |
| Manufacture of motor vehicles                          | 0.13%      |
| Service activities incidental to air transportation    | 0.07%      |
| Service activities incidental to land transportation   | 0.07%      |
| Renting and leasing of cars and light motor vehicles   | 0.03%      |
| Distribution of electricity                            | 0.01%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

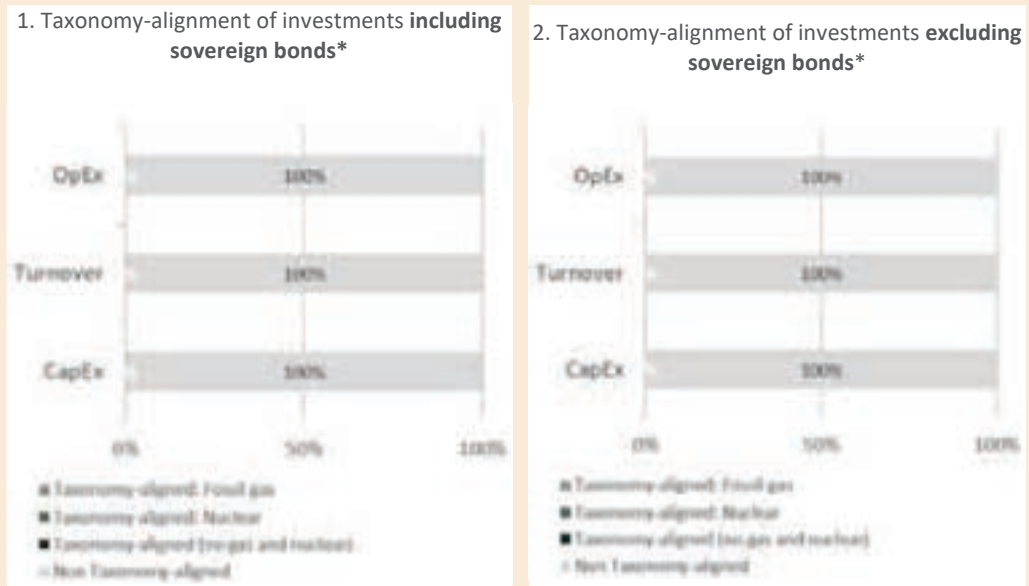

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 2.17% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 2.24% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 3.96% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <span style="color: green;">●●</span> <input type="checkbox"/> YES   | <span style="color: green;">●</span> <input checked="" type="checkbox"/> NO   |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 73.73% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                         |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-universe on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their E Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value  | Benchmark   | Coverage |
|-------------------------|--|---|----------|
| Carbon intensity        | 95.56 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 240.09 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 100%     |
| Water intensity         | 3277.79 Thousands of cubic meters for corporates   | 14236.19 Thousands of cubic meters for corporates   | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been

- qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                       | Sector   | Proportion | Country |
|---------------------------------------|--|------------|---------|
| ASML HOLDING NV XAMS EUR              | Manufacture of other special-purpose machinery n.e.c.                                  | 6.73%      | NL      |
| HERMES INTERNATIONAL XPAR EUR         | Manufacture of wearing apparel   | 4.41%      | FR      |
| LVMH MOET HENNESSY LOUIS VUI XPAR EUR | Manufacture of luggage, handbags and the like, saddlery and harness                    | 4.36%      | FR      |
| L'OREAL XPAR EUR                      | Manufacture of perfumes and toilet preparations  | 4.25%      | FR      |
| SCHNEIDER ELECTRIC SE XPAR EUR        | Manufacture of electric motors, generators and transformers                            | 3.99%      | FR      |
| FERRARI NV MTAA EUR                   | Manufacture of motor vehicles  | 3.98%      | IT      |
| PERNOD RICARD SA XPAR EUR             | Manufacture of beer  | 3.9%       | FR      |
| LOTUS BAKERIES XBRU EUR               | Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes     | 3.86%      | BE      |
| SYMRISE AG XETR EUR                   | Manufacture of other chemical products n.e.c.  | 3.7%       | DE      |
| ADYEN NV XAMS EUR                     | Other activities auxiliary to financial services, except insurance and pension funding | 3.64%      | NL      |
| DASSAULT SYSTEMES SE XPAR EUR         | Other software publishing  | 3.58%      | FR      |
| SARTORIUS AG-VORZUG XETR EUR          | Manufacture of instruments and appliances for measuring, testing and navigation        | 3.44%      | DE      |
| SIEMENS HEALTHINEERS AG XETR EUR      | Manufacture of medical and dental instruments and supplies                             | 3.43%      | DE      |
| D'IETEREN GROUP XBRU EUR              | Wholesale and retail trade and repair of motor vehicles and motorcycles                | 3.28%      | BE      |
| ATLAS COPCO AB-A SHS XSTO SEK         | Manufacture of other pumps and compressors   | 3.25%      | SE      |

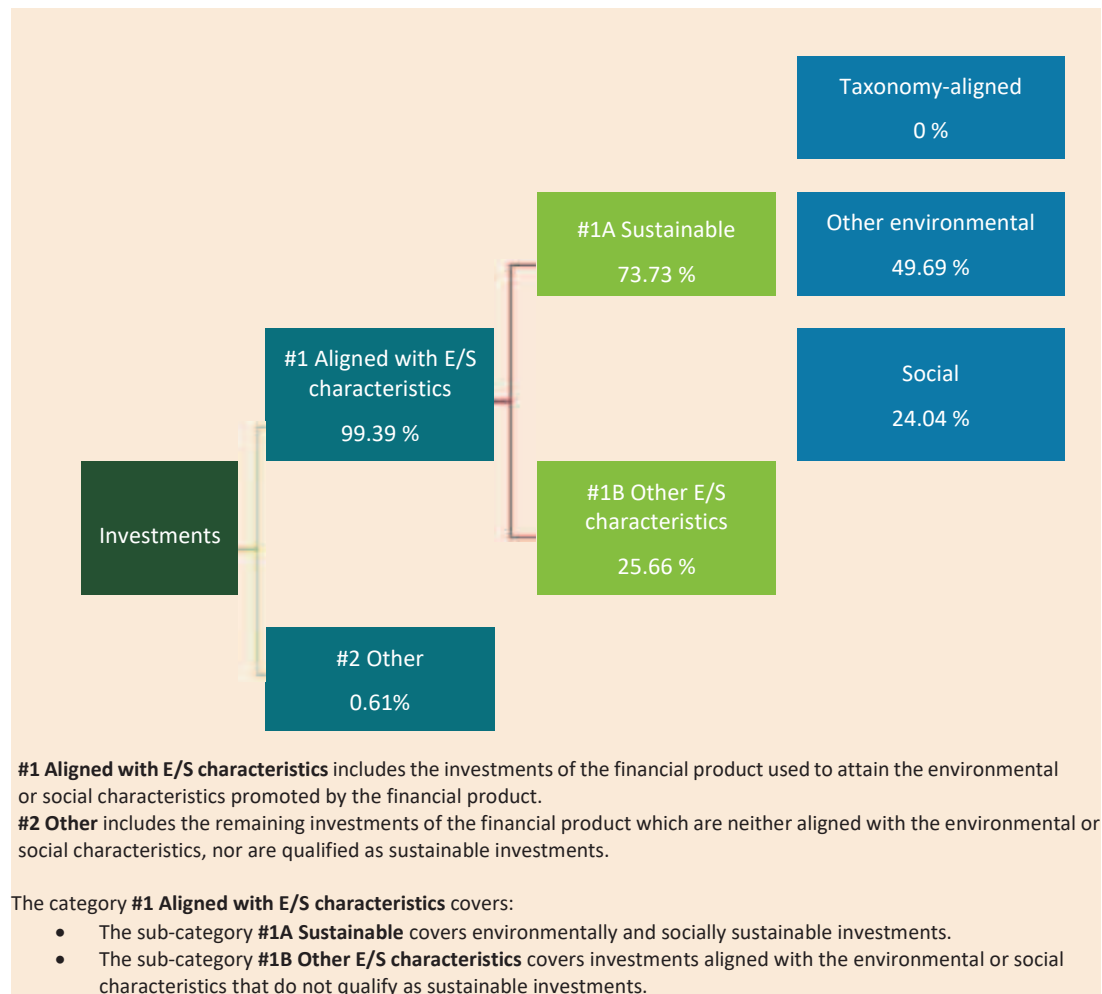

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of other chemical products n.e.c.  | 8.73%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 8.37%      |
| Manufacture of wearing apparel   | 7.03%      |
| Manufacture of luggage, handbags and the like, saddlery and harness                    | 4.36%      |
| Manufacture of perfumes and toilet preparations  | 4.25%      |
| Manufacture of electric motors, generators and transformers                            | 3.99%      |
| Manufacture of motor vehicles  | 3.98%      |
| Manufacture of beer  | 3.9%       |
| Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes     | 3.86%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 3.64%      |
| Other software publishing  | 3.58%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 3.44%      |
| Manufacture of medical and dental instruments and supplies                             | 3.43%      |
| Wholesale and retail trade and repair of motor vehicles and motorcycles                | 3.28%      |
| Manufacture of other pumps and compressors   | 3.25%      |
| Sound recording and music publishing activities  | 3.09%      |
| Computer programming activities  | 3.03%      |
| Production of electricity  | 2.67%      |
| Manufacture of machinery for food, beverage and tobacco processing                     | 2.59%      |
| Manufacture of electronic components   | 2.58%      |
| Research and experimental development on biotechnology                                 | 2.51%      |
| Manufacture of basic pharmaceutical products   | 2.43%      |
| Wholesale of pharmaceutical goods  | 2.42%      |
| Transmission of electricity  | 2.18%      |
| Other information technology and computer service activities                           | 2.14%      |
| Manufacture of refined petroleum products  | 1.97%      |
| Construction of utility projects for electricity and telecommunications                | 1.5%       |

|  |       |
|--|-------|
| Renting and leasing of cars and light motor vehicles | 0.92% |
| Manufacture of lifting and handling equipment        | 0.86% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

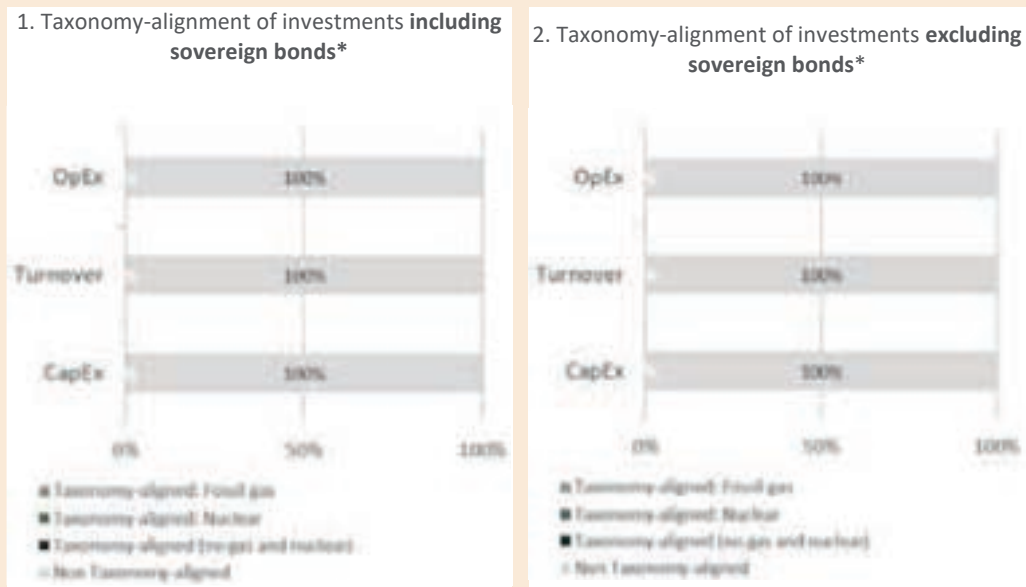

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 49.69% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 24.04% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.61% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social

characteristics  
that they  
promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 56.49% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark             | Coverage |
|-------------------------|------------------------|-----------------------|----------|
| ESG Score               | 7.09 Score over max 10 | 6.7 Score over max 10 | 98.5%    |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                | Sector                                   | Proportion | Country |
|--------------------------------|--|------------|---------|
| FRTR 0.25% - 25/07/2024<br>CPI | General public administration activities | 5.62%      | FR      |
| BTPS 1.85% - 01/07/2025        | General public administration activities | 4.91%      | IT      |

|                                    |  |       |    |
|------------------------------------|--|-------|----|
| SPGB 1.6% - 30/04/2025             | General public administration activities             | 2.98% | ES |
| SPGB 0.8% - 30/07/2027             | General public administration activities             | 2.98% | ES |
| BTPS 0.85% - 15/01/2027            | General public administration activities             | 2.73% | IT |
| BGB 1% - 22/06/2026                | General public administration activities             | 2.21% | BE |
| UNEDIC 0.1% - 25/11/2026           | Non-life insurance                                   | 1.62% | FR |
| ADIFAL 3.5% - 27/05/2024           | Service activities incidental to land transportation | 1.55% | ES |
| CDEP 2.125% - 27/09/2023           | General public administration activities             | 1.52% | IT |
| BNG 0.125% - 11/04/2026            | Other monetary intermediation                        | 1.38% | NL |
| CFF 0.25% - 11/04/2023             | Other monetary intermediation                        | 1.26% | FR |
| PHILIP 0.25% - 28/04/2025          | General public administration activities             | 1.17% | PH |
| NRW 0.25% - 13/03/2026             | General public administration activities             | 1.16% | DE |
| AXASA 3.941% Var - 07/11/2024 Perp | Non-life insurance                                   | 1.09% | FR |
| BTPS 4.5% - 01/03/2024             | General public administration activities             | 1.04% | IT |

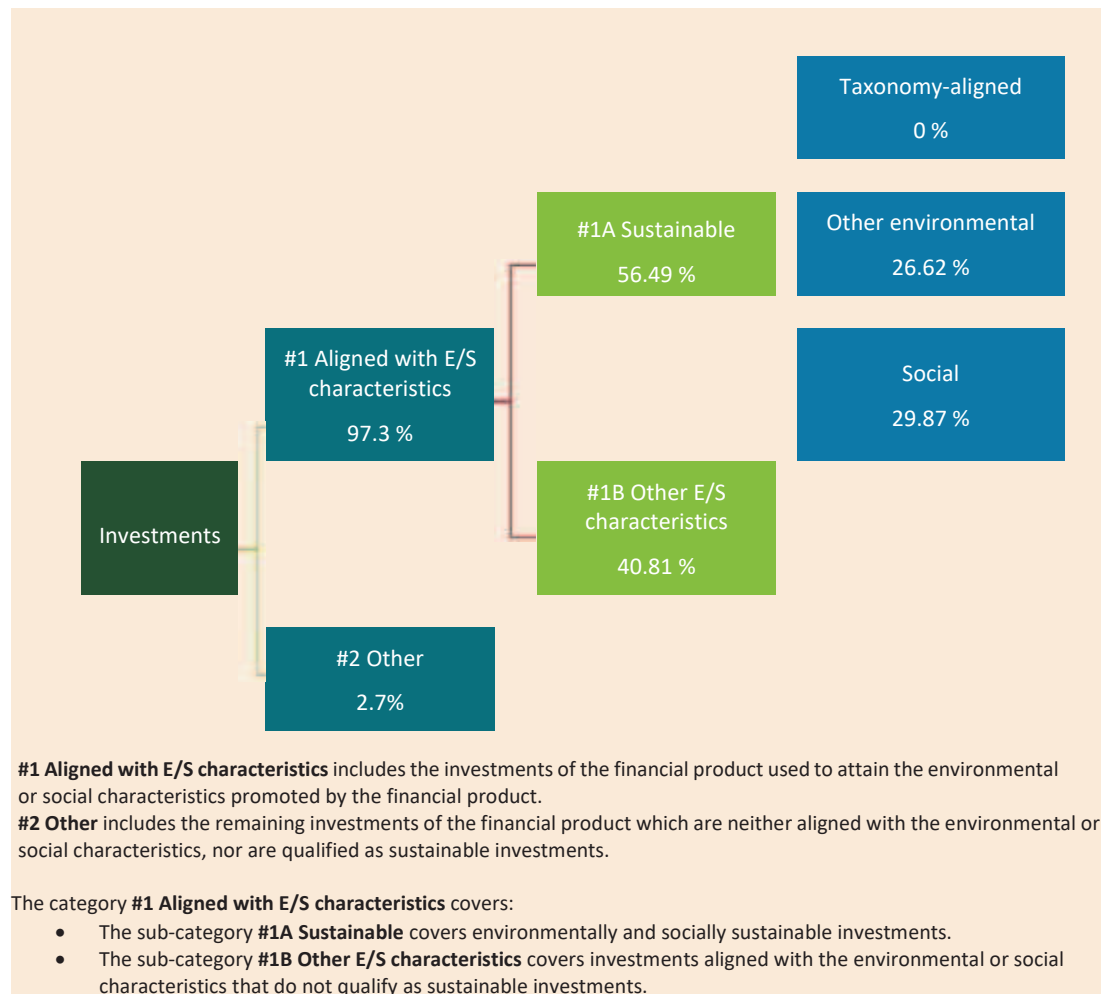

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| General public administration activities  | 30.39%     |
| Other monetary intermediation   | 25.34%     |
| Renting and operating of own or leased real estate                                | 5.23%      |
| Non-life insurance  | 4.63%      |
| Activities of extraterritorial organisations and bodies                           | 3.85%      |
| Electricity, gas, steam and air conditioning supply                               | 3.29%      |
| Service activities incidental to land transportation                              | 3.04%      |
| Manufacture of motor vehicles   | 2.93%      |
| Trusts, funds and similar financial entities                                      | 2.62%      |
| Manufacture of refined petroleum products   | 1.96%      |
| Life insurance  | 1.61%      |
| Wireless telecommunications activities  | 1.61%      |
| Water collection, treatment and supply  | 1.23%      |
| Production of electricity   | 1.16%      |
| Manufacture of basic pharmaceutical products                                      | 0.98%      |
| Wired telecommunications activities   | 0.94%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment       | 0.82%      |
| Distribution of electricity   | 0.82%      |
| Manufacture of cement   | 0.64%      |
| Manufacture of household and sanitary goods and of toilet requisites              | 0.62%      |
| Research and experimental development on biotechnology                            | 0.57%      |
| Manufacture of other organic basic chemicals                                      | 0.57%      |
| Other publishing activities   | 0.56%      |
| Manufacture of instruments and appliances for measuring, testing and navigation   | 0.55%      |
| Manufacture of beer   | 0.53%      |
| Retail trade, except of motor vehicles and motorcycles                            | 0.49%      |
| Manufacture of light metal packaging  | 0.49%      |
| Advertising agencies  | 0.47%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.38%      |
| Other credit granting   | 0.35%      |

|   |       |
|---|-------|
| Web portals   | 0.33% |
| Renting and leasing of cars and light motor vehicles                    | 0.24% |
| Manufacture of agricultural and forestry machinery                      | 0.24% |
| Manufacture of electrical equipment                                     | 0.2%  |
| Manufacture of soap and detergents, cleaning and polishing preparations | 0.2%  |
| Manufacture of luggage, handbags and the like, saddlery and harness     | 0.15% |
| Other   | 0%    |
| Other   | 0%    |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 26.62% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 29.87% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 2.7% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic

Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.45% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.89 Score over max 10 | 6.52 Score over max 10 | 98.84%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer fell within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                | Sector                                   | Proportion | Country |
|--------------------------------|--|------------|---------|
| FRTR 0.25% - 25/07/2024<br>CPI | General public administration activities | 14.45%     | FR      |
| BTPS 3.5% - 01/03/2030         | General public administration activities | 8.03%      | IT      |

|                                    |  |       |    |
|------------------------------------|--|-------|----|
| UNEDIC 0.25% - 25/11/2029          | Non-life insurance                                   | 2.83% | FR |
| ROMANI 2.375% - 19/04/2027         | General public administration activities             | 2.5%  | RO |
| SPGB 1.95% - 30/07/2030            | General public administration activities             | 1.9%  | ES |
| CCAMA 6% - 23/01/2027              | Non-life insurance                                   | 1.89% | FR |
| NRWBK 0.125% - 12/04/2027          | General public administration activities             | 1.83% | DE |
| BBVASM 0.5% - 14/01/2027           | Other monetary intermediation                        | 1.81% | ES |
| ULFP 2.125% Var - 25/07/2023 Perp  | Renting and operating of own or leased real estate   | 1.76% | FR |
| CABKSM 1.125% - 12/11/2026         | Other monetary intermediation                        | 1.54% | ES |
| UCGIM 2% Var - 23/09/2029 Call     | Other monetary intermediation                        | 1.53% | IT |
| ABESM 1% - 27/02/2027              | Service activities incidental to land transportation | 1.5%  | ES |
| EDPPL 4.496% Var - 30/04/2079 Call | Electricity, gas, steam and air conditioning supply  | 1.4%  | PT |
| REPSM 4.5% Var - 25/03/2075 Call   | Manufacture of refined petroleum products            | 1.38% | NL |
| PERU 3.75% - 01/03/2030            | General public administration activities             | 1.33% | PE |

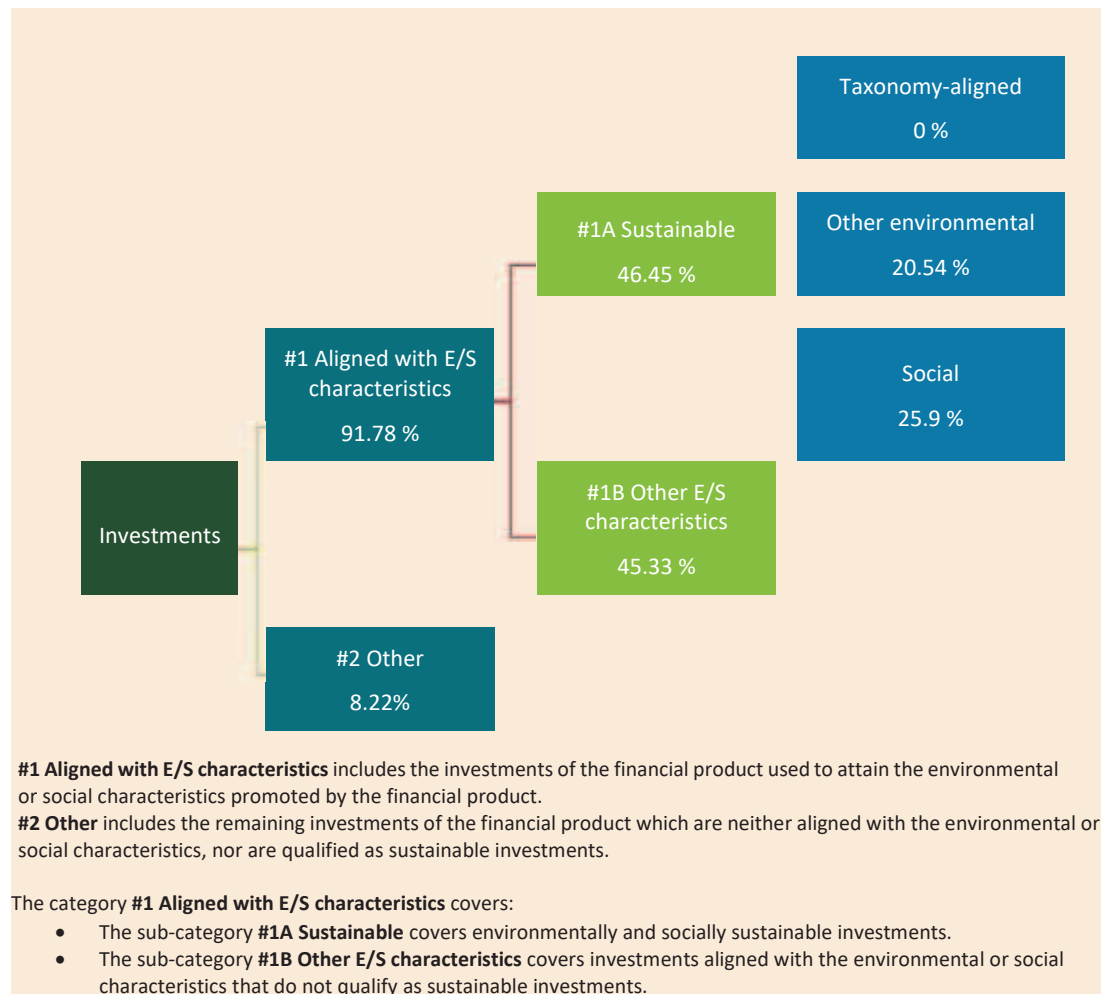

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| General public administration activities                             | 35.96%     |
| Other monetary intermediation  | 29.37%     |
| Renting and operating of own or leased real estate                   | 6%         |
| Non-life insurance   | 5.72%      |
| Trusts, funds and similar financial entities                         | 3.55%      |
| Manufacture of motor vehicles  | 3.09%      |
| Production of electricity  | 3.03%      |
| Manufacture of refined petroleum products                            | 2.36%      |
| Water collection, treatment and supply                               | 1.84%      |
| Service activities incidental to land transportation                 | 1.78%      |
| Electricity, gas, steam and air conditioning supply                  | 1.7%       |
| Life insurance   | 1.34%      |
| Manufacture of other organic basic chemicals                         | 1.29%      |
| Research and experimental development on biotechnology               | 0.97%      |
| Wired telecommunications activities                                  | 0.87%      |
| Wireless telecommunications activities                               | 0.48%      |
| Transmission of electricity  | 0.39%      |
| Manufacture of household and sanitary goods and of toilet requisites | 0.25%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an

**What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 20.54% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 25.9% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 8.22% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.44% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Women on board
- Carbon Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-Class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Women on board and Carbon Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Women on board indicator and iii) 70% for the Carbon Intensity indicator.

| Sustainability KPI Name | Value   | Benchmark  | Coverage |
|-------------------------|---|--|----------|
| Women on board          | 37.76 % of women on board   | 36.59 % of women on board  | 95.38%   |
| Carbon Intensity        | 128CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 147.38CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 97.99%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives. It has considered climate mitigation; climate adaptation objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies                    | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy                         | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)       | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |

|   |   |  |  |
|---|---|--|--|
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector  | GWh per million EUR of revenue of investee companies, per high impact climate sector |  |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average                     |  |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average                     |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                 | Sector                                      | Proportion | Country |
|---|---|------------|---------|
| FRTR 0.25% - 25/07/2024<br>CPI                  | General public<br>administration activities | 6.12%      | FR      |
| BTPS 0 - 15/12/2024                             | General public<br>administration activities | 3.09%      | IT      |
| DBR 0 - 15/08/2050                              | General public<br>administration activities | 2.25%      | DE      |
| FRTR 1.75% - 25/06/2039                         | General public<br>administration activities | 1.99%      | FR      |
| AXA WF ACT Social Bonds<br>M Capitalisation EUR |   | 1.79%      | LU      |
| BGB 1.25% - 22/04/2033                          | General public<br>administration activities | 1.67%      | BE      |
| SPGB 1.4% - 30/04/2028                          | General public<br>administration activities | 1.62%      | ES      |
| SPGB 1.3% - 31/10/2026                          | General public<br>administration activities | 1.45%      | ES      |

|                            |   |       |    |
|----------------------------|---|-------|----|
| FRTR 0.5% - 25/06/2044     | General public administration activities                | 1.41% | FR |
| BTPS 0.95% - 15/09/2027    | General public administration activities                | 1.35% | IT |
| SPGB 4.2% - 31/01/2037     | General public administration activities                | 1.29% | ES |
| CDEP 1% - 11/02/2030       | General public administration activities                | 1.22% | IT |
| EU 0 - 04/10/2030          | Activities of extraterritorial organisations and bodies | 1.22% | BE |
| DBR 0 - 15/08/2030         | General public administration activities                | 1.19% | DE |
| NEDWBK 0.625% - 06/02/2029 | Other monetary intermediation                           | 1.14% | NL |

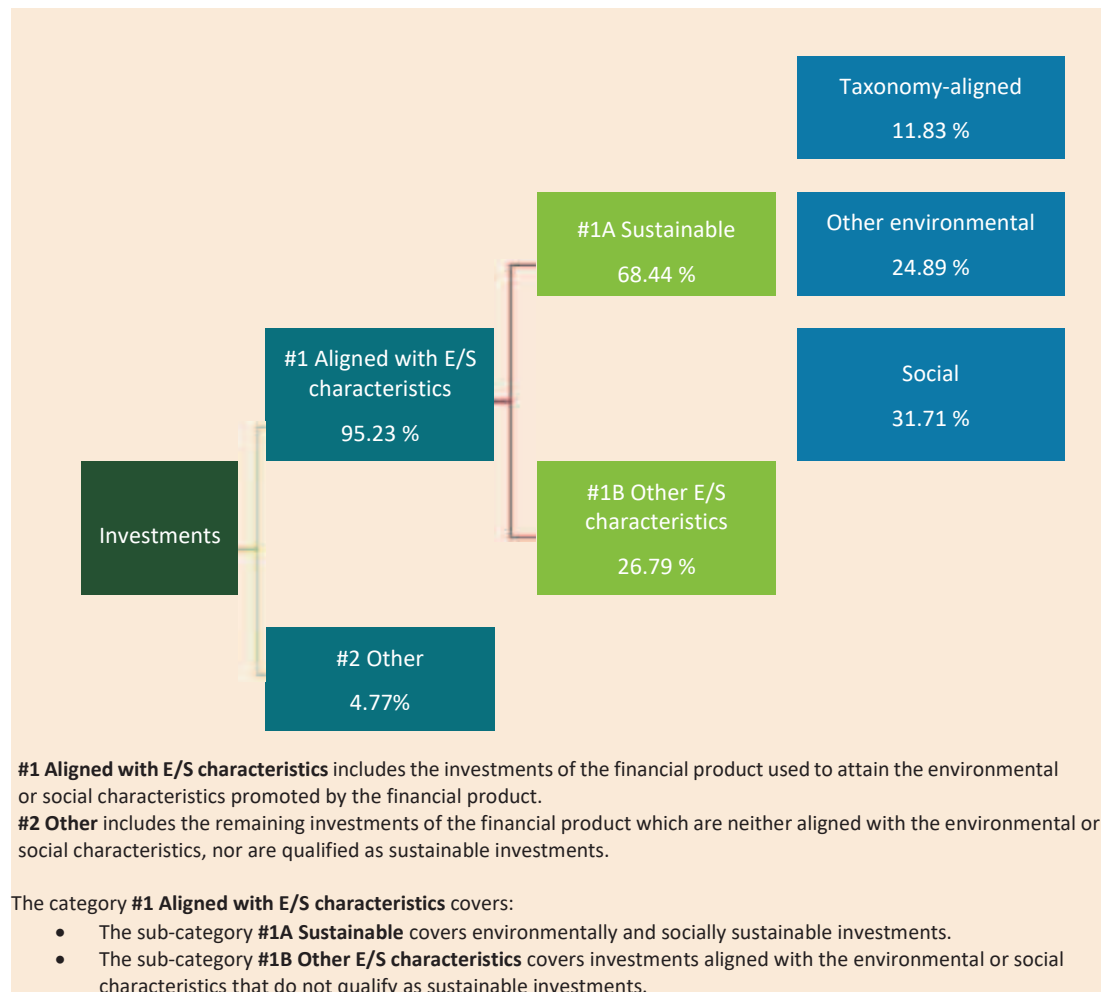

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| General public administration activities  | 47.1%      |
| Other monetary intermediation   | 17.74%     |
| Non-life insurance  | 4.68%      |
| Renting and operating of own or leased real estate                                | 4.31%      |
| Activities of extraterritorial organisations and bodies                           | 3.58%      |
| Electricity, gas, steam and air conditioning supply                               | 2.72%      |
| Wireless telecommunications activities  | 2.53%      |
| Production of electricity   | 1.9%       |
| Service activities incidental to land transportation                              | 1.79%      |
| Other   | 1.79%      |
| Trusts, funds and similar financial entities                                      | 1.32%      |
| Distribution of electricity   | 0.94%      |
| Manufacture of motor vehicles   | 0.92%      |
| Life insurance  | 0.83%      |
| Manufacture of medical and dental instruments and supplies                        | 0.8%       |
| Operation of dairies and cheese making  | 0.78%      |
| Land transport and transport via pipelines  | 0.55%      |
| Manufacture of wearing apparel  | 0.54%      |
| Manufacture of other articles of paper and paperboard                             | 0.5%       |
| Wired telecommunications activities   | 0.47%      |
| Service activities incidental to air transportation                               | 0.44%      |
| Manufacture of other chemical products n.e.c.                                     | 0.43%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.42%      |
| Manufacture of instruments and appliances for measuring, testing and navigation   | 0.42%      |
| Manufacture of beer   | 0.4%       |
| Manufacture of other organic basic chemicals                                      | 0.39%      |
| Transmission of electricity   | 0.34%      |
| Retail trade, except of motor vehicles and motorcycles                            | 0.33%      |
| Financial leasing   | 0.32%      |
| Manufacture of basic pharmaceutical products                                      | 0.31%      |
| Manufacture of industrial gases   | 0.17%      |

|  |       |
|--|-------|
| Manufacture of household and sanitary goods and of toilet requisites | 0.15% |
| Manufacture of electric motors, generators and transformers          | 0.09% |
| Other  | 0%    |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy
- No

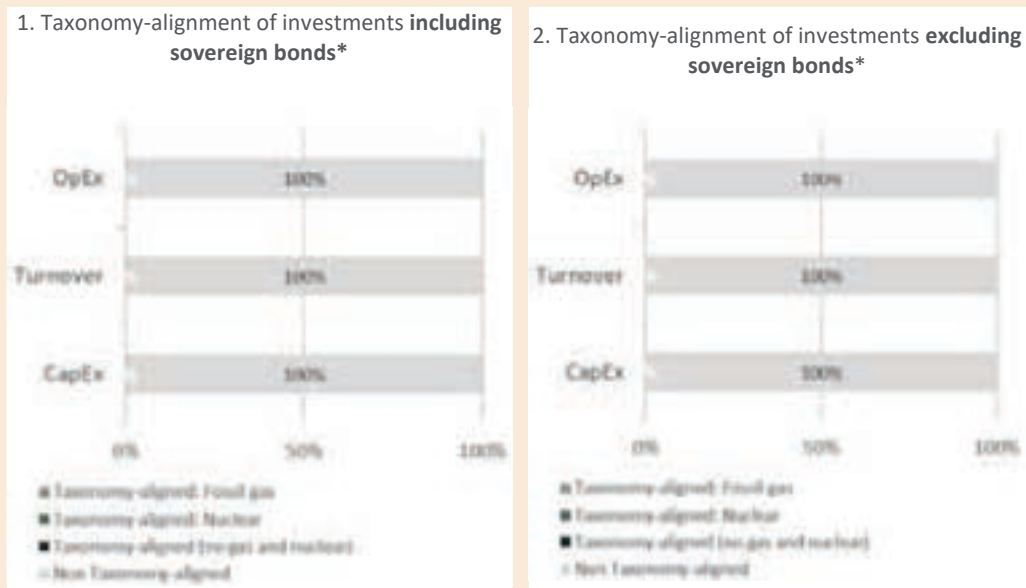

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the “do not significantly harm” principles. It invested in activities following the climate mitigation; climate adaptation objectives of the EU Taxonomy.

The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated to the portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully

**What was the share of investments made in transitional and enabling activities?**

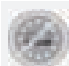

The Financial Product has invested % of its Net Asset Value in transitional activities and % of its Net Asset Value in enabling activities.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## ● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The table below displays a historical comparison of investments aligned with the EU Taxonomy compared with previous periodic reports:

## **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 24.89% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

## **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 31.71% of sustainable investments with a social objective.

## **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 4.77% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

## **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

## **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.89% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Women on board
- Carbon Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Women on board and Carbon Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Women on board indicator and iii) 70% for the Carbon Intensity indicator.

| Sustainability KPI Name | Value  | Benchmark  | Coverage |
|-------------------------|--|--|----------|
| Women on board          | 39.42 % of women on board  | 38.28 % of women on board  | 95.42%   |
| Carbon Intensity        | 139.23CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 191.01CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 93.71%   |

### ● ... And compared to previous periods?

Not applicable.

### ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

#### **3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under –5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high  |             |

|   |   |  |  |
|---|---|--|--|
|   |   | impact climate sector  |  |
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score         | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average |  |
| SDG no significantly negative score         | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                           | Sector  | Proportion | Country |
|---|---|------------|---------|
| AXA Trésor Court Terme Capitalisation EUR | Trusts, funds and similar financial entities        | 9.51%      | FR      |
| BTF 0 - 29/11/2023                        | General public administration activities            | 3.82%      | FR      |
| GS 4% - 21/09/2029 Call                   | Security and commodity contracts brokerage          | 1.31%      | US      |
| DEVOBA 1.75% Var - 22/10/2030 Call        | Other monetary intermediation                       | 1.3%       | NL      |
| KBCBB 0.375% Var - 16/06/2027 Call        | Other monetary intermediation                       | 1.18%      | BE      |
| STLA 2.75% - 15/05/2026 Call              | Manufacture of motor vehicles                       | 1.15%      | NL      |
| NTGYSM 0.875% - 15/05/2025 Call           | Electricity, gas, steam and air conditioning supply | 1.13%      | NL      |
| ABNANV 4.25% - 21/02/2030                 | Other monetary intermediation                       | 1.03%      | NL      |

|                                    |  |       |    |
|------------------------------------|--|-------|----|
| CMARK 0.875% - 07/05/2027          | Other monetary intermediation  | 0.98% | FR |
| CABKSM 3.75% Var - 15/02/2029 Call | Other monetary intermediation  | 0.98% | ES |
| VZ 0.375% - 22/03/2029 Call        | Wireless telecommunications activities   | 0.98% | US |
| DB 5% Var - 05/09/2030 Call        | Other monetary intermediation  | 0.93% | DE |
| BFCM 1.625% - 15/11/2027           | Other monetary intermediation  | 0.92% | FR |
| CONGR 1.125% - 25/09/2024 Call     | Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres | 0.92% | NL |
| LOGICR 0.75% - 15/07/2024 Call     | Renting and operating of own or leased real estate                               | 0.89% | LU |

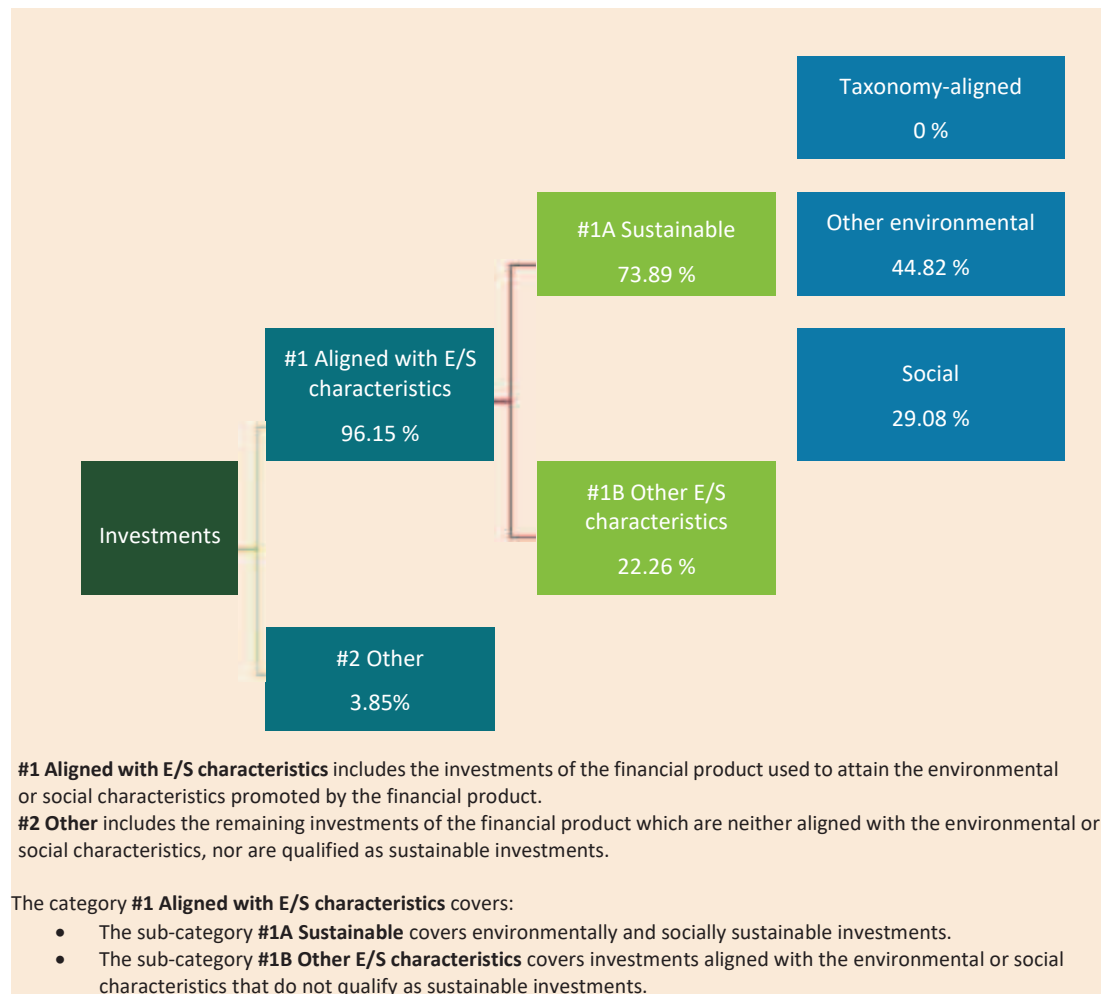

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 28.39%     |
| Trusts, funds and similar financial entities   | 10.54%     |
| Electricity, gas, steam and air conditioning supply                                    | 6.36%      |
| Renting and operating of own or leased real estate                                     | 6.03%      |
| Manufacture of motor vehicles  | 3.97%      |
| General public administration activities   | 3.82%      |
| Wireless telecommunications activities   | 3.71%      |
| Life insurance   | 3.61%      |
| Production of electricity  | 3.05%      |
| Non-life insurance   | 2.33%      |
| Security and commodity contracts brokerage   | 2.27%      |
| Manufacture of beer  | 2%         |
| Distribution of electricity  | 1.89%      |
| Service activities incidental to land transportation                                   | 1.86%      |
| Manufacture of basic pharmaceutical products   | 1.54%      |
| Distribution of gaseous fuels through mains  | 1.35%      |
| Wired telecommunications activities  | 1.31%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters      | 1.15%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 1.1%       |
| Service activities incidental to air transportation                                    | 1.03%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 0.97%      |
| Transmission of electricity  | 0.93%      |
| Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres       | 0.92%      |
| Manufacture of machinery and equipment n.e.c.  | 0.91%      |
| Manufacture of food products   | 0.88%      |
| Manufacture of medical and dental instruments and supplies                             | 0.68%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 0.66%      |
| Other software publishing  | 0.65%      |
| Manufacture of refined petroleum products  | 0.63%      |
| Financial leasing  | 0.62%      |

|   |       |
|---|-------|
| Renting and leasing of trucks   | 0.62% |
| Manufacture of other organic basic chemicals                                    | 0.61% |
| Operation of dairies and cheese making  | 0.61% |
| Manufacture of other articles of paper and paperboard                           | 0.6%  |
| Manufacture of perfumes and toilet preparations                                 | 0.47% |
| Manufacture of wearing apparel  | 0.43% |
| Civil engineering   | 0.4%  |
| Manufacture of instruments and appliances for measuring, testing and navigation | 0.38% |
| Web portals   | 0.37% |
| Reinsurance   | 0.34% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 44.82% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 29.08% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 3.85% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 20.16% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 113.26 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 159.53 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 82.89%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG

(on a scale from + 10 corresponding to 'significant contributing impact' to - 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units            | Measurement |
|--|---|------------------|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|                                     |   |   |  |
|-------------------------------------|---|---|--|
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap         | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members          |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                 | Sector  | Proportion | Country |
|---|---|------------|---------|
| AXA IM EURO LIQUIDITY SRI Capitalisation EUR pf | Trusts, funds and similar financial entities          | 6.41%      | FR      |
| EXAIL TECHNOLOGIES XPAR EUR                     | Manufacture of other special-purpose machinery n.e.c. | 2.52%      | FR      |
| JDC GROUP AG XETR EUR                           | Security and commodity contracts brokerage            | 2.4%       | DE      |
| BONESUPPORT HOLDING AB XSTO SEK                 | Manufacture of basic pharmaceutical products          | 2.16%      | SE      |

|                                     |  |       |    |
|-------------------------------------|--|-------|----|
| EQUASENS XPAR EUR                   | Other software publishing  | 1.71% | FR |
| FRIEDRICH VORWERK GROUP SE XFRA EUR | Production of electricity  | 1.65% | DE |
| VAN LANSCHOT KEMPEN NV XAMS EUR     | Other activities auxiliary to financial services, except insurance and pension funding | 1.63% | NL |
| LU-VE SPA MTA EUR                   | Manufacture of ovens, furnaces and furnace burners                                     | 1.62% | IT |
| VA-Q-TEC AG XETR EUR                | Manufacture of other non-metallic mineral products n.e.c.                              | 1.59% | DE |
| CTT SYSTEMS AB XSTO SEK             | Manufacture of air and spacecraft and related machinery                                | 1.54% | SE |
| NX FILTRATION NV XAMS EUR           | Manufacture of other special-purpose machinery n.e.c.                                  | 1.52% | NL |
| DOVALUE SPA MTA EUR                 | Other monetary intermediation  | 1.44% | IT |
| SCANDI STANDARD AB XSTO SEK         | Wholesale of meat and meat products  | 1.44% | SE |
| XVIVO PERFUSION AB XSTO SEK         | Manufacture of medical and dental instruments and supplies                             | 1.42% | SE |
| ESKER SA XPAR EUR                   | Other software publishing  | 1.42% | FR |

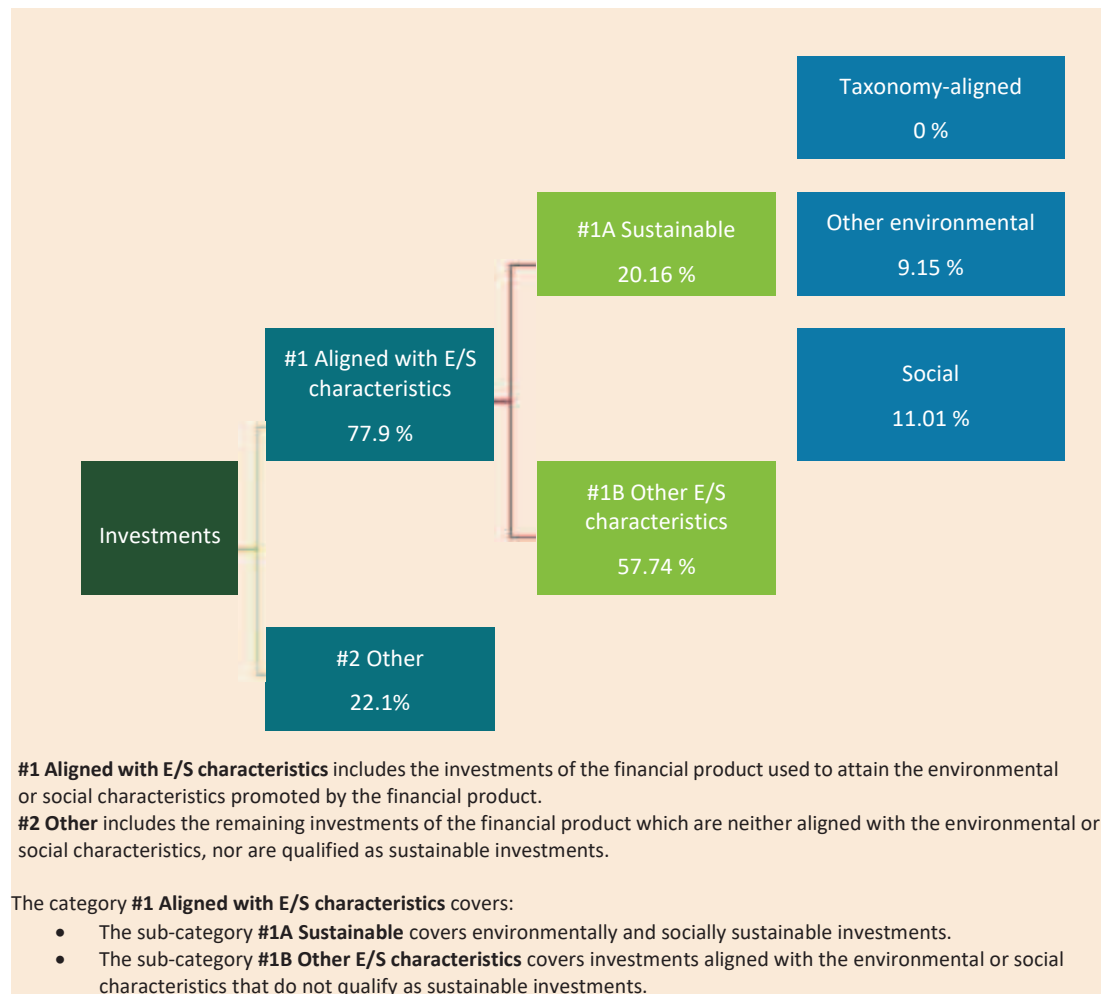

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 8.24%      |
| Trusts, funds and similar financial entities   | 6.41%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 5.8%       |
| Computer programming, consultancy and related activities                               | 4.28%      |
| Manufacture of communication equipment   | 3.81%      |
| Other monetary intermediation  | 3.76%      |
| Manufacture of basic pharmaceutical products   | 3.73%      |
| Manufacture of medical and dental instruments and supplies                             | 3.53%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 3%         |
| Other human health activities  | 2.44%      |
| Security and commodity contracts brokerage   | 2.4%       |
| Production of electricity  | 2.34%      |
| Manufacture of air and spacecraft and related machinery                                | 2.31%      |
| Publishing of computer games   | 2.03%      |
| Research and experimental development on biotechnology                                 | 2.02%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 1.93%      |
| Manufacture of computers and peripheral equipment                                      | 1.87%      |
| Manufacture of optical instruments and photographic equipment                          | 1.87%      |
| Computer consultancy activities  | 1.62%      |
| Manufacture of ovens, furnaces and furnace burners                                     | 1.62%      |
| Manufacture of other non-metallic mineral products n.e.c.                              | 1.59%      |
| Wholesale of meat and meat products  | 1.44%      |
| Manufacture of games and toys  | 1.38%      |
| Mining of other non-ferrous metal ores   | 1.32%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 1.31%      |
| Manufacture of food products   | 1.31%      |
| Manufacture of batteries and accumulators  | 1.29%      |
| Photographic activities  | 1.27%      |
| Web portals  | 1.21%      |

|  |       |
|--|-------|
| Manufacture of electrical equipment                                      | 1.17% |
| Manufacture of other articles of paper and paperboard                    | 1.17% |
| Renting and operating of own or leased real estate                       | 1.15% |
| Treatment and disposal of hazardous waste                                | 1.13% |
| Manufacture of agricultural and forestry machinery                       | 1.09% |
| Water collection, treatment and supply                                   | 1%    |
| Construction of residential and non-residential buildings                | 0.99% |
| Warehousing and storage  | 0.94% |
| Manufacture of other electrical equipment                                | 0.93% |
| Motion picture, video and television programme production activities     | 0.85% |
| Accommodation  | 0.84% |
| Other retail sale of new goods in specialised stores                     | 0.82% |
| Other food service activities  | 0.79% |
| Manufacture of other chemical products n.e.c.                            | 0.78% |
| Wholesale trade, except of motor vehicles and motorcycles                | 0.77% |
| Retail sale of medical and orthopaedic goods in specialised stores       | 0.76% |
| Manufacture of other inorganic basic chemicals                           | 0.75% |
| Manufacture of fabricated metal products, except machinery and equipment | 0.75% |
| Retail sale of hardware, paints and glass in specialised stores          | 0.74% |
| Manufacture of plastic plates, sheets, tubes and profiles                | 0.71% |
| Motion picture projection activities                                     | 0.71% |
| Fitness facilities   | 0.7%  |
| Architectural and engineering activities, technical testing and analysis | 0.65% |
| Extraction of crude petroleum and natural gas                            | 0.64% |
| Construction of utility projects for electricity and telecommunications  | 0.54% |
| Manufacture of pesticides and other agrochemical products                | 0.52% |
| Book publishing  | 0.46% |
| Administration of financial markets                                      | 0.36% |
| Retail sale via mail order houses or via Internet                        | 0.14% |
| Activities of holding companies  | 0%    |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

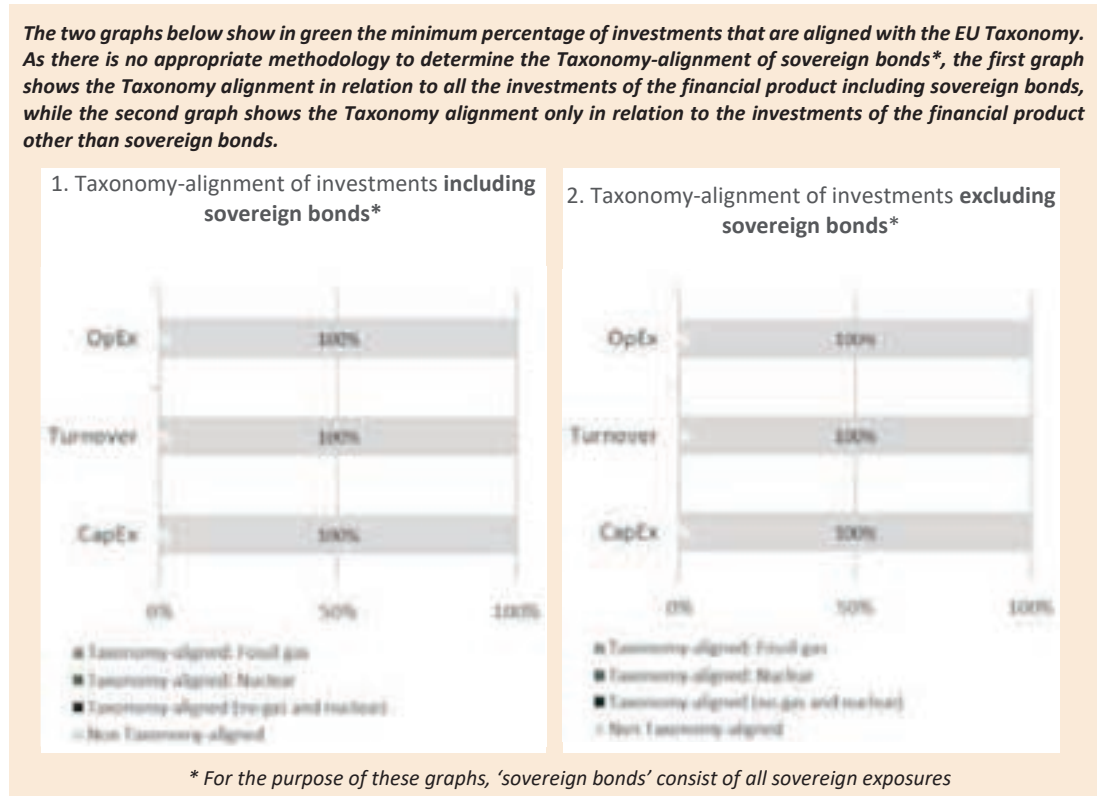

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas  In nuclear energy
- No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

**What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 9.15% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 11.01% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 22.1% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?  |   |
|--|---|
| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 16.22% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 114.93 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 160.33 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 78.35%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG

(on a scale from + 10 corresponding to 'significant contributing impact' to - 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units            | Measurement |
|--|---|------------------|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|                                     |   |   |  |
|-------------------------------------|---|---|--|
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap         | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members          |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                       | Sector  | Proportion | Country |
|---------------------------------------|---|------------|---------|
| JDC GROUP AG XETR EUR                 | Security and commodity contracts brokerage            | 2.39%      | DE      |
| EXAIL TECHNOLOGIES XPAR EUR           | Manufacture of other special-purpose machinery n.e.c. | 2.33%      | FR      |
| BONESUPPORT HOLDING AB XSTO SEK       | Manufacture of basic pharmaceutical products          | 2.25%      | SE      |
| ALPHA FINANCIAL MARKETS CONS XLON GBP | Business and other management consultancy activities  | 1.94%      | GB      |

|                                   |  |       |    |
|-----------------------------------|--|-------|----|
| TEAM17 GROUP PLC XLON GBP         | Publishing of computer games   | 1.93% | GB |
| FOCUSRITE PLC XLON GBP            | Manufacture of consumer electronics  | 1.82% | GB |
| VAN LANSCHOT KEMPEN NV XAMS EUR   | Other activities auxiliary to financial services, except insurance and pension funding | 1.82% | NL |
| HOLLYWOOD BOWL GROUP PLC XLON GBP | Operation of sports facilities   | 1.75% | GB |
| D4T4 SOLUTIONS PLC XLON GBP       | Computer consultancy activities  | 1.7%  | GB |
| DOVALUE SPA MTA EUR               | Other monetary intermediation  | 1.67% | IT |
| VA-Q-TEC AG XETR EUR              | Manufacture of other non-metallic mineral products n.e.c.                              | 1.63% | DE |
| TRUSTPILOT GROUP PLC XLON GBP     | Web portals  | 1.58% | GB |
| EXEL INDUSTRIES SA-A SHS XPAR EUR | Manufacture of agricultural and forestry machinery                                     | 1.55% | FR |
| EQUASENS XPAR EUR                 | Other software publishing  | 1.55% | FR |
| HILL & SMITH PLC XLON GBP         | Manufacture of fabricated metal products, except machinery and equipment               | 1.54% | GB |

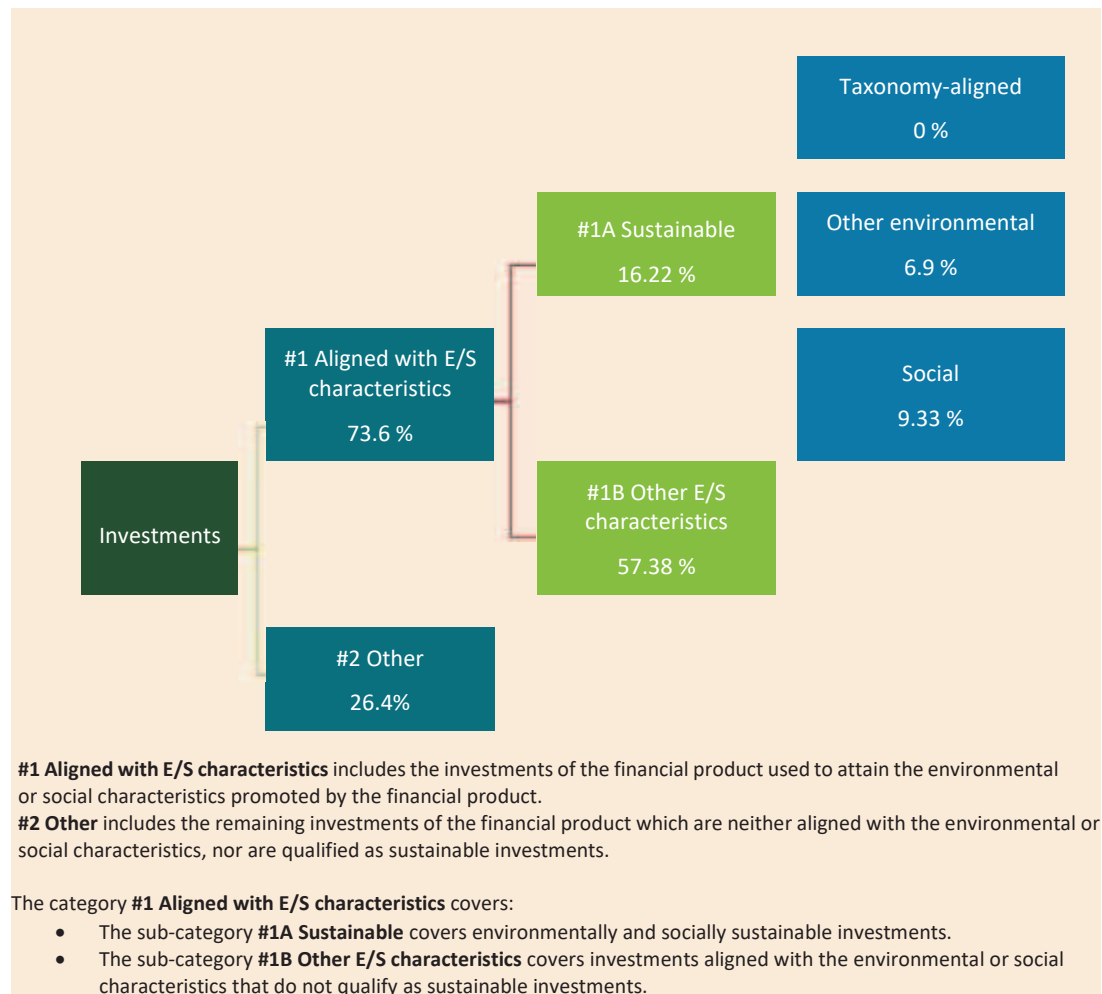

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 8.5%       |
| Manufacture of other special-purpose machinery n.e.c.                                  | 4.68%      |
| Manufacture of basic pharmaceutical products   | 4.39%      |
| Manufacture of medical and dental instruments and supplies                             | 3.97%      |
| Security and commodity contracts brokerage   | 3.92%      |
| Computer consultancy activities  | 3.22%      |
| Other monetary intermediation  | 3.15%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 3.02%      |
| Computer programming, consultancy and related activities                               | 2.94%      |
| Research and experimental development on biotechnology                                 | 2.69%      |
| Manufacture of communication equipment   | 2.45%      |
| Web portals  | 2.37%      |
| Production of electricity  | 2.24%      |
| Manufacture of fabricated metal products, except machinery and equipment               | 2.1%       |
| Business and other management consultancy activities                                   | 1.94%      |
| Publishing of computer games   | 1.93%      |
| Manufacture of consumer electronics  | 1.82%      |
| Operation of sports facilities   | 1.75%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 1.73%      |
| Manufacture of other non-metallic mineral products n.e.c.                              | 1.63%      |
| Manufacture of agricultural and forestry machinery                                     | 1.55%      |
| Wholesale of meat and meat products  | 1.46%      |
| Manufacture of electrical equipment  | 1.45%      |
| Manufacture of other chemical products n.e.c.  | 1.42%      |
| Manufacture of weapons and ammunition  | 1.41%      |
| Manufacture of batteries and accumulators  | 1.37%      |
| Manufacture of other inorganic basic chemicals   | 1.36%      |
| Renting and operating of own or leased real estate                                     | 1.31%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 1.29%      |

|  |       |
|--|-------|
| Other postal and courier activities  | 1.28% |
| Other human health activities  | 1.27% |
| Other food service activities  | 1.26% |
| Manufacture of games and toys  | 1.24% |
| Manufacture of other articles of paper and paperboard  | 1.16% |
| Travel agency activities   | 1.14% |
| Administration of financial markets  | 1.07% |
| Manufacture of optical instruments and photographic equipment  | 1.05% |
| Manufacture of other electrical equipment  | 1.04% |
| Extraction of natural gas  | 1%    |
| Mining of other non-ferrous metal ores   | 0.99% |
| Extraction of crude petroleum and natural gas  | 0.99% |
| Manufacture of wood and of products of wood and cork, except furniture, manufacture of articles of s | 0.98% |
| Manufacture of air and spacecraft and related machinery  | 0.9%  |
| Motion picture, video and television programme production activities                                 | 0.89% |
| Other personal service activities  | 0.85% |
| Retail sale via mail order houses or via Internet  | 0.82% |
| Retail sale of hardware, paints and glass in specialised stores                                      | 0.81% |
| Retail sale of medical and orthopaedic goods in specialised stores                                   | 0.8%  |
| Manufacture of pesticides and other agrochemical products  | 0.79% |
| Fitness facilities   | 0.76% |
| Book publishing  | 0.72% |
| Manufacture of other organic basic chemicals   | 0.72% |
| Motion picture projection activities   | 0.7%  |
| Manufacture of food products   | 0.7%  |
| Wholesale trade, except of motor vehicles and motorcycles  | 0.7%  |
| Manufacture of computers and peripheral equipment  | 0.69% |
| Construction of utility projects for electricity and telecommunications                              | 0.69% |
| Construction of residential and non-residential buildings  | 0.65% |
| Wholesale of other household goods   | 0.28% |

|                                 |    |
|---------------------------------|----|
| Activities of holding companies | 0% |
|---------------------------------|----|

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

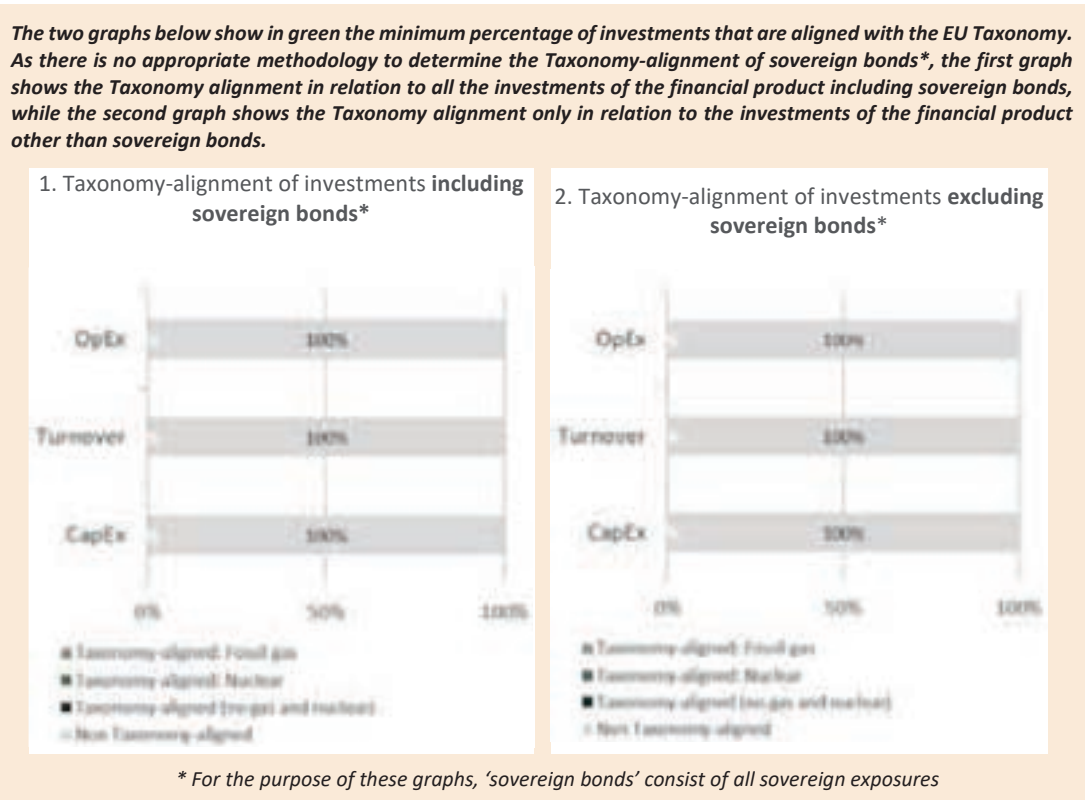

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 6.9% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 9.33% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 26.4% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 81,29% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 7.92 Score over max 10 | 7.46 Score over max 10 | 98.48%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer fell within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units            | Measurement |
|--|---|------------------|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|                                     |   |   |  |
|-------------------------------------|---|---|--|
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap         | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members          |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies                    | PAI indicator  | Units   | Measurement |
|---|--|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 3: GHG intensity of investee companies                               | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 4: Exposure to companies active in the fossil fuel sector            | % of investments  |             |
| Climate Risk policy (engagement only)       | PAI 5: Share of non-renewable energy consumption and production          | % of total energy sources   |             |

|   |   |  |  |
|---|---|--|--|
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments                               |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments                               |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments                               |  |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                    | Sector   | Proportion | Country |
|------------------------------------|--|------------|---------|
| SEGRO PLC XLON GBP                 | Renting and operating of own or leased real estate | 6.27%      | GB      |
| VONOVIA SE XETR EUR                | Renting and operating of own or leased real estate | 5.26%      | DE      |
| LEG IMMOBILIEN SE XETR EUR         | Renting and operating of own or leased real estate | 5.04%      | DE      |
| BRITISH LAND CO PLC XLON GBP       | Renting and operating of own or leased real estate | 5.03%      | GB      |
| KLEPIERRE XPAR EUR                 | Renting and operating of own or leased real estate | 4.81%      | FR      |
| PSP SWISS PROPERTY AG-REG XSWX CHF | Renting and operating of own or leased real estate | 4.45%      | CH      |
| SAFESTORE HOLDINGS PLC XLON GBP    | Renting and operating of own or leased real estate | 4.15%      | GB      |
| UNITE GROUP PLC/THE XLON GBP       | Renting and operating of own or leased real estate | 3.77%      | GB      |

|                                       |   |       |    |
|---------------------------------------|---|-------|----|
| LAND SECURITIES GROUP<br>PLC XLON GBP | Renting and operating of<br>own or leased real estate | 3.51% | GB |
| AEDIFICA XBRU EUR                     | Renting and operating of<br>own or leased real estate | 3.43% | BE |
| COFINIMMO XBRU EUR                    | Renting and operating of<br>own or leased real estate | 2.98% | BE |
| GECINA SA XPAR EUR                    | Renting and operating of<br>own or leased real estate | 2.78% | FR |
| CATENA AB XSTO SEK                    | Renting and operating of<br>own or leased real estate | 2.69% | SE |
| KOJAMO OYJ XHEL EUR                   | Renting and operating of<br>own or leased real estate | 2.33% | FI |
| DERWENT LONDON PLC<br>XLON GBP        | Renting and operating of<br>own or leased real estate | 2.27% | GB |

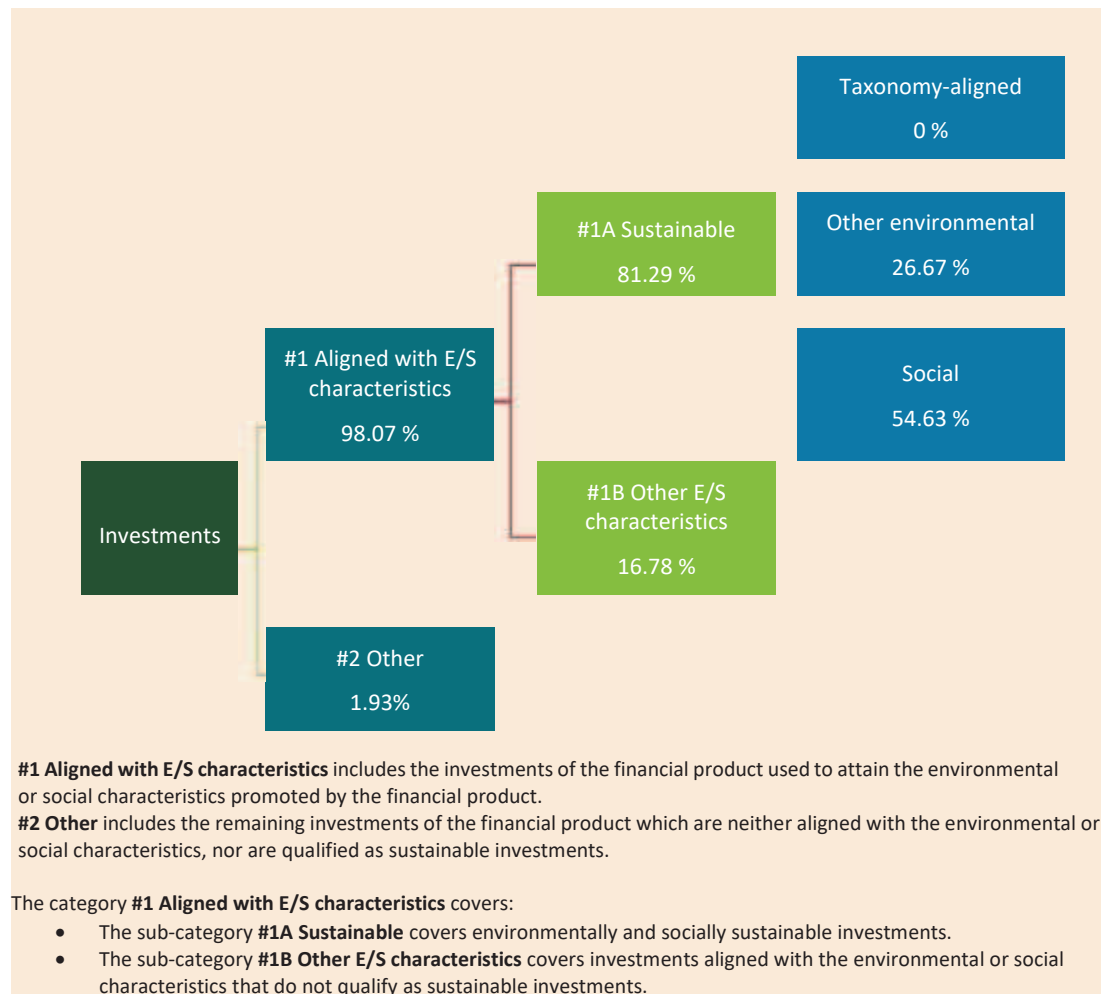

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Renting and operating of own or leased real estate   | 95.21%     |
| Management of real estate on a fee or contract basis | 2.86%      |
| Real estate activities                               | 1.1%       |
| Activities of holding companies                      | 0.83%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas  In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 26.67% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 54.63 % of sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 1.93% of the Financial Product’s Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product and
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity related instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and/or for diversification and/or hedging purposes.

Environmental or social safeguards are applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-universe on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their E Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 124.38 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 161.53 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 98.49%   |
| Water intensity         | 2116.35 Thousands of cubic meters for corporates  | 23449.42 Thousands of cubic meters for corporates   | 98.49%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been

- qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                              | Sector   | Proportion | Country |
|--|--|------------|---------|
| TECHNIP ENERGIES NV<br>XPAR EUR              | Support activities for petroleum and natural gas extraction              | 3.2%       | FR      |
| SIEGFRIED HOLDING AG-<br>REG XSWX CHF        | Manufacture of basic pharmaceutical products                             | 3%         | CH      |
| FINCOBANK SPA MTAA<br>EUR                    | Other monetary intermediation  | 2.8%       | IT      |
| EMMI AG-REG XSWX CHF                         | Operation of dairies and cheese making                                   | 2.72%      | CH      |
| HISCOX LTD XLON GBP                          | Non-life insurance   | 2.62%      | BM      |
| NEOEN SA XPAR EUR                            | Production of electricity  | 2.61%      | FR      |
| ARCADIS NV XAMS EUR                          | Architectural and engineering activities, technical testing and analysis | 2.59%      | NL      |
| DIASORIN SPA MTAA EUR                        | Manufacture of pharmaceutical preparations                               | 2.55%      | IT      |
| ASR NEDERLAND NV XAMS<br>EUR                 | Life insurance   | 2.32%      | NL      |
| CORBION NV XAMS EUR                          | Manufacture of other food products n.e.c.                                | 2.27%      | NL      |
| INFRASTRUTTURE<br>WIRELESS ITAL MTAA EUR     | Construction of utility projects for electricity and telecommunications  | 2.26%      | IT      |
| SSP GROUP PLC XLON GBP                       | Other food service activities  | 2.24%      | GB      |
| AXA Tr?sor Court Terme<br>Capitalisation EUR | Trusts, funds and similar financial entities                             | 2.23%      | FR      |
| INTERTEK GROUP PLC<br>XLON GBP               | Technical testing and analysis   | 2.22%      | GB      |
| HILL & SMITH PLC XLON<br>GBP                 | Manufacture of fabricated metal products, except machinery and equipment | 2.19%      | GB      |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Renting and operating of own or leased real estate                                 | 6.88%      |
| Other monetary intermediation  | 6.54%      |
| Web portals  | 5.03%      |
| Other software publishing  | 4.86%      |
| Manufacture of basic pharmaceutical products                                       | 4.76%      |
| Manufacture of other special-purpose machinery n.e.c.                              | 4.67%      |
| Architectural and engineering activities, technical testing and analysis           | 4.59%      |
| Support activities for petroleum and natural gas extraction                        | 3.2%       |
| Manufacture of other chemical products n.e.c.                                      | 3.02%      |
| Operation of dairies and cheese making   | 2.72%      |
| Non-life insurance   | 2.62%      |
| Production of electricity  | 2.61%      |
| Manufacture of pharmaceutical preparations   | 2.55%      |
| Life insurance   | 2.32%      |
| Manufacture of other food products n.e.c.  | 2.27%      |
| Construction of utility projects for electricity and telecommunications            | 2.26%      |
| Other food service activities  | 2.24%      |
| Trusts, funds and similar financial entities                                       | 2.23%      |
| Technical testing and analysis   | 2.22%      |
| Manufacture of fabricated metal products, except machinery and equipment           | 2.19%      |
| Retail trade, except of motor vehicles and motorcycles                             | 2.1%       |
| Other business support service activities n.e.c.                                   | 2.02%      |
| Other transportation support activities  | 1.96%      |
| Manufacture of fluid power equipment   | 1.88%      |
| Manufacture of wearing apparel   | 1.77%      |
| Activities of holding companies  | 1.76%      |
| Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes | 1.65%      |
| Wholesale of chemical products   | 1.62%      |
| Manufacture of batteries and accumulators  | 1.54%      |
| Wholesale trade, except of motor vehicles and motorcycles                          | 1.5%       |

|  |       |
|--|-------|
| Manufacture of machinery for food, beverage and tobacco processing                     | 1.46% |
| Manufacture of other parts and accessories for motor vehicles                          | 1.36% |
| Other activities auxiliary to financial services, except insurance and pension funding | 1.21% |
| Manufacture of electric lighting equipment   | 1.2%  |
| Other human health activities  | 1.2%  |
| Computer programming, consultancy and related activities                               | 1.15% |
| Manufacture of electrical equipment  | 1.06% |
| Manufacture of ceramic tiles and flags   | 1.05% |
| Renting and leasing of cars and light motor vehicles                                   | 1.02% |
| Manufacture of medical and dental instruments and supplies                             | 1.01% |
| Manufacture of sports goods  | 0.66% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 34.49% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 34.91% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.51% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO   |
|--|--|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 77.1% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective  |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 219.03 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 238.18 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 99.66%   |
| Water intensity         | 2107.87Thousands of cubic meters for corporates   | 11618.89Thousands of cubic meters for corporates  | 99.66%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been

- qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                     | Sector   | Proportion | Country |
|-------------------------------------|--|------------|---------|
| ALPHABET INC-CL C XNGS USD          | Web portals  | 4.26%      | US      |
| UNITEDHEALTH GROUP INC XNYS USD     | Non-life insurance   | 3.67%      | US      |
| TE CONNECTIVITY LTD XNYS USD        | Manufacture of computer, electronic and optical products                               | 2.75%      | US      |
| NATIONAL GRID PLC XLON GBP          | Distribution of electricity  | 2.66%      | GB      |
| NEXTERA ENERGY INC XNYS USD         | Electricity, gas, steam and air conditioning supply                                    | 2.64%      | US      |
| APPLE INC XNGS USD                  | Manufacture of communication equipment   | 2.43%      | US      |
| ZIMMER BIOMET HOLDINGS INC XNYS USD | Manufacture of medical and dental instruments and supplies                             | 2.38%      | US      |
| MICROSOFT CORP XNGS USD             | Other software publishing  | 2.37%      | US      |
| VISA INC-CLASS A SHARES XNYS USD    | Other activities auxiliary to financial services, except insurance and pension funding | 2.34%      | US      |
| SIEMENS AG-REG XETR EUR             | Manufacture of electrical equipment  | 2.34%      | DE      |
| BOSTON SCIENTIFIC CORP XNYS USD     | Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 2.29%      | US      |
| QUALCOMM INC XNGS USD               | Manufacture of electronic components   | 2.26%      | US      |
| FISERV INC XNGS USD                 | Other activities auxiliary to financial services, except insurance and pension funding | 2.25%      | US      |
| AIA GROUP LTD XHKG HKD              | Life insurance   | 2.22%      | HK      |
| HDFC BANK LTD-ADR XNYS USD          | Other monetary intermediation  | 2.2%       | IN      |

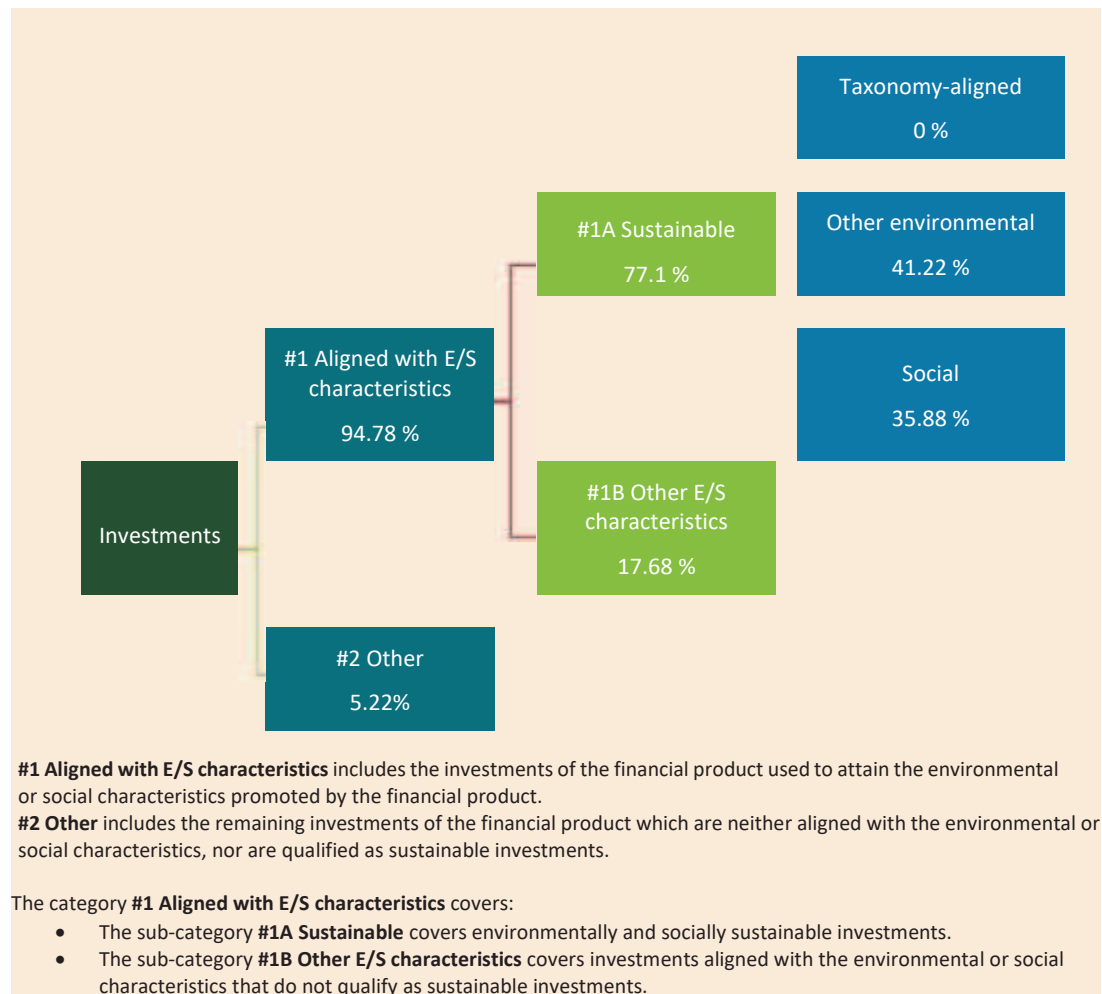

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of medical and dental instruments and supplies                             | 11.12%     |
| Other activities auxiliary to financial services, except insurance and pension funding | 9.21%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 6.05%      |
| Other software publishing  | 5.73%      |
| Web portals  | 4.26%      |
| Collection of non-hazardous waste  | 3.79%      |
| Manufacture of electronic components   | 3.75%      |
| Non-life insurance   | 3.67%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 3.42%      |
| Manufacture of basic pharmaceutical products   | 2.77%      |
| Manufacture of computer, electronic and optical products                               | 2.75%      |
| Distribution of electricity  | 2.66%      |
| Electricity, gas, steam and air conditioning supply                                    | 2.64%      |
| Manufacture of communication equipment   | 2.43%      |
| Manufacture of electrical equipment  | 2.34%      |
| Life insurance   | 2.22%      |
| Other monetary intermediation  | 2.2%       |
| Funeral and related activities   | 2.07%      |
| Construction of utility projects for electricity and telecommunications                | 2.05%      |
| Retail sale via mail order houses or via Internet                                      | 2.03%      |
| Manufacture of other food products n.e.c.  | 2.02%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 1.93%      |
| Other credit granting  | 1.88%      |
| Processing and preserving of meat  | 1.86%      |
| Fund management activities   | 1.64%      |
| Research and experimental development on biotechnology                                 | 1.6%       |
| Renting and operating of own or leased real estate                                     | 1.59%      |
| Administration of financial markets  | 1.54%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 1.52%      |

|   |       |
|---|-------|
| Production of electricity   | 1.51% |
| Manufacture of wearing apparel  | 1.28% |
| Manufacture of electrical and electronic equipment for motor vehicles   | 1.17% |
| Other human health activities   | 1.14% |
| Waste collection, treatment and disposal activities, materials recovery | 0.92% |
| Construction of other civil engineering projects n.e.c.                 | 0.89% |
| Manufacture of batteries and accumulators                               | 0.34% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 41.22% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 35.88% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 5.22% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic

Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO   |
|--|--|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 55.9% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective  |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 104.52 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 213.07 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 100%     |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the

Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments         | Sector                                 | Proportion | Country |
|-------------------------|--|------------|---------|
| APPLE INC XNGS USD      | Manufacture of communication equipment | 6.89%      | US      |
| MICROSOFT CORP XNGS USD | Other software publishing              | 6.43%      | US      |

|                                       |   |       |    |
|---------------------------------------|---|-------|----|
| ALPHABET INC-CL C XNGS USD            | Web portals   | 3.85% | US |
| UNITEDHEALTH GROUP INC XNYS USD       | Non-life insurance  | 2.56% | US |
| AMAZON.COM INC XNGS USD               | Retail sale via mail order houses or via Internet                           | 2.48% | US |
| INTUITIVE SURGICAL INC XNGS USD       | Manufacture of medical and dental instruments and supplies                  | 1.9%  | US |
| STARBUCKS CORP XNGS USD               | Restaurants and mobile food service activities                              | 1.73% | US |
| ROPER TECHNOLOGIES INC XNYS USD       | Other software publishing   | 1.72% | US |
| BOSTON SCIENTIFIC CORP XNYS USD       | Manufacture of irradiation, electromedical and electrotherapeutic equipment | 1.71% | US |
| PROGRESSIVE CORP XNYS USD             | Non-life insurance  | 1.7%  | US |
| EQUINIX INC XNGS USD                  | Renting and operating of own or leased real estate                          | 1.7%  | US |
| SCHLUMBERGER LTD XNYS USD             | Support activities for petroleum and natural gas extraction                 | 1.67% | US |
| NVIDIA CORP XNGS USD                  | Manufacture of electronic components  | 1.66% | US |
| ELI LILLY & CO XNYS USD               | Manufacture of basic pharmaceutical products                                | 1.65% | US |
| INTERCONTINENTAL EXCHANGE IN XNYS USD | Administration of financial markets   | 1.64% | US |

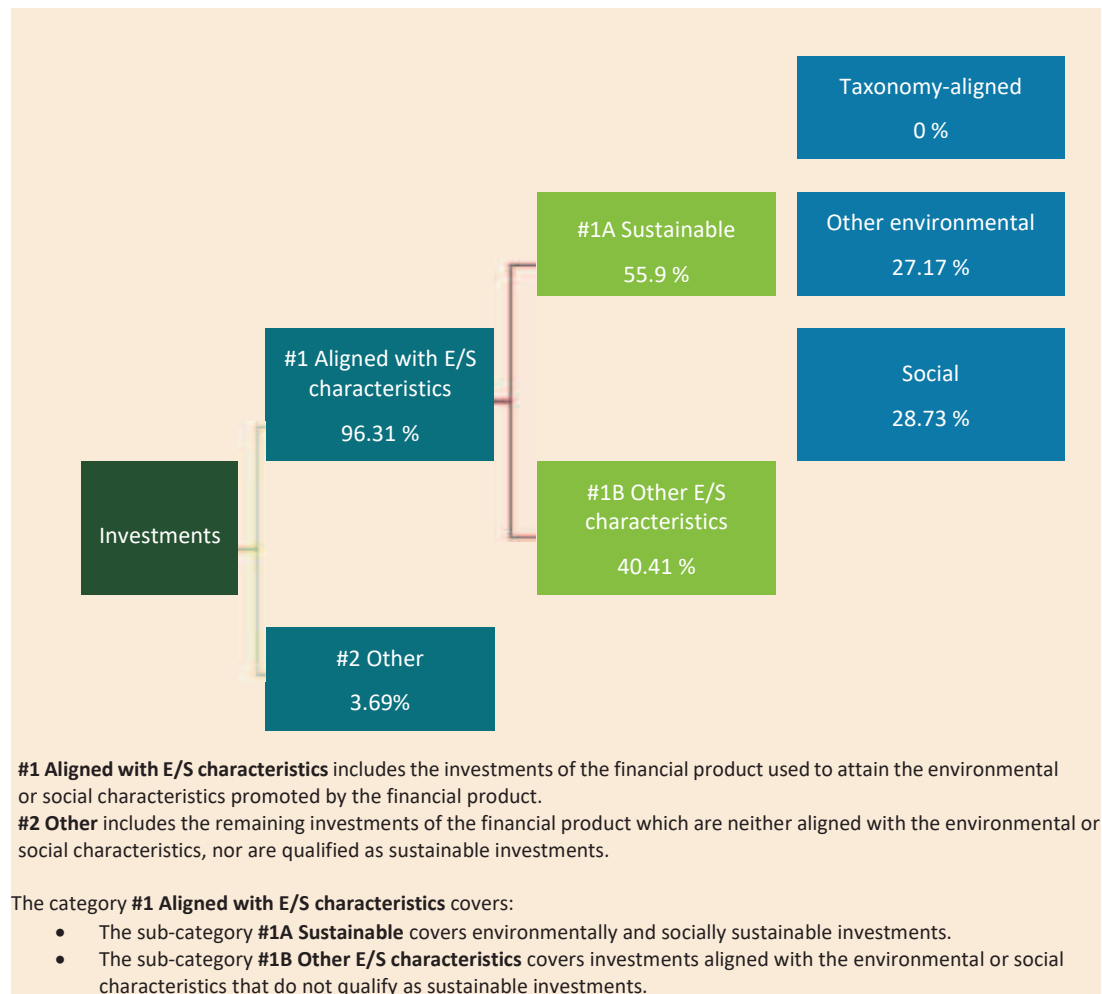

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 14.96%     |
| Manufacture of communication equipment   | 6.89%      |
| Web portals  | 5.94%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 5.37%      |
| Manufacture of electronic components   | 5.18%      |
| Non-life insurance   | 4.89%      |
| Manufacture of medical and dental instruments and supplies                             | 4.76%      |
| Renting and operating of own or leased real estate                                     | 3.32%      |
| Restaurants and mobile food service activities   | 3.27%      |
| Retail sale via mail order houses or via Internet                                      | 2.48%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 2.28%      |
| Fitness facilities   | 2.09%      |
| Retail sale of clothing in specialised stores  | 1.92%      |
| Support activities for petroleum and natural gas extraction                            | 1.67%      |
| Manufacture of basic pharmaceutical products   | 1.65%      |
| Administration of financial markets  | 1.64%      |
| Retail trade of motor vehicle parts and accessories                                    | 1.61%      |
| Other retail sale of new goods in specialised stores                                   | 1.6%       |
| Other credit granting  | 1.58%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters      | 1.54%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 1.52%      |
| Other monetary intermediation  | 1.47%      |
| Manufacture of fluid power equipment   | 1.39%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 1.39%      |
| Manufacture of motor vehicles  | 1.38%      |
| Manufacture of electrical equipment  | 1.38%      |
| Manufacture of other chemical products n.e.c.  | 1.37%      |
| Manufacture of perfumes and toilet preparations  | 1.35%      |
| Extraction of crude petroleum and natural gas  | 1.25%      |
| Extraction of crude petroleum  | 1.23%      |

|  |       |
|--|-------|
| Gambling and betting activities                                | 1.23% |
| Publishing of computer games                                   | 1.2%  |
| Freight rail transport   | 1.18% |
| Manufacture of other food products n.e.c.                      | 1.15% |
| Research and experimental development on biotechnology         | 1.1%  |
| Manufacture of air and spacecraft and related machinery        | 1.08% |
| Sea and coastal passenger water transport                      | 1.02% |
| Manufacture of other tanks, reservoirs and containers of metal | 1%    |
| Manufacture of weapons and ammunition                          | 0.97% |
| Collection of non-hazardous waste                              | 0.64% |
| Manufacture of pharmaceutical preparations                     | 0.57% |
| Other business support service activities n.e.c.               | 0.51% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 27.17% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 28.73% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 3.69% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65.17% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 154.67 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 372.98 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 96.03%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the

Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments              | Sector   | Proportion | Country |
|------------------------------|--|------------|---------|
| DXCM 0.25% - 15/11/2025 Conv | Manufacture of medical and dental instruments and supplies | 2.27%      | US      |
| EDENFP 0 - 06/09/2024 Conv   | Other business support service activities n.e.c.           | 2.27%      | FR      |

|                                 |  |       |    |
|---------------------------------|--|-------|----|
| AKAM 0.375% - 01/09/2027 Conv   | Other software publishing  | 2.25% | US |
| JPM 0 - 10/06/2024 Conv         | Trusts, funds and similar financial entities                                     | 2.21% | FR |
| LUV 1.25% - 01/05/2025 Conv     | Trusts, funds and similar financial entities                                     | 2.17% | US |
| SHOPCN 0.125% - 01/11/2025 Conv | Other software publishing  | 1.97% | CA |
| PRYIM 0 - 02/02/2026 Conv       | Manufacture of electrical equipment  | 1.83% | IT |
| ENPH 0 - 01/03/2026 Conv        | Manufacture of other electrical equipment  | 1.79% | US |
| SUFP 0 - 15/06/2026 Conv        | Manufacture of electric motors, generators and transformers                      | 1.78% | FR |
| BNP 0 - 13/05/2025 Conv         | Other monetary intermediation  | 1.77% | FR |
| F 0 - 15/03/2026 Conv           | Manufacture of motor vehicles  | 1.71% | US |
| STM 0 - 04/08/2025 Conv         | Manufacture of electronic components   | 1.68% | CH |
| Z 2.75% - 15/05/2025 Conv       | Web portals  | 1.66% | US |
| MLFP 0 - 10/11/2023 Conv        | Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres | 1.57% | FR |
| MITCHM 0 - 29/03/2024 Conv      | Manufacture of chemicals and chemical products                                   | 1.56% | JP |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 15.35%     |
| Web portals  | 6.34%      |
| Trusts, funds and similar financial entities   | 4.96%      |
| Security and commodity contracts brokerage   | 4.05%      |
| Manufacture of medical and dental instruments and supplies                             | 3.97%      |
| Passenger air transport  | 3.66%      |
| Other monetary intermediation  | 3.66%      |
| Manufacture of electronic components   | 3.4%       |
| Other business support service activities n.e.c.                                       | 3.33%      |
| Activities of holding companies  | 3.25%      |
| Retail sale via mail order houses or via Internet                                      | 2.87%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 2.77%      |
| Publishing of computer games   | 2.62%      |
| Manufacture of other electrical equipment  | 2.58%      |
| Manufacture of motor vehicles  | 2.38%      |
| Production of electricity  | 2.35%      |
| Manufacture of pharmaceutical preparations   | 2.35%      |
| Research and experimental development on biotechnology                                 | 2.12%      |
| Manufacture of electrical equipment  | 1.83%      |
| Wireless telecommunications activities   | 1.8%       |
| Manufacture of electric motors, generators and transformers                            | 1.78%      |
| Mining of other non-ferrous metal ores   | 1.77%      |
| Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres       | 1.57%      |
| Manufacture of chemicals and chemical products   | 1.56%      |
| Manufacture of basic pharmaceutical products   | 1.53%      |
| Construction of utility projects for electricity and telecommunications                | 1.49%      |
| Manufacture of air and spacecraft and related machinery                                | 1.39%      |
| Computer programming, consultancy and related activities                               | 1.35%      |
| Satellite telecommunications activities  | 1.33%      |

|   |       |
|---|-------|
| Water collection, treatment and supply  | 1.17% |
| Retail sale of clothing in specialised stores                                   | 1.05% |
| Manufacture of concrete products for construction purposes                      | 1.01% |
| Transport via pipeline  | 0.84% |
| Data processing, hosting and related activities                                 | 0.83% |
| Television programming and broadcasting activities                              | 0.75% |
| Other human health activities   | 0.75% |
| Other amusement and recreation activities                                       | 0.73% |
| Manufacture of other chemical products n.e.c.                                   | 0.71% |
| Manufacture of other special-purpose machinery n.e.c.                           | 0.68% |
| Electricity, gas, steam and air conditioning supply                             | 0.66% |
| Manufacture of computers and peripheral equipment                               | 0.53% |
| Extraction of crude petroleum and natural gas                                   | 0.37% |
| Manufacture of instruments and appliances for measuring, testing and navigation | 0.35% |
| General public administration activities  | 0.19% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

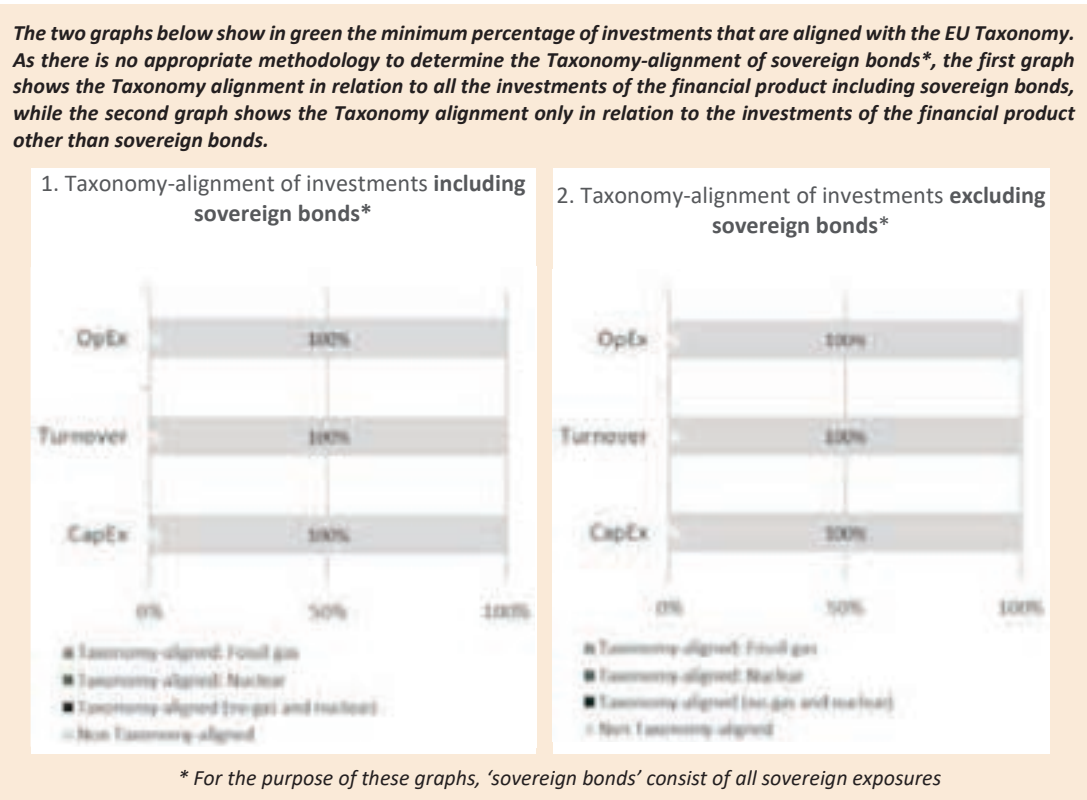

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 28.38% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 36.79% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 4.75% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 43.24% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.35 Score over max 10 | 5.36 Score over max 10 | 97.02%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact' to - 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |

|                                     |   |  |  |
|-------------------------------------|---|--|--|
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments                               |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2022-12-30

| Top investments                       | Sector  | Proportion | Country |
|---------------------------------------|---|------------|---------|
| TAIWAN SEMICONDUCTOR MANUFAC XTAI TWD | Manufacture of other special-purpose machinery n.e.c. | 8.76%      | TW      |
| SAMSUNG ELECTRONICS CO LTD XKRX KRW   | Manufacture of communication equipment                | 3.84%      | KR      |
| TENCENT HOLDINGS LTD XHKG HKD         | Web portals   | 3.61%      | CN      |
| GRUPO FINANCIERO BANORTE-O XMEX MXN   | Other monetary intermediation                         | 3.25%      | MX      |

|                                       |  |       |    |
|---------------------------------------|--|-------|----|
| HDFC BANK LIMITED XNSE INR            | Other monetary intermediation                            | 3.17% | IN |
| WALMART DE MEXICO SAB DE CV XMEX MXN  | Retail trade, except of motor vehicles and motorcycles   | 2.76% | MX |
| RELIANCE INDUSTRIES LTD XNSE INR      | Manufacture of refined petroleum products                | 2.63% | IN |
| YUM CHINA HOLDINGS INC XNYS USD       | Restaurants and mobile food service activities           | 2.51% | CN |
| CHINA MERCHANTS BANK-H XHKG HKD       | Other monetary intermediation                            | 2.5%  | CN |
| ITAU UNIBANCO H-SPON PRF ADR XNYS USD | Other monetary intermediation                            | 2.47% | BR |
| DINO POLSKA SA XWAR PLN               | Retail trade, except of motor vehicles and motorcycles   | 2.44% | PL |
| AIA GROUP LTD XHKG HKD                | Life insurance   | 2.38% | HK |
| MEDIATEK INC XTAI TWD                 | Manufacture of electronic components                     | 2.34% | TW |
| TATA CONSULTANCY SVCS LTD XNSE INR    | Computer programming, consultancy and related activities | 2.31% | IN |
| ALIBABA GROUP HOLDING LTD XHKG HKD    | Retail sale via mail order houses or via Internet        | 2.2%  | CN |

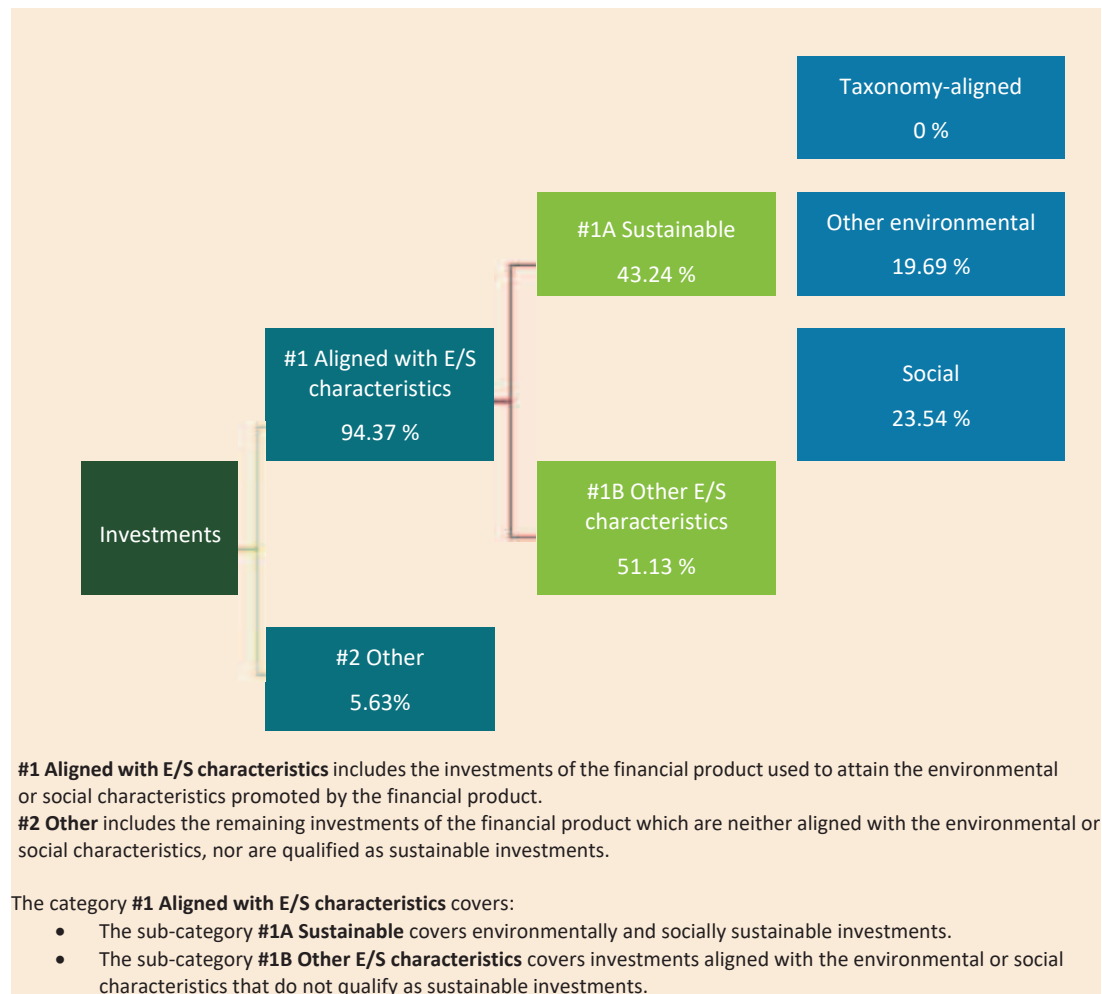

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation   | 16.2%      |
| Manufacture of other special-purpose machinery n.e.c.                           | 8.76%      |
| Retail trade, except of motor vehicles and motorcycles                          | 5.2%       |
| Web portals   | 4.69%      |
| Manufacture of electronic components  | 4.38%      |
| Life insurance  | 4.22%      |
| Manufacture of communication equipment  | 3.84%      |
| Retail sale via mail order houses or via Internet                               | 3.81%      |
| Mining of other non-ferrous metal ores  | 2.87%      |
| Manufacture of computer, electronic and optical products                        | 2.65%      |
| Manufacture of refined petroleum products                                       | 2.63%      |
| Restaurants and mobile food service activities                                  | 2.51%      |
| Manufacture of other organic basic chemicals                                    | 2.48%      |
| Computer programming, consultancy and related activities                        | 2.31%      |
| Technical testing and analysis  | 1.98%      |
| Manufacture of beer   | 1.93%      |
| Wholesale trade, except of motor vehicles and motorcycles                       | 1.68%      |
| Manufacture of soap and detergents, cleaning and polishing preparations         | 1.59%      |
| Manufacture of electric domestic appliances                                     | 1.48%      |
| Wireless telecommunications activities  | 1.48%      |
| Publishing of computer games  | 1.45%      |
| Manufacture of electric motors, generators and transformers                     | 1.42%      |
| Other retail sale of new goods in specialised stores                            | 1.41%      |
| Other human health activities   | 1.39%      |
| Manufacture of medical and dental instruments and supplies                      | 1.35%      |
| Manufacture of electrical equipment   | 1.33%      |
| Other personal service activities n.e.c.  | 1.29%      |
| Production of electricity   | 1.28%      |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics | 1.27%      |

|   |       |
|---|-------|
| Manufacture of other electrical equipment   | 1.21% |
| Retail sale of medical and orthopaedic goods in specialised stores                | 1.2%  |
| Manufacture of basic pharmaceutical products                                      | 1.16% |
| Manufacture of motor vehicles   | 1.15% |
| Sound recording and music publishing activities                                   | 1.15% |
| Manufacture of condiments and seasonings  | 1.14% |
| Administration of financial markets   | 1.1%  |
| Manufacture of other chemical products n.e.c.                                     | 1.02% |
| Wholesale of other machinery and equipment  | 1%    |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.98% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 19.69% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 23.54% of sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 5.63% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 84.94% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Women on Board

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-universe on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their E Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Women on Board during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Women on Board indicator.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 148.83 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 199.18 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 99.56%   |
| Women on Board          | 41.37% of women on board  | 39.73% of women on board  | 99.74%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.

- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2022-12-30

| Top investments                           | Sector   | Proportion | Country |
|---|--|------------|---------|
| ASML HOLDING NV XAMS EUR                  | Manufacture of other special-purpose machinery n.e.c.                                  | 4.5%       | NL      |
| BP PLC XLON GBP                           | Manufacture of refined petroleum products  | 4.46%      | GB      |
| UBS GROUP AG-REG XSWX CHF                 | Other activities auxiliary to financial services, except insurance and pension funding | 3.95%      | CH      |
| NESTLE SA-REG XSWX CHF                    | Manufacture of food products   | 3.86%      | CH      |
| ASTRAZENECA PLC XLON GBP                  | Manufacture of basic pharmaceutical products   | 3.8%       | GB      |
| ROCHE HOLDING AG-GENUSSCHEIN XSWX CHF     | Manufacture of basic pharmaceutical products   | 3.7%       | CH      |
| BNP PARIBAS XPAR EUR                      | Other monetary intermediation  | 3.67%      | FR      |
| DEUTSCHE TELEKOM AG-REG XETR EUR          | Wireless telecommunications activities   | 3.65%      | DE      |
| NOVO NORDISK A/S-BXCSE DKK                | Manufacture of basic pharmaceutical products   | 3.41%      | DK      |
| AXA Tr?sor Court Terme Capitalisation EUR | Trusts, funds and similar financial entities   | 3.16%      | FR      |
| ASHTREAD GROUP PLC XLON GBP               | Rental and leasing activities  | 2.66%      | GB      |
| SCHNEIDER ELECTRIC SE XPAR EUR            | Manufacture of electric motors, generators and transformers                            | 2.56%      | FR      |
| STELLANTIS NV XPAR EUR                    | Manufacture of motor vehicles  | 2.4%       | NL      |
| LVMH MOET HENNESSY LOUIS VUI XPAR EUR     | Manufacture of luggage, handbags and the like, saddlery and harness                    | 2.36%      | FR      |
| SSE PLC XLON GBP                          | Production of electricity  | 2.3%       | GB      |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of basic pharmaceutical products   | 10.91%     |
| Trusts, funds and similar financial entities   | 7.34%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 6.95%      |
| Other monetary intermediation  | 6.69%      |
| Manufacture of refined petroleum products  | 5.51%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 4.5%       |
| Manufacture of motor vehicles  | 3.91%      |
| Manufacture of food products   | 3.86%      |
| Production of electricity  | 3.68%      |
| Wireless telecommunications activities   | 3.65%      |
| Non-life insurance   | 3.01%      |
| Rental and leasing activities  | 2.66%      |
| Manufacture of electric motors, generators and transformers                            | 2.56%      |
| Manufacture of luggage, handbags and the like, saddlery and harness                    | 2.36%      |
| Distilling, rectifying and blending of spirits   | 2.14%      |
| Manufacture of machinery for mining, quarrying and construction                        | 2.02%      |
| Other postal and courier activities  | 1.94%      |
| Manufacture of industrial gases  | 1.94%      |
| Other food service activities  | 1.94%      |
| Publishing of journals and periodicals   | 1.87%      |
| Manufacture of other food products n.e.c.  | 1.83%      |
| Manufacture of other chemical products n.e.c.  | 1.79%      |
| Advertising agencies   | 1.77%      |
| Manufacture of electrical equipment  | 1.68%      |
| Other human health activities  | 1.56%      |
| Construction of utility projects for electricity and telecommunications                | 1.47%      |
| Research and experimental development on biotechnology                                 | 1.47%      |
| Other information service activities n.e.c.  | 1.46%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 1.44%      |

|   |       |
|---|-------|
| Computer programming activities                 | 1.37% |
| Other software publishing                       | 1.04% |
| Manufacture of perfumes and toilet preparations | 1.03% |
| Security systems service activities             | 0.79% |
| Manufacture of electric domestic appliances     | 0.63% |
| Manufacture of other pumps and compressors      | 0.62% |
| Manufacture of electronic components            | 0.62% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria

- **What was the share of investments made in transitional and enabling activities?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 40.92% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 44.02% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented -1.84% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 85.64% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Women on Board

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-universe on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their E Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Women on Board during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Women on Board indicator.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 156.03 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 240.09 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 98.7%    |
| Women on Board          | 43.78% of women on board  | 40.77% of women on board  | 97.93%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.

- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                           | Sector  | Proportion | Country |
|---|---|------------|---------|
| ASML HOLDING NV XAMS EUR                  | Manufacture of other special-purpose machinery n.e.c.               | 6.51%      | NL      |
| LVMH MOET HENNESSY LOUIS VUI XPAR EUR     | Manufacture of luggage, handbags and the like, saddlery and harness | 4.99%      | FR      |
| IBERDROLA SA XMAD EUR                     | Production of electricity   | 4.15%      | ES      |
| SCHNEIDER ELECTRIC SE XPAR EUR            | Manufacture of electric motors, generators and transformers         | 3.93%      | FR      |
| BNP PARIBAS XPAR EUR                      | Other monetary intermediation                                       | 3.82%      | FR      |
| FINECOBANK SPA MTAA EUR                   | Other monetary intermediation                                       | 3.75%      | IT      |
| AIR LIQUIDE SA XPAR EUR                   | Manufacture of industrial gases                                     | 3.42%      | FR      |
| INTESA SANPAOLO MTAA EUR                  | Other monetary intermediation                                       | 3.4%       | IT      |
| PUBLICIS GROUPE XPAR EUR                  | Advertising agencies  | 3.35%      | FR      |
| DEUTSCHE TELEKOM AG-REG XETR EUR          | Wireless telecommunications activities                              | 3.26%      | DE      |
| ALLIANZ SE-REG XETR EUR                   | Non-life insurance  | 3.2%       | DE      |
| AXA Tr?sor Court Terme Capitalisation EUR | Trusts, funds and similar financial entities                        | 2.72%      | FR      |
| INDUSTRIA DE DISENO TEXTIL XMAD EUR       | Retail sale of clothing in specialised stores                       | 2.51%      | ES      |
| L'OREAL XPAR EUR                          | Manufacture of perfumes and toilet preparations                     | 2.5%       | FR      |
| STELLANTIS NV XPAR EUR                    | Manufacture of motor vehicles                                       | 2.38%      | NL      |

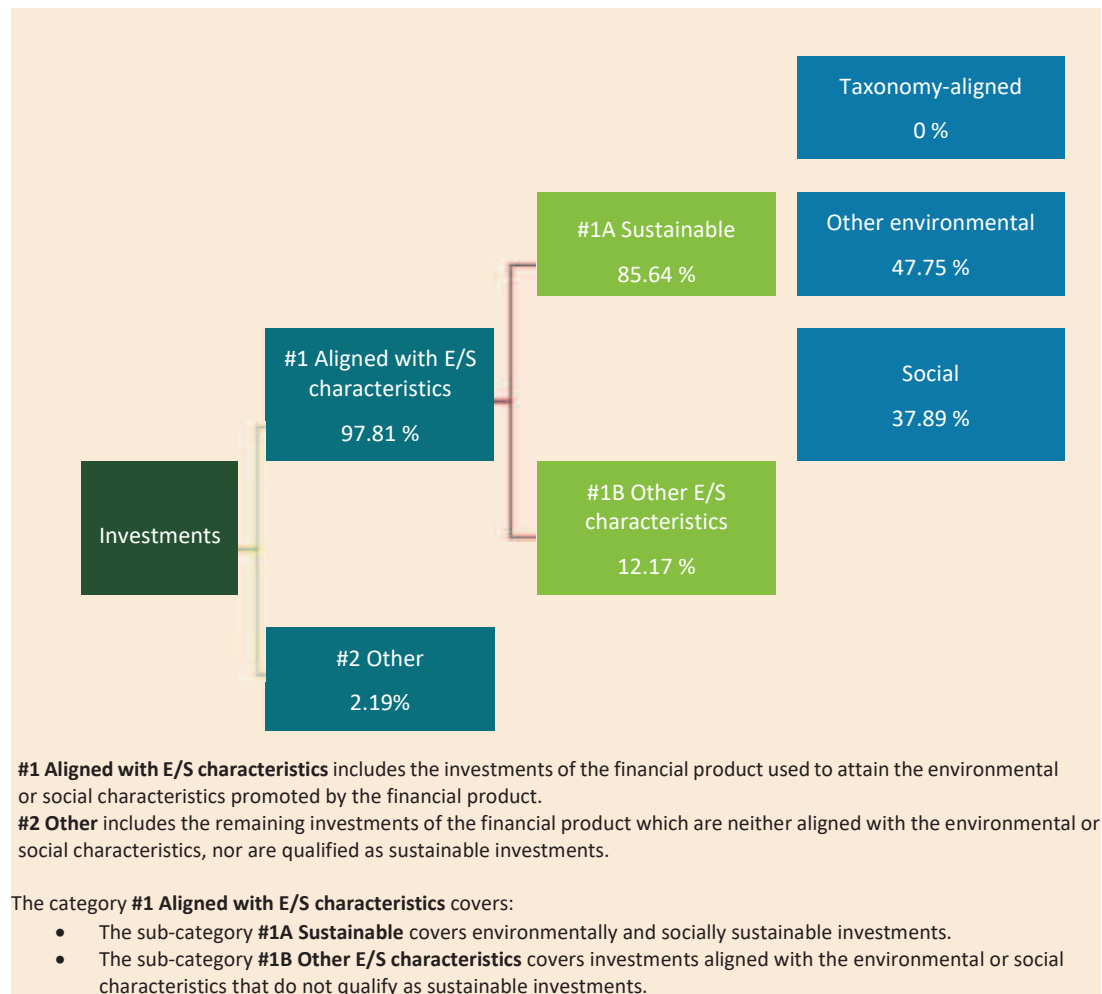

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 13.92%     |
| Manufacture of other special-purpose machinery n.e.c.                                  | 8.32%      |
| Production of electricity  | 5.12%      |
| Manufacture of luggage, handbags and the like, saddlery and harness                    | 4.99%      |
| Manufacture of electric motors, generators and transformers                            | 3.93%      |
| Trusts, funds and similar financial entities   | 3.86%      |
| Manufacture of industrial gases  | 3.42%      |
| Advertising agencies   | 3.35%      |
| Wireless telecommunications activities   | 3.26%      |
| Non-life insurance   | 3.2%       |
| Construction of utility projects for electricity and telecommunications                | 2.72%      |
| Retail sale of clothing in specialised stores  | 2.51%      |
| Manufacture of perfumes and toilet preparations  | 2.5%       |
| Manufacture of motor vehicles  | 2.38%      |
| Manufacture of machinery and equipment n.e.c.  | 2.33%      |
| Civil engineering  | 2.26%      |
| Manufacture of basic pharmaceutical products   | 2.25%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 2.19%      |
| Manufacture of medical and dental instruments and supplies                             | 2.05%      |
| Manufacture of beer  | 1.99%      |
| Manufacture of refined petroleum products  | 1.92%      |
| Other software publishing  | 1.9%       |
| Manufacture of electrical equipment  | 1.85%      |
| Research and experimental development on biotechnology                                 | 1.72%      |
| Water collection, treatment and supply   | 1.68%      |
| Other postal and courier activities  | 1.5%       |
| Architectural and engineering activities, technical testing and analysis               | 1.45%      |
| Manufacture of chemicals and chemical products   | 1.42%      |
| Transmission of electricity  | 1.29%      |

|  |       |
|--|-------|
| Manufacture of pharmaceutical preparations                       | 1.23% |
| Manufacture of other chemical products n.e.c.                    | 1.2%  |
| Accounting, bookkeeping and auditing activities, tax consultancy | 1.12% |
| Manufacture of other food products n.e.c.                        | 1.06% |
| Data processing, hosting and related activities                  | 1.05% |
| Computer programming activities                                  | 0.98% |
| Manufacture of paper and paperboard                              | 0.88% |
| Manufacture of electric domestic appliances                      | 0.67% |
| Manufacture of other parts and accessories for motor vehicles    | 0.53% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 47.75% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 37.89% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 2.19% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES  | <input checked="" type="checkbox"/> NO  |
|---|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%<br><br><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy<br><br><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy<br><br><input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____% | It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 13.83% of sustainable investments<br><br><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy<br><br><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy<br><br><input checked="" type="checkbox"/> with a social objective<br><br><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b> |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 4.31 Score over max 10 | 3.83 Score over max 10 | 94.71%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                  | Sector                                   | Proportion | Country |
|----------------------------------|--|------------|---------|
| ECUA 2.5% Step - 31/07/2035 Sink | General public administration activities | 2%         | EC      |
| EGYPT 6.375% - 11/04/2031        | General public administration activities | 1.89%      | EG      |
| OMAN 6.75% - 17/01/2048          | General public administration activities | 1.84%      | OM      |
| DOMREP 4.875% - 23/09/2032       | General public administration activities | 1.78%      | DO      |

|  |  |       |    |
|--|--|-------|----|
| AXA WF Asian High Yield Bonds M Capitalisation USD | Trusts, funds and similar financial entities | 1.62% | LU |
| ILGOV 0.15% - 31/07/2023                           | General public administration activities     | 1.62% | IL |
| MBONO 7.5% - 03/06/2027                            | General public administration activities     | 1.62% | MX |
| IVYCST 4.875% - 30/01/2032 Sink                    | General public administration activities     | 1.54% | CI |
| REPHUN 4.25% - 16/06/2031                          | General public administration activities     | 1.46% | HU |
| EGYPT 5.625% - 16/04/2030                          | General public administration activities     | 1.41% | EG |
| SOAF 7.3% - 20/04/2052                             | General public administration activities     | 1.31% | ZA |
| QATAR 5.103% - 23/04/2048                          | General public administration activities     | 1.27% | QA |
| ANGOL 8% - 26/11/2029                              | General public administration activities     | 1.18% | AO |
| KZOKZ 6.375% - 24/10/2048                          | Manufacture of refined petroleum products    | 1.16% | KZ |
| OMAN 5.625% - 17/01/2028                           | General public administration activities     | 1.14% | OM |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| General public administration activities                                | 65.77%     |
| Manufacture of refined petroleum products                               | 6.4%       |
| Other monetary intermediation   | 3.45%      |
| Renting and operating of own or leased real estate                      | 2.03%      |
| Transport via pipeline  | 1.93%      |
| Trusts, funds and similar financial entities                            | 1.62%      |
| Mining of other non-ferrous metal ores                                  | 1.52%      |
| Extraction of crude petroleum and natural gas                           | 1.47%      |
| Production of electricity   | 1.45%      |
| Activities of holding companies   | 1.12%      |
| Service activities incidental to air transportation                     | 0.97%      |
| Manufacture of computers and peripheral equipment                       | 0.94%      |
| Financial leasing   | 0.92%      |
| Web portals   | 0.89%      |
| Wireless telecommunications activities                                  | 0.83%      |
| Manufacture of communication equipment                                  | 0.82%      |
| Hotels and similar accommodation  | 0.66%      |
| Renting and leasing of cars and light motor vehicles                    | 0.65%      |
| Manufacture of other special-purpose machinery n.e.c.                   | 0.65%      |
| Wired telecommunications activities                                     | 0.64%      |
| Service activities incidental to water transportation                   | 0.57%      |
| Manufacture of other parts and accessories for motor vehicles           | 0.55%      |
| Passenger air transport   | 0.5%       |
| Freight rail transport  | 0.48%      |
| Copper production   | 0.48%      |
| Manufacture of electrical equipment                                     | 0.47%      |
| Manufacture of electronic components                                    | 0.46%      |
| Processing and preserving of meat                                       | 0.44%      |
| Manufacture of chemicals and chemical products                          | 0.41%      |
| Service activities incidental to land transportation                    | 0.3%       |
| Construction of utility projects for electricity and telecommunications | 0.2%       |
| Retail sale via mail order houses or via Internet                       | 0.16%      |

|   |       |
|---|-------|
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.12% |
| Other   | 0.07% |
| Other retail sale in non-specialised stores                                       | 0.04% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

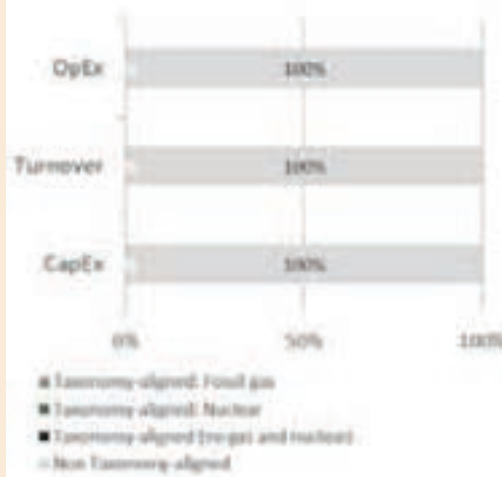

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 9.25% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 4.58% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 8.64% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains

Not applicable.

the  
environmental or  
social  
characteristics  
that they  
promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO   |
|--|--|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 69.12% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input type="checkbox"/> with a social objective   |
|  | <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark           | Coverage |
|-------------------------|------------------------|---------------------|----------|
| ESG Score               | 6.65 Score over max 10 | 6 Score over max 10 | 98.93%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The Financial product did not make any sustainable investments during the reference period.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Financial product did not make any sustainable investments during the reference period.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial product did not make any sustainable investments during the reference period.

