

**Fund objectives and investment policy**

The fund aims to provide capital growth and income in excess of the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged Index after fees have been deducted over a three to five year period by investing in inflation-linked bonds.

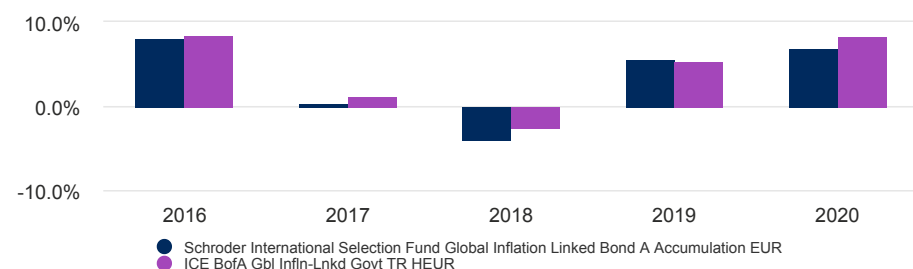

This fund may use financial derivative instruments as a part of the investment process. Derivatives carry a high degree of risk and should only be considered by sophisticated investors.

**Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.**

**Past performance and any forecasts are not necessarily a guide to the future or likely performance.**

**The value of investments and income from them can go down as well as up and is not guaranteed.** The distributions are not guaranteed. Ordinarily, they will be reviewed annually. In the event of the Fund's income and realised gains being less than indicated distribution amount per unit per annum, distributions will be made from capital. Investors should be aware that the distributions may exceed the income and realised gains of the Fund at times and lead to a reduction of the amount originally invested, depending on the date of initial investment. Some performance differences between the fund and the benchmark may arise as the benchmark returns are not adjusted for non-dealing days of the fund. Where 'since inception' performance figures are stated, please note that the inception date is the same as the share class launch date under 'Fund Facts'.

### Benchmark and corporate action information

The fund's performance should be assessed against its target benchmark being to exceed the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged index. The fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. However, the fund will likely reflect certain features of the target benchmark namely credit quality and duration, as well as currency exposure. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide.
