### What is this product?

This product is a closed-end Investment Company incorporated in England and listed on the London Stock Exchange. The Company's investment objective is to achieve growth of capital through investing in equities (ordinary shares in companies listed on a stock market) of small and medium-sized companies in Europe, excluding the United Kingdom. These are defined as those with a market capitalisation below or equal to that of the largest company in the EMIX Smaller European Companies (ex UK) Index. The Company will not invest more than 20 per cent of its total assets in any one company and does not take legal or management control of any company in which it invests.

As part of an active investment strategy the Company does not restrict its investments to any specific industrial or geographical sector; a diversified geographical spread is maintained. The Company does not seek to create a portfolio to take advantage of anticipated currency fluctuations. The Company has the ability to undertake stock lending activities but does not anticipate doing so. The Company has the powers under its Articles to borrow an amount up to 20 per cent of its securities portfolio.

The Company has a high distribution policy: barring unforeseen circumstances, it will pay an annual dividend equivalent to 6 per cent of the net asset value of the Company at the end of the preceding year. The dividend is funded from a combination of current year net profits and historic other reserves. The Company has a simple capital structure, being financed exclusively by the issue of ordinary shares.

### What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

← Lower risk Higher risk →

- The risk indicator assumes you invest in the Company for five years. The actual risk can vary significantly if you sell your shares at an early stage and you may get back less than you invested. You may not be able to sell your shares easily or you may have to sell at a price that significantly impacts on how much you get back. You will incur costs in buying and selling your shares.
- We have classified this product as 5, which is a medium high risk class. This rates the potential losses from future performance at a medium high level. In periods when market conditions are poor, the value of your investment may fall and may impact the amount you get back in the long term.
- Be aware of currency risk: The Company's assets are denominated in Euros or other continental European currencies. The majority of its shares are traded in Sterling on the London Stock Exchange. The returns to UK-based shareholders are therefore subject to the fluctuations in the relative strength of Sterling against its European counterparts. The value of your investment can go down as well as up. You may lose some or all of your investment. The Company does not provide any protection from future market conditions and regulatory changes. There can be no assurances that the objective of the company will be achieved or that dividend distributions will continue to be made. The use of gearing can enhance returns to investors in a rising market, but if the market falls the losses may be greater.

## What are the risks and what could I get in return? (continued)

Assuming you invest £10,000, this table shows how your investment could perform and what you could get back over the next 5 years under different scenarios. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past but are not an exact indicator. What you get will depend on how the market performs and how long you keep the investment. Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

The figures shown include all the costs of the product itself, where applicable, but do not include all the costs that you may pay to your advisor or plan manager, or local transaction taxes.

## What happens if the Company is unable to pay out?

The Company's shares are listed on the London Stock Exchange. Should the Company be liquidated, the amount you receive for your holding will be based on the value of assets available for distribution after all other liabilities, but before shareholders, have been paid. Shareholders in this company do not have the right to make a claim to the Financial Services Compensation Scheme in the event that the Company is unable to pay out.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown below are the cumulative costs of the product itself depending on how long you remain invested. The figures assume you invest £10,000. The figures are estimates and may change in the future. The person selling or advising you about this product may charge you other costs. If so, that person will provide you with information about those costs and show you the impact that all costs will have on your investment over time.

Investment £10,000			
Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at 5 years
Total costs	£112	£320	£508
