

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers iBoxx EUR Corporate Bond Yield Plus UCITS ETF Share Class: 1D (ISIN: IE00BYPH736), (WKN: A2ACJ8), (Currency: EUR)

a sub fund of Xtrackers (IE) plc. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the Markit iBoxx EUR Corporates Yield Plus Index (Index).

The Index is designed to reflect the performance of higher-yielding tradable debt (bonds), which are denominated in Euro and issued by companies with a rating of between BB- and AAA by the major credit rating agencies.

The Index is calculated on a total return gross basis. This means that all distributions received from bonds are reinvested in the Index. The Index is reviewed and rebalanced quarterly.

To achieve the aim, the Fund will attempt to replicate the Index, before fees and expenses, by buying a substantial number of the

bonds which are comprised in the Index in the same proportion as the Index, as determined by the Sub-Portfolio Manager which is Deutsche Asset Management (UK) Limited.

The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund.

Dividends may be declared on your shares up to four times a year. You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will attempt to replicate the performance of the Index less costs, but your investment is not expected to match the performance of the Index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the Fund's performance to be substantially different from the performance of the Index.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

Deutsche Asset Management entities and related companies may act in several roles in relation to the Fund such as distributor, derivative counterparty, securities lending agent and management company which may involve conflicts of interest.

Fluctuations in interest rates of the currency of the shares, the Index or the other assets of the Fund may affect the value of your investment.

The Index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances.

The Fund invests in non-investment grade bonds which generally have a higher risk of default and are more susceptible to market fluctuations than investment grade bonds. This may affect the value of your investment.

The Fund follows a rules-based strategy which will deviate from the overall market or parent index performance. Your investment may be less diversified, with no guarantee that the strategy will be achieved.

The Fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

The Fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charges	0.25%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the Fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the year ending October 2017. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

To the extent the Fund undertakes securities lending to reduce costs, the Fund will ultimately be allocated 70% of the associated revenue generated, Deutsche Asset Management (UK) Limited, as Sub-Portfolio Manager, will be allocated 15%, and Deutsche Bank AG, as securities lending agent, will be allocated 15%. To facilitate this, the Fund will initially receive 85% of the associated revenue generated from which Deutsche Asset Management (UK) Limited will receive its allocation. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2016 and the share class was launched in 2016.

Past performance has been calculated in EUR.
