

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Invesco US High Yield Fallen Angels UCITS ETF (the "Fund") A sub-fund of Invesco Markets III plc (the "Umbrella Fund") Dist (ISIN: IE00BD0Q9673) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The Fund is a passively managed Exchange-Traded Fund. This means shares in the Fund are listed and traded on one or more stock exchange(s).
- The objective of the Fund is to provide investors with investment results which, before expenses, would correspond to the price and yield performance of the FTSE Time-Weighted US Fallen Angel Bond Select Index (Total Return) (the "Index")¹ by investing in a representative sample of the constituents of the Index.
- The Fund's shares are listed on one or more Stock Exchange(s). Generally, only Authorised Participants may subscribe or redeem shares directly with the Fund. Other investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances other investors will be permitted to redeem their shares directly from Invesco Markets III plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- An index measures the performance of a selection of securities representative of the overall market or a subsection of it.
- To achieve the investment objective, the Fund will employ sampling techniques to select securities in the Index which may include but are not limited to index weighted average duration, industry sectors, country weights, liquidity and credit quality. The use of the sampling approach will result in the Fund holding a smaller number of securities than are in the underlying Index.
- The Index measures the performance of US\$ "fallen angels" i.e., US\$ corporate bonds which were (i) previously rated investment-grade (higher quality) and subsequently downgraded to high-yield (lower quality); or (ii) previously rated high-yield, subsequently rated investment-grade and then downgraded again to high-yield. The index rebalances monthly.
- The Index is based on the FTSE Time-Weighted US Fallen Angel Bond Index which includes US Dollar-denominated bonds issued by corporations domiciled in the US or Canada.
- You can buy and sell shares in the Fund on any Business Day (as defined in the Prospectus).
- Any income from your investment will be paid quarterly.

Risk and Reward Profile

Lower Risk ← Higher Risk
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Share Class is in risk category 5 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- **General Investment Risk:** The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **Non-Investment Grade Securities Risk:** Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the Fund.
- **Concentration risk:** The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified.
- **Credit risk:** The creditworthiness of the debt the Fund is exposed to may weaken and result in fluctuations in the value of the Fund. There is no guarantee the issuers of debt will repay the interest and capital on the redemption date. The risk is higher when the Fund is exposed to high yield debt securities.
- **Interest Rate Risk:** Changes in interest rates will result in fluctuations in the value of the Fund.
- **Securities lending:** The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at etf.invesco.com (select your country and navigate to the Prospectus on the Documents section on the product page).
