## FTF Franklin UK Mid Cap Fund

**Class W (acc) • ISIN GB00B7BXT545** • A sub-fund of Franklin Templeton Funds  
The management company is Franklin Templeton Fund Management Limited.

### Objectives and Investment Policy

FTF Franklin UK Mid Cap Fund (the "Fund") aims to grow in value by more than the FTSE 250 (ex-Investment Trusts) Index, from a combination of income and investment growth over a three to five-year period after all fees and costs are deducted.

The Fund invests at least two thirds (but typically significantly more) in the shares of medium-sized companies that are constituents of the FTSE 250 (ex-Investment Trusts) Index and that are incorporated/domiciled in the UK or which have significant business operations in the UK. This will typically be around 30-50 companies.

The Fund's managers try to reduce risk by making sure no single company share dominates the Fund's investments. Normally they try to keep shareholdings in any individual company between 1.5% and 5% of the Fund's total value.

The FTSE 250 (ex-Investment Trusts) Index constrains the Fund's investment universe and acts as a performance comparison as it is widely available and reflects the performance of medium-sized companies.

The Fund can invest to a lesser extent in:

- equity securities of companies not included in the FTSE 250 (ex-Investment Trusts) Index (up to 10% of the Fund's assets);
- other asset classes, such as debt securities, bonds, other transferable securities, cash, money market instruments, and other collective investment schemes.

The Fund can use derivatives for efficient portfolio management (managing the fund in a way that is designed to reduce risk or cost and/or generate extra income or growth).

You may request the sale of your shares in the Fund on any UK business day.

The income received from the Fund's investments is accumulated and included in the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

### Terms to Understand

**Derivatives:** financial contracts whose value is linked to the price of another asset (e.g. indices, interest rates, share prices or currencies).

**FTSE 250 Index (excluding investment companies):** This index comprises medium sized companies, excluding investment companies, listed on the London Stock Exchange. The Index is used to assess the change in value of the securities which comprise it.

**Shares of companies (equities):** Securities that represent an ownership stake in a company.

**Transferable securities:** investments such as shares or debt that can be bought and sold between investors.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

#### Why is the Fund in this specific category?

The Fund invests mainly in equity securities of mid-sized UK companies that are included in the FTSE 250 ex-Investment Trusts Index. Such securities have historically been subject to price movements, sometimes to a greater extent than securities of large UK companies, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

#### Risks materially relevant not adequately captured by the indicator:

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

<b>Entry charge</b>	Not applicable*

<i>This is the maximum that might be taken out of your money before it is invested.</i>	

### Charges taken from the Fund over a year

<b>Ongoing charges</b>	0.82%
------------------------	-------

### Charges taken from the Fund under certain specific conditions

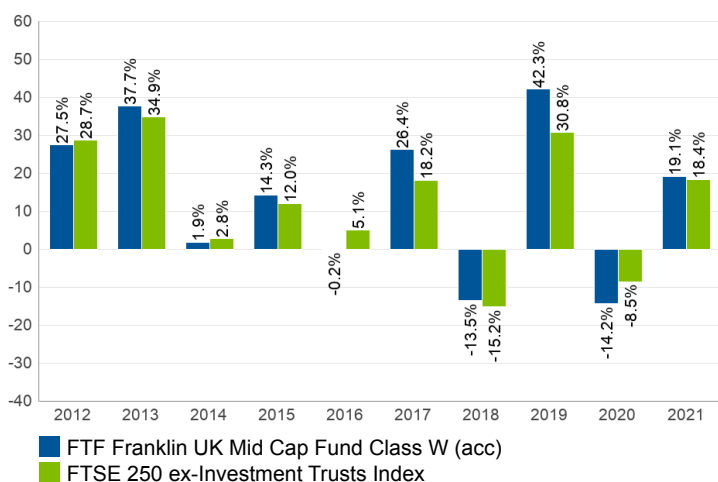

<b>Performance fee</b>	Not applicable
------------------------	----------------

\*This share class is only available through certain financial advisers which may apply their own charges. You may find more information about charges from your financial adviser.

The ongoing charges are based on the expenses for the year ending 31 December 2021. This figure may vary from year to year.

For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds.

## Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP.
- The Fund was launched in 2011 and the present share class on 31/05/2012.
- The FTSE 250 (ex-Investment Trusts) Index is the Fund's performance target and constrains the Fund's investment universe. It is widely available and reflects the performance of medium-sized companies.

The FTF Franklin UK Mid Cap Fund was launched on 17/10/11 to receive the assets of Rensburg UK Mid Cap Growth Trust. Past performance from the start of the performance chart has been simulated and is based on mid-price of the Trust and from 17/10/11 up to the launch date of the share class has been simulated by taking the performance of another existing share class of the Fund, which does not differ materially in the extent of its participation in the assets of the Fund.