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Financial product did not make any sustainable investments during the reference period.

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments        | Sector   | Proportion | Country |
|------------------------|--|------------|---------|
| PROLOGIS INC XNYS USD  | Renting and operating of own or leased real estate | 5.87%      | US      |
| B 0 - 09/03/2023       | General public administration activities           | 4.24%      | US      |
| GOODMAN GROUP XASX AUD | Renting and operating of own or leased real estate | 2.58%      | AU      |

|                                       |  |       |    |
|---------------------------------------|--|-------|----|
| EQUINIX INC XNGS USD                  | Renting and operating of own or leased real estate | 2.35% | US |
| B 0 - 23/03/2023                      | General public administration activities           | 2.19% | US |
| CAPITALAND INVESTMENT LTD/SI XSES SGD | Activities of holding companies                    | 2.04% | SG |
| LINK REIT XHKG HKD                    | Renting and operating of own or leased real estate | 1.91% | HK |
| ALEXANDRIA REAL ESTATE EQUIT XNYS USD | Renting and operating of own or leased real estate | 1.91% | US |
| AVALONBAY COMMUNITIES INC XNYS USD    | Renting and operating of own or leased real estate | 1.89% | US |
| CAPITALAND INTEGRATED COMMER XSES SGD | Renting and operating of own or leased real estate | 1.85% | SG |
| AMERICAN HOMES 4 RENT- A XNYS USD     | Trusts, funds and similar financial entities       | 1.82% | US |
| MITSUI FUDOSAN CO LTD XTKS JPY        | Renting and operating of own or leased real estate | 1.55% | JP |
| HEALTHPEAK PROPERTIES INC XNYS USD    | Renting and operating of own or leased real estate | 1.52% | US |
| WELLTOWER INC XNYS USD                | Renting and operating of own or leased real estate | 1.49% | US |
| KIMCO REALTY CORP XNYS USD            | Renting and operating of own or leased real estate | 1.47% | US |

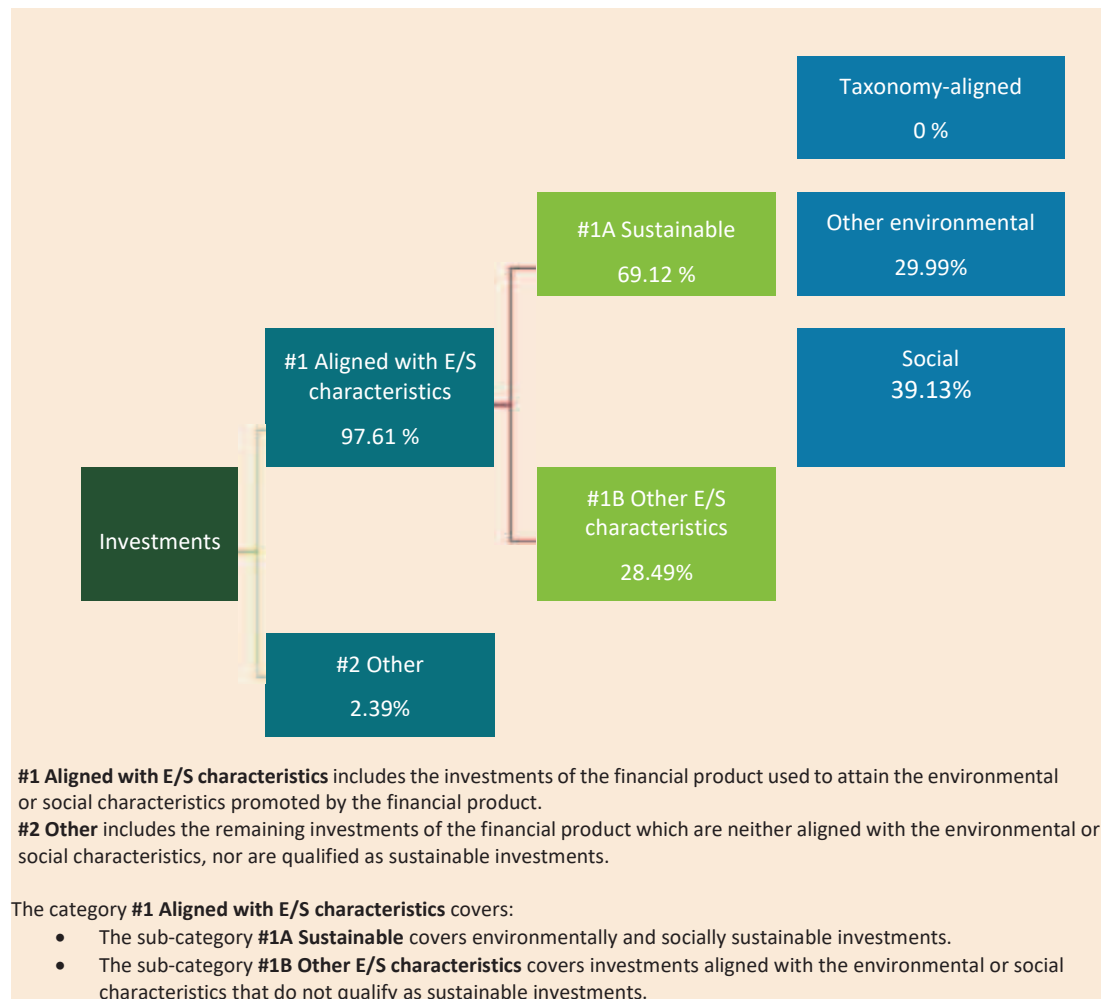

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Renting and operating of own or leased real estate   | 88.15%     |
| General public administration activities             | 7.44%      |
| Trusts, funds and similar financial entities         | 2.15%      |
| Activities of holding companies                      | 2.04%      |
| Management of real estate on a fee or contract basis | 0.22%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas  In nuclear energy
- No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

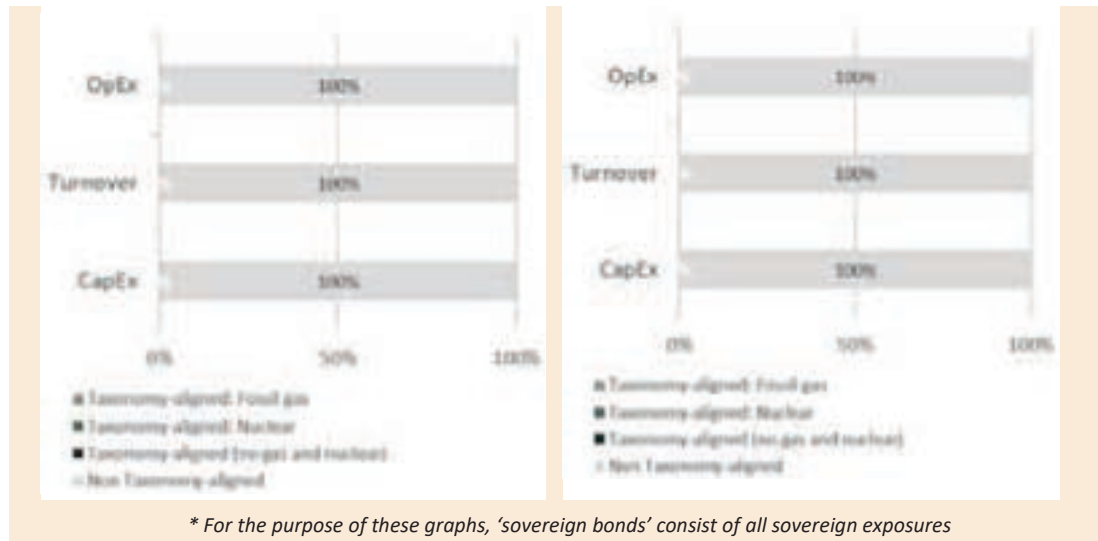

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 29.99% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 39.13% of sustainable investments with a social objective;

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 2.39% of the Financial Product’s Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product and
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity related instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and/or for diversification and/or hedging purposes.

Environmental or social safeguards are applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 24.24% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 5.23 Score over max 10 | 5.12 Score over max 10 | 99.72%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments               | Sector  | Proportion | Country |
|-------------------------------|---|------------|---------|
| ABEGT 9.75% - 01/03/2027 Call | Web portals   | 0.93%      | US      |
| BWY 7.25% - 15/04/2025 Call   | Manufacture of other articles of paper and paperboard | 0.88%      | US      |

|                                 |   |       |    |
|---------------------------------|---|-------|----|
| VCVHHO 9.75% - 15/08/2026 Call  | Other information service activities n.e.c.                                     | 0.79% | US |
| WATCOS 6.5% - 15/06/2027 Call   | Freight rail transport  | 0.79% | US |
| SSNC 5.5% - 30/09/2027 Call     | Other software publishing   | 0.78% | US |
| LUMMUS 9% - 01/07/2028 Call     | Manufacture of other organic basic chemicals                                    | 0.72% | US |
| GRSTAR 5.75% - 01/12/2025 Call  | Renting and operating of own or leased real estate                              | 0.71% | US |
| AXTA 4.75% - 15/06/2027 Call    | Manufacture of paints, varnishes and similar coatings, printing ink and mastics | 0.67% | US |
| HBGCN 7% - 01/05/2026 Call      | Activities of insurance agents and brokers                                      | 0.67% | US |
| LABL 10.5% - 15/07/2027 Call    | Manufacture of other articles of paper and paperboard                           | 0.66% | US |
| GEL 7.75% - 01/02/2028 Call     | Transport via pipeline  | 0.64% | US |
| GWCN 9.5% - 01/11/2027 Call     | Private security activities   | 0.63% | CA |
| MATW 5.25% - 01/12/2025 Call    | Manufacture of other articles of paper and paperboard                           | 0.62% | US |
| OXY 6.45% - 15/09/2036          | Extraction of crude petroleum   | 0.6%  | US |
| CLVTSC 4.875% - 01/07/2029 Call | Other software publishing   | 0.59% | US |

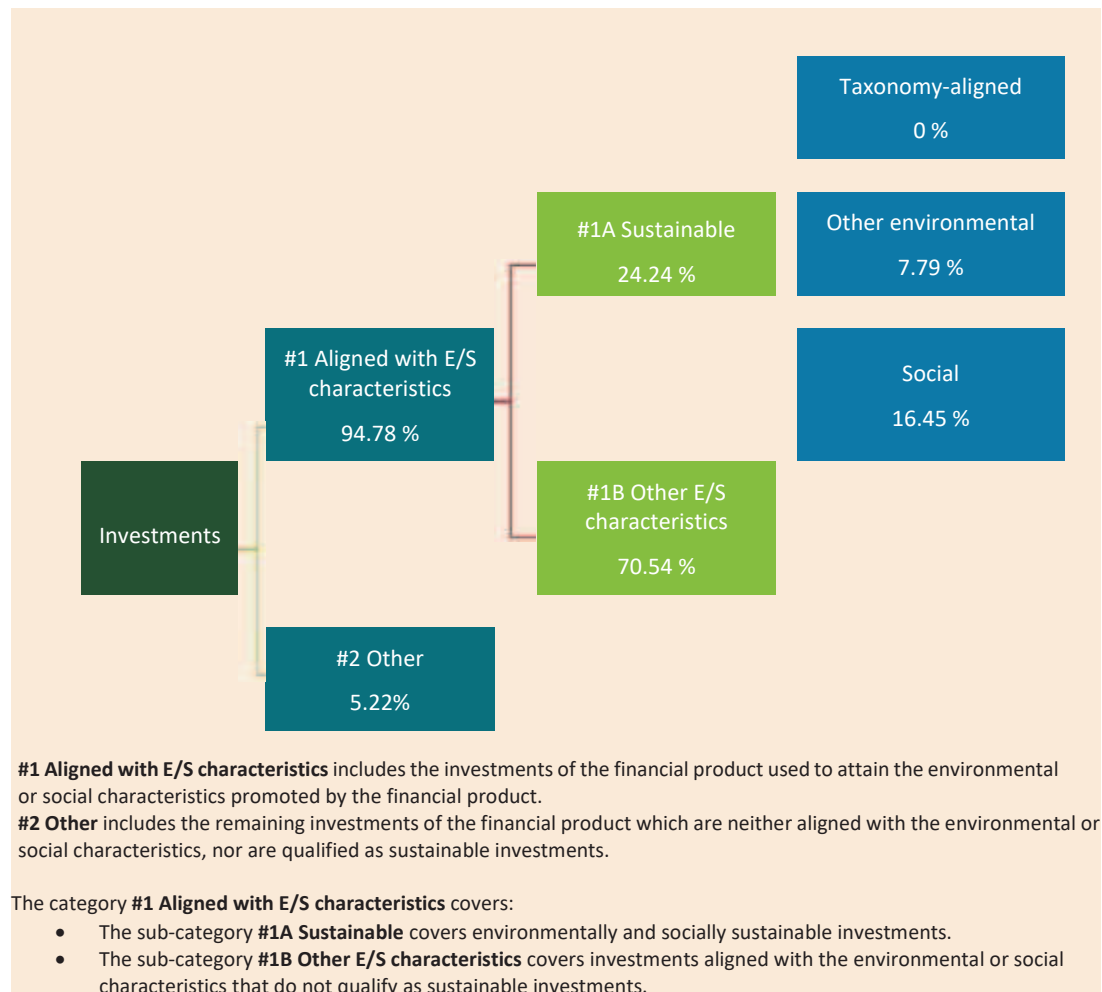

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 7.52%      |
| Manufacture of other articles of paper and paperboard                                  | 4.36%      |
| Satellite telecommunications activities  | 4.28%      |
| Transport via pipeline   | 3.82%      |
| Other monetary intermediation  | 3.18%      |
| Renting and operating of own or leased real estate                                     | 3.13%      |
| Wired telecommunications activities  | 3.02%      |
| Other human health activities  | 2.76%      |
| Extraction of crude petroleum and natural gas  | 2.7%       |
| Private security activities  | 2.39%      |
| Manufacture of basic pharmaceutical products   | 2.34%      |
| Manufacture of light metal packaging   | 2.3%       |
| Manufacture of other chemical products n.e.c.  | 2.05%      |
| Gambling and betting activities  | 1.89%      |
| Retail sale of hardware, paints and glass in specialised stores                        | 1.59%      |
| Other information service activities n.e.c.  | 1.55%      |
| Web portals  | 1.54%      |
| Manufacture of motor vehicles  | 1.51%      |
| Manufacture of communication equipment   | 1.33%      |
| Restaurants and mobile food service activities   | 1.32%      |
| Activities of insurance agents and brokers   | 1.18%      |
| Agents involved in the sale of food, beverages and tobacco                             | 1.16%      |
| Manufacture of electrical equipment  | 1.16%      |
| Computer programming, consultancy and related activities                               | 1.13%      |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics        | 1.05%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 1.03%      |
| Sale of cars and light motor vehicles  | 0.99%      |
| Television programming and broadcasting activities                                     | 0.99%      |
| Manufacture of medical and dental instruments and supplies                             | 0.96%      |
| Wireless telecommunications activities   | 0.92%      |

|   |       |
|---|-------|
| Construction of utility projects for electricity and telecommunications | 0.91% |
| Manufacture of other organic basic chemicals                            | 0.9%  |
| Hospital activities   | 0.88% |
| Sea and coastal passenger water transport                               | 0.87% |
| Manufacture of computers and peripheral equipment                       | 0.85% |
| Rental and leasing activities   | 0.84% |
| Extraction of crude petroleum   | 0.82% |
| Motion picture, video and television programme production activities    | 0.81% |
| Freight rail transport  | 0.79% |
| Manufacture of cement   | 0.79% |
| Other manufacturing n.e.c.  | 0.75% |
| Retail sale of automotive fuel in specialised stores                    | 0.74% |
| Support activities for petroleum and natural gas extraction             | 0.71% |
| Accommodation   | 0.68% |
| Other credit granting   | 0.68% |
| Manufacture of grain mill products                                      | 0.68% |
| Other food service activities   | 0.67% |
| Manufacture of other builders' carpentry and joinery                    | 0.65% |
| Support activities to performing arts                                   | 0.56% |
| Hotels and similar accommodation  | 0.56% |
| Publishing of newspapers  | 0.54% |
| Wholesale trade, except of motor vehicles and motorcycles               | 0.53% |
| Manufacture of motor vehicles, trailers and semi-trailers               | 0.51% |
| Production of electricity   | 0.51% |
| Advertising agencies  | 0.51% |
| Manufacture of pesticides and other agrochemical products               | 0.51% |
| Manufacture of other food products n.e.c.                               | 0.5%  |
| Wholesale of pharmaceutical goods                                       | 0.5%  |
| Waste collection, treatment and disposal activities, materials recovery | 0.48% |
| Processing and preserving of meat                                       | 0.48% |
| Fitness facilities  | 0.48% |

|  |       |
|--|-------|
| Market research and public opinion polling   | 0.46% |
| Manufacture of air and spacecraft and related machinery  | 0.46% |
| Manufacture of batteries and accumulators  | 0.45% |
| Manufacture of other inorganic basic chemicals   | 0.43% |
| Manufacture of soft drinks, production of mineral waters and other bottled waters                    | 0.42% |
| Manufacture of other special-purpose machinery n.e.c.  | 0.41% |
| Research and experimental development on biotechnology   | 0.39% |
| Manufacture of sports goods  | 0.36% |
| Manufacture of chemicals and chemical products   | 0.36% |
| Freight transport by road  | 0.35% |
| Real estate activities   | 0.33% |
| Life insurance   | 0.33% |
| Manufacture of instruments and appliances for measuring, testing and navigation                      | 0.33% |
| Processing and preserving of poultry meat  | 0.33% |
| Book publishing  | 0.33% |
| Aluminium production   | 0.32% |
| Trusts, funds and similar financial entities   | 0.3%  |
| Manufacture of wearing apparel   | 0.29% |
| Other business support service activities n.e.c.   | 0.28% |
| Manufacture of hollow glass  | 0.28% |
| Manufacture of other tanks, reservoirs and containers of metal                                       | 0.25% |
| Manufacture of plastic packing goods   | 0.25% |
| Construction of residential and non-residential buildings  | 0.25% |
| Manufacture of other parts and accessories for motor vehicles  | 0.24% |
| Manufacture of paper and paperboard  | 0.22% |
| Distribution of electricity  | 0.22% |
| Activities of holding companies  | 0.22% |
| Manufacture of food products   | 0.21% |
| Other retail sale of new goods in specialised stores   | 0.21% |
| Manufacture of wood and of products of wood and cork, except furniture, manufacture of articles of s | 0.21% |
| Wholesale of chemical products   | 0.2%  |

|  |       |
|--|-------|
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 0.2%  |
| Other  | 0.19% |
| Renting and leasing of cars and light motor vehicles                                     | 0.19% |
| Treatment and disposal of hazardous waste  | 0.19% |
| Manufacture of builders ware of plastic  | 0.18% |
| Distribution of gaseous fuels through mains  | 0.18% |
| Manufacture of footwear  | 0.18% |
| Education  | 0.18% |
| Collection of non-hazardous waste  | 0.17% |
| Manufacture of household and sanitary goods and of toilet requisites                     | 0.16% |
| Service activities incidental to land transportation                                     | 0.16% |
| Manufacture of electronic components   | 0.15% |
| Manufacture of refined petroleum products  | 0.15% |
| Printing and reproduction of recorded media  | 0.14% |
| Manufacture of concrete products for construction purposes                               | 0.14% |
| Legal and accounting activities  | 0.13% |
| Sewerage   | 0.13% |
| Activities of amusement parks and theme parks  | 0.12% |
| Non-life insurance   | 0.12% |
| Mining of other non-ferrous metal ores   | 0.11% |
| Repair of other equipment  | 0.1%  |
| Other retail sale in non-specialised stores  | 0.1%  |
| Combined facilities support activities   | 0.1%  |
| Tertiary education   | 0.1%  |
| Civil engineering  | 0.1%  |
| Other financial service activities, except insurance and pension funding n.e.c.          | 0.09% |
| Service activities incidental to air transportation                                      | 0.09% |
| Financial leasing  | 0.09% |
| Security and commodity contracts brokerage   | 0.09% |
| Manufacture of other furniture   | 0.09% |
| Beverage serving activities  | 0.08% |
| Retail trade, except of motor vehicles and motorcycles                                   | 0.07% |

|   |       |
|---|-------|
| Manufacture of soap and detergents, cleaning and polishing preparations | 0.07% |
| Manufacture of lifting and handling equipment                           | 0.07% |
| Electricity, gas, steam and air conditioning supply                     | 0.02% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies.  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 7.79% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 16.45% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 5.22% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains

Not applicable.

the  
environmental or  
social  
characteristics  
that they  
promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 49.33% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.59 Score over max 10 | 6.02 Score over max 10 | 98.1%    |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                               | Sector                                       | Proportion | Country |
|---|--|------------|---------|
| BTF 0 - 25/01/2023                            | General public administration activities     | 4.28%      | FR      |
| AXA WF Longevity Economy M Capitalisation EUR | Trusts, funds and similar financial entities | 4.17%      | LU      |

|                                      |   |       |    |
|--------------------------------------|---|-------|----|
| BNP P ENERGY & METAL UCITS           | Trusts, funds and similar financial entities                                      | 4%    | LU |
| ABBVIE INC XNYS USD                  | Manufacture of basic pharmaceutical products                                      | 0.98% | US |
| COCA-COLA CO/THE XNYS USD            | Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.95% | US |
| JOHNSON & JOHNSON XNYS USD           | Manufacture of basic pharmaceutical products                                      | 0.82% | US |
| PFIZER INC XNYS USD                  | Manufacture of basic pharmaceutical products                                      | 0.82% | US |
| CISCO SYSTEMS INC XNGS USD           | Manufacture of communication equipment  | 0.79% | US |
| MERCK & CO. INC. XNYS USD            | Manufacture of basic pharmaceutical products                                      | 0.71% | US |
| VERIZON COMMUNICATIONS INC XNYS USD  | Wireless telecommunications activities  | 0.62% | US |
| INTL BUSINESS MACHINES CORP XNYS USD | Computer programming, consultancy and related activities                          | 0.61% | US |
| AT&T INC XNYS USD                    | Wireless telecommunications activities  | 0.6%  | US |
| NOVARTIS AG-REG XSWX CHF             | Manufacture of basic pharmaceutical products                                      | 0.59% | CH |
| BANCOG 4.125% - 07/08/2027 Call      | Other monetary intermediation   | 0.58% | PA |
| O_SX5E_C0624_3800_IN                 |   | 0.55% | EU |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 13.09%     |
| General public administration activities   | 9.83%      |
| Trusts, funds and similar financial entities   | 8.95%      |
| Manufacture of basic pharmaceutical products   | 5.44%      |
| Wireless telecommunications activities   | 4.61%      |
| Renting and operating of own or leased real estate                                       | 3.69%      |
| Manufacture of motor vehicles  | 2.45%      |
| Non-life insurance   | 2.29%      |
| Manufacture of refined petroleum products  | 2.28%      |
| Life insurance   | 1.95%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters        | 1.93%      |
| Transport via pipeline   | 1.84%      |
| Mining of iron ores  | 1.59%      |
| Other  | 1.39%      |
| Electricity, gas, steam and air conditioning supply                                      | 1.26%      |
| Manufacture of communication equipment   | 1.19%      |
| Manufacture of chemicals and chemical products   | 1.09%      |
| Wired telecommunications activities  | 1.07%      |
| Computer programming, consultancy and related activities                                 | 1.06%      |
| Financial leasing  | 1%         |
| Production of electricity  | 0.97%      |
| Manufacture of household and sanitary goods and of toilet requisites                     | 0.92%      |
| Manufacture of food products   | 0.92%      |
| Service activities incidental to land transportation                                     | 0.86%      |
| Other activities auxiliary to financial services, except insurance and pension funding   | 0.86%      |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 0.84%      |
| Other business support service activities n.e.c.   | 0.79%      |
| Satellite telecommunications activities  | 0.77%      |
| Distribution of electricity  | 0.75%      |
| Manufacture of light metal packaging   | 0.74%      |

|  |       |
|--|-------|
| Mining of other non-ferrous metal ores   | 0.72% |
| Security and commodity contracts brokerage   | 0.68% |
| Extraction of crude petroleum and natural gas                                      | 0.61% |
| Web portals  | 0.61% |
| Motion picture, video and television programme production activities               | 0.59% |
| Construction of residential and non-residential buildings                          | 0.59% |
| Service activities incidental to water transportation                              | 0.58% |
| Manufacture of electronic components   | 0.57% |
| Construction of utility projects for electricity and telecommunications            | 0.57% |
| Distribution of gaseous fuels through mains  | 0.56% |
| Other software publishing  | 0.54% |
| Retail trade, except of motor vehicles and motorcycles                             | 0.53% |
| Manufacture of other chemical products n.e.c.                                      | 0.52% |
| Research and experimental development on biotechnology                             | 0.52% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics    | 0.5%  |
| Manufacture of other articles of paper and paperboard                              | 0.5%  |
| Manufacture of electrical equipment  | 0.46% |
| Manufacture of motor vehicles, trailers and semi-trailers                          | 0.45% |
| Fund management activities   | 0.43% |
| Gambling and betting activities  | 0.4%  |
| Manufacture of other organic basic chemicals                                       | 0.4%  |
| Reinsurance  | 0.39% |
| Other human health activities  | 0.38% |
| Business and other management consultancy activities                               | 0.36% |
| Administration of financial markets  | 0.35% |
| Wholesale of pharmaceutical goods  | 0.33% |
| Service activities incidental to air transportation                                | 0.32% |
| Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes | 0.3%  |
| Manufacture of pulp  | 0.28% |
| Manufacture of computers and peripheral equipment                                  | 0.28% |
| Production of meat and poultry meat products                                       | 0.27% |

|   |       |
|---|-------|
| Other credit granting   | 0.27% |
| Other   | 0.27% |
| Wholesale trade, except of motor vehicles and motorcycles                   | 0.26% |
| Freight rail transport  | 0.25% |
| Hotels and similar accommodation  | 0.25% |
| Manufacture of motorcycles  | 0.24% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment | 0.24% |
| Manufacture of beer   | 0.22% |
| Manufacture of other parts and accessories for motor vehicles               | 0.22% |
| Retail sale via mail order houses or via Internet                           | 0.21% |
| Hospital activities   | 0.2%  |
| Processing and preserving of meat   | 0.2%  |
| Rental and leasing activities   | 0.19% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 25.45% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 23.88% of sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 11.38% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international conventions such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD Guidelines for Multinational Enterprises. AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product and the sustainability indicators mentioned above:

| Sustainability KPI Name | Value | Benchmark | Coverage |
|-------------------------|-------|-----------|----------|
|                         |       |           |          |

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

|           |                        |  |      |
|-----------|------------------------|--|------|
| ESG Score | 5.95 Score over max 10 |  | 100% |
|-----------|------------------------|--|------|

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and sustainable investment contribute to such objective?**

The Financial product did not make any sustainable investments during the reference period.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harmful environmental or social sustainable investment objective?**

The Financial product did not make any sustainable investments during the reference period.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial product did not make any sustainable investments during the reference period.

The Financial Product is also taking into account the environmental optional indicator 'recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery practices'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the periodic reporting SFDR annex – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI disclosed in the periodic reporting SFDR annex relative to the reference period in which SF entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Financial product did not make any sustainable investments during the reference period.

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                 | Sector                                   | Proportion | Country |
|---------------------------------|--|------------|---------|
| TII 3.375% - 15/04/2032<br>CPI  | General public administration activities | 21.07%     | US      |
| UKTI 0.125% - 22/11/2036<br>CPI | General public administration activities | 17.54%     | GB      |
| TII 0.125% - 15/01/2032<br>CPI  | General public administration activities | 11.33%     | US      |
| DBRI 0.1% - 15/04/2033<br>CPI   | General public administration activities | 10.94%     | DE      |

|                                 |   |       |    |
|---------------------------------|---|-------|----|
| UKTI 1.25% - 22/11/2032<br>CPI  | General public<br>administration activities | 9.7%  | GB |
| TII 0.625% - 15/07/2032<br>CPI  | General public<br>administration activities | 8.11% | US |
| BTPS 2.35% - 15/09/2035<br>CPI  | General public<br>administration activities | 5.58% | IT |
| FRTR 0.1% - 25/07/2036<br>CPI   | General public<br>administration activities | 5.52% | FR |
| BTPS 1.25% - 15/09/2032<br>CPI  | General public<br>administration activities | 5.1%  | IT |
| FRTR 3.15% - 25/07/2032<br>CPI  | General public<br>administration activities | 3.52% | FR |
| FRTR 0.1% - 25/07/2031<br>CPI   | General public<br>administration activities | 0.98% | FR |
| BTPS 0.1% - 15/05/2033<br>CPI   | General public<br>administration activities | 0.59% | IT |
| FRTR 0.7% - 25/07/2030<br>CPI   | General public<br>administration activities | 0.01% | FR |
| UKTI 0.125% - 10/08/2031<br>CPI | General public<br>administration activities | 0%    | GB |
| BTPS 0.4% - 15/05/2030<br>CPI   | General public<br>administration activities | 0%    | IT |

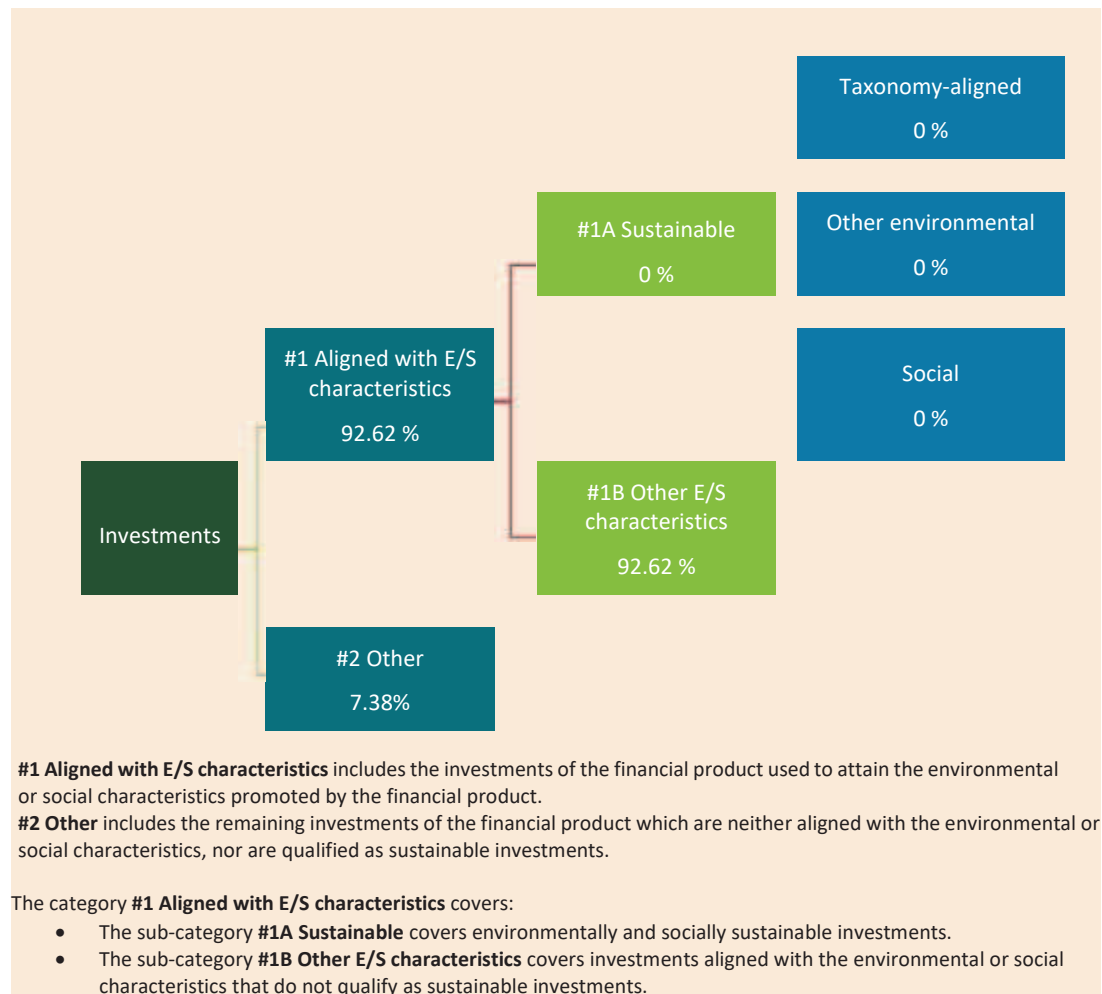

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector                               | Proportion |
|--|------------|
| General public administration activities | 100%       |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

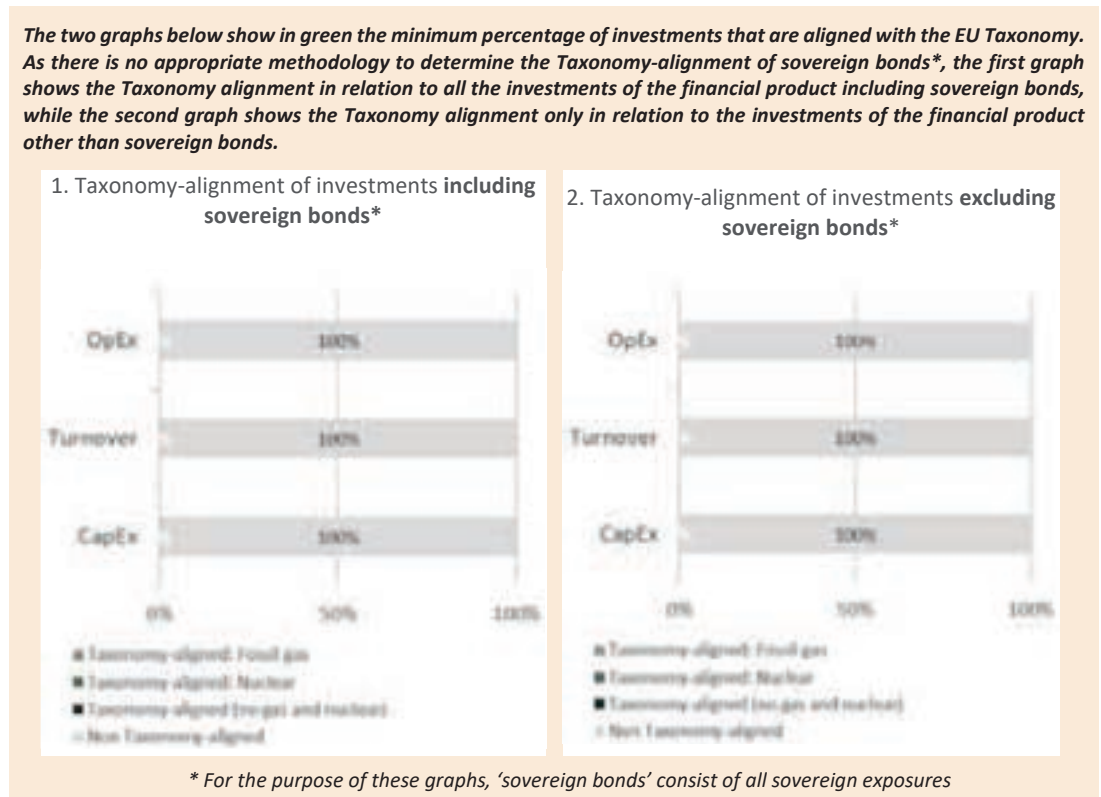

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas  In nuclear energy
- No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria

**What was the share of investments made in transitional and enabling activities?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

 **What was the share of socially sustainable investments?**

Not applicable.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 7.38% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.89% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value               | Benchmark              | Coverage |
|-------------------------|---------------------|------------------------|----------|
| ESG Score               | 6 Score over max 10 | 5.92 Score over max 10 | 99.81%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer fell within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                 | Sector                                       | Proportion | Country |
|---|--|------------|---------|
| AXA IM EURO LIQUIDITY SRI Capitalisation EUR pf | Trusts, funds and similar financial entities | 4.14%      | FR      |
| TII 0.125% - 15/01/2031 CPI                     | General public administration activities     | 2.75%      | US      |
| TII 3.875% - 15/04/2029 CPI                     | General public administration activities     | 2.12%      | US      |
| TII 0.125% - 15/10/2026 CPI                     | General public administration activities     | 2.02%      | US      |

|  |  |       |    |
|--|--|-------|----|
| TII 0.5% - 15/01/2028 CPI                          | General public administration activities     | 1.98% | US |
| TII 0.125% - 15/04/2027 CPI                        | General public administration activities     | 1.98% | US |
| TII 0.875% - 15/01/2029 CPI                        | General public administration activities     | 1.92% | US |
| AXA WF Global Inflation Short Duration Bonds M (H) | Trusts, funds and similar financial entities | 1.89% | LU |
| TII 0.75% - 15/07/2028 CPI                         | General public administration activities     | 1.74% | US |
| TII 0.625% - 15/01/2026 CPI                        | General public administration activities     | 1.71% | US |
| FRTR 0.25% - 25/07/2024 CPI                        | General public administration activities     | 1.7%  | FR |
| TII 0.125% - 15/01/2032 CPI                        | General public administration activities     | 1.7%  | US |
| TII 0.625% - 15/07/2032 CPI                        | General public administration activities     | 1.63% | US |
| UKTI 0.125% - 22/03/2024 CPI                       | General public administration activities     | 1.58% | GB |
| TII 0.125% - 15/07/2031 CPI                        | General public administration activities     | 1.57% | US |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector                                   | Proportion |
|--|------------|
| General public administration activities     | 93.51%     |
| Trusts, funds and similar financial entities | 6.03%      |
| Freight rail transport                       | 0.46%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

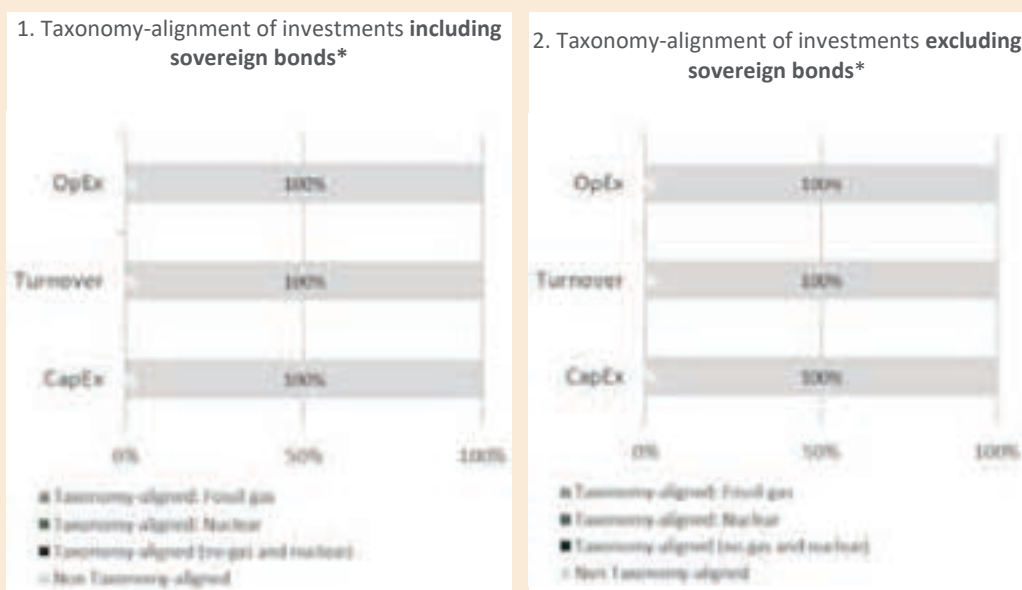

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies.  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 1.73% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 1.16% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 4.91% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic

Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.43% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark | Coverage |
|-------------------------|------------------------|-----------|----------|
| ESG Score               | 4.89 Score over max 10 |           | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments               | Sector   | Proportion | Country |
|-------------------------------|--|------------|---------|
| ARGIHC 7% - 15/06/2025 Call   | Restaurants and mobile food service activities | 1.43%      | US      |
| ARMK 6.375% - 01/05/2025 Call | Other food service activities                  | 1.38%      | US      |

|                                |   |       |    |
|--------------------------------|---|-------|----|
| BWY 5.5% - 15/04/2024 Call     | Manufacture of other articles of paper and paperboard                           | 1.34% | US |
| XHR 6.375% - 15/08/2025 Call   | Renting and operating of own or leased real estate                              | 1.34% | US |
| SRCL 5.375% - 15/07/2024 Call  | Collection of hazardous waste   | 1.27% | US |
| GTN 5.875% - 15/07/2026 Call   | Television programming and broadcasting activities                              | 1.27% | US |
| LABL 6.75% - 15/07/2026 Call   | Manufacture of other articles of paper and paperboard                           | 1.26% | US |
| VCVHHO 9.75% - 15/08/2026 Call | Other information service activities n.e.c.                                     | 1.25% | US |
| USFOOD 6.25% - 15/04/2025 Call | Agents involved in the sale of food, beverages and tobacco                      | 1.21% | US |
| WLSC 6.125% - 15/06/2025 Call  | Rental and leasing activities   | 1.21% | US |
| CMLP 5.75% - 01/04/2025 Call   | Transport via pipeline  | 1.19% | US |
| BMCAUS 5% - 15/02/2027 Call    | Manufacture of other builders' carpentry and joinery                            | 1.18% | US |
| COMM 6% - 01/03/2026 Call      | Manufacture of communication equipment  | 1.15% | US |
| AVNT 5.75% - 15/05/2025 Call   | Manufacture of paints, varnishes and similar coatings, printing ink and mastics | 1.12% | US |
| ARGID 5.25% - 30/04/2025 Call  | Manufacture of other articles of paper and paperboard                           | 1.1%  | IE |

