Notes to the Financial Statements

1. General

The Company is an open-ended investment company and was incorporated in Luxembourg as a SICAV (société d'investissement à capital variable) on 15 June 1990. The Company is a SICAV under part I of the Luxembourg Law of 17 December 2010, as amended, relating to undertakings for collective investment, which implements Directive 2014/91/EU ("UCITS V Directive").

FIMLUX is the Management Company of the Company, with the day-to-day responsibility for the administration, investment management and marketing/distribution functions of the Company.

As at 30 April 2024, the Company consisted of 132 active sub-funds. The Directors may from time to time close sub-funds as well as launch further sub-funds with different investment objectives, subject to the approval of the CSSF.

The following classes of Shares were launched during the year:

Investments in Indian securities within India Focus Fund are made partly via a wholly-owned Mauritian subsidiary, FIL Investments (Mauritius) Limited (the "Subsidiary"), previously called Fid Funds (Mauritius) Limited. The sole object of the Subsidiary is to carry out investment activities on behalf of the Company. FIL Investment Management (Singapore) Limited ("FIMSL") provides investment advisory and management services to the Subsidiary. FIMSL has obtained approval from the Securities and Exchange Board of India and the Reserve Bank of India to invest in India on its own behalf and on behalf of approved client accounts as a Foreign Portfolio Investor under Indian law. The Subsidiary is registered as a Foreign Portfolio Investor sub-account of FIMSL's licence and has been granted approval to invest in Indian securities. The assets and liabilities of the Subsidiary are consolidated in the Statement of Net Assets and all investments held by the Subsidiary are disclosed in the Schedule of Investments.

On 5 June 2023, Emerging Europe, Middle East and Africa Fund was reorganised with the creation of new classes of Shares to which the portfolio of Russian assets and a cash and receivables amount of USD 30,396,298 are allocated as at year end. The "Side Pocket" classes of Shares ("SP")

disclosed on the classes of Shares launches table are closed for subscriptions and redemptions. For more details about Side Pocket please refer to the Shareholder notice released on 5 May 2023 and available on https://www.fidelity.lu/funds/fund-updates.

On 11 August 2023, Fidelity TargetTM 2025 (Euro) Fund was renamed Fidelity TargetTM 2025 Fund, Fidelity TargetTM 2030 (Euro) Fund was renamed Fidelity TargetTM 2030 Fund, Fidelity TargetTM 2035 Fund, Fidelity TargetTM 2040 (Euro) Fund was renamed Fidelity TargetTM 2045 Fund, Fidelity TargetTM 2040 Fund, Fidelity TargetTM 2045 (Euro) Fund was renamed Fidelity TargetTM 2045 Fund, Fidelity TargetTM 2050 (Euro) Fund was renamed Fidelity TargetTM 2050 Fund, Fidelity Target

On 6 September 2023, SMART Global Defensive Fund was renamed Multi Asset Dynamic Inflation Fund.

On 20 February 2024, EURO STOXX 50® Fund was renamed Euro 50 Index Fund.

2. Significant Accounting Policies

The financial statements are prepared in accordance with the Luxembourg legal and regulatory requirements relating to undertakings for collective investment

Calculation of the Net Asset Value. The Net Asset Value per share of each class of shares, is calculated by determining first the proportion of the net assets of the relevant sub-fund attributable to each class of shares. Each such amount will be divided by the number of shares of the relevant class outstanding as at close of business. The Net Asset Value of each class is determined in the principal dealing currency of the respective class.

Security Valuation. Investments in financial instruments traded on any stock exchange are valued at the last available price at the time when the valuation is carried out on the principal stock exchange on which such security is traded. Financial instruments dealt on any over the counter market, short-dated debt transferable securities and money market instruments not traded on a regulated exchange or market are valued at the last available price at the time when the valuation is carried out. For Cash Funds, Money Market Instruments are valued at Mark-to-Market or Mark-to-Model where the use of mark-to-market is not possible or the market data is not of sufficient quality. All other assets are valued with prudence and in good faith by the Directors of the Company on the basis of their reasonably foreseeable sales price. All holdings owned by the Company are quoted on a regulated market, except where otherwise distinguished in a sub-fund's Schedule of Investments.

Swing Pricing Policy. A swing pricing policy has been adopted and implemented to protect the interests of the Company's shareholders. The purpose of the price adjustment policy is to allocate the costs associated with large inflows and outflows to investors transacting that day, thereby protecting the long-term Shareholder from the worst effects of dilution. It achieves this purpose by adjusting the share class price at which deals in a sub-fund are transacted. As such, share class prices may be adjusted up or down depending on the level and type of investor transactions on a particular day within a sub-fund. In this way the existing and remaining Shareholders do not suffer an inappropriate level of dilution. The Company will only trigger an adjustment in the price when there are significant net flows likely to have a material impact on the remaining Shareholders. The adjustment will be based on the normal dealing costs for the particular assets in which a sub-fund is invested but will not exceed 2% of the price. The Board may decide to increase this adjustment limit in exceptional circumstances to protect Shareholders' interests. Once an adjustment is made to a share class price, that price is the official price for that share class for all deals that day. As at 30 April 2024, price adjustments were made on the following sub-funds:

Sub-fund name	Class of Shares	Unswung NAV per Share	Swung NAV per Share

Fair Value Adjustments Policy. Fair value adjustments may be implemented to protect the interests of the Company's Shareholders against market timing practices. Accordingly if a sub-fund invests in markets that are closed for business at the time the sub-fund is valued, the Directors may, by derogation from the provisions above under security valuation, allow for the financial instruments included in a particular portfolio to be adjusted to reflect more accurately the fair value of the sub-fund's investments at the point of valuation.

Bank Deposits and Cash at Banks and Brokers. All bank deposits and cash at bank and brokers amounts are carried at face value.

Investment Security Transactions. Investment security transactions are accounted for on the date securities are purchased or sold. The computation of the cost of sales of securities is made on the basis of average cost.

Futures. Futures are accounted for on the date of opening or closing of the contract. Subsequent payments are made or received by the sub-fund each day, dependent on the daily fluctuations in the value of the underlying index or security which are recorded for financial reporting purposes as unrealised gains or losses by the sub-fund. The unrealised gains or losses resulting from futures are included in the Statement of Net Assets and in the Schedule of Investments. The realised gains and losses are based on the First In — First Out method. All gains and losses on futures are disclosed in the Statement of Operations and Changes in Net Assets.

Forward Foreign Exchange Contracts. Forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised gains or losses resulting from forward foreign exchange contracts are included in the Statement of Net Assets and in the Schedule of Investments. All forwards, including those used for the hedging of share classes, are included in the Schedule of Investments. All gains and losses on forwards are disclosed in the Statement of Operations and Changes in Net Assets.

Option Contracts. Options purchased are recorded as investments at their realisable market value; options written or sold are recorded as liabilities based on the cost to close the position. Purchased and written options are included in the Statement of Net Assets and in the Schedule of Investments. When the exercise of an option results in a cash settlement, the difference between the premium and the settlement proceeds is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased. All gains and losses on options are disclosed in the Statement of Operations and Changes in Net Assets.

Interest Rate, Inflation, Overnight Index & Total Return Swaps. Interest receivable and payable on interest rate, inflation, overnight index and total return swap contracts is accrued on a daily basis, and future commitments under the swap are valued at market rates. Interest rate, inflation overnight interest and total return swap contracts are disclosed in the Statement of Net Assets and in the Schedule of Investments. All gains and losses in the value of interest rate and total return swaps are disclosed in the Statement of Operations and Changes in Net Assets. Income receivable/payable on interest rate swaps is included in income or expenses on an accruals basis and is reflected in the Statement of Operations

and Changes in Net Assets as Interest received/paid on swaps.

