Schroder Global Recovery Fund

a sub-fund of Schroder Investment Fund Company

Class L Accumulation GBP (GB00BYRJXP30)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth by investing in the equities of companies worldwide which are considered to be undervalued relative to their long term earnings potential.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of companies worldwide that have suffered a set back in either share price or profitability, but where long term prospects are believed to be good.

The fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the Investment Manager believes are significantly undervalued relative to their long-term earnings potential.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective

investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivative instruments for investment purposes as well as for efficient portfolio management.

Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against the MSCI World (Net Total Return) index and the Investment Association Global Equity Income sector average return.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using simulated performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Charges

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2020 and may vary from year to year. The ongoing charge figure may be discounted depending on the size of the fund. The fund's annual report for each financial year will include details on the exact charges made.

Please see the prospectus for more details about the charges.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 30 October 2015.