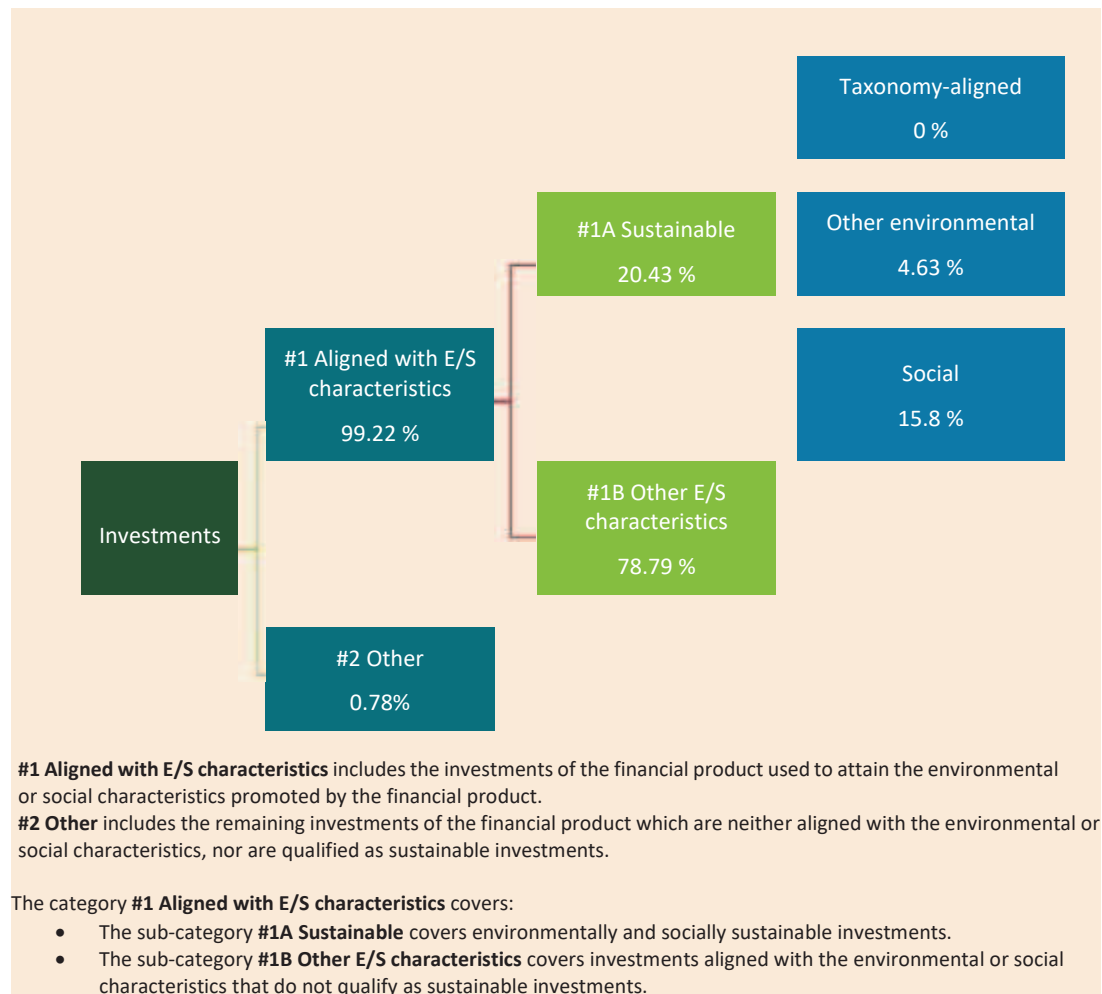

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Manufacture of other articles of paper and paperboard                   | 5.71%      |
| Renting and operating of own or leased real estate                      | 5.68%      |
| Satellite telecommunications activities                                 | 5.24%      |
| Other software publishing   | 4.14%      |
| Private security activities   | 4.1%       |
| Gambling and betting activities   | 3.63%      |
| Other monetary intermediation   | 3.3%       |
| Transport via pipeline  | 3.08%      |
| Television programming and broadcasting activities                      | 2.96%      |
| Activities of holding companies   | 2.91%      |
| Hospital activities   | 2.81%      |
| Other food service activities   | 2.47%      |
| Restaurants and mobile food service activities                          | 2.24%      |
| Wired telecommunications activities                                     | 2.18%      |
| Other human health activities   | 2.15%      |
| Manufacture of hollow glass   | 2.12%      |
| Manufacture of communication equipment                                  | 2.06%      |
| Agents involved in the sale of food, beverages and tobacco              | 2.05%      |
| Manufacture of other builders' carpentry and joinery                    | 1.88%      |
| Other manufacturing n.e.c.  | 1.82%      |
| Activities of amusement parks and theme parks                           | 1.55%      |
| Manufacture of light metal packaging                                    | 1.46%      |
| Extraction of crude petroleum and natural gas                           | 1.44%      |
| Waste collection, treatment and disposal activities, materials recovery | 1.44%      |
| Other credit granting   | 1.44%      |
| Advertising agencies  | 1.42%      |
| Retail sale of hardware, paints and glass in specialised stores         | 1.39%      |
| Manufacture of motor vehicles   | 1.37%      |
| Manufacture of batteries and accumulators                               | 1.3%       |
| Collection of hazardous waste   | 1.27%      |
| Other information service activities n.e.c.                             | 1.25%      |

|  |       |
|--|-------|
| Rental and leasing activities  | 1.21% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics        | 1.12% |
| Other activities auxiliary to financial services, except insurance and pension funding | 1.11% |
| Freight rail transport   | 1.01% |
| Sale of cars and light motor vehicles  | 0.92% |
| Motion picture, video and television programme production activities                   | 0.9%  |
| Manufacture of other food products n.e.c.  | 0.84% |
| Retail trade, except of motor vehicles and motorcycles                                 | 0.84% |
| Manufacture of underwear   | 0.83% |
| Manufacture of condiments and seasonings   | 0.8%  |
| Aluminium production   | 0.79% |
| Manufacture of plastic packing goods   | 0.78% |
| Activities of insurance agents and brokers   | 0.78% |
| Manufacture of electrical equipment  | 0.73% |
| Wireless telecommunications activities   | 0.7%  |
| Architectural and engineering activities, technical testing and analysis               | 0.67% |
| Manufacture of grain mill products   | 0.61% |
| Manufacture of other special-purpose machinery n.e.c.                                  | 0.61% |
| Web portals  | 0.6%  |
| Retail sale of automotive fuel in specialised stores                                   | 0.54% |
| Support activities to performing arts  | 0.49% |
| Retail sale of sporting equipment in specialised stores                                | 0.49% |
| Computer programming, consultancy and related activities                               | 0.47% |
| Manufacture of games and toys  | 0.46% |
| Publishing of newspapers   | 0.46% |
| Manufacture of chemicals and chemical products   | 0.41% |
| Manufacture of other parts and accessories for motor vehicles                          | 0.4%  |
| Manufacture of other inorganic basic chemicals   | 0.37% |
| Wholesale of chemical products   | 0.35% |
| Manufacture of computers and peripheral equipment                                      | 0.31% |

|   |       |
|---|-------|
| Wholesale trade, except of motor vehicles and motorcycles                   | 0.29% |
| Other amusement and recreation activities                                   | 0.28% |
| Manufacture of other organic basic chemicals                                | 0.24% |
| Manufacture of other chemical products n.e.c.                               | 0.24% |
| Construction of residential and non-residential buildings                   | 0.22% |
| Manufacture of machinery and equipment n.e.c.                               | 0.14% |
| Accommodation   | 0.06% |
| Processing and preserving of meat   | 0.05% |
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel | 0.03% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 4.63% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 15.8% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.78% of the Financial Product’s Net Asset Value. The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 48.09% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.99 Score over max 10 | 6.22 Score over max 10 | 99.65%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                    | Sector                                       | Proportion | Country |
|--|--|------------|---------|
| ISHARES PHYSICAL GOLD ETC                          | Trusts, funds and similar financial entities | 4.99%      | IE      |
| AXA WF Global Emerging Markets Bonds M (H) Capital | Trusts, funds and similar financial entities | 2.64%      | LU      |

|  |  |       |    |
|--|--|-------|----|
| BTF 0 - 08/03/2023                                 | General public administration activities   | 2.56% | FR |
| PRYSMIAN SPA MTAA EUR                              | Manufacture of electrical equipment  | 2.48% | IT |
| AWF Eur Inf P MC                                   | Trusts, funds and similar financial entities   | 2.2%  | LU |
| AXA IM FIIS US Short Duration High Yield A (H) Dis | Trusts, funds and similar financial entities   | 2.09% | LU |
| DIAGEO PLC XLON GBP                                | Distilling, rectifying and blending of spirits   | 1.82% | GB |

| ASTRAZENECA PLC XLON GBP                           | Manufacture of basic pharmaceutical products   | 1.47% | GB |
| CIE FINANCIERE RICHEMO-A REG XSWX CHF              | Manufacture of jewellery and related articles  | 1.46% | CH |
| MASTERCARD INC - A XNYS USD                        | Other activities auxiliary to financial services, except insurance and pension funding | 1.42% | US |
| CHECK POINT SOFTWARE TECH XNGS USD                 | Other software publishing  | 1.39% | IL |
| MSCI INC XNYS USD                                  | Other information service activities n.e.c.  | 1.37% | US |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

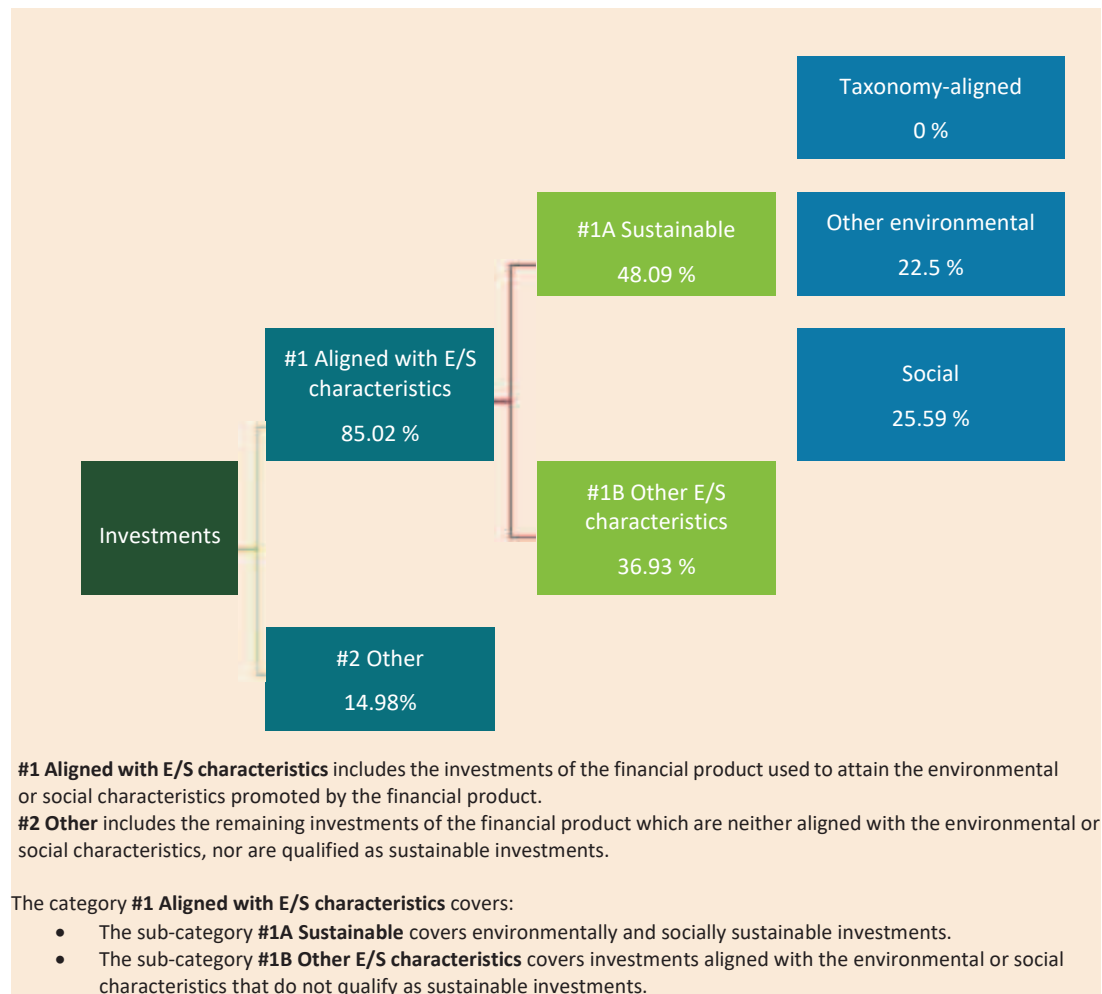

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Trusts, funds and similar financial entities   | 14.85%     |
| Other monetary intermediation  | 6.8%       |
| Manufacture of basic pharmaceutical products   | 5.61%      |
| General public administration activities   | 5.44%      |
| Other software publishing  | 5.35%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 4.97%      |
| Manufacture of refined petroleum products  | 3.23%      |
| Manufacture of motor vehicles  | 3.18%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 2.92%      |
| Other  | 2.89%      |
| Other information service activities n.e.c.  | 2.7%       |
| Manufacture of electrical equipment  | 2.48%      |
| Distilling, rectifying and blending of spirits   | 2.33%      |
| Mining of other non-ferrous metal ores   | 2.26%      |
| Manufacture of medical and dental instruments and supplies                             | 1.94%      |
| Manufacture of food products   | 1.66%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 1.54%      |
| Manufacture of jewellery and related articles  | 1.46%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 1.29%      |
| Web portals  | 1.29%      |
| Computer programming activities  | 1.13%      |
| Manufacture of beer  | 1.08%      |
| Manufacture of electric motors, generators and transformers                            | 1.07%      |
| Mining of iron ores  | 1.06%      |
| Retail sale of clothing in specialised stores  | 0.97%      |
| Manufacture of industrial gases  | 0.96%      |
| Manufacture of electronic components   | 0.92%      |
| Manufacture of luggage, handbags and the like, saddlery and harness                    | 0.79%      |
| Administration of financial markets  | 0.78%      |
| Non-life insurance   | 0.77%      |

|  |       |
|--|-------|
| Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres | 0.73% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics  | 0.73% |
| Transmission of electricity  | 0.7%  |
| Manufacture of other non-metallic mineral products                               | 0.69% |
| Manufacture of musical instruments   | 0.67% |
| Civil engineering  | 0.66% |
| Computer programming, consultancy and related activities                         | 0.57% |
| Manufacture of ovens, furnaces and furnace burners                               | 0.57% |
| Manufacture of machinery for mining, quarrying and construction                  | 0.53% |
| Manufacture of lifting and handling equipment                                    | 0.51% |
| Hotels and similar accommodation   | 0.5%  |
| Wireless telecommunications activities   | 0.5%  |
| Life insurance   | 0.5%  |
| Engineering activities and related technical consultancy                         | 0.42% |
| Fitness facilities   | 0.41% |
| Manufacture of communication equipment   | 0.4%  |
| Manufacture of ceramic sanitary fixtures   | 0.38% |
| Sound recording and music publishing activities                                  | 0.37% |
| Retail sale of audio and video equipment in specialised stores                   | 0.37% |
| Retail sale via mail order houses or via Internet                                | 0.37% |
| Renting and operating of own or leased real estate                               | 0.31% |
| Manufacture of air and spacecraft and related machinery                          | 0.31% |
| Electricity, gas, steam and air conditioning supply                              | 0.3%  |
| Other postal and courier activities  | 0.29% |
| Other business support service activities n.e.c.                                 | 0.28% |
| Production of electricity  | 0.25% |
| Fishing and aquaculture  | 0.24% |
| Data processing, hosting and related activities                                  | 0.24% |
| Retail trade, except of motor vehicles and motorcycles                           | 0.23% |
| Gambling and betting activities  | 0.21% |
| Motion picture, video and television programme production activities             | 0.21% |

|   |       |
|---|-------|
| Manufacture of footwear   | 0.21% |
| Manufacture of other organic basic chemicals  | 0.2%  |
| Support activities for petroleum and natural gas extraction                                     | 0.19% |
| Manufacture of ceramic tiles and flags  | 0.19% |
| Manufacture of perfumes and toilet preparations   | 0.19% |
| Construction of residential and non-residential buildings                                       | 0.19% |
| Publishing of computer games  | 0.17% |
| Service activities incidental to land transportation  | 0.16% |
| Manufacture of computers and peripheral equipment   | 0.15% |
| Growing of citrus fruits  | 0.14% |
| Manufacture of agricultural and forestry machinery  | 0.14% |
| Manufacture of other food products n.e.c.   | 0.14% |
| Wholesale of chemical products  | 0.14% |
| Manufacture of soft drinks, production of mineral waters and other bottled waters               | 0.11% |
| Manufacture of other parts and accessories for motor vehicles                                   | 0.08% |
| Manufacture of bodies (coachwork) for motor vehicles, manufacture of trailers and semi-trailers | 0.07% |
| Water collection, treatment and supply  | 0.07% |
| Manufacture of other chemical products n.e.c.   | 0.07% |
| Collection of non-hazardous waste   | 0.07% |
| Other food service activities   | 0.07% |
| Passenger air transport   | 0.05% |
| Printing and reproduction of recorded media   | 0.03% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment                     | 0.03% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an

**What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 22.5% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 25.59% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 14.98% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ___%                   | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 70.72% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ___%                           | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.35 Score over max 10 | 5.65 Score over max 10 | 98.41%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets. The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR. Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units            | Measurement |
|--|---|------------------|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|                                     |   |   |  |
|-------------------------------------|---|---|--|
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap         | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members          |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies                    | PAI indicator  | Units   | Measurement |
|---|--|---|-------------|
| Climate Risk policy                         | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 2: Carbon Footprint  | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 3: GHG intensity of investee companies                               | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy |  |   |             |
| Climate Risk policy                         | PAI 4: Exposure to companies active in the fossil fuel sector            | % of investments  |             |
| Climate Risk policy (engagement only)       | PAI 5: Share of non-renewable energy consumption and production          | % of total energy sources   |             |

|   |   |  |  |
|---|---|--|--|
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments                               |  |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments                               |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members |  |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments                               |  |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                       | Sector   | Proportion | Country |
|---------------------------------------|--|------------|---------|
| PROLOGIS INC XNYS USD                 | Renting and operating of own or leased real estate | 9.51%      | US      |
| EQUINIX INC XNGS USD                  | Renting and operating of own or leased real estate | 4.46%      | US      |
| AVALONBAY COMMUNITIES INC XNYS USD    | Renting and operating of own or leased real estate | 4.11%      | US      |
| LINK REIT XHKG HKD                    | Renting and operating of own or leased real estate | 3.59%      | HK      |
| ALEXANDRIA REAL ESTATE EQUIT XNYS USD | Renting and operating of own or leased real estate | 3.58%      | US      |
| AMERICAN HOMES 4 RENT- A XNYS USD     | Trusts, funds and similar financial entities       | 3.42%      | US      |
| GOODMAN GROUP XASX AUD                | Renting and operating of own or leased real estate | 3.04%      | AU      |
| HEALTHPEAK PROPERTIES INC XNYS USD    | Renting and operating of own or leased real estate | 2.87%      | US      |

|   |  |       |    |
|---|--|-------|----|
| WELLTOWER INC XNYS USD                          | Renting and operating of own or leased real estate | 2.83% | US |
| AXA IM EURO LIQUIDITY SRI Capitalisation EUR pf | Trusts, funds and similar financial entities       | 2.8%  | FR |
| CAPITALAND INVESTMENT LTD/SI XSES SGD           | Activities of holding companies                    | 2.78% | SG |
| KIMCO REALTY CORP XNYS USD                      | Renting and operating of own or leased real estate | 2.74% | US |
| REALTY INCOME CORP XNYS USD                     | Renting and operating of own or leased real estate | 2.72% | US |
| AMERICOLD REALTY TRUST INC XNYS USD             | Renting and operating of own or leased real estate | 2.71% | US |
| SIMON PROPERTY GROUP INC XNYS USD               | Renting and operating of own or leased real estate | 2.53% | US |

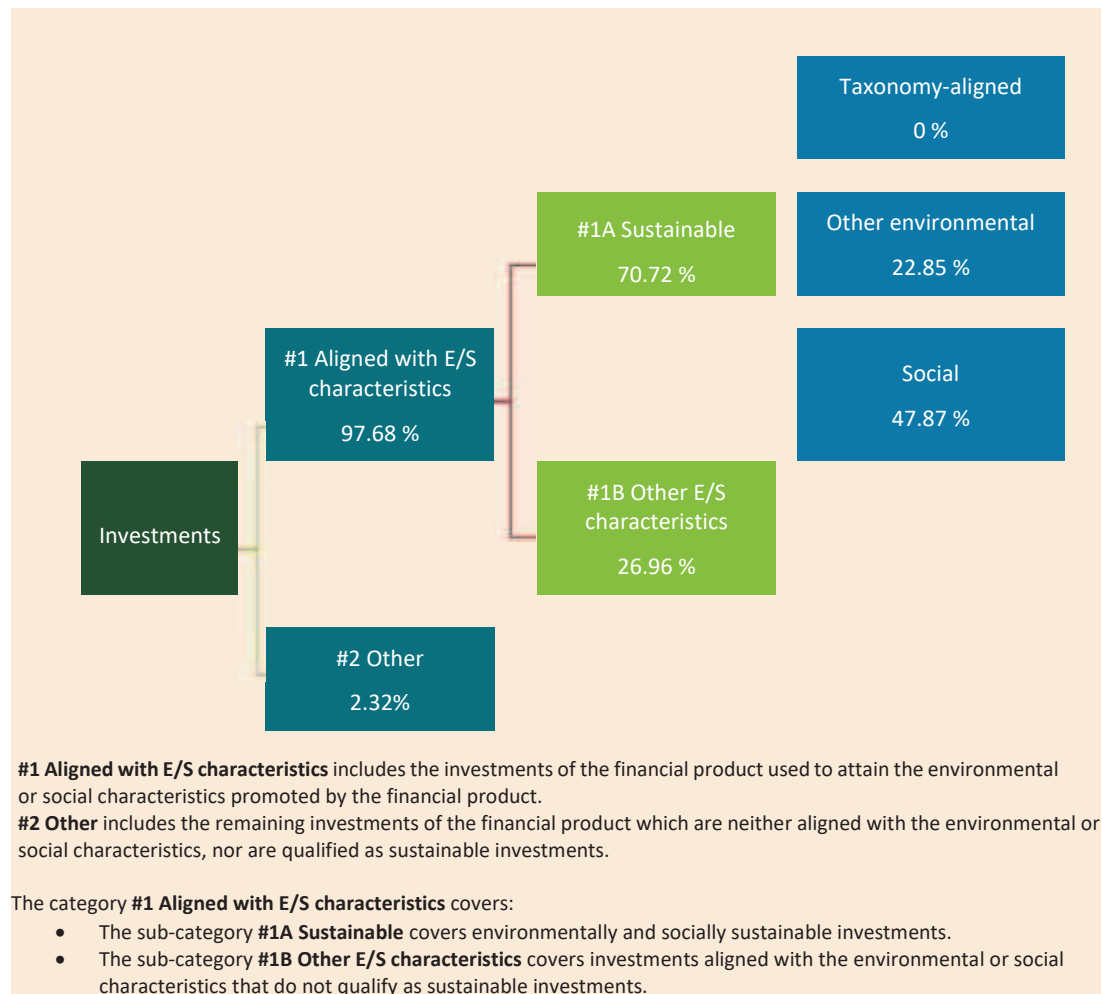

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Renting and operating of own or leased real estate       | 90.26%     |
| Trusts, funds and similar financial entities             | 6.22%      |
| Activities of holding companies                          | 2.78%      |
| Computer programming, consultancy and related activities | 0.52%      |
| Real estate activities                                   | 0.22%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies.  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 22.85% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 47.87 % of sustainable investments with a social objective;

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 2.32% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product and
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity related instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and/or for diversification and/or hedging purposes.

Environmental or social safeguards are applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 39.93% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.53 Score over max 10 | 5.96 Score over max 10 | 96.75%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                    | Sector                                       | Proportion | Country |
|--|--|------------|---------|
| AXA WF US Short Duration High Yield Bonds M Capita | Trusts, funds and similar financial entities | 5.3%       | LU      |
| DBRI 0.1% - 15/04/2023 CPI                         | General public administration activities     | 3.79%      | DE      |

|                                     |   |       |    |
|-------------------------------------|---|-------|----|
| UKT 4.25% - 07/12/2027              | General public administration activities            | 2.19% | GB |
| UKT 1.25% - 22/07/2027              | General public administration activities            | 1.73% | GB |
| UKTI 0.125% - 22/03/2024 CPI        | General public administration activities            | 1.55% | GB |
| BACR 0.877% Var - 28/01/2028 Call   | Other monetary intermediation                       | 1.24% | GB |
| ACAFP 0.625% Var - 12/01/2028 Call  | Other monetary intermediation                       | 1.04% | FR |
| ROTHLF 5.5% Var - 17/09/2029 Call   | Life insurance                                      | 1.03% | GB |
| ADRIT 5.441% - 20/02/2023           | Service activities incidental to air transportation | 1.01% | IT |
| SWEDA 7.272% Var - 15/11/2032 Call  | Other monetary intermediation                       | 0.99% | SE |
| NAB 1.699% Var - 15/09/2031 Call    | Other monetary intermediation                       | 0.98% | AU |
| TSCOPF 3.5% - 25/07/2025 Call       | Other monetary intermediation                       | 0.96% | GB |
| ULFP 2.125% - 30/03/2025 Call       | Renting and operating of own or leased real estate  | 0.92% | AU |
| LLOYDS 1.985% Var - 15/12/2031 Call | Other monetary intermediation                       | 0.89% | GB |
| SANTAN 1.5% - 14/04/2026            | Trusts, funds and similar financial entities        | 0.89% | ES |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Other monetary intermediation   | 29.1%      |
| General public administration activities  | 9.63%      |
| Trusts, funds and similar financial entities                                    | 8.1%       |
| Renting and operating of own or leased real estate                              | 5.79%      |
| Life insurance  | 4.16%      |
| Retail trade, except of motor vehicles and motorcycles                          | 2.61%      |
| Non-life insurance  | 2.31%      |
| Manufacture of motor vehicles   | 2.27%      |
| Hotels and similar accommodation  | 2.15%      |
| Wireless telecommunications activities  | 1.97%      |
| Service activities incidental to air transportation                             | 1.84%      |
| Production of electricity   | 1.73%      |
| Wired telecommunications activities   | 1.68%      |
| Electricity, gas, steam and air conditioning supply                             | 1.59%      |
| Security and commodity contracts brokerage                                      | 1.57%      |
| Motion picture, video and television programme production activities            | 1.48%      |
| Web portals   | 1.09%      |
| Manufacture of refined petroleum products                                       | 1.05%      |
| Manufacture of other chemical products n.e.c.                                   | 0.82%      |
| Manufacture of beer   | 0.77%      |
| Manufacture of chemicals and chemical products                                  | 0.77%      |
| Activities of amusement parks and theme parks                                   | 0.75%      |
| Production of meat and poultry meat products                                    | 0.69%      |
| Retail sale via mail order houses or via Internet                               | 0.67%      |
| Manufacture of pulp   | 0.67%      |
| Manufacture of instruments and appliances for measuring, testing and navigation | 0.67%      |
| Activities of insurance agents and brokers                                      | 0.66%      |
| Other business support service activities n.e.c.                                | 0.66%      |
| Warehousing and support activities for transportation                           | 0.62%      |
| Other financial service activities, except insurance and pension funding n.e.c. | 0.61%      |
| Rental and leasing activities   | 0.6%       |

|  |       |
|--|-------|
| Financial leasing  | 0.59% |
| Extraction of crude petroleum and natural gas  | 0.58% |
| Manufacture of electronic components   | 0.58% |
| Manufacture of food products   | 0.56% |
| Manufacture of motor vehicles, trailers and semi-trailers                              | 0.55% |
| Combined facilities support activities   | 0.55% |
| Manufacture of batteries and accumulators  | 0.52% |
| Restaurants and mobile food service activities   | 0.52% |
| Other retail sale in non-specialised stores  | 0.5%  |
| Other software publishing  | 0.5%  |
| Water collection, treatment and supply   | 0.49% |
| Distribution of electricity  | 0.46% |
| Manufacture of pesticides and other agrochemical products                              | 0.45% |
| Other human health activities  | 0.43% |
| Construction of utility projects for electricity and telecommunications                | 0.39% |
| Research and experimental development on biotechnology                                 | 0.38% |
| Satellite telecommunications activities  | 0.34% |
| Other information service activities n.e.c.  | 0.33% |
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel            | 0.33% |
| Manufacture of basic pharmaceutical products   | 0.31% |
| Renting and leasing of trucks  | 0.3%  |
| Raising of poultry   | 0.29% |
| Manufacture of household and sanitary goods and of toilet requisites                   | 0.22% |
| Other retail sale of new goods in specialised stores                                   | 0.22% |
| Other activities auxiliary to financial services, except insurance and pension funding | 0.19% |
| Manufacture of agricultural and forestry machinery                                     | 0.18% |
| Manufacture of computers and peripheral equipment                                      | 0.14% |
| Wholesale of metals and metal ores   | 0.05% |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

- **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 13.51% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 26.42% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 5.83% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?  |  |
|--|--|
| <p style="margin: 0;"><span style="color: green;">●●</span> <input type="checkbox"/> <b>YES</b></p>  | <p style="margin: 0;"><span style="color: green;">●</span> <input checked="" type="checkbox"/> <b>NO</b></p>   |
| <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ____%</p> | <p>It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 24.51% of sustainable investments</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p> |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.09 Score over max 10 | 5.86 Score over max 10 | 98.93%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments        | Sector                                   | Proportion | Country |
|------------------------|--|------------|---------|
| T 1.125% - 15/02/2031  | General public administration activities | 4.29%      | US      |
| UKT 1% - 22/04/2024    | General public administration activities | 2.31%      | GB      |
| UKT 4.25% - 07/06/2032 | General public administration activities | 2.14%      | GB      |

|                                 |  |       |    |
|---------------------------------|--|-------|----|
| T 4.5% - 15/02/2036             | General public administration activities | 2.13% | US |
| FRTR 0.1% - 01/03/2025 CPI      | General public administration activities | 1.9%  | FR |
| T 3% - 30/06/2024               | General public administration activities | 1.87% | US |
| TII 0.125% - 15/04/2025 CPI     | General public administration activities | 1.76% | US |
| T 3% - 15/05/2047               | General public administration activities | 1.62% | US |
| T 2% - 15/02/2050               | General public administration activities | 1.41% | US |
| UKTI 0.125% - 22/03/2026 CPI    | General public administration activities | 1.39% | GB |
| FRTR 0.25% - 25/11/2026         | General public administration activities | 1.29% | FR |
| CBGLN 2% Var - 11/09/2031 Call  | Other monetary intermediation            | 1.07% | GB |
| T 1.25% - 15/05/2050            | General public administration activities | 1.07% | US |
| T 2.5% - 15/02/2046             | General public administration activities | 1%    | US |
| ROTHLF 5% Var - 13/10/2031 Perp | Life insurance                           | 0.95% | GB |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| General public administration activities   | 31.88%     |
| Other monetary intermediation  | 11.73%     |
| Renting and operating of own or leased real estate                                     | 5.54%      |
| Life insurance   | 4.82%      |
| Manufacture of refined petroleum products  | 4.04%      |
| Other software publishing  | 2%         |
| Manufacture of other articles of paper and paperboard                                  | 1.82%      |
| Transport via pipeline   | 1.66%      |
| Non-life insurance   | 1.49%      |
| Other information service activities n.e.c.  | 1.39%      |
| Manufacture of other chemical products n.e.c.  | 1.38%      |
| Restaurants and mobile food service activities   | 1.22%      |
| Distribution of electricity  | 1.01%      |
| Wireless telecommunications activities   | 0.93%      |
| Service activities incidental to air transportation                                    | 0.9%       |
| Other human health activities  | 0.84%      |
| Mining of other non-ferrous metal ores   | 0.84%      |
| Security and commodity contracts brokerage   | 0.83%      |
| Web portals  | 0.82%      |
| Trusts, funds and similar financial entities   | 0.81%      |
| Private security activities  | 0.81%      |
| Manufacture of other organic basic chemicals   | 0.8%       |
| Other activities auxiliary to financial services, except insurance and pension funding | 0.78%      |
| Extraction of crude petroleum and natural gas  | 0.78%      |
| Electricity, gas, steam and air conditioning supply                                    | 0.77%      |
| Reinsurance  | 0.72%      |
| Passenger rail transport, interurban   | 0.68%      |
| Retail sale of hardware, paints and glass in specialised stores                        | 0.67%      |
| Activities of insurance agents and brokers   | 0.67%      |
| Construction of residential and non-residential buildings                              | 0.65%      |
| Manufacture of basic pharmaceutical products   | 0.61%      |

|   |       |
|---|-------|
| Manufacture of medical and dental instruments and supplies                        | 0.57% |
| Manufacture of beer   | 0.56% |
| Manufacture of other special-purpose machinery n.e.c.                             | 0.56% |
| Manufacture of chemicals and chemical products                                    | 0.55% |
| Production of electricity   | 0.55% |
| Advertising agencies  | 0.54% |
| Satellite telecommunications activities   | 0.53% |
| Accounting, bookkeeping and auditing activities, tax consultancy                  | 0.49% |
| Hotels and similar accommodation  | 0.48% |
| Packaging activities  | 0.48% |
| Other passenger land transport n.e.c.   | 0.48% |
| Freight rail transport  | 0.46% |
| Financial leasing   | 0.42% |
| Manufacture of light metal packaging  | 0.41% |
| Manufacture of motor vehicles   | 0.39% |
| Construction of utility projects for electricity and telecommunications           | 0.37% |
| Manufacture of food products  | 0.36% |
| Wired telecommunications activities   | 0.36% |
| Other retail sale in non-specialised stores                                       | 0.34% |
| Rental and leasing activities   | 0.34% |
| Manufacture of grain mill products  | 0.32% |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.31% |
| Retail trade, except of motor vehicles and motorcycles                            | 0.3%  |
| Support activities for petroleum and natural gas extraction                       | 0.29% |
| Other business support service activities n.e.c.                                  | 0.29% |
| Sea and coastal passenger water transport   | 0.29% |
| Extraction of crude petroleum   | 0.28% |
| Motion picture, video and television programme production activities              | 0.26% |
| Gambling and betting activities   | 0.25% |
| Production of meat and poultry meat products                                      | 0.22% |
| Manufacture of pulp   | 0.22% |

|  |       |
|--|-------|
| Retail sale via mail order houses or via Internet  | 0.21% |
| Accommodation  | 0.2%  |
| Manufacture of wood and of products of wood and cork, except furniture, manufacture of articles of s | 0.18% |
| Administration of financial markets  | 0.18% |
| Other manufacturing n.e.c.   | 0.18% |
| Manufacture of electrical equipment  | 0.18% |
| Activities of amusement parks and theme parks  | 0.18% |
| Manufacture of machinery and equipment n.e.c.  | 0.18% |
| Manufacture of other tanks, reservoirs and containers of metal                                       | 0.17% |
| Manufacture of plastic packing goods   | 0.17% |
| Service activities incidental to water transportation  | 0.17% |
| Combined facilities support activities   | 0.17% |
| Computer programming, consultancy and related activities   | 0.15% |
| Retail sale of medical and orthopaedic goods in specialised stores                                   | 0.13% |
| Book publishing  | 0.12% |
| Manufacture of other food products n.e.c.  | 0.12% |
| Manufacture of flat glass  | 0.12% |
| Renting and leasing of trucks  | 0.11% |
| Manufacture of perfumes and toilet preparations  | 0.09% |
| Collection of non-hazardous waste  | 0.09% |
| Processing and preserving of meat  | 0.09% |
| Raising of poultry   | 0.09% |
| Manufacture of communication equipment   | 0.08% |
| Manufacture of footwear  | 0.08% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics                      | 0.07% |
| Television programming and broadcasting activities   | 0.06% |
| Freight transport by road  | 0.06% |
| Hospital activities  | 0.05% |
| Manufacture of soap and detergents, cleaning and polishing preparations                              | 0.04% |
| Manufacture of pesticides and other agrochemical products  | 0.04% |

|   |       |
|---|-------|
| Distribution of gaseous fuels through mains | 0.04% |
| Other                                       | 0.02% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

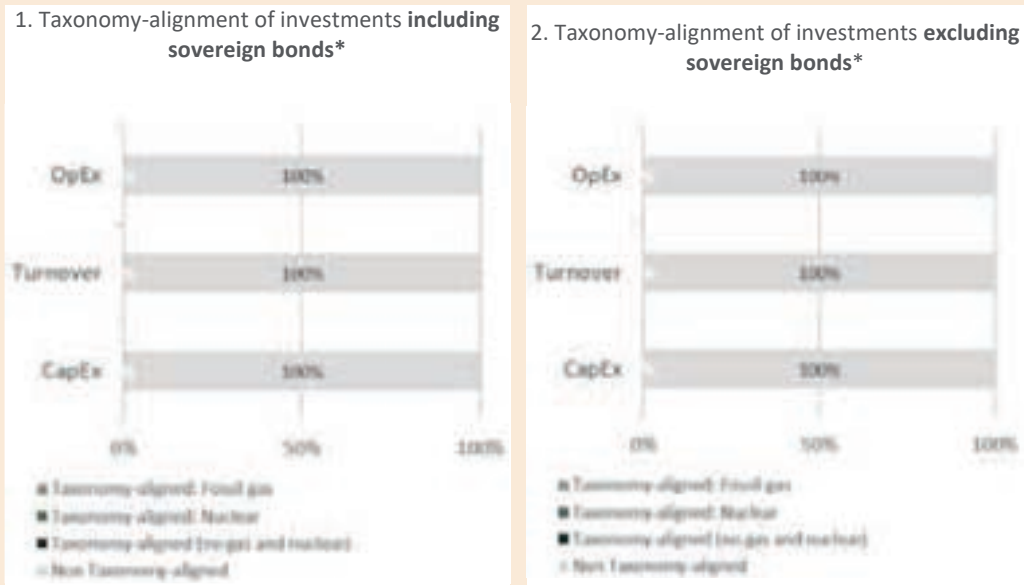

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 9.97% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 14.54% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 8.58% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social

characteristics  
that they  
promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 29.11% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Women on board
- Carbon Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Women on board and Carbon Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Women on board indicator and iii) 70% for the Carbon Intensity indicator.

| Sustainability KPI Name | Value  | Benchmark  | Coverage |
|-------------------------|--|--|----------|
| Women on board          | 34.15 % of women on board  | 33.64 % of women on board  | 94.1%    |
| Carbon Intensity        | 170.69CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 251.93CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 95.65%   |

### ... And compared to previous periods?

Not applicable.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

#### 3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under –5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high  |             |

|   |   |  |  |
|---|---|--|--|
|   |   | impact climate sector  |  |
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score         | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average |  |
| SDG no significantly negative score         | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                | Sector                                      | Proportion | Country |
|--------------------------------|---|------------|---------|
| FRTR 0.25% - 25/07/2024<br>CPI | General public<br>administration activities | 4.78%      | FR      |
| BTPS 0 - 15/12/2024            | General public<br>administration activities | 4.23%      | IT      |
| T 1.5% - 31/01/2027            | General public<br>administration activities | 3.97%      | US      |
| T 4.5% - 15/02/2036            | General public<br>administration activities | 3.69%      | US      |
| T 0.875% - 30/09/2026          | General public<br>administration activities | 2.93%      | US      |
| T 0.75% - 30/04/2026           | General public<br>administration activities | 2.34%      | US      |
| T 2.75% - 15/08/2032           | General public<br>administration activities | 2.24%      | US      |
| JGB 0.005% - 01/04/2023        | General public<br>administration activities | 2.15%      | JP      |

|                        |  |       |    |
|------------------------|--|-------|----|
| DBR 1.75% - 15/02/2024 | General public administration activities | 1.98% | DE |
| BKO 2.2% - 12/12/2024  | General public administration activities | 1.93% | DE |
| DBR 0 - 15/02/2031     | General public administration activities | 1.83% | DE |
| T 1.25% - 31/03/2028   | General public administration activities | 1.79% | US |
| JGB 2.3% - 20/12/2035  | General public administration activities | 1.76% | JP |
| T 3.375% - 15/11/2048  | General public administration activities | 1.71% | US |
| T 1.875% - 15/02/2032  | General public administration activities | 1.6%  | US |