Credit Default Swaps. Premiums paid and received on credit default swap contracts to buy or sell protection against a credit event are accrued on a daily basis and reflected as net income. Future commitments under the swap are valued at market rates. Credit default swap contracts are disclosed in the Statement of Net Assets and the Schedule of Investments. All gains and losses in the value of credit default swaps are disclosed in the Statement of Operations and Changes in Net Assets.

Contracts for Difference. Contracts for difference are contracts entered into between a broker and the Company under which the parties agree to make payments to each other so as to replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference also mirror any corporate actions that take place. Dividends received or paid on contracts for difference are disclosed net in the Statement of Operations and Changes in Net Assets under the caption Derivative Income or Derivative Expenses. When a contract is closed, the Company records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The valuation of contracts for difference is based on the underlying security and they are disclosed in the Statement of Net Assets and the Schedule of Investments. The finance costs paid to the broker for holding the underlying security are included under the caption Finance costs on contracts for difference in the Statement of Operations and Changes in Net Assets. All gains and losses on contracts for difference are disclosed in the Statement of Operations and Changes in Net Assets.

Equity Linked Notes. Equity Linked Notes are valued daily based on the price of the underlying security and are disclosed in the Statement of Net Assets and the Schedule of Investments at market value. The intermediate coupon(s) and final payment at maturity are determined by the change in value of the underlying security. The interest income or "out performance" earned and any gains or losses are disclosed in Statement of Operations and Changes in Net Assets.

Foreign Exchange. The Directors determine the designated currency of each sub-fund. Assets and liabilities as at 30 April 2024 have been translated at the prevailing exchange rates on that date. All transactions denominated in foreign currencies during the year are translated into the subfund's designated currency at the exchange rate prevailing on the day of transaction.

Bonds in Escrow. Bonds included in the Schedule of Investments can be used as collateral against open derivative exposures. Where this is the case, bonds will be escrowed to prevent them from being traded. The following table discloses the bond's quantities in escrow per sub-funds:

		ominated quantity
Sub-fund name	Security description	in escrow
Euro Bond Fund	Germany 1.30% 15/10/2027	58,802

Fund share Transactions. The issue and redemption price per share of each sub-fund is the Net Asset Value per share on the date of trade, subject to the price adjustment policy.

Formation Costs. All formation costs related to the launch of the Company have been amortised. Costs incurred in launching new sub-funds will be charged to current operating expenses.

Income. Dividends on equities are recognised when the security is quoted ex-dividend. Interest is accounted for on an accruals basis.

Zero Coupon Disclosure. Zero coupon bonds and zero coupon money market instruments are disclosed in the Schedule of Investments at a rate reflecting the actual return.

Combined Accounts. The combined financial statements have been presented in USD which is the Company's designated currency and represent the total financial statements of the different sub-funds. Sub-funds stated in currencies other than USD have been converted at exchange rates ruling at the year-end.

NAV Adjustment post year-end. NAV per Share as of 30 April 2024 have been adjusted for the sub-fund Emerging Market Local Currency Debt Fund. The adjusted Net Assets Values are disclosed in the Annual Report and differ from the published NAV per Share as at year-end:

Share class	Published NAV per Share	Re-calculated NAV per Share
A-ACC Shares (USD)	8.022	8.031
A-ACC Shares (EUR)	10.03	10.04
A-MDIST Shares (EUR)	6.223	6.224

Y-ACC Shares (EUR) (EUR/USD hedged)	8.655	8.658
Y-QDIST Shares (EUR)	6.268	6.269

3. Co-Management of Assets

For the purpose of effective management, where the investment policies of the sub-funds so permit, the Board of Directors may choose to co-manage assets of certain sub-funds within the Fidelity Funds range. In such cases, assets of different sub-funds will be managed in common. Fractions may result from the co-management technique. The value of these fractions is based on the market value of the underlying financial instruments in the portfolio of the co-managed sub-funds at the end of the year and is included in the total market value of the portfolio. Considering the insignificance of these amounts, they have been included as "Fractions" in the Schedule of Investments.

4. Investment Management Fees and Other Transactions with the Investment Manager or its Affiliates

Pursuant to the Investment Management Agreement amended and restated on 9 July 2020, FFML is entitled to a monthly investment management fee and asset allocation fee, accrued daily and based on the average Total Net Assets of each sub-fund, at annual rates disclosed in the table below:

v Will be reduced to 0.30% on 1 January 2053 and will be reduced further on 1 January 2061 to 0.21%.		

During the year ended 30 April 2024, the sub-funds invested in the following fund shares: Fidelity ILF - The Sterling Fund - A-ACC-GBP, Fidelity ILF - The US Dollar Fund - A-ACC-USD and Fidelity ILF - The Euro Fund - A-ACC-EUR, all of which have their management fees capped at 0.25% per annum.

Performance Fees

The Investment Manager is entitled to receive an annual performance fee, which is calculated in relation to the net assets of classes of Shares of funds that have cash indices as Market Indices, and which is subject to a high water mark adjusted for the return of the relevant Market Index. The use of a High Water Mark is appropriate in a performance fee methodology for a class of Shares of a fund that seeks to achieve an absolute return annually. The use of a High Water Mark seeks to ensure that investors will not be charged a performance fee until any previous losses are recovered. There is no mechanism to lower the High Water Mark.

The basis for calculation of performance fees is fully explained in the Prospectus that all investors should read before investing. The relevant performance fee rates, hurdle rates and comparative indices for each sub-fund are as follows:

Sub-fund name	Performance fee	Hurdle rate	Comparative Index
Absolute Return Asian Equity Fund	15%	N/A	Secured Overnight Financing Rate
Absolute Return Global Equity Fund	15%	N/A	Secured Overnight Financing Rate
Absolute Return Multi Strategy Fund	10%	N/A	Secured Overnight Financing Rate

The following table discloses the performances fees for each share class for the year:

Sub-fund name	Class of Shares	Class Currency	Performance Fees	% of AUM
Absolute Return Global Equity Fund	A-PF-ACC Shares (USD)	USD	226,115	0.65
Absolute Return Global Equity Fund	A-PF-ACC Shares (EUR) (EUR/USD hedged)	EUR	221,312	0.44

Absolute Return Global Equity Fund	Y-PF-ACC Shares (USD)	USD	304,229	0.78
Absolute Return Global Equity Fund	Y-PF-ACC Shares (EUR) (EUR/USD hedged)	EUR	116,265	0.48

During the period under review, none of the Class of Shares of Absolute Return Asian Equity Fund and Absolute Return Multi Strategy Fund were paid performance fees.

Others

Class C Shares are subject to an annual distribution fee of up to 1.00% of the Net Asset Value of the relevant class. Class D shares are subject to an annual distribution fee of up to 0.50% of the Net Asset Value of the relevant class. Class E shares are subject to an annual distribution fee of up to 0.75% of the Net Asset Value of the relevant class. These fees are accrued daily and payable quarterly to FID. The Reserved Funds' classes of shares may only be acquired by investors who are either Undertakings for Collective Investment or investors whose assets are held in accounts managed by FIL or its affiliates. Expenses and charges, excluding investment management fees, administration expenses, government taxes and custodian fees for such classes of shares, will be charged to, and paid directly by, FIL and its affiliates. The investment management fees, administration expenses, government taxes and custodian fees for such classes of shares are charged to the sub-funds but are reimbursed in full by FIL and its affiliates.

