Objectives and Investment Policy

The objective of this Sub-Fund is to track the performance of MSCI Emerging Markets Index, and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The Sub-Fund aims to achieve a level of tracking error of the Sub-Fund and its index that will not normally exceed 1%.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return. MSCI Emerging Markets Index is an equity index representative of the large and mid-cap markets across 23 emerging countries.

More information about the composition of the index and its operating rules are available in the prospectus and at: msci.com

The Index value is available via Reuters (.dMIEF0000NUS) and Bloomberg (NDUEEGF).

The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and also if it allows a better exposition to an Index constituent. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

Dividend Policy : the accumulation share automatically retains, and re-invests, net investment incomes within the Sub-Fund when the distribution share pays dividends.

The minimum recommended holding term is 5 years.

The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges, provided that the Market Makers can maintain market liquidity. Only authorised participants (e.g. selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the prospectus of the UCITS.