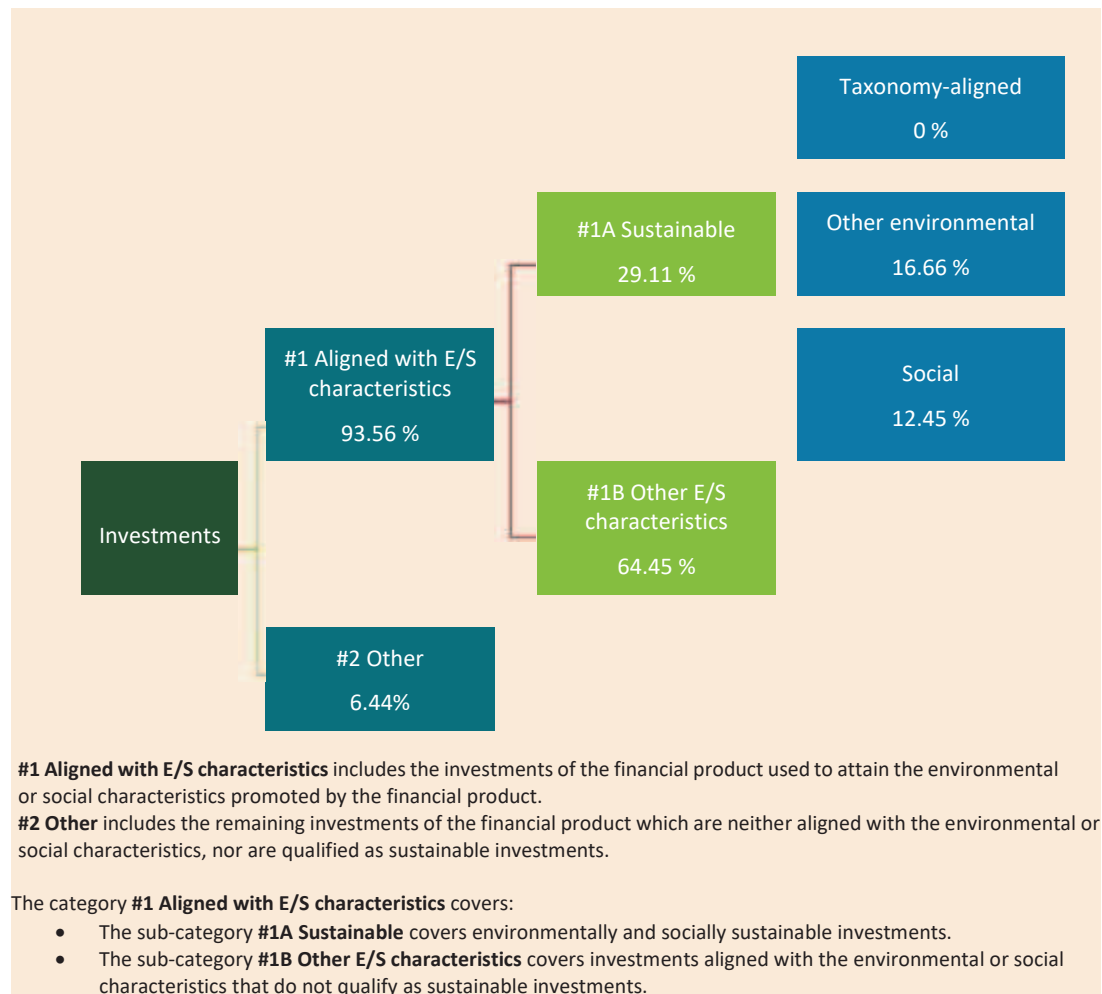

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| General public administration activities   | 59.56%     |
| Other monetary intermediation  | 12.36%     |
| Activities of extraterritorial organisations and bodies                                | 2.93%      |
| Trusts, funds and similar financial entities   | 2.65%      |
| Renting and operating of own or leased real estate                                     | 2.01%      |
| Life insurance   | 1.32%      |
| Other  | 1.13%      |
| Electricity, gas, steam and air conditioning supply                                    | 1.13%      |
| Distribution of gaseous fuels through mains  | 0.98%      |
| Land transport and transport via pipelines   | 0.95%      |
| Wireless telecommunications activities   | 0.94%      |
| Manufacture of basic pharmaceutical products   | 0.82%      |
| Manufacture of motor vehicles  | 0.77%      |
| Non-life insurance   | 0.64%      |
| Security and commodity contracts brokerage   | 0.61%      |
| Transport via pipeline   | 0.61%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 0.59%      |
| Distribution of electricity  | 0.53%      |
| Retail sale of hardware, paints and glass in specialised stores                        | 0.52%      |
| Freight rail transport   | 0.48%      |
| Production of electricity  | 0.47%      |
| Financial leasing  | 0.45%      |
| Manufacture of refined petroleum products  | 0.44%      |
| Extraction of crude petroleum and natural gas  | 0.43%      |
| Other  | 0.4%       |
| Wholesale of pharmaceutical goods  | 0.36%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 0.35%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters      | 0.34%      |
| Manufacture of agricultural and forestry machinery                                     | 0.31%      |
| Motion picture, video and television programme production activities                   | 0.3%       |

|  |       |
|--|-------|
| Manufacture of communication equipment   | 0.27% |
| Research and experimental development on biotechnology                           | 0.24% |
| Service activities incidental to land transportation                             | 0.24% |
| Manufacture of chemicals and chemical products                                   | 0.24% |
| Renting and leasing of trucks  | 0.23% |
| Retail trade, except of motor vehicles and motorcycles                           | 0.21% |
| Manufacture of games and toys  | 0.2%  |
| Hospital activities  | 0.17% |
| Manufacture of medical and dental instruments and supplies                       | 0.17% |
| Wired telecommunications activities  | 0.16% |
| Manufacture of other parts and accessories for motor vehicles                    | 0.16% |
| Manufacture of food products   | 0.15% |
| Other information service activities n.e.c.                                      | 0.14% |
| Reinsurance  | 0.13% |
| Treatment and disposal of non-hazardous waste                                    | 0.13% |
| Manufacture of plastic packing goods   | 0.12% |
| Wholesale trade, except of motor vehicles and motorcycles                        | 0.12% |
| Manufacture of electronic components   | 0.12% |
| Production of meat and poultry meat products                                     | 0.1%  |
| Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres | 0.09% |
| Advertising agencies   | 0.09% |
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel      | 0.08% |
| Other transportation support activities  | 0.08% |
| Transmission of electricity  | 0.06% |
| Manufacture of machinery for mining, quarrying and construction                  | 0.06% |
| Manufacture of other organic basic chemicals                                     | 0.05% |
| Manufacture of other chemical products n.e.c.                                    | 0.05% |
| Business and other management consultancy activities                             | 0.05% |
| Manufacture of computers and peripheral equipment                                | 0.05% |
| Manufacture of railway locomotives and rolling stock                             | 0.05% |

|   |       |
|---|-------|
| Service activities incidental to air transportation                     | 0.05% |
| Other credit granting   | 0.05% |
| Satellite telecommunications activities                                 | 0.04% |
| Retail sale of medical and orthopaedic goods in specialised stores      | 0.04% |
| Civil engineering   | 0.04% |
| Other food service activities   | 0.04% |
| Agents involved in the sale of food, beverages and tobacco              | 0.04% |
| Web portals   | 0.04% |
| Retail sale of clothing in specialised stores                           | 0.03% |
| Manufacture of machinery and equipment n.e.c.                           | 0.03% |
| Manufacture of other non-metallic mineral products                      | 0.03% |
| Manufacture of electrical equipment                                     | 0.03% |
| Construction of residential and non-residential buildings               | 0.02% |
| Manufacture of industrial gases   | 0.02% |
| Service activities incidental to water transportation                   | 0.02% |
| Manufacture of cement   | 0.02% |
| Manufacture of soap and detergents, cleaning and polishing preparations | 0.02% |
| Hotels and similar accommodation  | 0.01% |
| Collection of non-hazardous waste                                       | 0.01% |
| Manufacture of other articles of paper and paperboard                   | 0.01% |
| Other software publishing   | 0.01% |
| Manufacture of electric motors, generators and transformers             | 0.01% |
| Water collection, treatment and supply                                  | 0.01% |
| Restaurants and mobile food service activities                          | 0.01% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

In fossil gas  In nuclear energy

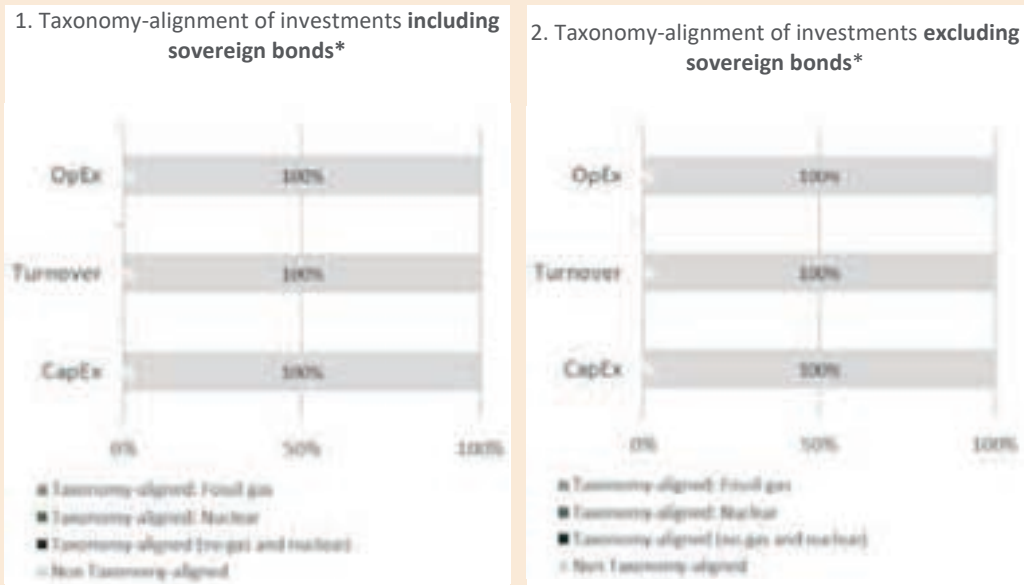

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 16.66% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 12.45% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 6.44% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.86% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Women on board
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Women on board and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Women on board indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Women on board          | 35.74 % of women on board                         | 34.15 % of women on board                         | 97.37%   |
| Water intensity         | 13410.32 Thousands of cubic meters for corporates | 21828.76 Thousands of cubic meters for corporates | 97.87%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 8: Emissions to water                          | Tonnes per million EUR invested, expressed as a weighted average |  |
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                    | Sector   | Proportion | Country |
|------------------------------------|--|------------|---------|
| JPM 3.509% Var - 23/01/2029 Call   | Other monetary intermediation  | 2.25%      | US      |
| UCGIM 1.625% Var - 03/07/2025 Call | Other monetary intermediation  | 1.78%      | IT      |
| BAC 2.456% Var - 22/10/2025 Call   | Other monetary intermediation  | 1.72%      | US      |
| ABIBB 5.55% - 23/01/2049 Call      | Manufacture of beer  | 1.2%       | US      |
| CRBG 3.65% - 05/04/2027 Call       | Life insurance   | 1.18%      | US      |
| BMO 2.65% - 08/03/2027             | Other monetary intermediation  | 1.18%      | CA      |
| NXPI 2.7% - 01/05/2025 Call        | Manufacture of electronic components   | 1.15%      | NL      |
| DTRGR 3.65% - 07/04/2027           | Manufacture of motor vehicles  | 1.13%      | US      |
| WM 4.15% - 15/04/2032 Call         | Treatment and disposal of non-hazardous waste  | 1.11%      | US      |
| GS 1.948% Var - 21/10/2027 Call    | Security and commodity contracts brokerage   | 1.1%       | US      |
| BMV 4.25% - 26/10/2049 Call        | Manufacture of basic pharmaceutical products   | 1.07%      | US      |
| TIAAGL 4.9% - 15/09/2044           | Life insurance   | 1.06%      | US      |
| SCHW 2.9% - 03/03/2032 Call        | Other activities auxiliary to financial services, except insurance and pension funding | 1.05%      | US      |
| BFCM 4.524% - 13/07/2025           | Other monetary intermediation  | 1.03%      | FR      |
| DB 1.875% Var - 23/02/2028 Call    | Other monetary intermediation  | 0.99%      | DE      |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 30.09%     |
| Renting and operating of own or leased real estate                                     | 6.29%      |
| Life insurance   | 5.4%       |
| Electricity, gas, steam and air conditioning supply                                    | 4.32%      |
| Security and commodity contracts brokerage   | 3.09%      |
| Distribution of gaseous fuels through mains  | 3.08%      |
| Transport via pipeline   | 2.98%      |
| Manufacture of motor vehicles  | 2.53%      |
| Distribution of electricity  | 2.44%      |
| Wireless telecommunications activities   | 2.41%      |
| Non-life insurance   | 2.2%       |
| Other activities auxiliary to financial services, except insurance and pension funding | 2.13%      |
| Extraction of crude petroleum and natural gas  | 1.74%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 1.73%      |
| Service activities incidental to land transportation                                   | 1.72%      |
| Manufacture of basic pharmaceutical products   | 1.66%      |
| Production of electricity  | 1.57%      |
| Trusts, funds and similar financial entities   | 1.53%      |
| Manufacture of beer  | 1.2%       |
| Manufacture of chemicals and chemical products   | 1.16%      |
| Retail sale of hardware, paints and glass in specialised stores                        | 1.15%      |
| Manufacture of electronic components   | 1.15%      |
| Treatment and disposal of non-hazardous waste  | 1.11%      |
| Wired telecommunications activities  | 1.1%       |
| Retail sale of clothing in specialised stores  | 1.08%      |
| Manufacture of games and toys  | 1.06%      |
| Manufacture of agricultural and forestry machinery                                     | 0.95%      |
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel            | 0.95%      |
| Manufacture of refined petroleum products  | 0.93%      |
| Wholesale of pharmaceutical goods  | 0.86%      |
| Financial leasing  | 0.86%      |

|   |       |
|---|-------|
| Research and experimental development on biotechnology                            | 0.81% |
| Motion picture, video and television programme production activities              | 0.73% |
| Manufacture of medical and dental instruments and supplies                        | 0.71% |
| Manufacture of communication equipment  | 0.7%  |
| Freight rail transport  | 0.67% |
| Manufacture of food products  | 0.57% |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.54% |
| Manufacture of cement   | 0.53% |
| Other information service activities n.e.c.                                       | 0.49% |
| Rental and leasing activities   | 0.43% |
| Web portals   | 0.42% |
| Hotels and similar accommodation  | 0.36% |
| Manufacture of instruments and appliances for measuring, testing and navigation   | 0.36% |
| Manufacture of machinery and equipment n.e.c.                                     | 0.34% |
| Manufacture of other chemical products n.e.c.                                     | 0.34% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics   | 0.34% |
| Satellite telecommunications activities   | 0.33% |
| Hospital activities   | 0.33% |
| Transmission of electricity   | 0.3%  |
| Retail sale of medical and orthopaedic goods in specialised stores                | 0.25% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not**

**What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 26.1% for this Financial Product during the reference period.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 28.76% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 5.55% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 70.88% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 226.13 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 267.01 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 92.12%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG

(on a scale from + 10 corresponding to 'significant contributing impact' to - 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units            | Measurement |
|--|---|------------------|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|                                     |   |   |  |
|-------------------------------------|---|---|--|
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap         | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members          |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments          | Sector  | Proportion | Country |
|--------------------------|---|------------|---------|
| INTESA SANPAOLO MTAA EUR | Other monetary intermediation                       | 9.44%      | IT      |
| ENEL SPA MTAA EUR        | Electricity, gas, steam and air conditioning supply | 9.34%      | IT      |
| FINECOBANK SPA MTAA EUR  | Other monetary intermediation                       | 8.89%      | IT      |
| PRYSMIAN SPA MTAA EUR    | Manufacture of electrical equipment                 | 6.03%      | IT      |

|  |   |       |    |
|--|---|-------|----|
| CNH INDUSTRIAL NV<br>MTAA EUR              | Manufacture of<br>agricultural and forestry<br>machinery  | 5.01% | GB |
| TERNA-RETE ELETTRICA<br>NAZIONALE MTAA EUR | Transmission of electricity   | 4.5%  | IT |
| STELLANTIS NV MTAA EUR                     | Manufacture of motor<br>vehicles  | 4.35% | NL |
| ERG SPA MTAA EUR                           | Production of electricity   | 4.12% | IT |
| STMICROELECTRONICS NV<br>MTAA EUR          | Manufacture of electronic<br>components   | 4.04% | CH |
| MEDIOBANCA SPA MTAA<br>EUR                 | Other monetary<br>intermediation  | 3.9%  | IT |
| NEXI SPA MTAA EUR                          | Other activities auxiliary to<br>financial services, except<br>insurance and pension<br>funding | 3.9%  | IT |
| SSGA-CSH EUR-EUR D                         | Trusts, funds and similar<br>financial entities   | 3.28% | IE |
| INTERPUMP GROUP SPA<br>MTAA EUR            | Manufacture of fluid<br>power equipment   | 2.67% | IT |
| TECHNOPROBE SPA MTAA<br>EUR                | Manufacture of other<br>special-purpose machinery<br>n.e.c.                                     | 2.51% | IT |
| DIASORIN SPA MTAA EUR                      | Manufacture of<br>pharmaceutical<br>preparations  | 2.47% | IT |

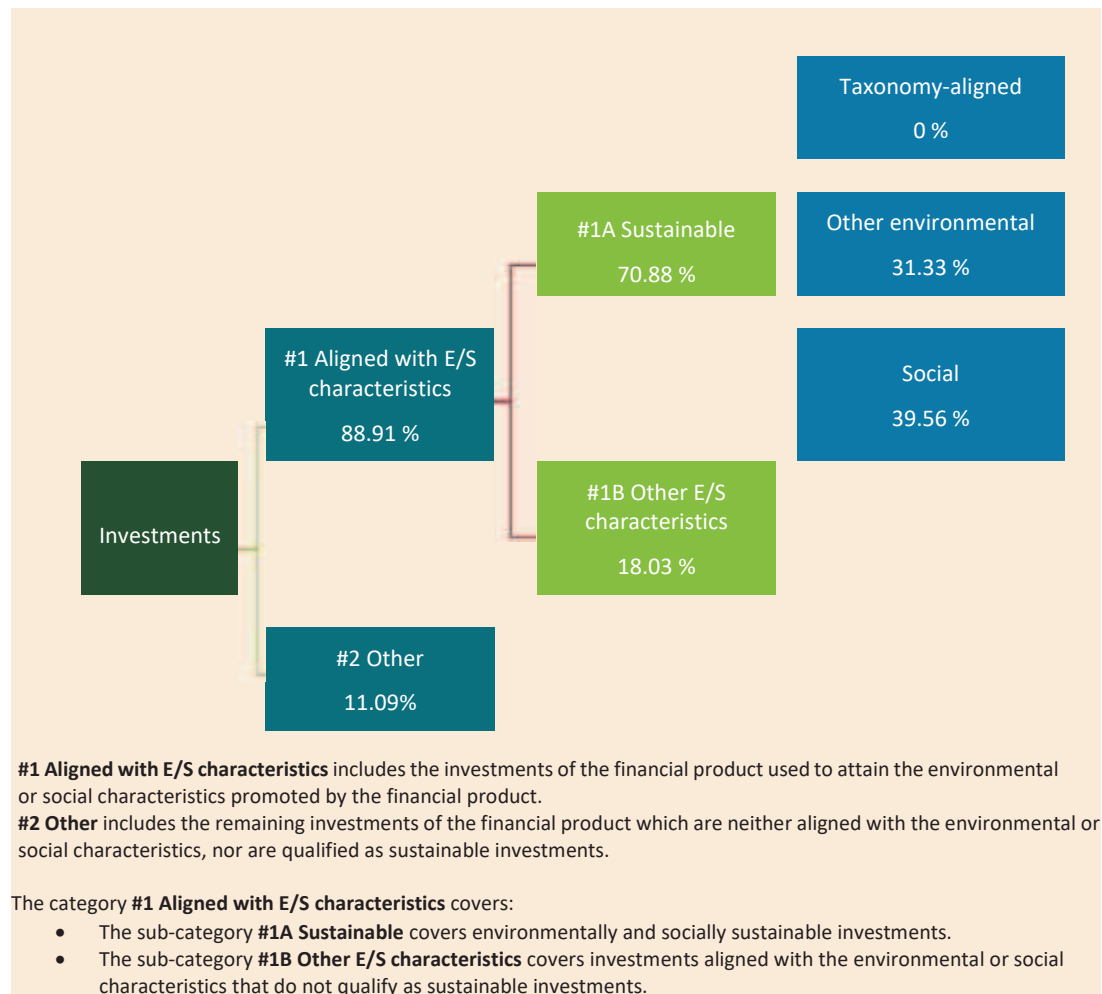

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 26.6%      |
| Electricity, gas, steam and air conditioning supply                                    | 9.34%      |
| Manufacture of electrical equipment  | 6.03%      |
| Manufacture of agricultural and forestry machinery                                     | 5.01%      |
| Transmission of electricity  | 4.5%       |
| Manufacture of motor vehicles  | 4.35%      |
| Production of electricity  | 4.12%      |
| Manufacture of electronic components   | 4.04%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 3.9%       |
| Manufacture of other special-purpose machinery n.e.c.                                  | 3.63%      |
| Trusts, funds and similar financial entities   | 3.28%      |
| Manufacture of fluid power equipment   | 2.67%      |
| Manufacture of pharmaceutical preparations   | 2.47%      |
| Other software publishing  | 2.31%      |
| Wholesale of pharmaceutical goods  | 1.65%      |
| Motion picture, video and television programme production activities                   | 1.65%      |
| Manufacture of perfumes and toilet preparations  | 1.56%      |
| Manufacture of wearing apparel   | 1.5%       |
| Manufacture of electric domestic appliances  | 1.49%      |
| Other postal and courier activities  | 1.26%      |
| Manufacture of sports goods  | 1.13%      |
| Non-specialised wholesale of food, beverages and tobacco                               | 0.9%       |
| Manufacture of basic pharmaceutical products   | 0.79%      |
| Manufacture of food products   | 0.72%      |
| Distribution of electricity  | 0.7%       |
| Computer programming activities  | 0.63%      |
| Web portals  | 0.62%      |
| Real estate activities   | 0.6%       |
| Computer programming, consultancy and related activities                               | 0.55%      |
| Manufacture of medical and dental instruments and supplies                             | 0.55%      |

|   |       |
|---|-------|
| Manufacture of other parts and accessories for motor vehicles | 0.51% |
| Manufacture of batteries and accumulators                     | 0.5%  |
| Manufacture of air and spacecraft and related machinery       | 0.45% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 31.33% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 39.56% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 11.09% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains

Not applicable.

the  
environmental or  
social  
characteristics  
that they  
promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 75.23% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-Class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 75.9 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 238.18 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 100%     |
| Water intensity         | 897.18 Thousands of cubic meters for corporates   | 11618.89 Thousands of cubic meters for corporates   | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been

- qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                       | Sector   | Proportion | Country |
|---------------------------------------|--|------------|---------|
| UNITEDHEALTH GROUP INC XNYS USD       | Non-life insurance   | 3.6%       | US      |
| ASTRAZENECA PLC XLON GBP              | Manufacture of basic pharmaceutical products   | 3.45%      | GB      |
| MERCK & CO. INC. XNYS USD             | Manufacture of basic pharmaceutical products   | 3.17%      | US      |
| THERMO FISHER SCIENTIFIC INC XNYS USD | Manufacture of instruments and appliances for measuring, testing and navigation        | 3.01%      | US      |
| SERVICE CORP INTERNATIONAL XNYS USD   | Funeral and related activities   | 2.89%      | US      |
| AMERICAN EXPRESS CO XNYS USD          | Other credit granting  | 2.84%      | US      |
| JULIUS BAER GROUP LTD XSWX CHF        | Other activities auxiliary to financial services, except insurance and pension funding | 2.83%      | CH      |
| PLANET FITNESS INC - CL A XNYS USD    | Fitness facilities   | 2.76%      | US      |
| ELEVANCE HEALTH INC XNYS USD          | Non-life insurance   | 2.74%      | US      |
| BOOKING HOLDINGS INC XNGS USD         | Web portals  | 2.69%      | US      |
| FIRST REPUBLIC BANK/CA XNYS USD       | Other monetary intermediation  | 2.59%      | US      |
| HUMANA INC XNYS USD                   | Non-life insurance   | 2.58%      | US      |
| UNICHARM CORP XTKS JPY                | Manufacture of household and sanitary goods and of toilet requisites                   | 2.53%      | JP      |
| LVMH MOET HENNESSY LOUIS VUI XPAR EUR | Manufacture of luggage, handbags and the like, saddlery and harness                    | 2.52%      | FR      |
| PRUDENTIAL PLC XLON GBP               | Life insurance   | 2.41%      | GB      |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

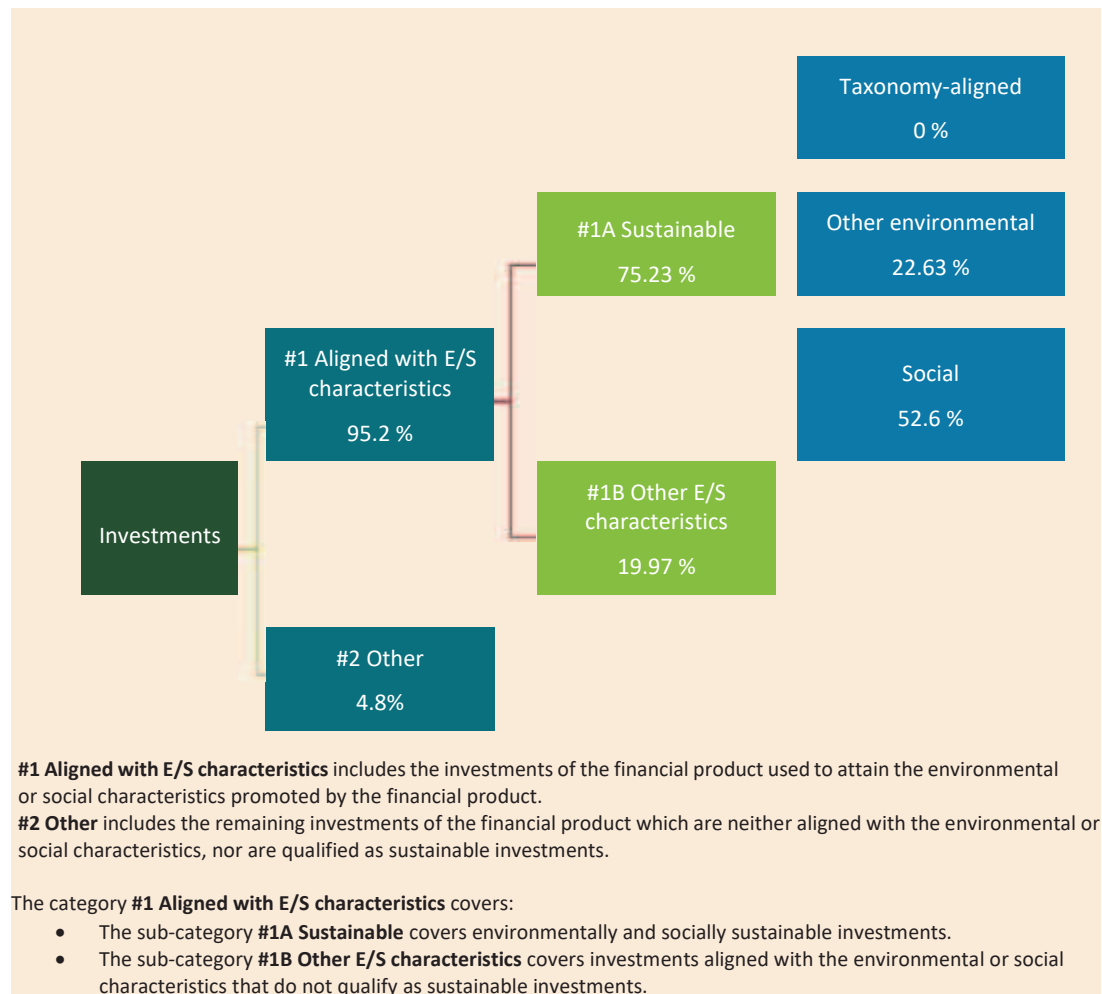

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of basic pharmaceutical products   | 12.92%     |
| Non-life insurance   | 8.91%      |
| Manufacture of medical and dental instruments and supplies                             | 8.78%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 7.02%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 6.55%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 4.87%      |
| Fitness facilities   | 4.16%      |
| Research and experimental development on biotechnology                                 | 3.51%      |
| Manufacture of pharmaceutical preparations   | 3.03%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 3.01%      |
| Funeral and related activities   | 2.89%      |
| Other credit granting  | 2.84%      |
| Web portals  | 2.69%      |
| Other monetary intermediation  | 2.59%      |
| Manufacture of luggage, handbags and the like, saddlery and harness                    | 2.52%      |
| Life insurance   | 2.41%      |
| Other human health activities  | 2.33%      |
| Hospital activities  | 2.11%      |
| Fund management activities   | 2.1%       |
| Gambling and betting activities  | 2.02%      |
| Other software publishing  | 2.01%      |
| Manufacture of wearing apparel   | 1.98%      |
| Manufacture of perfumes and toilet preparations  | 1.73%      |
| Other retail sale of new goods in specialised stores                                   | 1.48%      |
| Retail sale of clothing in specialised stores  | 1.27%      |
| Sea and coastal passenger water transport  | 1.25%      |
| Tertiary education   | 1.13%      |
| Wholesale of pharmaceutical goods  | 0.99%      |
| Manufacture of other wearing apparel and accessories                                   | 0.88%      |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

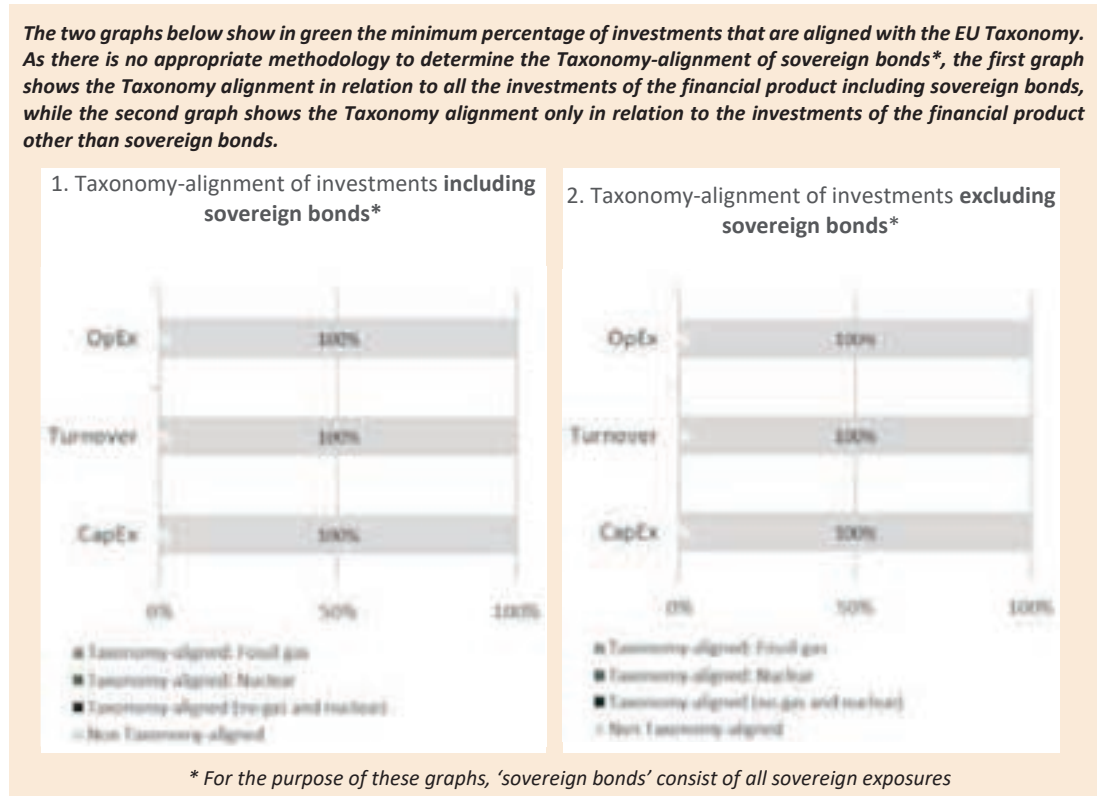

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas  In nuclear energy
- No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 22.63% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 52.6% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 4.8% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.49% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value  | Benchmark   | Coverage |
|-------------------------|--|---|----------|
| Carbon intensity        | 43.54 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 238.18 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 98.99%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the

Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments       | Sector  | Proportion | Country |
|-----------------------|---|------------|---------|
| PENUMBRA INC XNYS USD | Manufacture of irradiation, electromedical and electrotherapeutic equipment | 3.95%      | US      |
| NVIDIA CORP XNGS USD  | Manufacture of electronic components  | 3.69%      | US      |

|                                     |   |       |    |
|-------------------------------------|---|-------|----|
| QUALCOMM INC XNGS USD               | Manufacture of electronic components                  | 3.52% | US |
| AUTODESK INC XNGS USD               | Other software publishing                             | 3.37% | US |
| META PLATFORMS INC-CLASS A XNGS USD | Web portals   | 3.22% | US |
| SIEMENS AG-REG XETR EUR             | Manufacture of electrical equipment                   | 3.21% | DE |
| TENCENT HOLDINGS LTD XHKG HKD       | Web portals   | 3.13% | CN |
| ELECTRONIC ARTS INC XNGS USD        | Publishing of computer games                          | 3.03% | US |
| MICROSOFT CORP XNGS USD             | Other software publishing                             | 2.94% | US |
| UNITY SOFTWARE INC XNYS USD         | Other software publishing                             | 2.91% | US |
| CADENCE DESIGN SYS INC XNGS USD     | Other software publishing                             | 2.79% | US |
| SONY GROUP CORP XTKS JPY            | Manufacture of consumer electronics                   | 2.78% | JP |
| ROBLOX CORP -CLASS A XNYS USD       | Publishing of computer games                          | 2.69% | US |
| ASML HOLDING NV XAMS EUR            | Manufacture of other special-purpose machinery n.e.c. | 2.66% | NL |
| ADVANCED MICRO DEVICES XNGS USD     | Manufacture of electronic components                  | 2.61% | US |

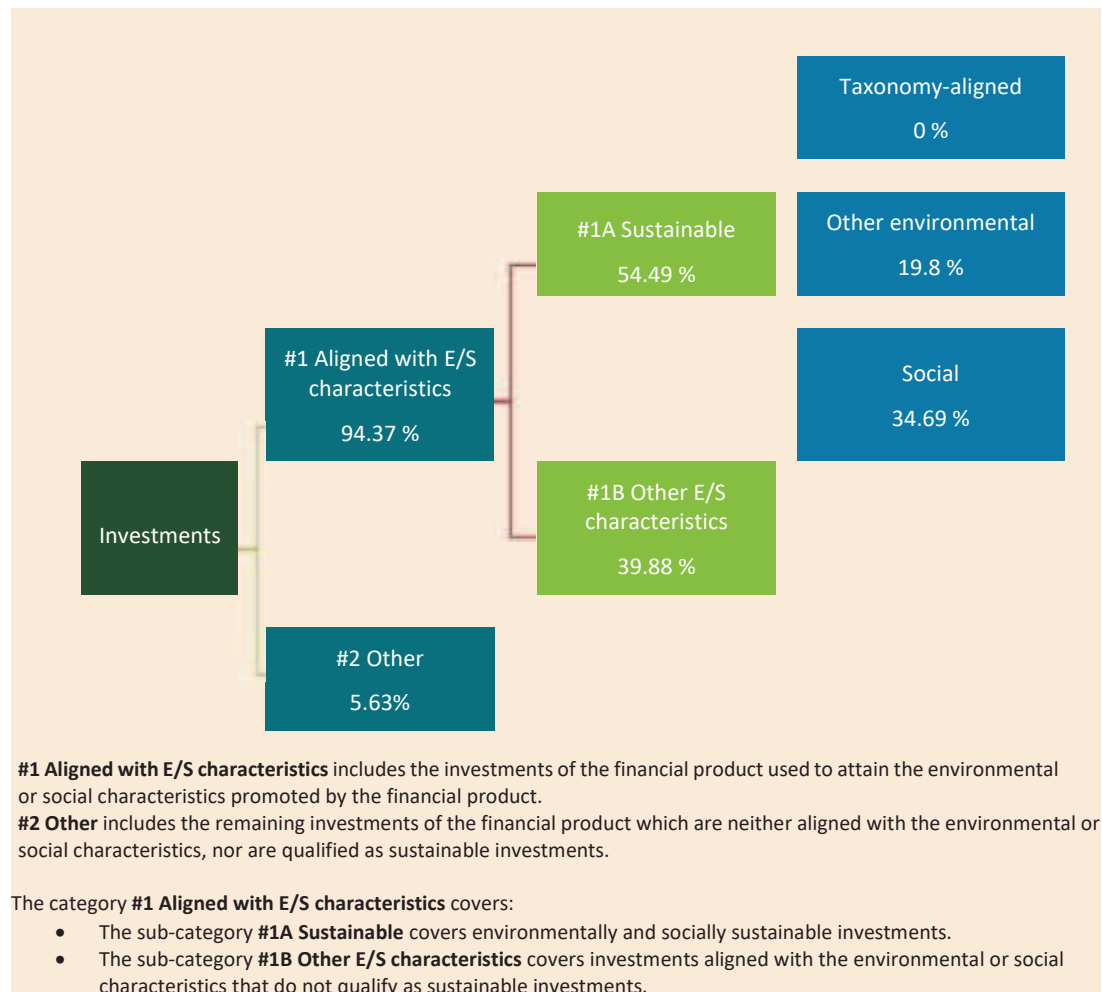

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 26.38%     |
| Publishing of computer games   | 14.82%     |
| Manufacture of electronic components   | 13.61%     |
| Web portals  | 12.82%     |
| Manufacture of other special-purpose machinery n.e.c.                                  | 9.43%      |
| Manufacture of consumer electronics  | 4.43%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 3.95%      |
| Manufacture of electrical equipment  | 3.21%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 2.38%      |
| Renting and operating of own or leased real estate                                     | 2.35%      |
| Manufacture of luggage, handbags and the like, saddlery and harness                    | 1.64%      |
| Manufacture of footwear  | 1.52%      |
| Sound recording and music publishing activities  | 1.3%       |
| Motion picture, video and television programme production activities                   | 1.02%      |
| Retail sale via mail order houses or via Internet                                      | 0.66%      |
| Administration of financial markets  | 0.47%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy  
 No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not**

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 19.8% for this Financial Product during the reference period.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 34.69% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 5.63% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective: \_\_\_%**

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.2% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-universe on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their G score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 225.53 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 283.26 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 98.39%   |
| Water intensity         | 605.69 Thousands of cubic meters for corporates   | 15009.05 Thousands of cubic meters for corporates   | 98.39%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been

- qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2022-12-30

| Top investments                       | Sector  | Proportion | Country |
|---------------------------------------|---|------------|---------|
| B O - 05/10/2023                      | General public administration activities  | 4.26%      | US      |
| EDENRED XPAR EUR                      | Other business support service activities n.e.c.                                | 3.09%      | FR      |
| NOVANTA INC XNGS USD                  | Manufacture of electrical equipment   | 3.06%      | US      |
| TETRA TECH INC XNGS USD               | Other professional, scientific and technical activities n.e.c.                  | 2.89%      | US      |
| ICON PLC XNGS USD                     | Other human health activities   | 2.73%      | IE      |
| MGP INGREDIENTS INC XNGS USD          | Distilling, rectifying and blending of spirits                                  | 2.72%      | US      |
| BADGER METER INC XNYS USD             | Manufacture of instruments and appliances for measuring, testing and navigation | 2.72%      | US      |
| FINECOBANK SPA MTAA EUR               | Other monetary intermediation   | 2.35%      | IT      |
| WORKIVA INC XNYS USD                  | Other software publishing   | 2.34%      | US      |
| HISCOX LTD XLON GBP                   | Non-life insurance  | 2.33%      | BM      |
| CYBERARK SOFTWARE LTD/ISRAEL XNGS USD | Other software publishing   | 2.31%      | IL      |
| NIHON M&A CENTER HOLDINGS IN XTKS JPY | Other monetary intermediation   | 2.29%      | JP      |
| WATTS WATER TECHNOLOGIES-A XNYS USD   | Manufacture of fluid power equipment  | 2.05%      | US      |
| IDP EDUCATION LTD XASX AUD            | Education   | 2.05%      | AU      |
| SAMSONITE INTERNATIONAL SA XHKG HKD   | Manufacture of luggage, handbags and the like, saddlery and harness             | 1.97%      | US      |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 14.92%     |
| Other monetary intermediation  | 8.26%      |
| Manufacture of other special-purpose machinery n.e.c.                                  | 4.76%      |
| General public administration activities   | 4.26%      |
| Education  | 4.01%      |
| Renting and operating of own or leased real estate                                     | 3.57%      |
| Manufacture of other parts and accessories for motor vehicles                          | 3.52%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 3.13%      |
| Other business support service activities n.e.c.                                       | 3.09%      |
| Manufacture of electrical equipment  | 3.06%      |
| Other professional, scientific and technical activities n.e.c.                         | 2.89%      |
| Other human health activities  | 2.73%      |
| Distilling, rectifying and blending of spirits   | 2.72%      |
| Manufacture of medical and dental instruments and supplies                             | 2.34%      |
| Non-life insurance   | 2.33%      |
| Manufacture of fluid power equipment   | 2.05%      |
| Manufacture of luggage, handbags and the like, saddlery and harness                    | 1.97%      |
| Web portals  | 1.9%       |
| Manufacture of household and sanitary goods and of toilet requisites                   | 1.78%      |
| Wired telecommunications activities  | 1.65%      |
| Research and experimental development on biotechnology                                 | 1.6%       |
| Other retail sale of new goods in specialised stores                                   | 1.58%      |
| Manufacture of agricultural and forestry machinery                                     | 1.53%      |
| Other credit granting  | 1.48%      |
| Wholesale trade, except of motor vehicles and motorcycles                              | 1.44%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 1.39%      |
| Construction of utility projects for electricity and telecommunications                | 1.33%      |
| Market research and public opinion polling   | 1.31%      |

|   |       |
|---|-------|
| Manufacture of pharmaceutical preparations                                  | 1.29% |
| Manufacture of batteries and accumulators                                   | 1.25% |
| Manufacture of other food products n.e.c.                                   | 1.23% |
| Manufacture of other electrical equipment                                   | 1.14% |
| Other transportation support activities                                     | 1.12% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment | 1.09% |
| Other postal and courier activities   | 1.08% |
| Private security activities   | 0.97% |
| Other information service activities n.e.c.                                 | 0.97% |
| Manufacture of veneer sheets and wood-based panels                          | 0.94% |
| Agents involved in the sale of a variety of goods                           | 0.86% |
| Manufacture of electronic components  | 0.79% |
| Architectural and engineering activities, technical testing and analysis    | 0.71% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 11.31% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 39.89% of sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.75% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 59.81% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Women on Board

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Women on Board during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Women on Board indicator.