FIL and its affiliates may waive any or all of their fees and limit the maximum level of expenses (with certain exceptions) that the sub-funds would be paying. These waivers are voluntary, may be revised at any time and are disclosed under the caption Fees waived in the Statement of Operations and Changes in Net Assets. In addition, FFML may from time to time bear certain expenses of the subfunds, on a discretionary basis, these reimbursements are disclosed under the caption Expense reimbursement in the Statement of Operations and Changes in Net Assets. Certain officers and directors of the Company are also directors, officers or employees of FIL or its affiliates.

FID is a wholly-owned subsidiary of FIL. In performing its activities as General Distributor of the Company, FID is entitled to receive a sales commission on sales of shares in the Company. For the year ended 30 April 2024, FID retained a total of USD 156,500 in sales commissions, the remainder is paid to intermediaries involved in distributing shares.

During the year ended 30 April 2024, the Company did not have transactions with connected persons and did not enter into any soft dollar arrangement.

5. Directors' Fees

Each Director is entitled to an annual fee of EUR 50,000. The Chair is entitled to an annual fee of EUR 100,000. There is an additional attendance fee of EUR 5,000 for each meeting attended. Directors who are employed by FIL or any of its subsidiaries have waived their fees for the period ended 30 April 2024. The total fees earned by the Directors in respect of services rendered for the year ended 30 April 2024 was USD 456,790.

6. Securities Lending

As at 30 April 2024, the Company lent securities having a value of USD 728,187,492 and received collateral with a market value of USD 768,246,297. During the year ended 30 April 2024, the Company paid USD 1,603,339 to the securities lending agents in relation to the securities lent. With respect to securities lending transactions, the Company will generally require the borrower to post collateral representing, at any time during the lifetime of the agreement, at least 105% of the total value of the securities lent. The following table discloses the breakdown of the total value of securities on loan, by sub-fund, as at 30 April 2024:

7. Taxation

The Company is not liable to any Luxembourg taxes on income or on realised or unrealised capital gains, nor to any Luxembourg withholding tax. The sub-funds are subject to an annual subscription tax of 0.05% on Equity, Equity Income, Asset Allocation, Multi Asset, SMART, Bond, Fixed-Term Bond, Fidelity Lifestyle Funds and Institutional Reserved Funds Class Y Shares, 0.01% on Cash, Reserved, Class P, R, X and I Shares, and 0.00% on Index tracker Funds, calculated and payable quarterly on the Net Assets of the sub-fund on the last day of each calendar quarter.

Foreign capital gains, dividends and interest may be subject to capital gain and withholding taxes or other taxes imposed by the country of origin concerned and such taxes may not be recoverable by the Company or its Shareholders. Where there is a reasonable likelihood that a liability will crystallise, the tax payable on the unrealised gain is provided for in the NAV.

8. Transaction Fees

Transaction fees are fees paid to brokers when buying and selling equities, CFD's, futures, options and exchange traded funds. Transaction fees are generally included in the costs of investments that are part of the realised and unrealised gain/(loss) in the Statement of Operations and Changes in Net Assets. A portion of the transaction fees are included in the custody fees in the Statement of Operations and Changes in Net Assets. Transactions fees on Bonds and Swaps are not disclosed as they are included in the spread.

For the year ended 30 April 2024, these transaction fees amount to:

9. Equalisation

Income equalisation arrangements are applied to all share classes (accumulating and distributing), across all sub-funds. For distributing shares, these arrangements are intended to ensure that the income per share which is distributed in respect of a distribution period is not affected by changes in the number of shares in issue during that period. The calculation of equalisation is based on net investment income. All equalisation amounts are disclosed in the Statement of Operations and Changes in Net Assets.

10. Dividend Payments

The following dividend payments were made during the year ended 30 April 2024:

Sub-fund name	Div per Share	Ex-div date	Sub-fund name	Div per Share	Ex-div date

19. Claims for Discriminatory Withholding Taxes within the European Union

Investment funds are generally subject to local withholding taxes on receipt of cross-border payments of dividends throughout Europe. However, European Court of Justice and European Free Trade Association Court decisions support a tax discrimination claim where EU or European Economic Area ("EEA") countries impose such withholding taxes on cross-border payments at rates higher than the withholding tax imposed on dividends paid in similar situations to resident investors.

The Board of the Company has therefore authorised the filing of protective claims, based on the EU principle of the freedom of movement of capital within the EU & EEA, against countries where it is believed that withholding taxes may have been unlawfully imposed by individual EU or EEA States on dividend payments to the Company. The Board's decision has been taken exclusively to protect the position of investors in the Company.

The nature of these claims is complex and subject to each jurisdiction's local statute of limitations and procedural requirements. Consequently, these claims may be subject to lengthy litigation, and at the current time there is no certainty whether all the protective claims will ultimately be successful and whether or how much withholding tax will ultimately be recovered in each of the jurisdictions. During the year ended 30 April 2024, no reclaims were received. The Withholding tax reclaims receivable are included in the Dividend and interest receivable in the Statements of Net Assets.

20. Statement of Changes in Investments

A list for each sub-fund, specifying for each investment the total purchases and sales which occurred during the year under review, may be obtained free of charge from the Registered Office of the Company or from any of the companies registered as Distributors of the Company. It is possible to receive information about the full holdings of the sub-funds in which you invest, at any point in time during the year. This is available upon request, by contacting your usual Fidelity Representative.

21. Rates of Exchange

The USD exchange rates as at 30 April 2024 are noted below. For the Chinese Renminbi currency, please note that the offshore rate is applied. RMB is a colloquial reference to the Chinese Renminbi, which is also know internationally as the Chinese Yuan ('CNY'). Whilst the CNY is traded both onshore in China and offshore (primarily in Hong Kong), it is the same currency although currently traded at different rates. The offshore rate for trading CNY is generally referred to as 'CNH'. The CNH rate will be used when determining the value of the Shares of a fund as well as for hedging purposes and should be read as the base currency of China RMB Bond Fund in the whole report.

Currency	Exchange rate	Currency	Exchange rate
Australian dollar (AUD)	1.540951	Nigerian naira (NGN)	1,365
Brazilian real (BRL)	5.1777	Norwegian krone (NOK)	11.08335

To the Shareholders of Fidelity Funds 2a, rue Albert Borschette B.P. 2174 L-1246 Luxembourg

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Opinion

We have audited the financial statements of Fidelity Funds (the "Company") and of each of its sub-funds, which comprise the statement of net assets and the schedule of investments as at 30 April 2024 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its sub-funds as at 30 April 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the réviseur d'entreprises agréé for the Audit of the Financial Statements" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the Financial Statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Deloitte.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
 Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of the Board of Directors of the Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the réviseur d'entreprises agréé to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the réviseur d'entreprises agréé. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and
 whether the financial statements represent the underlying transactions and events in a manner that achieves fair
 presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, Cabinet de révision agréé

Laurent Fedrigo, *Réviseur d'entreprises agréé* Partner

Luxembourg, 7 August 2024

Unaudited Supplementary Information

Global Market Risk Exposure

The Board of Directors of the Company has decided to adopt the commitment approach to determine the global market risk exposure for the Company, except for the below mentioned sub-funds:

The global market risk exposure information for the year ending 30 April 2024 is as follows:

	Global Risk calculation			VaR	Lowest utilisation of VaR	Highest utilisation of VaR	Average utilisation of VaR	Average level of leverage reached during
Sub-Fund	Method	VaR model	Reference Portfolio	limit	limit	limit	limit	the year
Strategic European Fund	Relative VaR	Monte Carlo Simulation	100% MSCI Europe Index	150%	33.05%	48.35%	40.53%	57.33%
Global Multi Asset Defensive Fund	Absolute VaR	Monte Carlo Simulation	N/A	8%	30.17%	53.56%	37.34%	255.36%
Multi Asset Dynamic Inflation Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	35.02%	65.03%	52.72%	308.39%
Emerging Market Total Return Debt Fund	Relative VaR	Monte Carlo Simulation	50% JP Morgan GBI-EM Global Diversified Composite 25% JP Morgan CEMBI Broad Diversified 25% JP Morgan EMBI Global	150%	64.03%	91.61%	75.65%	149.87%
Flexible Bond Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	26.43%	48.64%	35.85%	302.90%
Structured Credit Income Fund	Absolute VaR		N/A	20%	1.89%	6.18%	3.97%	29.77%
Sustainable Strategic Bond Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	20.35%	37.96%	27.83%	208.62%
Multi Asset Target Income 2024 Fund	Absolute VaR	Monte Carlo Simulation	N/A	8%	3.96%	51.90%	22.18%	163.53%
Absolute Return Global Equity Fund	Absolute VaR	Monte Carlo Simulation	N/A	9.5%	33.06%	54.03%	46.31%	212.61%
Absolute Return Global Fixed Income Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	16.26%	30.23%	23.77%	285.36%
Absolute Return Multi Strategy Fund	Absolute VaR	Monte Carlo Simulation	N/A	20%	3.56%	11.49%	6.88%	252.32%

For the above mentioned sub-fund, the global exposure is calculated and monitored daily by using the Value at Risk (VaR) calculation methodology. Monte Carlo Simulation: 5000 Simulations, 99% Confidence, 20 days holding period.

EU Securities Financing Transactions Regulation

The Securities Financing Transaction Regulations (SFTR), which came into effect on the 13 January 2017, requires further transparency regarding the use of securities financing transactions.

The Company may use total return swaps or other financial derivative instruments with similar characteristics to meet the investment objective of the Company.

The Company used contracts for difference (CFD), total return swap (TRS) and securities lending for the year ended 30 April 2024.

The top 10 counterparties are disclosed in note 6 for the securities lending, in note 15 for TRS and in note 18 for CFD.

As at 30 April 2024, there was only collateral received from collateral issuers (governments and international institutions) for securities lending as is show in note 6.

Assets engaged in securities financing transactions as at 30 April 2024

The assets engaged, expressed in absolute value and as a proportion of the net assets, by category of securities financing transactions as at 30 April 2024 amounted to:

The assets engaged in securities lending are disclosed in note 6.

Shareholders Rights Directive II

On 20 August 2019, the Grand Ducal Law of 1 August 2019 amended the Law of 24 May 2011 on the exercise of certain shareholder rights. This law transposes, for Luxembourg, the Directive (EU) 2017/828 (the Shareholders' Rights Directive II). It entered into force on 24 August 2019.

The information on the Portfolio turnover ratio (PTR) and the Portfolio turnover cost (PTC) are disclosed in the fund factsheet except for the 1 sub-fund below. SRDII does not define a methodology for these values; ours is as follows: PTR = (purchases of securities + sales of securities) minus (subscriptions of units + redemptions of units), divided by average fund value over the prior 12 months multiplied by 100. Any funds' trading in Fidelity Institutional Liquidity Funds is excluded from the PTR calculation. PTC = PTR (capped at 100%) x transaction cost, where transaction cost is calculated as ex-post (i.e. prior 12 months) MiFID disclosure of portfolio transaction costs minus implicit costs.

The risks factors are available in the section Risk Descriptions of the prospectus.

Sub-fund name	Status period	PTR %	PTC %
Greater China Fund II	01/05/23 - 30/04/24	196.22	0.31

For French residents only

For the year under review, the following sub-funds have invested in securities eligible to PEA (Plan d'Épargne en Actions), a French tax wrapping in accordance with article L 221-31 of the French monetary and financial code.

Sub-fund name	% of Net Assets
Sustainable Eurozone Equity Fund	96.82
Italy Fund	96.57
Germany Fund	95.62
Iberia Fund	95.52
Nordic Fund	94.58

For Hong Kong residents only

The Manager and/or the Investment Manager may enter into trades for the account of a Sub-Fund with: (i) the accounts of other clients managed by the Manager, the Investment Manager or its affiliates; or (ii) their house accounts (i.e., accounts owned by the Manager, the Investment Manager or any of its connected persons over which it can exercise control and influence) ("cross-trades"). Such cross-trades will only be undertaken in accordance with the relevant requirements promulgated by the relevant authorities. During the year ended 30 April 2024, the Company did not enter into any cross trade.

For UK residents only

The affairs of the Company have been conducted to ensure as far as possible that United Kingdom Reporting Fund Status will be granted for the period of these accounts with respect to the sub-funds and Share classes that are registered in the United Kingdom. With respect to UK registered sub-funds and Share classes in existence prior to the introduction of the new regime the Company has applied to the UK Inland Revenue to transition into the new regime and the UK authorities have given notice that they accept this entry. Moreover, the Company has submitted an application for the reporting funds regime for UK registered sub-funds launched during the accounting year ending 30 April 2024. It also submitted or will submit an application for new Share classes in existing or new UK registered sub-funds launched during the accounting period. Reportable income figures are generally available six months after the year end date. The distributing sub-funds and Share classes of the Company that were registered in the UK at the time have also been certified as "distributing funds" by the UK Inland Revenue authorities under the predecessor regime for all accounting periods up to 30 April 2010.

Taxonomy

Where a sub-fund is not identified as subject to the disclosure requirements of article 8 or article 9 of the EU Sustainable Finance Disclosure Regulation, the sub-fund is subject to Article 7 of the EU Taxonomy Regulation (EU) 2020/852 and the investments underlying such a sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Remuneration

Remuneration Disclosure

FIMLUX is a UCITS licensed Management Company and wholly owned subsidiary of FIL. The FIL Group, consisting of FIL and its subsidiaries, has approved a remuneration policy which is applicable to all constituent parts of the group. In addition FIMLUX has its own remuneration policy which closely reflects the FIL group policy. In the implementation of its policy, FIMLUX will ensure good corporate governance and promote sound and effective risk management.

Remuneration Policy

The remuneration policy does not encourage any risk taking which would be inconsistent with the risk appetite of the Company, the Articles of Association or Prospectus. FIMLUX will ensure that any decisions are consistent with the overall business strategy, objectives and the remuneration policy and try to avoid any conflicts of interest which may arise.

Fixed remuneration is defined as base salary plus other benefits. Base salaries are set competitive to local market, based on an individual's specific role and responsibilities as well as their relevant experience, qualifications, performance and overall contribution to FIL. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses and long term incentive awards. These discretionary pay elements are determined by individual performance and overall company affordability (set taking into consideration the financial and non-financial performance and associated business and operational risks).

A summary of the Remuneration Policy is available at https://www.fidelityinternational.com.

FIMLUX will ensure that the remuneration policy is reviewed internally and independently annually. There have not been any material changes to the adopted remuneration policy since the last review performed in December 2023 and the review outcome showed no exception. The Remuneration Policy applies to all employees of FIMLUX, including individuals whose professional activities have a material impact on the risk profile of the Management Company or the UCITS Funds it manages ('UCITS Identified Staff'). The UCITS identified staff include members of the Board of the Management Company, senior management, heads of relevant control functions and heads of other key functions. Individuals are notified of their identification and the implications of this status on at least an annual basis.

Total Remuneration paid to staff of the Management Company and to its delegates for the past financial year	EUR 10,749,276
Of which, fixed remuneration	EUR 8,529,736
Of which, variable remuneration	EUR 2,219,540
Total number of employees of the Management Company and its delegates (as at 31/12/2023)	110
Portion of remuneration that is attributable to the Fund (as at 31/12/2023)	81.81%

Sustainable Finance Disclosure Regulation (Unaudited)

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Funds - America Fund Legal entity identifier: 549300V54PMROCISWF43

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective:__% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48.6% of sustainable investments in economic activities that qualify as with an environmental objective in environmentally sustainable under economic activities that qualify as environmentally sustainable under the EU the EU Taxonomy **Taxonomy** × in economic activities that do not with an environmental objective in qualify as environmentally economic activities that do not qualify as sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy × with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not social objective:__% make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the sub-fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable

investment in an

investment means an

economic activity that contributes to an

environmental or social objective, provided that the investment does not

significantly harm any environmental or social

objective and that the

follow good governance

The **EU Taxonomy** is a

activities. That

investee companies

practices.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) the 86.76 % percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) the 48.6 % percentage of the fund invested in sustainable investments;
- iv) the 23.67 % percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 24.49% the percentage of the fund invested in sustainable investments with a social objective. The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 82.68 % of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 47.9 % of the fund was invested in sustainable investments;
- iv) 20.63 of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 27.06% of the fund was invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 48.6 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Alphabet (A)	Information Technology	4.12%	US
Baker Hughes	Energy	3.88%	US
Wells Fargo &	Financials	3.85%	US

Union Pacific	Industrials	3.4%	US
Norfolk Southern	Industrials	3.22%	US
Salesforce	Information Technology	3.07%	US
Sempra (A)	Utilities	2.64%	US
T-Mobile US	Communication Services	2.63%	US
BJ's Wholesale Club Holdings	Consumer Staples	2.46%	US
Agnico Eagle Mines	Materials	2.12%	CA

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 48.6 % in sustainable investments.

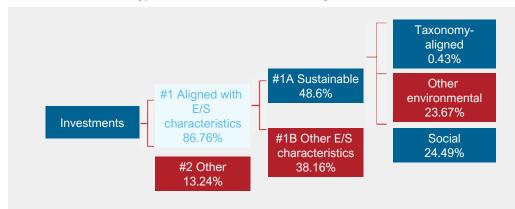

What was the asset allocation?

The fund invested in:

- 1. 86.76 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 48.6 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 23.67 % have an environmental objective (which is not aligned with the EU Taxonomy) and 24.49 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 82.68% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 47.9% in sustainable investments of which 0.2% have an environmental objective (which is aligned with the EU Taxonomy), 20.63% have an environmental objective (which is not aligned with the EU Taxonomy), and 27.06% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	3.05%

	·	

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-

carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

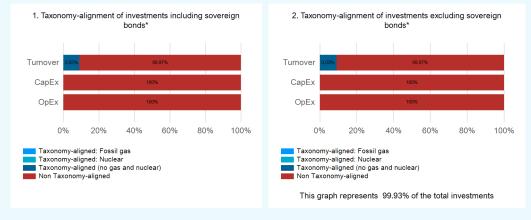

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☑ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.4%

Opex - 0%

Capex - 0 %

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.4%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 23.67 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 24.49 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

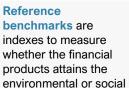

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index? Not applicable

characteristics that they

promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the sub-fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The **EU Taxonomy** is a classification system laid down in Regulation

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) the 75.03 % percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) the 44.04 % percentage of the fund invested in sustainable investments;
- iv) the 12.11 % percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.74% the percentage of the fund invested in sustainable investments with a social objective. The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 74.12% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 36.14% of the fund was invested in sustainable investments;
- iv) 4.63% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.51% of the fund was invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 44.04 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

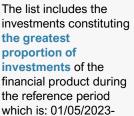

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

30/04/2024

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 44.04 % in sustainable investments.

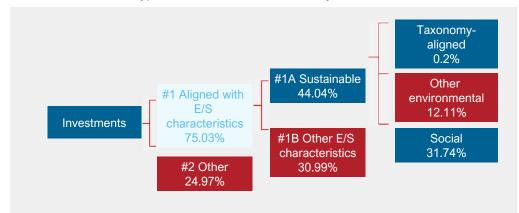

What was the asset allocation?

The fund invested in:

- 1. 75.03 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 44.04 % in sustainable investments of which 0.2 % have an environmental objective (which is aligned with the EU Taxonomy), 12.11 % have an environmental objective (which is not aligned with the EU Taxonomy) and 31.74 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 74.12% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 36.14% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 4.63% have an environmental objective (which is not aligned with the EU Taxonomy), and 31.51% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.2% in sustainable investments with an environmental objective

on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: -turnover reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies.

aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

□ Yes □ In fossil gas ☐ In nuclear energy × No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0 %

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.11 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 31.74 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

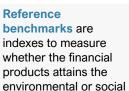

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

significantly harm any environmental or social

objective and that the

follow good governance

The **EU Taxonomy** is a

laid down in Regulation

classification system

investee companies

practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 84.45 % of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 28.45 % of the fund was invested in sustainable investments and;
- iv) 27.52% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 78.61% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 24.53% of the fund was invested in sustainable investments and;
- iv) 22.34% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 28.45 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 28.45 % in sustainable investments.

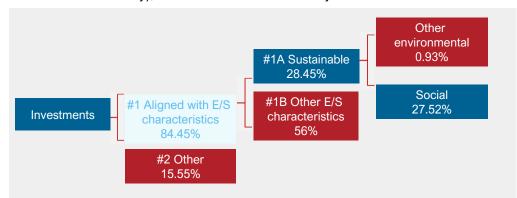

What was the asset allocation?

The fund invested in:

- 1. 84.45 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 28.45 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 0.93 % have an environmental objective (which is not aligned with the EU Taxonomy) and 27.52 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 78.61% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 24.53% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 2.19% have an environmental objective (which is not aligned with the EU Taxonomy), and 22.34% have a social objective.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective

To comply with the EU

Taxonomy, the criteria

on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: -turnover reflecting the share of revenue from green activities of investee companies.

 capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies.

aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

□ Yes □ In fossil gas ☐ In nuclear energy × No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0 %

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0.93 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 27.52 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable investments with × It promoted Environmental/Social (E/S) an environmental objective:__% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 30.2% of sustainable investments in economic activities that qualify as with an environmental objective in environmentally sustainable under economic activities that qualify as the EU Taxonomy environmentally sustainable under the EU **Taxonomy** × in economic activities that do not with an environmental objective in qualify as environmentally economic activities that do not qualify as sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy × with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not social objective:__% make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable

investment in an

investment means an

economic activity that contributes to an

practices.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 74.35% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 30.2% of the fund invested in sustainable investments;
- iv) 5.8% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 24.4% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 30.2% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 11/08/2023-30/04/2024

What was the proportion of sustainability-related investments?