| Sustainability KPI Name | Value  | Benchmark   | Coverage |
|-------------------------|--|---|----------|
| Carbon intensity        | 186.5 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 265.32 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 95.82%   |
| Women on Board          | 40.34% of women on board   | 34.65% of women on board  | 95.44%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under –5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high  |             |

|   |   |  |  |
|---|---|--|--|
|   |   | impact climate sector  |  |
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity sensitive areas | % of investments   |  |
| SDG no significantly negative score         | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average |  |
| SDG no significantly negative score         | PAI 9: Hazardous waste and radioactive waste ratio                  | Tonnes per million EUR invested, expressed as a weighted average |  |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                                    | Sector  | Proportion | Country |
|--|---|------------|---------|
| ASML HOLDING NV XAMS EUR                           | Manufacture of other special-purpose machinery n.e.c. | 4.27%      | NL      |
| AIR LIQUIDE PRIME FIDELITÄ© XPAR EUR               | Manufacture of industrial gases                       | 3.69%      | FR      |
| FINECOBANK SPA MTAA EUR                            | Other monetary intermediation                         | 3.04%      | IT      |
| REMY COINTREAU XPAR EUR                            | Distilling, rectifying and blending of spirits        | 2.94%      | FR      |
| AWF Eur Inf P MC                                   | Trusts, funds and similar financial entities          | 2.18%      | LU      |
| AXA IM FIIS Europe Short Duration High Yield A Cap | Trusts, funds and similar financial entities          | 2.18%      | LU      |
| AXA WF Next Generation M Capitalisation USD        | Trusts, funds and similar financial entities          | 1.94%      | LU      |
| ROCHE HOLDING AG-GENUSSCHEIN XSWX CHF              | Manufacture of basic pharmaceutical products          | 1.86%      | CH      |

|  |  |       |    |
|--|--|-------|----|
| KABEL DEUTSCHLAND HOLDING AG XHAM EUR              | Satellite telecommunications activities          | 1.86% | DE |
| BANCO BILBAO VIZCAYA ARGENTA XMAD EUR              | Other monetary intermediation                    | 1.73% | ES |
| AXA WF Dynamic Optimal Income M Capitalisation USD |  | 1.7%  | LU |
| EDENRED XPAR EUR                                   | Other business support service activities n.e.c. | 1.65% | FR |
| ASTRAZENECA PLC XLON GBP                           | Manufacture of basic pharmaceutical products     | 1.5%  | GB |
| VOLVO AB-B SHS XSTO SEK                            | Manufacture of motor vehicles                    | 1.43% | SE |
| AIR LIQUIDE SA-PF-2024 EUR                         | Manufacture of industrial gases                  | 1.41% | FR |

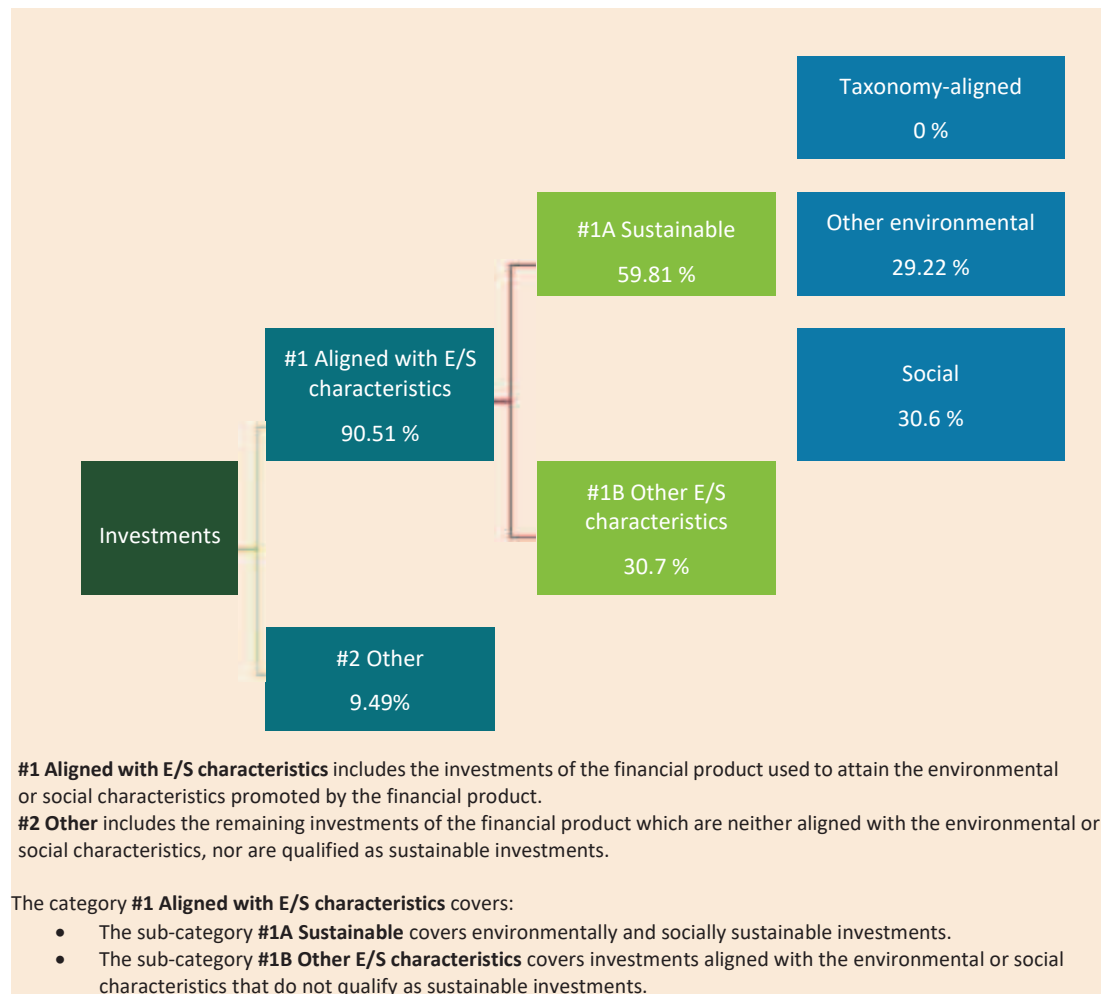

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 16.24%     |
| Trusts, funds and similar financial entities                                     | 9.55%      |
| Manufacture of basic pharmaceutical products                                     | 5.48%      |
| Manufacture of other special-purpose machinery n.e.c.                            | 5.48%      |
| Manufacture of industrial gases  | 5.23%      |
| Manufacture of motor vehicles  | 4.29%      |
| Distilling, rectifying and blending of spirits                                   | 4.15%      |
| Other  | 3.91%      |
| Manufacture of refined petroleum products  | 3.2%       |
| Renting and operating of own or leased real estate                               | 2.86%      |
| General public administration activities   | 2.81%      |
| Other business support service activities n.e.c.                                 | 2.13%      |
| Satellite telecommunications activities  | 1.97%      |
| Other software publishing  | 1.97%      |
| Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres | 1.35%      |
| Manufacture of food products   | 1.31%      |
| Manufacture of electrical equipment  | 1.27%      |
| Wireless telecommunications activities   | 1.23%      |
| Manufacture of agricultural and forestry machinery                               | 1.22%      |
| Manufacture of electric motors, generators and transformers                      | 1.17%      |
| Manufacture of ceramic sanitary fixtures   | 1.12%      |
| Manufacture of air and spacecraft and related machinery                          | 1.05%      |
| Computer programming activities  | 1.02%      |
| Manufacture of luggage, handbags and the like, saddlery and harness              | 0.97%      |
| Life insurance   | 0.95%      |
| Production of electricity  | 0.95%      |
| Mining of other non-ferrous metal ores   | 0.92%      |
| Data processing, hosting and related activities                                  | 0.87%      |
| Manufacture of jewellery and related articles                                    | 0.85%      |
| Other postal and courier activities  | 0.84%      |
| Civil engineering  | 0.82%      |

|   |       |
|---|-------|
| Electricity, gas, steam and air conditioning supply   | 0.78% |
| Non-life insurance  | 0.77% |
| Transmission of electricity   | 0.67% |
| Manufacture of beer   | 0.58% |
| Retail trade, except of motor vehicles and motorcycles  | 0.53% |
| Manufacture of musical instruments  | 0.47% |
| Manufacture of machinery for mining, quarrying and construction                                 | 0.44% |
| Other information service activities n.e.c.   | 0.42% |
| Sound recording and music publishing activities   | 0.41% |
| Support activities for petroleum and natural gas extraction                                     | 0.38% |
| Distribution of gaseous fuels through mains   | 0.34% |
| Manufacture of bodies (coachwork) for motor vehicles, manufacture of trailers and semi-trailers | 0.33% |
| Manufacture of electrical and electronic equipment for motor vehicles                           | 0.32% |
| Motion picture, video and television programme production activities                            | 0.31% |
| Administration of financial markets   | 0.29% |
| Service activities incidental to land transportation  | 0.29% |
| Manufacture of medical and dental instruments and supplies                                      | 0.29% |
| Advertising agencies  | 0.28% |
| Security and commodity contracts brokerage  | 0.28% |
| Passenger air transport   | 0.28% |
| Retail sale of clothing in specialised stores   | 0.27% |
| Wired telecommunications activities   | 0.25% |
| Manufacture of instruments and appliances for measuring, testing and navigation                 | 0.25% |
| Service activities incidental to air transportation   | 0.23% |
| Water collection, treatment and supply  | 0.23% |
| Construction of residential and non-residential buildings                                       | 0.21% |
| Manufacture of other organic basic chemicals  | 0.21% |
| Other activities auxiliary to financial services, except insurance and pension funding          | 0.2%  |
| Collection of non-hazardous waste   | 0.19% |
| Manufacture of ovens, furnaces and furnace burners  | 0.19% |

|   |       |
|---|-------|
| Manufacture of other parts and accessories for motor vehicles                   | 0.16% |
| Manufacture of other inorganic basic chemicals                                  | 0.16% |
| Other credit granting   | 0.16% |
| Manufacture of other chemical products n.e.c.                                   | 0.14% |
| Land transport and transport via pipelines                                      | 0.14% |
| Other food service activities   | 0.14% |
| Wholesale of chemical products  | 0.14% |
| Manufacture of communication equipment  | 0.12% |
| Mining of uranium and thorium ores  | 0.12% |
| Specialist medical practice activities  | 0.12% |
| Distribution of electricity   | 0.1%  |
| Web portals   | 0.1%  |
| Activities of holding companies   | 0.1%  |
| Research and experimental development on biotechnology                          | 0.1%  |
| Manufacture of concrete products for construction purposes                      | 0.1%  |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics | 0.06% |
| Management of real estate on a fee or contract basis                            | 0.06% |
| Manufacture of electronic components  | 0.05% |
| Hotels and similar accommodation  | 0.05% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

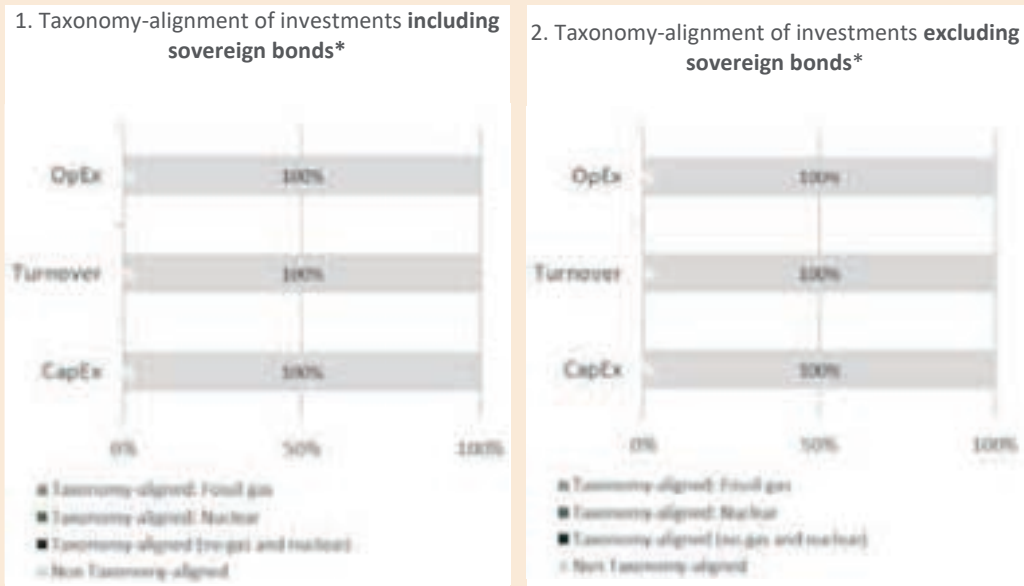

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 29.22% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 30.6% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 9.49% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.66% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Financial Product has applied a socially responsible investment selectivity approach Best-in-Class on the investment universe during the reference period. The selectivity approach has reduced the investment universe at least by 20% based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their ESG Score to the exception of cash held on an ancillary basis and Solidarity Assets.

In addition, the investment strategy has outperformed its benchmark or investment universe on at least two ESG Key Performance Indicator that are Carbon intensity and Water Intensity during the reference period.

During the reference period, the following minimum coverage rates have been applied with the Financial Product portfolio (expressed as a percentage of at least % of the net assets, excluding bonds and other debt securities issued by public issuers, cash held on an ancillary basis and Solidarity Assets): i) 90% for the ESG analysis, ii) 90% for the Carbon intensity indicator and iii) 70% for the Water Intensity indicator.

| Sustainability KPI Name | Value  | Benchmark   | Coverage |
|-------------------------|--|---|----------|
| Carbon intensity        | 95.78 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 238.18 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 97.24%   |
| Water intensity         | 472.75 Thousands of cubic meters for corporates  | 11618.89 Thousands of cubic meters for corporates   | 97.24%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been

- qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector                    |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes per million EUR invested, expressed as a weighted average |  |
|-------------------------------------|--|--|--|

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                       | Sector  | Proportion | Country |
|---------------------------------------|---|------------|---------|
| INTUITIVE SURGICAL INC XNGS USD       | Manufacture of medical and dental instruments and supplies                      | 4.39%      | US      |
| DEXCOM INC XNGS USD                   | Manufacture of medical and dental instruments and supplies                      | 4.09%      | US      |
| KEYENCE CORP XTKS JPY                 | Manufacture of other special-purpose machinery n.e.c.                           | 3.68%      | JP      |
| SIEMENS AG-REG XETR EUR               | Manufacture of electrical equipment   | 3.67%      | DE      |
| THERMO FISHER SCIENTIFIC INC XNYS USD | Manufacture of instruments and appliances for measuring, testing and navigation | 3.28%      | US      |
| QUALCOMM INC XNGS USD                 | Manufacture of electronic components  | 3.09%      | US      |
| SILICON LABORATORIES INC XNGS USD     | Manufacture of electronic components  | 2.95%      | US      |
| CADENCE DESIGN SYS INC XNGS USD       | Other software publishing   | 2.92%      | US      |
| FANUC CORP XTKS JPY                   | Manufacture of other special-purpose machinery n.e.c.                           | 2.89%      | JP      |
| ALPHABET INC-CL C XNGS USD            | Web portals   | 2.81%      | US      |
| AXONICS INC XNGS USD                  | Manufacture of irradiation, electromedical and electrotherapeutic equipment     | 2.41%      | US      |
| SCHNEIDER ELECTRIC SE XPAR EUR        | Manufacture of electric motors, generators and transformers                     | 2.4%       | FR      |
| NVIDIA CORP XNGS USD                  | Manufacture of electronic components  | 2.37%      | US      |
| INFINEON TECHNOLOGIES AG XETR EUR     | Manufacture of electronic components  | 2.36%      | DE      |
| TERADYNE INC XNGS USD                 | Manufacture of other special-purpose machinery n.e.c.                           | 2.34%      | US      |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

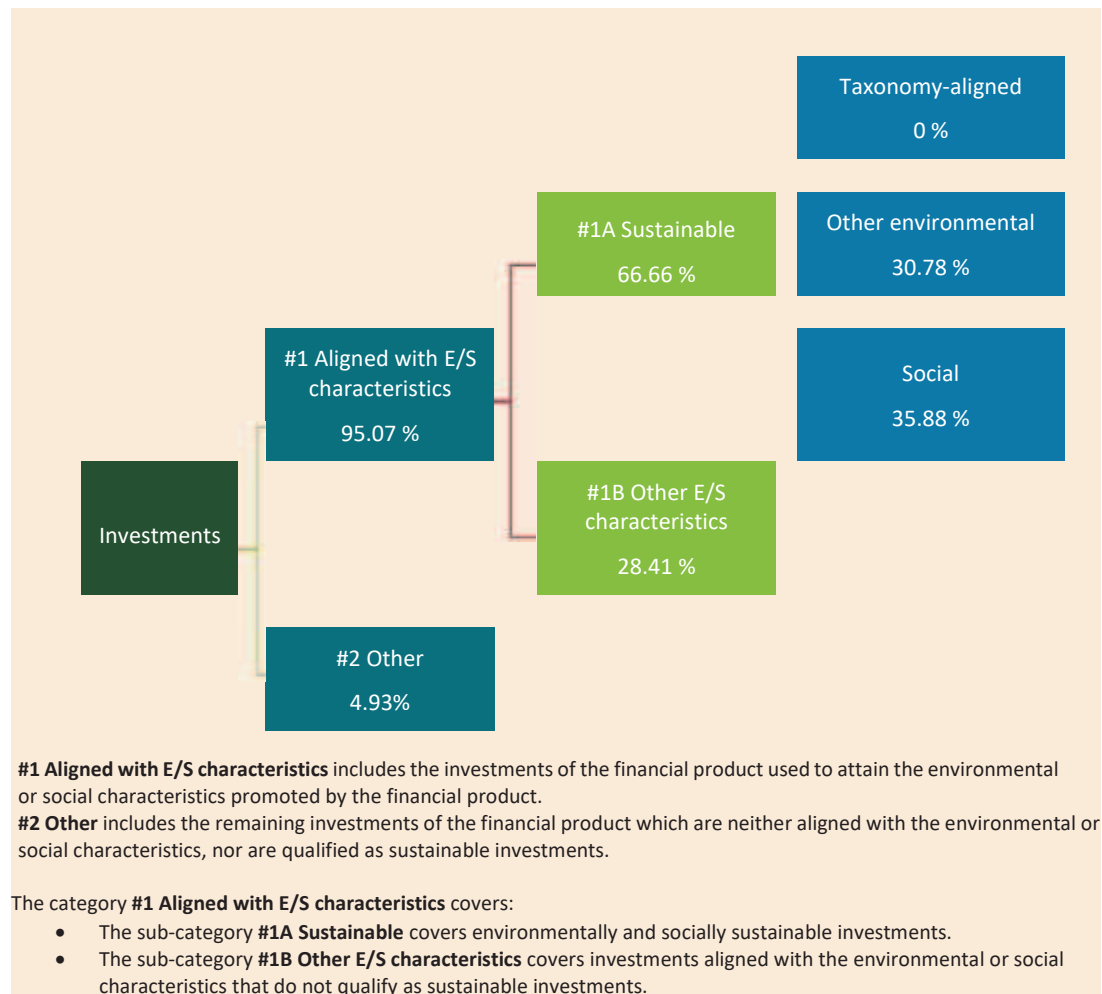

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Manufacture of electronic components  | 23.77%     |
| Manufacture of other special-purpose machinery n.e.c.                           | 17.88%     |
| Manufacture of medical and dental instruments and supplies                      | 12.63%     |
| Other software publishing   | 10.24%     |
| Manufacture of instruments and appliances for measuring, testing and navigation | 7.17%      |
| Manufacture of electrical equipment   | 5.36%      |
| Manufacture of electric motors, generators and transformers                     | 3.49%      |
| Web portals   | 2.81%      |
| Manufacture of communication equipment  | 2.44%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment     | 2.41%      |
| Manufacture of lifting and handling equipment                                   | 2.33%      |
| Retail sale via mail order houses or via Internet                               | 2.18%      |
| Manufacture of computer, electronic and optical products                        | 2.09%      |
| Manufacture of electrical and electronic equipment for motor vehicles           | 2.01%      |
| Manufacture of machinery for food, beverage and tobacco processing              | 1.08%      |
| Other business support service activities n.e.c.                                | 0.81%      |
| Retail trade, except of motor vehicles and motorcycles                          | 0.75%      |
| Manufacture of motor vehicles   | 0.56%      |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 30.78% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 35.88% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 4.93% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <span style="color: green;">●●</span> <input type="checkbox"/> YES   | <span style="color: green;">●</span> <input checked="" type="checkbox"/> NO  |
|--|--|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 81.80 % of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective  |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Women on board
- Carbon Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the reference period, the Financial Product has applied a ESG Score Upgrade Approach approach on its investment universe, according to which the ESG scoring of the Financial Product has been higher than the scoring of the investment universe after removing at least the 20% worst ESG Scores, on a weighted average basis.

| Sustainability KPI Name | Value  | Benchmark  | Coverage |
|-------------------------|--|--|----------|
| Women on board          | 36.84 % of women on board  | 33.19 % of women on board  | 95.67%   |
| Carbon Intensity        | 513.36CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 726.75CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 92.84%   |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
  - a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
  - b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR. Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members          |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Financial product did not make any sustainable investments during the reference period.

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                | Sector   | Proportion | Country |
|--------------------------------|--|------------|---------|
| NEXTERA ENERGY INC<br>XNYS USD | Electricity, gas, steam and air conditioning supply  | 4.67%      | US      |
| TRANSURBAN GROUP<br>XASX AUD   | Service activities incidental to land transportation | 4.54%      | AU      |

|                                      |   |       |    |
|--------------------------------------|---|-------|----|
| SEMPRA ENERGY XNYS USD               | Distribution of electricity                         | 3.57% | US |
| EVERSOURCE ENERGY XNYS USD           | Distribution of electricity                         | 3.52% | US |
| IBERDROLA SA XMAD EUR                | Production of electricity                           | 3.27% | ES |
| EXELON CORP XNGS USD                 | Electricity, gas, steam and air conditioning supply | 2.64% | US |
| AMERICAN WATER WORKS CO INC XNYS USD | Water collection, treatment and supply              | 2.17% | US |
| DOMINION ENERGY INC XNYS USD         | Electricity, gas, steam and air conditioning supply | 2.13% | US |
| AENA SME SA XMAD EUR                 | Service activities incidental to air transportation | 2.04% | ES |
| HOWOGE 0.625% - 01/11/2028 Call      | Renting and operating of own or leased real estate  | 2%    | DE |
| UNION PACIFIC CORP XNYS USD          | Freight rail transport                              | 1.99% | US |
| VINCI SA XPAR EUR                    | Civil engineering                                   | 1.91% | FR |
| VIEFP 2% Var - 15/11/2027 Perp       | Water collection, treatment and supply              | 1.71% | FR |
| UNP 2.8% - 14/02/2032 Call           | Freight rail transport                              | 1.68% | US |
| WEST JAPAN RAILWAY CO XTKS JPY       | Land transport and transport via pipelines          | 1.64% | JP |

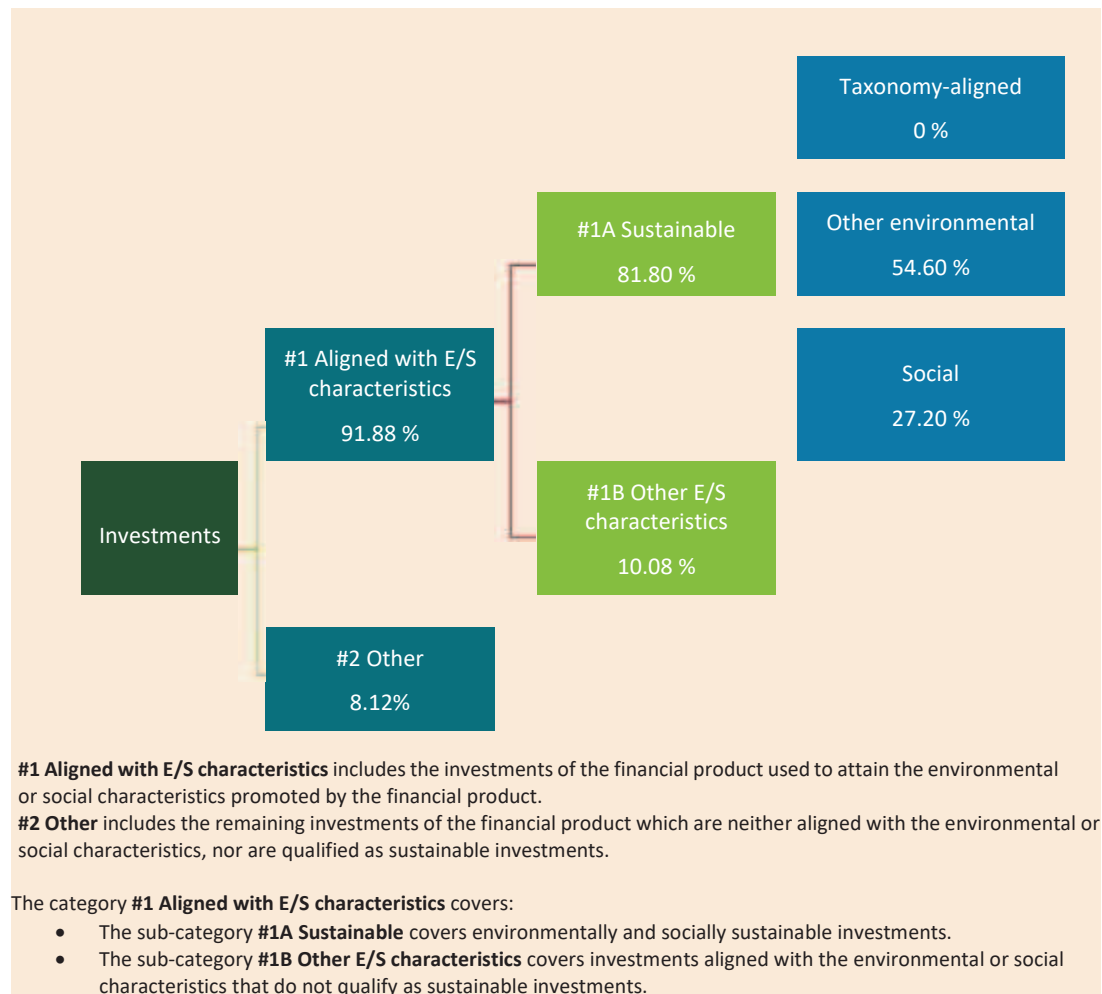

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

**In which economic sectors were the investments made?**

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Renting and operating of own or leased real estate                      | 22.66%     |
| Electricity, gas, steam and air conditioning supply                     | 14.74%     |
| Distribution of electricity   | 11.3%      |
| Production of electricity   | 9.08%      |
| Water collection, treatment and supply                                  | 7.96%      |
| Service activities incidental to land transportation                    | 6.39%      |
| Freight rail transport  | 5.7%       |
| Service activities incidental to air transportation                     | 4.55%      |
| Construction of utility projects for electricity and telecommunications | 3.59%      |
| Civil engineering   | 3.51%      |
| Land transport and transport via pipelines                              | 2.67%      |
| Construction of residential and non-residential buildings               | 1.92%      |
| Distribution of gaseous fuels through mains                             | 1.82%      |
| Urban and suburban passenger land transport                             | 1.56%      |
| Warehousing and support activities for transportation                   | 1.08%      |
| Television programming and broadcasting activities                      | 1.06%      |
| Transmission of electricity   | 0.4%       |
| General public administration activities                                | 0%         |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not**

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 54.60% for this Financial Product during the reference period.

**take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 27.20 % of sustainable investments with a social objective;

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 8.12% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product and
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity related instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and/or for diversification and/or hedging purposes.

Environmental or social safeguards are applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective: \_\_\_%**

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.32% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the reference period, the Financial Product has applied a ESG Score Upgrade Approach approach on its investment universe, according to which the ESG scoring of the Financial Product has been higher than the scoring of the investment universe after removing at least the 20% worst ESG Scores, on a weighted average basis.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 128.15 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 225.84 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 99.89%   |
| Water intensity         | 7835.77Thousands of cubic meters for corporates   | 12712.05Thousands of cubic meters for corporates  | 99.89%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities (“Operations”). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the “products and services” offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer’s operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer’s Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer’s “Operations” is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission’s ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

----- ● **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments         | Sector                                 | Proportion | Country |
|-------------------------|--|------------|---------|
| APPLE INC XNGS USD      | Manufacture of communication equipment | 3.84%      | US      |
| MICROSOFT CORP XNGS USD | Other software publishing              | 2.9%       | US      |

|                                      |   |       |    |
|--------------------------------------|---|-------|----|
| ALPHABET INC-CL A XNGS USD           | Web portals   | 1.47% | US |
| PROCTER & GAMBLE CO/THE XNYS USD     | Manufacture of household and sanitary goods and of toilet requisites              | 1.31% | US |
| BERKSHIRE HATHAWAY INC-CL B XNYS USD | Non-life insurance  | 1.29% | US |
| COCA-COLA CO/THE XNYS USD            | Manufacture of soft drinks, production of mineral waters and other bottled waters | 1.17% | US |
| PEPSICO INC XNGS USD                 | Manufacture of soft drinks, production of mineral waters and other bottled waters | 1.12% | US |
| UNITEDHEALTH GROUP INC XNYS USD      | Non-life insurance  | 0.98% | US |
| HOME DEPOT INC XNYS USD              | Retail sale of hardware, paints and glass in specialised stores                   | 0.95% | US |
| ROYAL BANK OF CANADA XTSE CAD        | Other monetary intermediation   | 0.87% | CA |
| MERCK & CO. INC. XNYS USD            | Manufacture of basic pharmaceutical products                                      | 0.87% | US |
| UNION PACIFIC CORP XNYS USD          | Freight rail transport  | 0.84% | US |
| JPMORGAN CHASE & CO XNYS USD         | Other monetary intermediation   | 0.82% | US |
| ABBOTT LABORATORIES XNYS USD         | Manufacture of irradiation, electromedical and electrotherapeutic equipment       | 0.82% | US |
| NESTLE SA-REG XSWX CHF               | Manufacture of food products  | 0.77% | CH |

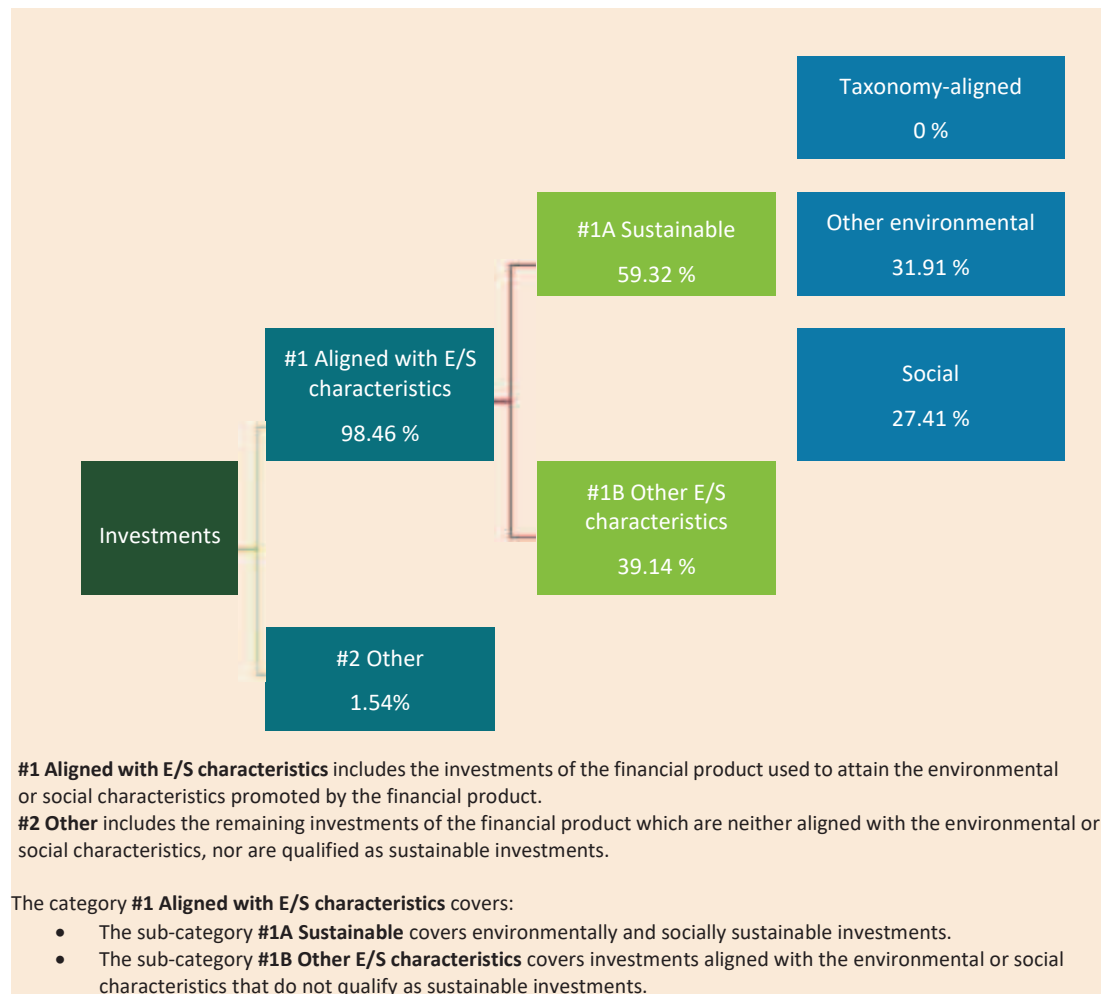

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Non-life insurance   | 6.96%      |
| Other monetary intermediation  | 6.66%      |
| Manufacture of communication equipment   | 4.95%      |
| Other software publishing  | 4.41%      |
| Manufacture of basic pharmaceutical products   | 4.28%      |
| Manufacture of household and sanitary goods and of toilet requisites                   | 3.47%      |
| Freight rail transport   | 2.84%      |
| Manufacture of soft drinks, production of mineral waters and other bottled waters      | 2.77%      |
| Retail trade, except of motor vehicles and motorcycles                                 | 2.69%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 2.64%      |
| Renting and operating of own or leased real estate                                     | 2.51%      |
| Manufacture of electrical equipment  | 2.37%      |
| Wireless telecommunications activities   | 2.27%      |
| Other information service activities n.e.c.  | 2.06%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 2.05%      |
| Web portals  | 2.03%      |
| Manufacture of food products   | 1.81%      |
| Life insurance   | 1.69%      |
| Retail sale of hardware, paints and glass in specialised stores                        | 1.64%      |
| Wholesale trade, except of motor vehicles and motorcycles                              | 1.56%      |
| Research and experimental development on biotechnology                                 | 1.51%      |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment            | 1.32%      |
| Wholesale of pharmaceutical goods  | 1.31%      |
| Manufacture of medical and dental instruments and supplies                             | 1.22%      |
| Administration of financial markets  | 1.18%      |
| Activities of insurance agents and brokers   | 1.16%      |
| Computer programming, consultancy and related activities                               | 1.12%      |
| Data processing, hosting and related activities  | 1.11%      |

|  |       |
|--|-------|
| Manufacture of electronic components   | 1.11% |
| Manufacture of motor vehicles  | 1.07% |
| Manufacture of other special-purpose machinery n.e.c.                              | 1.01% |
| Satellite telecommunications activities  | 0.95% |
| Manufacture of rusks and biscuits, manufacture of preserved pastry goods and cakes | 0.86% |
| Manufacture of other chemical products n.e.c.                                      | 0.76% |
| Manufacture of computers and peripheral equipment                                  | 0.74% |
| Retail trade of motor vehicle parts and accessories                                | 0.72% |
| Water collection, treatment and supply   | 0.69% |
| Manufacture of electric motors, generators and transformers                        | 0.61% |
| Retail sale via mail order houses or via Internet                                  | 0.6%  |
| Manufacture of chemicals and chemical products                                     | 0.59% |
| Manufacture of ovens, furnaces and furnace burners                                 | 0.58% |
| Wired telecommunications activities  | 0.58% |
| Treatment and disposal of non-hazardous waste                                      | 0.55% |
| Other postal and courier activities  | 0.52% |

| Manufacture of other non-metallic mineral products                      | 0.07% |
| Manufacture of industrial gases   | 0.06% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an

**What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 31.91% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 27.41% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 1.54% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?  |   |
|--|---|
| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 77.22% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |

|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value   | Benchmark   | Coverage |
|-------------------------|---|---|----------|
| Carbon intensity        | 124.43 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 161.08 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG

(on a scale from + 10 corresponding to 'significant contributing impact' to - 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| SDG no significantly negative score   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units            | Measurement |
|--|---|------------------|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|                                     |   |   |  |
|-------------------------------------|---|---|--|
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap         | Average unadjusted gender pay gap of investee companies |  |
| SDG no significantly negative score | PAI 13: Board gender diversity            | Expressed as a percentage of all board members          |  |
| Controversial weapons policy        | PAI 14: Exposure to controversial weapons | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| Climate Risk policy  | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy                          |   |   |             |
| Climate Risk policy  | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Ecosystem protection & Deforestation policy                          | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                       | Sector   | Proportion | Country |
|---------------------------------------|--|------------|---------|
| NESTLE SA-REG XSWX CHF                | Manufacture of food products   | 9.25%      | CH      |
| ROCHE HOLDING AG-GENUSSCHEIN XSWX CHF | Manufacture of basic pharmaceutical products   | 8.21%      | CH      |
| NOVARTIS AG-REG XSWX CHF              | Manufacture of basic pharmaceutical products   | 6.84%      | CH      |
| UBS GROUP AG-REG XSWX CHF             | Other activities auxiliary to financial services, except insurance and pension funding | 6.01%      | CH      |

|   |  |       |    |
|---|--|-------|----|
| JULIUS BAER GROUP LTD<br>XSWX CHF         | Other activities auxiliary to financial services, except insurance and pension funding   | 5.08% | CH |
| ZURICH INSURANCE<br>GROUP AG XSWX CHF     | Non-life insurance   | 4.89% | CH |
| SWISSCOM AG-REG XSWX<br>CHF               | Wired telecommunications activities  | 4.34% | CH |
| ABB LTD-REG XSWX CHF                      | Manufacture of electric motors, generators and transformers                              | 4.34% | CH |
| SIG GROUP AG XSWX CHF                     | Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 3.96% | CH |
| BARRY CALLEBAUT AG-<br>REG XSWX CHF       | Manufacture of cocoa, chocolate and sugar confectionery                                  | 3.92% | CH |
| FISCHER (GEORG)-REG<br>XSWX CHF           | Manufacture of fluid power equipment   | 3.85% | CH |
| LONZA GROUP AG-REG<br>XSWX CHF            | Other human health activities  | 3.51% | CH |
| CIE FINANCIERE RICHEMO-<br>A REG XSWX CHF | Manufacture of jewellery and related articles  | 3.2%  | CH |
| VAT GROUP AG XSWX CHF                     | Manufacture of other taps and valves   | 3.13% | CH |
| STRAUMANN HOLDING<br>AG-REG XSWX CHF      | Manufacture of medical and dental instruments and supplies                               | 3.08% | CH |

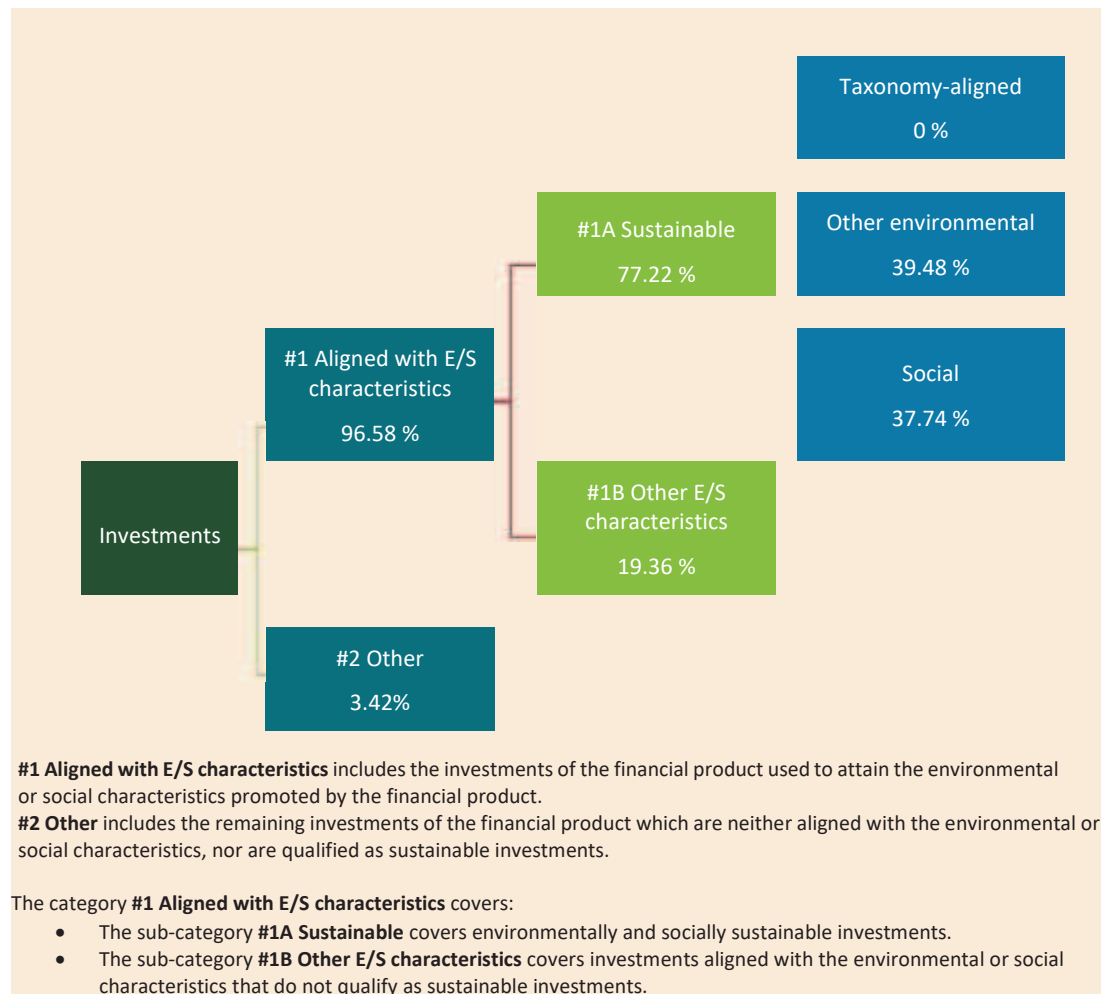

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Manufacture of basic pharmaceutical products   | 17.34%     |
| Other activities auxiliary to financial services, except insurance and pension funding   | 11.09%     |
| Manufacture of food products   | 9.25%      |
| Manufacture of cocoa, chocolate and sugar confectionery                                  | 5.56%      |
| Non-life insurance   | 4.89%      |
| Manufacture of medical and dental instruments and supplies                               | 4.74%      |
| Wired telecommunications activities  | 4.34%      |
| Manufacture of electric motors, generators and transformers                              | 4.34%      |
| Manufacture of corrugated paper and paperboard and of containers of paper and paperboard | 3.96%      |
| Manufacture of fluid power equipment   | 3.85%      |
| Other human health activities  | 3.51%      |
| Manufacture of jewellery and related articles  | 3.2%       |
| Manufacture of other taps and valves   | 3.13%      |
| Manufacture of concrete products for construction purposes                               | 2.6%       |
| Manufacture of other chemical products n.e.c.  | 2.55%      |
| Manufacture of agricultural and forestry machinery                                       | 2.1%       |
| Renting and operating of own or leased real estate                                       | 1.86%      |
| Manufacture of instruments and appliances for measuring, testing and navigation          | 1.85%      |
| Life insurance   | 1.55%      |
| Manufacture of other rubber products   | 1.3%       |
| Other software publishing  | 1.23%      |
| Other transportation support activities  | 1.21%      |
| Activities of holding companies  | 1.07%      |
| Manufacture of computers and peripheral equipment  | 1.04%      |
| Electricity, gas, steam and air conditioning supply                                      | 0.86%      |
| Computer programming, consultancy and related activities                                 | 0.83%      |
| Manufacture of fabricated metal products, except machinery and equipment                 | 0.46%      |
| Temporary employment agency activities   | 0.3%       |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