The fund invested 30.2 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 1. 74.35 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 30.2 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 5.8 % have an environmental objective (which is not aligned with the EU Taxonomy) and 24.4 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

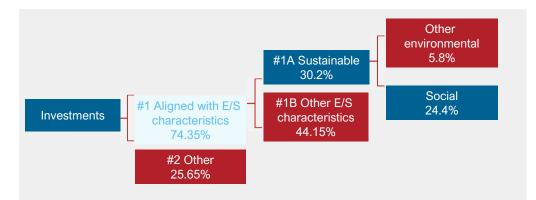

investments in specific

Asset allocation describes the share of

assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

directly enable other activities to make a

Enabling activities

substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have

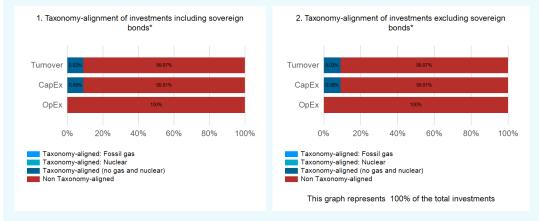

greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies. The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.02%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 5.8 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 24.4 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The **EU Taxonomy** is a classification system laid down in Regulation

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) the 89.99 % percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) the 48.81 % percentage of the fund invested in sustainable investments;
- iv) the 17.57 % percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.24% the percentage of the fund invested in sustainable investments with a social objective. The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 91.48% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 43.8% of the fund was invested in sustainable investments;
- iv) 12.02% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.78% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 48.81 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 48.81 % in sustainable investments.

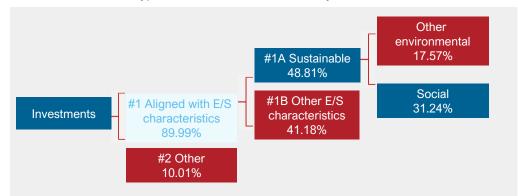

What was the asset allocation?

The fund invested in:

- 1. 89.99 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 48.81 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 17.57 % have an environmental objective (which is not aligned with the EU Taxonomy) and 31.24 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 91.48% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 43.8% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 12.02% have an environmental objective (which is not aligned with the EU Taxonomy), and 31.78% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	1.92%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

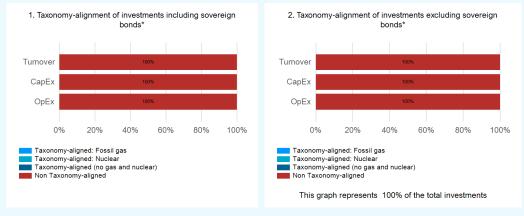

economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0 %

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 17.57 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 31.24 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

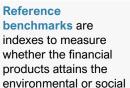

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainable

practices.

(EU) 2020/852

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) the 82.29 % percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) the 30.58 % percentage of the fund invested in sustainable investments;
- iv) the 10.42 % percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 20.16% the percentage of the fund invested in sustainable investments with a social objective. The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 82.8% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 21.26% of the fund was invested in sustainable investments;
- iv) 3.14% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 18.11% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 30.58 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 30.58 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 1. 82.29 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 30.58 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 10.42 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.16 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

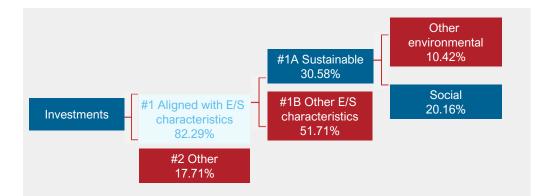

- 1. 82.8% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 21.26% % in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 3.14% have an environmental objective (which is not aligned with the EU Taxonomy), and 18.11% have a social objective.

investments in specific

assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

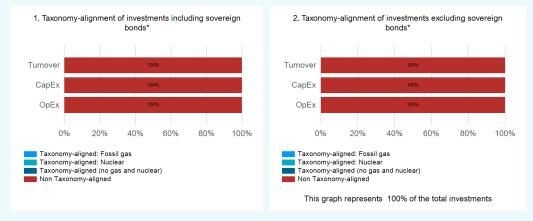

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0 %

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 10.42 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.16 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

(EU) 2020/852

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 77.62% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 17.75% of the fund invested in sustainable investments;
- iv) 7.68% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.75% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 17.75% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 11/08/2023-30/04/2024

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 17.75 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 1. 77.62 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 17.75 % in sustainable investments of which 0.32 % have an environmental objective (which is aligned with the EU Taxonomy), 7.68 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

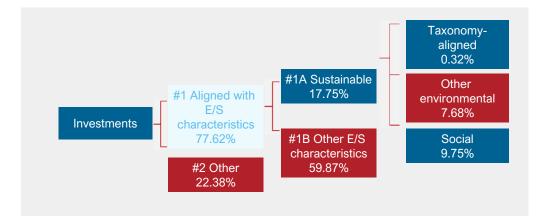

describes the share of

investments in specific

assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.32% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

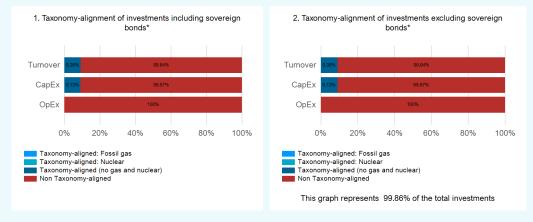

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

□ Yes □ In fossil gas □ In nuclear energy **⋈** No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.35%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 7.68 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.75 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Fidelity Funds - China Innovation Fund

Legal entity identifier: 549300IV1SMG8Q6CJU79

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is a

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 76.88 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 39.01 % of the fund invested in sustainable investments;
- iv) 26.26 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 12.47% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.55% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 34.24% of the fund was invested in sustainable investments;
- iv) 18.11% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 15.23% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 39.01 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 39.01 % in sustainable investments.

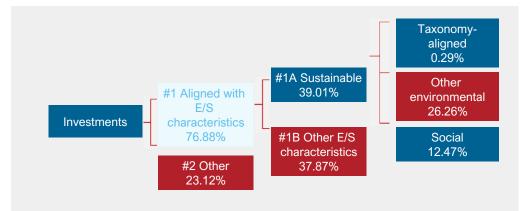

What was the asset allocation?

The fund invested in:

- 1. 76.88 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 39.01 % in sustainable investments of which 0.29 % have an environmental objective (which is aligned with the EU Taxonomy), 26.26 % have an environmental objective (which is not aligned with the EU Taxonomy) and 12.47 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 85.55% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 34.24% in sustainable investments of which 0.91% have an environmental objective (which is aligned with the EU Taxonomy), 18.11% have an environmental objective (which is not aligned with the EU Taxonomy), and 15.23% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.29% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

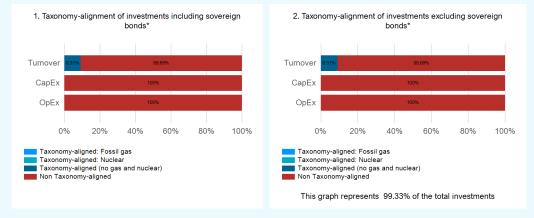

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a
- companies, e.g. for a transition to a green economy.
 operational expenditure (OpEx)

expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.30%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.9%

Opex - 0%

Capex - 0 %

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.9%

Opex - 0%

Capex - 0%

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 26.26 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 12.47 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

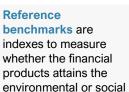

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable

practices.

(EU) 2020/852
establishing a list of
environmentally
sustainable economic
activities. That
Regulation does not
include a list of socially
sustainable economic
activities. Sustainable
investments with an
environmental objective
might be aligned with

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The **EU Taxonomy** is a classification system laid down in Regulation

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 80.57 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 40.12 % of the fund invested in sustainable investments;
- iv) 16.53 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 23.58% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 81.81% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 34.21% of the fund was invested in sustainable investments;
- iv) 13.01% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 21.19% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 40.12 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 40.12 % in sustainable investments.

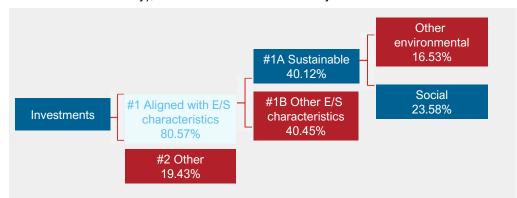

What was the asset allocation?

The fund invested in:

- 1. 80.57 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 40.12 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 16.53 % have an environmental objective (which is not aligned with the EU Taxonomy) and 23.58 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 81.81% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 34.21% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 13.01% have an environmental objective (which is not aligned with the EU Taxonomy), and 21.19% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and

subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

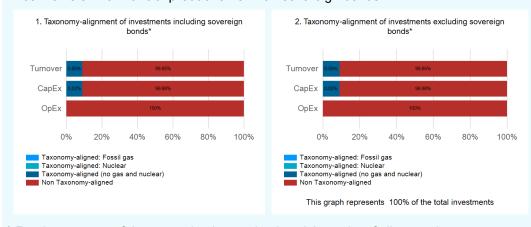

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.03%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0 %

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

. Capex - 0%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 16.53 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 23.58 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.28 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 52.9 % of the fund invested in sustainable investments;
- iv) 21.32 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.58% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 86.51% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 45.87% of the fund was invested in sustainable investments;
- iv) 15.27% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 30.58% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 52.9 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 52.9 % in sustainable investments.

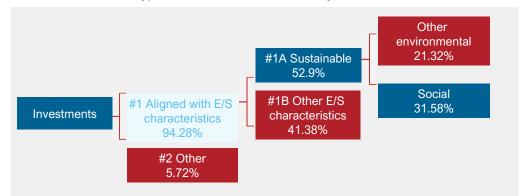

What was the asset allocation?

The fund invested in:

- 1. 94.28 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 52.9 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 21.32 % have an environmental objective (which is not aligned with the EU Taxonomy) and 31.58 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 86.51% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 45.87% in sustainable investments of which 0.02% have an environmental objective (which is aligned with the EU Taxonomy), 15.27% have an environmental objective (which is not aligned with the EU Taxonomy), and 30.58% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

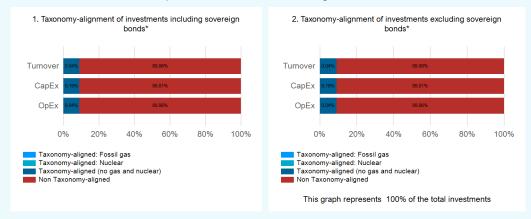

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a
- transition to a green economy. operational expenditure (OpEx) reflecting green

operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

□ Yes □ In fossil gas □ In nuclear energy **⋈** No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.04%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0.1%

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 21.32 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 31.58 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

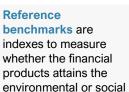

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable

practices.

(EU) 2020/852
establishing a list of
environmentally
sustainable economic
activities. That
Regulation does not
include a list of socially
sustainable economic
activities. Sustainable
investments with an
environmental objective
might be aligned with
the Taxonomy or not.

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The **EU Taxonomy** is a classification system laid down in Regulation

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 96.28 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 78.58 % of the fund invested in sustainable investments;
- iv) 25.54 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 52.87% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 97.8% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 70.08% of the fund was invested in sustainable investments;
- iv) 20.78% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 49.27% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 78.58 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 78.58 % in sustainable investments.

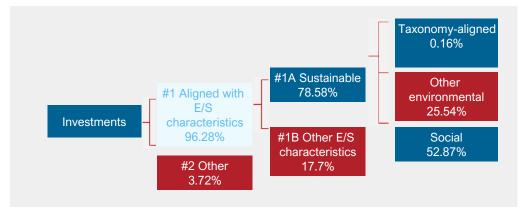

What was the asset allocation?

The fund invested in:

- 1. 96.28 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 78.58 % in sustainable investments of which 0.16 % have an environmental objective (which is aligned with the EU Taxonomy), 25.54 % have an environmental objective (which is not aligned with the EU Taxonomy) and 52.87 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 97.8% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 70.08% in sustainable investments of which 0.02% have an environmental objective (which is aligned with the EU Taxonomy), 20.78% have an environmental objective (which is not aligned with the EU Taxonomy), and 49.27% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Open Ended Fund	Closed Ended Cash Fund	3.66%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.16% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

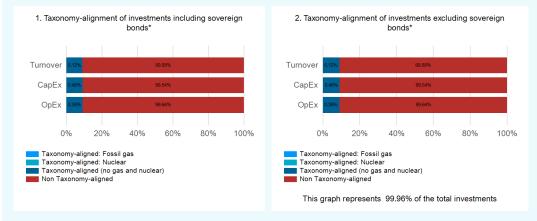

best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

economy.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.05%; Transitional Activity: 0.05%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.2%

Opex - 0.9%

Capex - 0.2%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.2%

Opex - 0.9%

Capex - 0.2%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 25.54 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 52.87 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Fidelity Funds - European Growth Fund

Legal entity identifier: 549300G4OINSKM9K3661

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? No It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and while it did not have as its an environmental objective:__% objective a sustainable investment, it had a proportion of 73.76% of sustainable investments in economic activities that qualify as with an environmental objective in environmentally sustainable under economic activities that qualify as the EU Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not with an environmental objective in qualify as environmentally economic activities that do not qualify as sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy × with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not social objective: % make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 95.6 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 73.76 % of the fund invested in sustainable investments;
- iv) 30.28 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 40.43% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.4% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 58.72% of the fund was invested in sustainable investments;
- iv) 23.40% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.01% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 73.76 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-
30/04/2024

Largest investments	Sector	% Assets	Country
SAP SE	Information Technology	5.09%	DE
Roche Holding AG	Healthcare	4.52%	СН

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 73.76 % in sustainable investments.

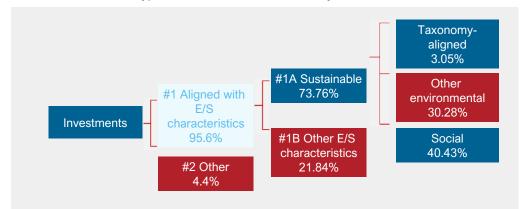

What was the asset allocation?

The fund invested in:

- 1. 95.6 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 73.76 % in sustainable investments of which 3.05 % have an environmental objective (which is aligned with the EU Taxonomy), 30.28 % have an environmental objective (which is not aligned with the EU Taxonomy) and 40.43 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 92.4% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 58.72% in sustainable investments of which 0.31% have an environmental objective (which is aligned with the EU Taxonomy), 23.4% have an environmental objective (which is not aligned with the EU Taxonomy), and 35.01% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Speciality Retail	4.94%
	Textiles & Apparel	1.69%
	Multiline Retail	1.62%

	Electric Utilities	1.26%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 3.05% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

□ Yes	
☐ In fossil gas	☐ In nuclear energy
⊠ No	

Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with the EU

Enabling activities

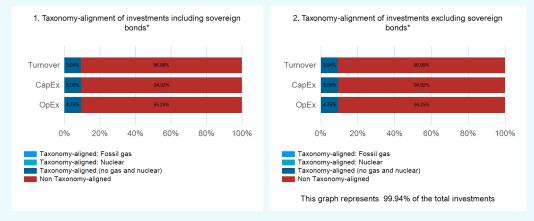

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.71%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 3%

Opex - 3.8%

Capex - 5.6%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 3%

Opex - 3.8%

Capex - 5.6%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 30.28 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 40.43 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

					×	with a social objective
			e sustainable investments with a objective:%		•	romoted E/S characteristics, but did not like any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable

practices.

economic activity that

The **EU Taxonomy** is a classification system laid down in Regulation

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 95.42 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 69.17 % of the fund invested in sustainable investments;
- iv) 30.85 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.57% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.66% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 55.51% of the fund was invested in sustainable investments; and
- iv) 23.02% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 32.21% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 69.17 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 69.17 % in sustainable investments.