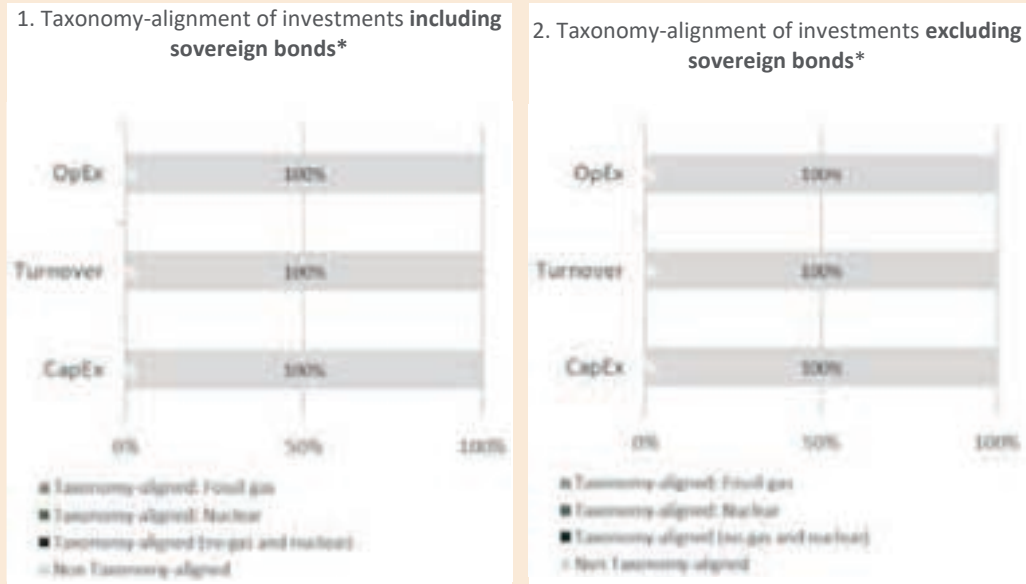

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 39.48% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 37.74% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 3.42% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

YES

NO

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 38.69% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value  | Benchmark   | Coverage |
|-------------------------|--|---|----------|
| Carbon intensity        | 169.5 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 214.79 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 93.15%   |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1.UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2.Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the

Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

Social and Governance:

| Relevant AXA IM policies   | PAI indicator  | Units            | Measurement |
|--|--|------------------|-------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments |             |

|  |   |   |  |
|--|---|---|--|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |  |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |  |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |  |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |  |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments          | Sector   | Proportion | Country |
|--------------------------|--|------------|---------|
| ASTRAZENECA PLC XLON GBP | Manufacture of basic pharmaceutical products   | 5.31%      | GB      |
| DIAGEO PLC XLON GBP      | Distilling, rectifying and blending of spirits | 4.19%      | GB      |

|                                      |  |       |    |
|--------------------------------------|--|-------|----|
| SHELL PLC XLON GBP                   | Manufacture of refined petroleum products                            | 4.18% | GB |
| BP PLC XLON GBP                      | Manufacture of refined petroleum products                            | 3.7%  | GB |
| RECKITT BENCKISER GROUP PLC XLON GBP | Manufacture of household and sanitary goods and of toilet requisites | 3.65% | GB |
| EXPERIAN PLC XLON GBP                | Other information service activities n.e.c.                          | 3.5%  | IE |
| LONDON STOCK EXCHANGE GROUP XLON GBP | Administration of financial markets                                  | 3.4%  | GB |
| GSK PLC XLON GBP                     | Manufacture of basic pharmaceutical products                         | 3.35% | GB |
| RENTOKIL INITIAL PLC XLON GBP        | Other cleaning activities  | 2.92% | GB |
| WEIR GROUP PLC/THE XLON GBP          | Manufacture of machinery for mining, quarrying and construction      | 2.48% | GB |
| STANDARD CHARTERED PLC XLON GBP      | Other monetary intermediation  | 2.46% | GB |
| PRUDENTIAL PLC XLON GBP              | Life insurance   | 2.36% | GB |
| SPIRENT COMMUNICATIONS PLC XLON GBP  | Manufacture of communication equipment                               | 2.29% | GB |
| 4IMPRINT GROUP PLC XLON GBP          | Advertising agencies   | 2.29% | GB |
| LEGAL & GENERAL GROUP PLC XLON GBP   | Life insurance   | 2.26% | GB |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Manufacture of basic pharmaceutical products  | 10.13%     |
| Manufacture of refined petroleum products   | 7.87%      |
| Life insurance  | 6.26%      |
| Other monetary intermediation   | 5.67%      |
| Other software publishing   | 5.33%      |
| Web portals   | 4.62%      |
| Distilling, rectifying and blending of spirits  | 4.19%      |
| Manufacture of household and sanitary goods and of toilet requisites                            | 3.65%      |
| Other information service activities n.e.c.   | 3.5%       |
| Administration of financial markets   | 3.4%       |
| Other cleaning activities   | 2.92%      |
| Manufacture of other chemical products n.e.c.   | 2.63%      |
| Manufacture of machinery for mining, quarrying and construction                                 | 2.48%      |
| Manufacture of communication equipment  | 2.29%      |
| Advertising agencies  | 2.29%      |
| Manufacture of weapons and ammunition   | 2.2%       |
| Renting and operating of own or leased real estate  | 2.12%      |
| Rental and leasing activities   | 2%         |
| Retail sale of furniture, lighting equipment and other household articles in specialised stores | 1.93%      |
| Computer programming, consultancy and related activities  | 1.91%      |
| Activities of holding companies   | 1.88%      |
| Extraction of natural gas   | 1.62%      |
| Mining of other non-ferrous metal ores  | 1.51%      |
| Manufacture of fluid power equipment  | 1.48%      |
| Other activities auxiliary to financial services, except insurance and pension funding          | 1.36%      |
| Other information technology and computer service activities                                    | 1.34%      |
| Retail sale via mail order houses or via Internet   | 1.29%      |
| Manufacture of cement   | 1.22%      |
| Security and commodity contracts brokerage  | 1.2%       |
| Manufacture of motor vehicles, trailers and semi-trailers                                       | 1.15%      |

|   |       |
|---|-------|
| Architectural and engineering activities, technical testing and analysis          | 1.1%  |
| Market research and public opinion polling  | 1.08% |
| Manufacture of other articles of paper and paperboard                             | 1.07% |
| Manufacture of textiles   | 1.05% |
| Other retail sale of new goods in specialised stores                              | 1.04% |
| Extraction of crude petroleum and natural gas                                     | 0.96% |
| Research and experimental development on biotechnology                            | 0.7%  |
| Manufacture of ceramic tiles and flags  | 0.65% |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.55% |
| Manufacture of batteries and accumulators   | 0.27% |
| Manufacture of irradiation, electromedical and electrotherapeutic equipment       | 0.11% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies.  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 10.94% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 27.75% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 8.64% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input checked="" type="checkbox"/> <input type="checkbox"/> YES   | <input type="checkbox"/> <input checked="" type="checkbox"/> NO   |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 36.57% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 6.72 Score over max 10 | 6.61 Score over max 10 | 100%     |

**... And compared to previous periods?**

Not applicable.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments              | Sector   | Proportion | Country |
|------------------------------|--|------------|---------|
| FITB 3.65% - 25/01/2024 Call | Other monetary intermediation  | 2.06%      | US      |
| SCHW Float - 13/05/2026 Call | Other activities auxiliary to financial services, except insurance and pension funding | 1.91%      | US      |

|                                   |  |       |    |
|-----------------------------------|--|-------|----|
| STT 2.354% Var - 01/11/2025 Call  | Other activities auxiliary to financial services, except insurance and pension funding | 1.88% | US |
| GM 6.05% - 10/10/2025             | Manufacture of motor vehicles  | 1.78% | US |
| BK 4.414% Var - 24/07/2026 Call   | Trusts, funds and similar financial entities   | 1.77% | US |
| TFC 4.26% Var - 28/07/2026 Call   | Other monetary intermediation  | 1.77% | US |
| ANZ 5.088% - 08/12/2025           | Other monetary intermediation  | 1.58% | US |
| JPM 3.845% Var - 14/06/2025 Call  | Other monetary intermediation  | 1.4%  | US |
| BWP 4.95% - 15/12/2024 Call       | Transport via pipeline   | 1.4%  | US |
| MS 4.679% Var - 17/07/2026 Call   | Security and commodity contracts brokerage   | 1.38% | US |
| ABBV 3.6% - 14/05/2025 Call       | Manufacture of basic pharmaceutical products   | 1.34% | US |
| JPM 2.083% Var - 22/04/2026 Call  | Other monetary intermediation  | 1.28% | US |
| BMO Float - 15/09/2026            | Other monetary intermediation  | 1.23% | CA |
| HBAN 5.699% Var - 18/11/2025 Call | Other monetary intermediation  | 1.19% | US |
| BNS 5.25% - 06/12/2024            | Other monetary intermediation  | 1.18% | CA |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other monetary intermediation  | 37.81%     |
| Transport via pipeline   | 5.46%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 5.42%      |
| Trusts, funds and similar financial entities   | 5.1%       |
| Security and commodity contracts brokerage   | 4.03%      |
| Life insurance   | 3.86%      |
| Manufacture of motor vehicles  | 3.81%      |
| Electricity, gas, steam and air conditioning supply                                    | 3.57%      |
| Renting and operating of own or leased real estate                                     | 2.67%      |
| Financial leasing  | 1.67%      |
| Motion picture, video and television programme production activities                   | 1.41%      |
| Activities of holding companies  | 1.35%      |
| Manufacture of basic pharmaceutical products   | 1.34%      |
| Manufacture of electronic components   | 1.32%      |
| Manufacture of games and toys  | 1.16%      |
| Other software publishing  | 1.12%      |
| Satellite telecommunications activities  | 1.07%      |
| Distribution of electricity  | 1.03%      |
| Manufacture of chemicals and chemical products   | 1.01%      |
| Extraction of crude petroleum and natural gas  | 1%         |
| Manufacture of other chemical products n.e.c.  | 0.91%      |
| Rental and leasing activities  | 0.91%      |
| Renting and leasing of trucks  | 0.91%      |
| Non-life insurance   | 0.9%       |
| Manufacture of refined petroleum products  | 0.87%      |
| Wholesale of pharmaceutical goods  | 0.82%      |
| Hospital activities  | 0.74%      |
| Manufacture of computers and peripheral equipment                                      | 0.66%      |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 0.59%      |
| Service activities incidental to land transportation                                   | 0.57%      |
| Manufacture of medical and dental instruments and supplies                             | 0.57%      |

|   |       |
|---|-------|
| Manufacture of plastic packing goods  | 0.52% |
| Other manufacturing n.e.c.  | 0.52% |
| Accounting, bookkeeping and auditing activities, tax consultancy                | 0.46% |
| Distribution of gaseous fuels through mains                                     | 0.45% |
| Wholesale trade, except of motor vehicles and motorcycles                       | 0.4%  |
| Manufacture of household and sanitary goods and of toilet requisites            | 0.39% |
| Research and experimental development on biotechnology                          | 0.38% |
| Manufacture of other builders' carpentry and joinery                            | 0.38% |
| Other business support service activities n.e.c.                                | 0.34% |
| Manufacture of machinery and equipment n.e.c.                                   | 0.29% |
| Other human health activities   | 0.27% |
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel     | 0.27% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics | 0.26% |
| Wireless telecommunications activities  | 0.26% |
| Manufacture of electrical and electronic equipment for motor vehicles           | 0.25% |
| Wired telecommunications activities   | 0.24% |
| Manufacture of machinery for mining, quarrying and construction                 | 0.24% |
| Restaurants and mobile food service activities                                  | 0.24% |
| Manufacture of food products  | 0.22% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

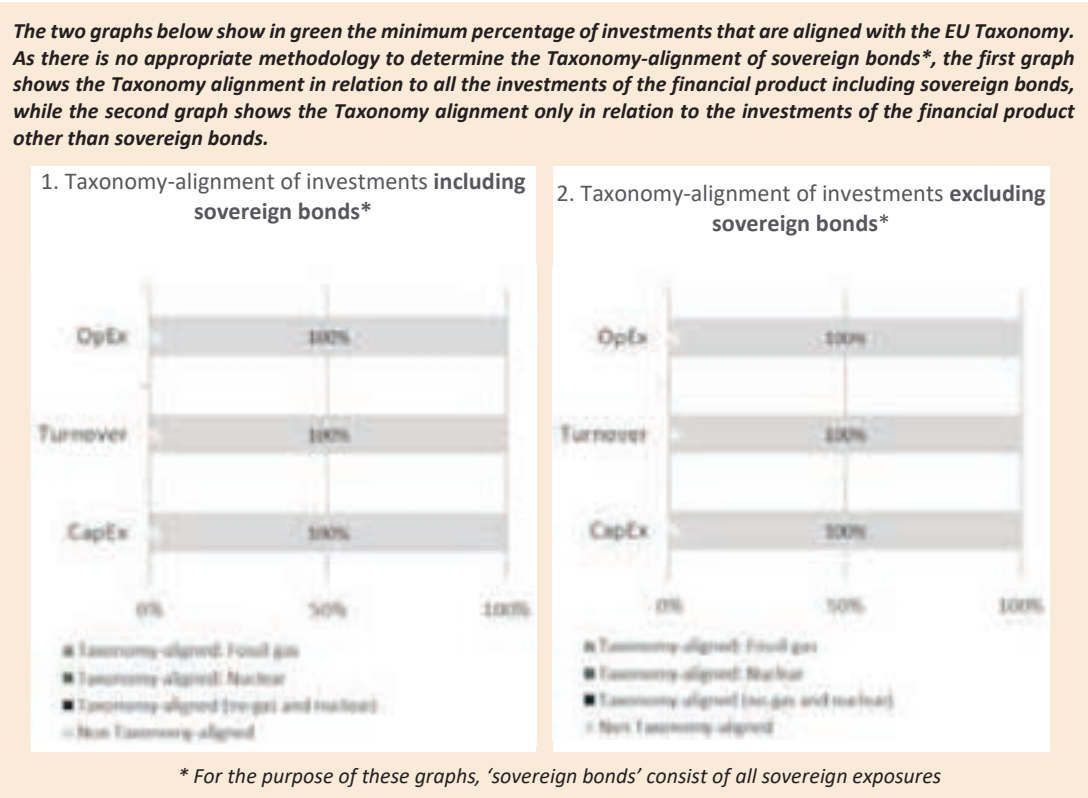

- Yes  
 In fossil gas  In nuclear energy  
 No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 11.15% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 25.42% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 2.24% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 23.44% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 4.82 Score over max 10 | 4.79 Score over max 10 | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments              | Sector                                      | Proportion | Country |
|------------------------------|---|------------|---------|
| RAX 8.625% - 15/11/2024 Call | Other software publishing                   | 1.18%      | US      |
| NLSN 5% - 01/02/2025 Call    | Other information service activities n.e.c. | 1.11%      | LU      |

|                                 |   |       |    |
|---------------------------------|---|-------|----|
| ARGID 6% - 15/02/2025 Call      | Manufacture of other articles of paper and paperboard | 1.11% | IE |
| NCX 5.25% - 01/08/2023 Call     | Manufacture of other organic basic chemicals          | 1.04% | CA |
| DAEHIM 5.875% - 01/06/2025 Call | Manufacture of machinery and equipment n.e.c.         | 1.02% | US |
| LABL 6.75% - 15/07/2026 Call    | Manufacture of other articles of paper and paperboard | 1.02% | US |
| ARMK 6.375% - 01/05/2025 Call   | Other food service activities                         | 1.01% | US |
| BWY 5.5% - 15/04/2024 Call      | Manufacture of other articles of paper and paperboard | 1.01% | US |
| ABEGET 9.75% - 01/03/2027 Call  | Web portals   | 0.98% | US |
| MATW 5.25% - 01/12/2025 Call    | Manufacture of other articles of paper and paperboard | 0.97% | US |
| CMLP 5.75% - 01/04/2025 Call    | Transport via pipeline                                | 0.95% | US |
| DNB 10.25% - 15/02/2027 Call    | Other information service activities n.e.c.           | 0.93% | US |
| RDIO 6.75% - 15/07/2025 Call    | Other manufacturing n.e.c.                            | 0.92% | US |
| SIRCOM 11% - 15/07/2027 Call    | Other software publishing                             | 0.86% | US |
| BGS 5.25% - 01/04/2025 Call     | Manufacture of condiments and seasonings              | 0.86% | US |

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period, excluding derivatives.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed above could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Manufacture of other articles of paper and paperboard           | 6.41%      |
| Other software publishing                                       | 6.01%      |
| Satellite telecommunications activities                         | 4.71%      |
| Television programming and broadcasting activities              | 3.98%      |
| Renting and operating of own or leased real estate              | 3.94%      |
| Transport via pipeline  | 3.84%      |
| Other information service activities n.e.c.                     | 3.48%      |
| Gambling and betting activities                                 | 3.34%      |
| Wired telecommunications activities                             | 2.7%       |
| Manufacture of batteries and accumulators                       | 2.4%       |
| Other monetary intermediation                                   | 2.24%      |
| Manufacture of other builders' carpentry and joinery            | 2.24%      |
| Private security activities                                     | 2.2%       |
| Agents involved in the sale of food, beverages and tobacco      | 2.02%      |
| Other human health activities                                   | 1.96%      |
| Hospital activities   | 1.92%      |
| Restaurants and mobile food service activities                  | 1.76%      |
| Retail sale of hardware, paints and glass in specialised stores | 1.75%      |
| Other manufacturing n.e.c.                                      | 1.72%      |
| Retail trade, except of motor vehicles and motorcycles          | 1.58%      |
| Retail sale of automotive fuel in specialised stores            | 1.54%      |
| Activities of holding companies                                 | 1.46%      |
| Rental and leasing activities                                   | 1.43%      |
| Manufacture of other organic basic chemicals                    | 1.33%      |
| Manufacture of computers and peripheral equipment               | 1.3%       |
| Manufacture of hollow glass                                     | 1.27%      |
| Manufacture of other food products n.e.c.                       | 1.2%       |
| Web portals   | 1.16%      |
| Manufacture of chemicals and chemical products                  | 1.16%      |
| Wireless telecommunications activities                          | 1.13%      |
| Freight transport by road                                       | 1.06%      |
| Other food service activities                                   | 1.02%      |

|  |       |
|--|-------|
| Manufacture of other chemical products n.e.c.  | 1.02% |
| Manufacture of communication equipment   | 1.02% |
| Manufacture of machinery and equipment n.e.c.  | 1.02% |
| Other credit granting  | 1%    |
| Motion picture, video and television programme production activities                   | 0.96% |
| Aluminium production   | 0.96% |
| Freight rail transport   | 0.91% |
| Manufacture of light metal packaging   | 0.9%  |
| Other activities auxiliary to financial services, except insurance and pension funding | 0.88% |
| Manufacture of condiments and seasonings   | 0.86% |
| Manufacture of instruments and appliances for measuring, testing and navigation        | 0.84% |
| Extraction of crude petroleum and natural gas  | 0.78% |
| Advertising agencies   | 0.74% |
| Sale of cars and light motor vehicles  | 0.7%  |
| Activities of insurance agents and brokers   | 0.7%  |
| Manufacture of grain mill products   | 0.69% |
| Manufacture of wearing apparel   | 0.67% |
| Manufacture of cement  | 0.66% |
| Waste collection, treatment and disposal activities, materials recovery                | 0.66% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics        | 0.64% |
| Manufacture of plastic packing goods   | 0.63% |
| Collection of hazardous waste  | 0.57% |
| Manufacture of underwear   | 0.57% |
| Architectural and engineering activities, technical testing and analysis               | 0.5%  |
| Wholesale trade, except of motor vehicles and motorcycles                              | 0.5%  |
| Processing and preserving of meat  | 0.48% |
| Activities of amusement parks and theme parks  | 0.46% |
| Manufacture of footwear  | 0.44% |
| Computer programming, consultancy and related activities                               | 0.43% |
| Funeral and related activities   | 0.39% |

|   |       |
|---|-------|
| Other publishing activities   | 0.37% |
| Retail sale of sporting equipment in specialised stores                           | 0.31% |
| Processing and preserving of poultry meat   | 0.3%  |
| Manufacture of soft drinks, production of mineral waters and other bottled waters | 0.25% |
| Manufacture of motor vehicles   | 0.25% |
| Support activities to performing arts   | 0.25% |
| Manufacture of basic pharmaceutical products                                      | 0.24% |
| Manufacture of other inorganic basic chemicals                                    | 0.23% |
| Manufacture of tubes, pipes, hollow profiles and related fittings, of steel       | 0.16% |
| Wholesale of chemical products  | 0.13% |
| Publishing of newspapers  | 0.13% |
| Manufacture of other special-purpose machinery n.e.c.                             | 0.13% |
| Manufacture of other parts and accessories for motor vehicles                     | 0.1%  |
| Manufacture of household and sanitary goods and of toilet requisites              | 0.09% |
| Accommodation   | 0.08% |
| Manufacture of games and toys   | 0.08% |
| Manufacture of electrical equipment   | 0.06% |
| Other amusement and recreation activities   | 0.01% |

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 3.75% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 19.69% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 1.77% of the Financial Product’s Net Asset Value.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 3.75% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 19.69% of sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 1.77% of the Financial Product’s Net Asset Value.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
|--|---|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>                    | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 20.93% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>                            | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

#### ● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark              | Coverage |
|-------------------------|------------------------|------------------------|----------|
| ESG Score               | 4.87 Score over max 10 | 4.79 Score over max 10 | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments                | Sector  | Proportion | Country |
|--------------------------------|---|------------|---------|
| MATW 5.25% - 01/12/2025 Call   | Manufacture of other articles of paper and paperboard | 1.17%      | US      |
| ABEGET 9.75% - 01/03/2027 Call | Web portals   | 1.13%      | US      |

|                                 |   |       |    |
|---------------------------------|---|-------|----|
| WATCOS 6.5% - 15/06/2027 Call   | Freight rail transport  | 0.95% | US |
| VCVHHO 9.75% - 15/08/2026 Call  | Other information service activities n.e.c.                     | 0.94% | US |
| LUMMUS 9% - 01/07/2028 Call     | Manufacture of other organic basic chemicals                    | 0.9%  | US |
| GRSTAR 5.75% - 01/12/2025 Call  | Renting and operating of own or leased real estate              | 0.86% | US |
| BWY 7.25% - 15/04/2025 Call     | Manufacture of other articles of paper and paperboard           | 0.84% | US |
| SBPLLC 6.375% - 30/09/2026 Call | Retail sale of hardware, paints and glass in specialised stores | 0.83% | US |
| LABL 10.5% - 15/07/2027 Call    | Manufacture of other articles of paper and paperboard           | 0.79% | US |
| SSNC 5.5% - 30/09/2027 Call     | Other software publishing                                       | 0.78% | US |
| ZMINFO 3.875% - 01/02/2029 Call | Other software publishing                                       | 0.75% | US |
| GWCN 9.5% - 01/11/2027 Call     | Private security activities                                     | 0.74% | CA |
| OXY 6.45% - 15/09/2036          | Extraction of crude petroleum                                   | 0.72% | US |
| CLVTSC 4.875% - 01/07/2029 Call | Other software publishing                                       | 0.67% | US |
| SOLWAT 7.625% - 01/04/2026 Call | Support activities for petroleum and natural gas extraction     | 0.67% | US |

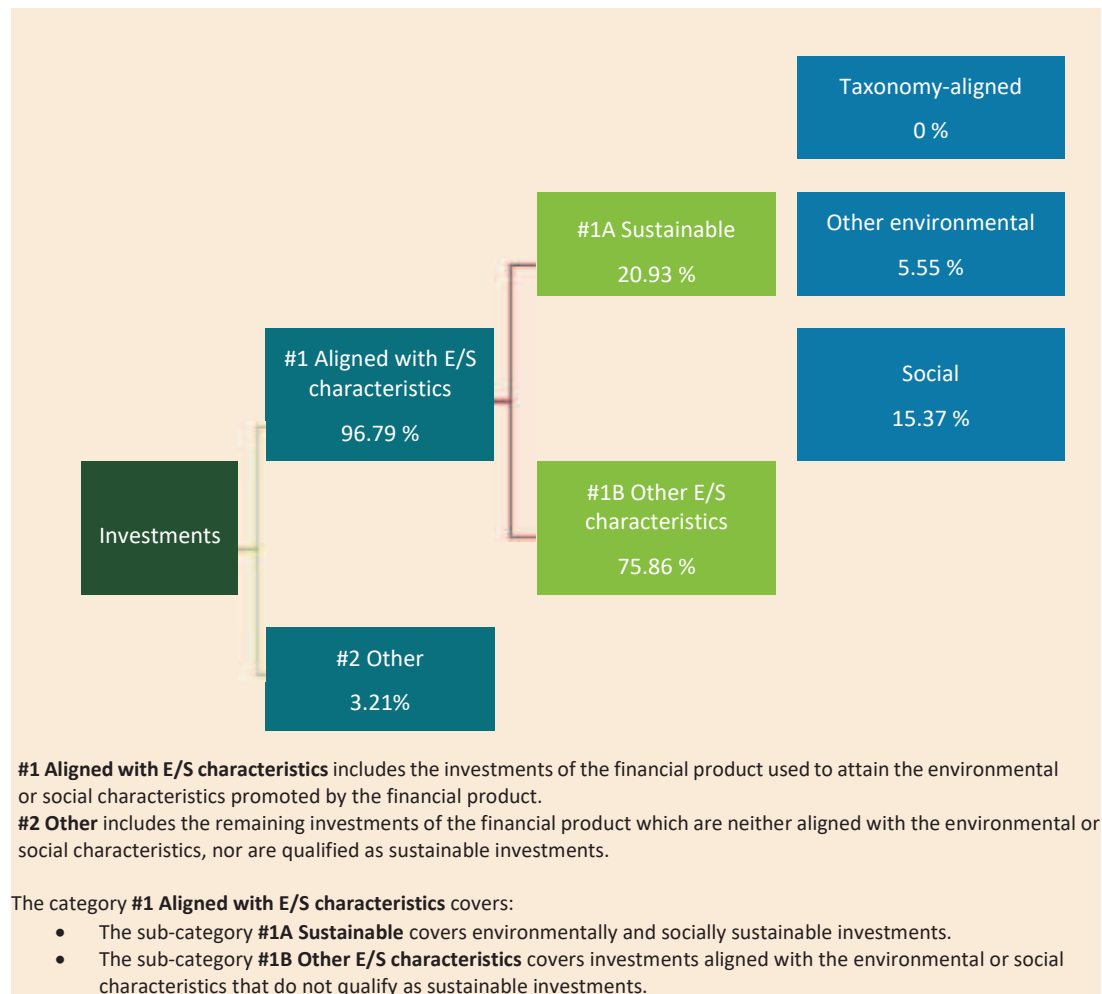

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector   | Proportion |
|--|------------|
| Other software publishing  | 8.18%      |
| Manufacture of other articles of paper and paperboard                                  | 5.63%      |
| Transport via pipeline   | 5.17%      |
| Satellite telecommunications activities  | 4.31%      |
| Extraction of crude petroleum and natural gas  | 3.48%      |
| Renting and operating of own or leased real estate                                     | 3.17%      |
| Private security activities  | 2.83%      |
| Manufacture of basic pharmaceutical products   | 2.66%      |
| Wired telecommunications activities  | 2.46%      |
| Retail sale of hardware, paints and glass in specialised stores                        | 2.4%       |
| Other human health activities  | 2.19%      |
| Manufacture of other chemical products n.e.c.  | 2.03%      |
| Restaurants and mobile food service activities   | 1.74%      |
| Other information service activities n.e.c.  | 1.72%      |
| Gambling and betting activities  | 1.68%      |
| Other monetary intermediation  | 1.59%      |
| Web portals  | 1.58%      |
| Manufacture of communication equipment   | 1.55%      |
| Manufacture of light metal packaging   | 1.38%      |
| Activities of insurance agents and brokers   | 1.33%      |
| Other activities auxiliary to financial services, except insurance and pension funding | 1.32%      |
| Manufacture of motor vehicles  | 1.23%      |
| Television programming and broadcasting activities                                     | 1.23%      |
| Manufacture of other organic basic chemicals   | 1.21%      |
| Sea and coastal passenger water transport  | 1.21%      |
| Agents involved in the sale of food, beverages and tobacco                             | 1.14%      |
| Other credit granting  | 1.14%      |
| Sale of cars and light motor vehicles  | 1.1%       |
| Computer programming, consultancy and related activities                               | 1.09%      |
| Support activities for petroleum and natural gas extraction                            | 1.09%      |

|   |       |
|---|-------|
| Manufacture of other builders' carpentry and joinery                            | 1.09% |
| Manufacture of medical and dental instruments and supplies                      | 1.08% |
| Hotels and similar accommodation  | 1.08% |
| Extraction of crude petroleum   | 1.07% |
| Manufacture of electrical equipment   | 0.99% |
| Other food service activities   | 0.95% |
| Freight rail transport  | 0.95% |
| Construction of utility projects for electricity and telecommunications         | 0.95% |
| Hospital activities   | 0.95% |
| Other manufacturing n.e.c.  | 0.94% |
| Manufacture of computers and peripheral equipment                               | 0.91% |
| Manufacture of paints, varnishes and similar coatings, printing ink and mastics | 0.9%  |
| Wireless telecommunications activities  | 0.88% |
| Manufacture of grain mill products  | 0.84% |
| Accommodation   | 0.82% |
| Motion picture, video and television programme production activities            | 0.79% |
| Retail sale of automotive fuel in specialised stores                            | 0.79% |
| Wholesale of pharmaceutical goods   | 0.78% |
| Rental and leasing activities   | 0.75% |
| Publishing of newspapers  | 0.71% |
| Advertising agencies  | 0.63% |
| Support activities to performing arts   | 0.62% |
| Fitness facilities  | 0.59% |
| Processing and preserving of poultry meat                                       | 0.56% |
| Manufacture of batteries and accumulators                                       | 0.53% |
| Manufacture of other food products n.e.c.                                       | 0.5%  |
| Manufacture of cement   | 0.5%  |
| Market research and public opinion polling                                      | 0.48% |
| Book publishing   | 0.44% |

| Manufacture of builders ware of plastic  | 0.08% |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

**The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 5.55% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

### **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 15.37% of sustainable investments with a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 3.21% of the Financial Product’s Net Asset Value. The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?  |   |
|--|---|
| <input type="checkbox"/> YES   | <input checked="" type="checkbox"/> NO  |
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%                  | <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 20.43% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%                          | <input checked="" type="checkbox"/> with a social objective   |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| Sustainability KPI Name | Value                  | Benchmark | Coverage |
|-------------------------|------------------------|-----------|----------|
| ESG Score               | 4.89 Score over max 10 |           | 100%     |

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

**1. UN Sustainable Development Goals alignment (SDG)** of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

**2. Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

**3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:**

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

#### Environment:

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes   |             |
| Ecosystem Protection & Deforestation policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
|   | PAI 3: GHG intensity of investee companies                                | Metric tonnes per eur million revenue   |             |
| Climate Risk policy   | PAI 4: Exposure to Companies active in the fossil fuel sector             | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5 : Share of non-renewable energy consumption and production          | % of total energy sources   |             |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) <sup>1</sup> | PAI 6: Energy consumption intensity per high impact climate sector        | GWh per million EUR of revenue of investee companies, per high impact climate sector  |             |
| Ecosystem Protection & Deforestation policy   | PAI 7: Activities negatively affecting biodiversity sensitive areas       | % of investments  |             |
| SDG no significantly negative score   | PAI 8: Emissions to water   | Tonnes per million EUR invested, expressed as a weighted average  |             |
| SDG no significantly negative score   | PAI 9: Hazardous waste and radioactive waste ratio                        | Tonnes per million EUR invested, expressed as a weighted average  |             |

#### Social and Governance:

| Relevant AXA IM policies   | PAI indicator   | Units   | Measurement |
|--|---|---|-------------|
| ESG standards policy: violation of international norms and standards   | PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises  | % of investments  |             |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) <sup>2</sup> | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises | % of investments  |             |
| SDG no significantly negative score  | PAI 12: Unadjusted gender pay gap   | Average unadjusted gender pay gap of investee companies |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity  | PAI 13: Board gender diversity  | Expressed as a percentage of all board members.         |             |
| Controversial weapons policy   | PAI 14: Exposure to controversial weapons   | % of investments  |             |

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report’s reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investment must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

| Relevant AXA IM policies  | PAI indicator   | Units   | Measurement |
|---|---|---|-------------|
| Climate Risk policy   | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)                          | Metric tonnes   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 2: Carbon Footprint   | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO <sub>2</sub> e/M€ or tCO <sub>2</sub> e/M\$) |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 3: GHG intensity of investee companies  | Metric tonnes per eur million revenue   |             |
| Ecosystem protection & Deforestation policy   |   |   |             |
| Climate Risk policy   | PAI 4: Exposure to companies active in the fossil fuel sector                                     | % of investments  |             |
| Climate Risk policy (engagement only)   | PAI 5: Share of non-renewable energy consumption and production                                   | % of total energy sources   |             |
| Ecosystem protection & Deforestation policy   | PAI 7: activities negatively affecting biodiversity sensitive area                                | % of investments  |             |
| ESG standard policy / violation of international norms and standards                            | PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises | % of investments  |             |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity  | Expressed as a percentage of all board members  |             |
| Controversial weapons policy  | PAI 14: Exposure to controversial weapons   | % of investments  |             |

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

## What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2022-12-30

| Top investments               | Sector   | Proportion | Country |
|-------------------------------|--|------------|---------|
| ARGIHC 7% - 15/06/2025 Call   | Restaurants and mobile food service activities | 1.43%      | US      |
| ARMK 6.375% - 01/05/2025 Call | Other food service activities                  | 1.38%      | US      |

|                                |   |       |    |
|--------------------------------|---|-------|----|
| BWY 5.5% - 15/04/2024 Call     | Manufacture of other articles of paper and paperboard                           | 1.34% | US |
| XHR 6.375% - 15/08/2025 Call   | Renting and operating of own or leased real estate                              | 1.34% | US |
| SRCL 5.375% - 15/07/2024 Call  | Collection of hazardous waste   | 1.27% | US |
| GTN 5.875% - 15/07/2026 Call   | Television programming and broadcasting activities                              | 1.27% | US |
| LABL 6.75% - 15/07/2026 Call   | Manufacture of other articles of paper and paperboard                           | 1.26% | US |
| VCVHHO 9.75% - 15/08/2026 Call | Other information service activities n.e.c.                                     | 1.25% | US |
| USFOOD 6.25% - 15/04/2025 Call | Agents involved in the sale of food, beverages and tobacco                      | 1.21% | US |
| WLSC 6.125% - 15/06/2025 Call  | Rental and leasing activities   | 1.21% | US |
| CMLP 5.75% - 01/04/2025 Call   | Transport via pipeline  | 1.19% | US |
| BMCAUS 5% - 15/02/2027 Call    | Manufacture of other builders' carpentry and joinery                            | 1.18% | US |
| COMM 6% - 01/03/2026 Call      | Manufacture of communication equipment  | 1.15% | US |
| AVNT 5.75% - 15/05/2025 Call   | Manufacture of paints, varnishes and similar coatings, printing ink and mastics | 1.12% | US |
| ARGID 5.25% - 30/04/2025 Call  | Manufacture of other articles of paper and paperboard                           | 1.1%  | IE |

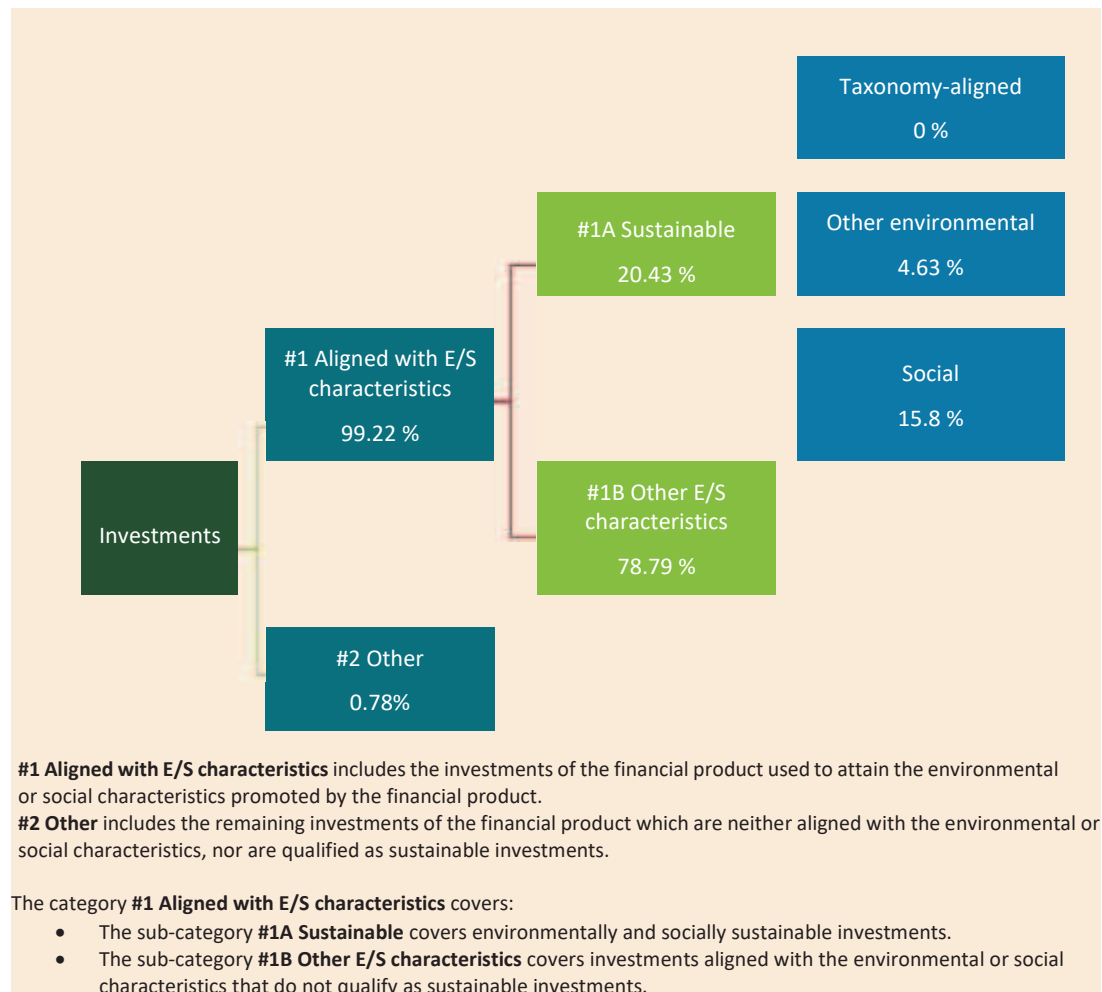

The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

● ***In which economic sectors were the investments made?***

Financial product's investments were made in the economic sectors detailed below:

| Top sector  | Proportion |
|---|------------|
| Manufacture of other articles of paper and paperboard                   | 5.71%      |
| Renting and operating of own or leased real estate                      | 5.68%      |
| Satellite telecommunications activities                                 | 5.24%      |
| Other software publishing   | 4.14%      |
| Private security activities   | 4.1%       |
| Gambling and betting activities   | 3.63%      |
| Other monetary intermediation   | 3.3%       |

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas  In nuclear energy

No

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including** sovereign bonds\*

2. Taxonomy-alignment of investments **excluding** sovereign bonds\*

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 4.63% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 15.8% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.78% of the Financial Product’s Net Asset Value. The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (iii) Arctic with divestment from companies deriving more than 10% of their production from Arctic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: <https://www.axa-im.com/our-policies-and-reports>

### **How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.