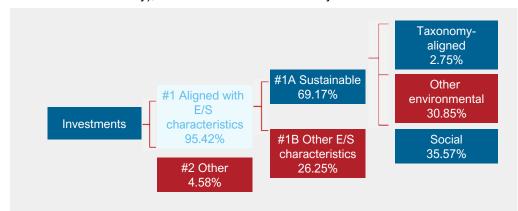

What was the asset allocation?

The fund invested in:

- 1. 95.42 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 69.17 % in sustainable investments of which 2.75 % have an environmental objective (which is aligned with the EU Taxonomy), 30.85 % have an environmental objective (which is not aligned with the EU Taxonomy) and 35.57 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 92.66% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 55.51% in sustainable investments of which 0.28% have an environmental objective (which is aligned with the EU Taxonomy), 23.02% have an environmental objective (which is not aligned with the EU Taxonomy), and 32.21% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

	Electric Utilities	1.29%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.75% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

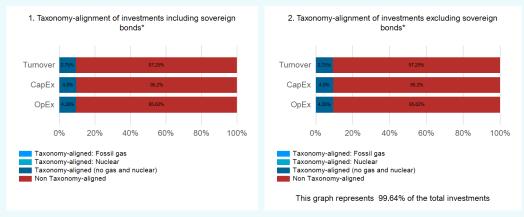

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

□ Yes □ In fossil gas □ In nuclear energy **⋈** No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.42%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.4%

Opex - 1.8%

Capex - 2.7%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.4%

Opex - 1.8%

Capex - 2.7%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 30.85 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 35.57 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

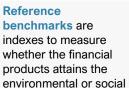

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an

environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is a

Sustainable

practices.

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 91.31 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 54.53 % of the fund invested in sustainable investments;
- iv) 28.24 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 26.18% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 88.11 % of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 51.6 % of the fund was invested in sustainable investments;
- iv) 23.53% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 28.07% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 54.53 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 54.53 % in sustainable investments.

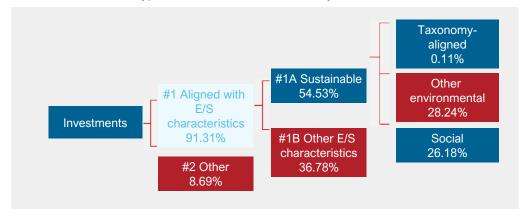

What was the asset allocation?

The fund invested in:

- 1. 91.31 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 54.53 % in sustainable investments of which 0.11 % have an environmental objective (which is aligned with the EU Taxonomy), 28.24 % have an environmental objective (which is not aligned with the EU Taxonomy) and 26.18 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 88.11% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 51.6%% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 23.53% have an environmental objective (which is not aligned with the EU Taxonomy), and 28.07% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies.

M

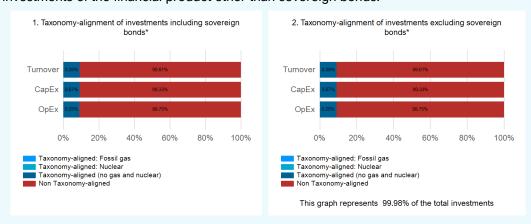

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.11% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.19%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0.4%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0.4%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 28.24 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 26.18 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. The EU Taxonomy is a classification system

investment means an

Sustainable

investment in an

classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 98.26% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 72.07% of the fund invested in sustainable investments;
- iv) 33.7% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 38.1% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 72.07% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

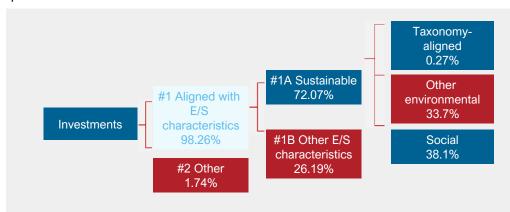

The fund invested 72.07 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 1. 98.26 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 72.07 % in sustainable investments of which 0.27 % have an environmental objective (which is aligned with the EU Taxonomy), 33.7 % have an environmental objective (which is not aligned with the EU Taxonomy) and 38.1 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.27% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

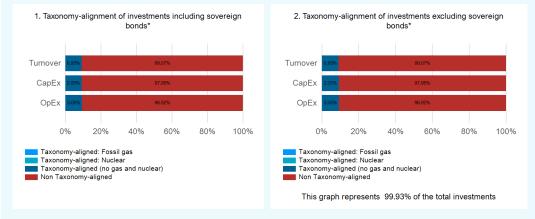

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

economy.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.73%; Transitional Activity: 0.08%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 33.7 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 38.1 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

activities. That

investee companies

practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 79.34 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 33.19 % of the fund invested in sustainable investments and;
- iv) 25.68% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 77.83% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 29.94% of the fund was invested in sustainable investments; and
- iv) 24.7% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 33.19 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 33.19 % in sustainable investments.

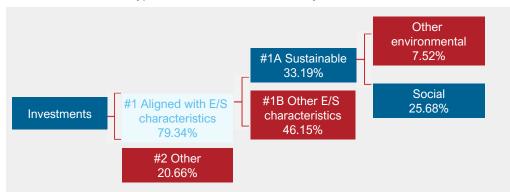

What was the asset allocation?

The fund invested in:

- 1. 79.34 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 33.19 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 7.52 % have an environmental objective (which is not aligned with the EU Taxonomy) and 25.68 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 77.83% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 29.94% in sustainable investments of which 0.06% have an environmental objective (which is aligned with the EU Taxonomy), 5.18% have an environmental objective (which is not aligned with the EU Taxonomy), and 24.7% have a social objective.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Financials	Diversified Financial Services	43.66%
	Commercial Banks	34.01%
	Insurance	19.1%
Industrials	Professional Services	1.09%
Information Technology	It Services	0.31%
Open Ended Fund	Closed Ended Cash Fund	2.27%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

economy.

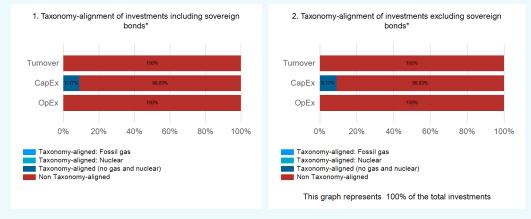

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0.1%

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 7.52 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 25.68 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Product name:

Legal entity identifier: 549300F4JJCOV7BCT788

Fidelity Funds - Global Focus Fund

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? No It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective:__% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.29% of sustainable investments in economic activities that qualify as with an environmental objective in environmentally sustainable under economic activities that qualify as the EU Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not with an environmental objective in qualify as environmentally economic activities that do not qualify as sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy × with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not social objective: % make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable

investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 86.65 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 64.29 % of the fund invested in sustainable investments;
- iv) 34.51 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 29.59% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 83.06% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 54.69% of the fund was invested in sustainable investments;
- iv) 30.61% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 23.97% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 64.29 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the		
financial product during the reference period which is: 01/05/2023- 30/04/2024		

Largest investments	Sector	% Assets	Country
Berkshire Hathaway (B)	Financials	4.22%	US
Microsoft	Information Technology	4.03%	US

Norfolk Southern	Industrials	1.88%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 64.29 % in sustainable investments.

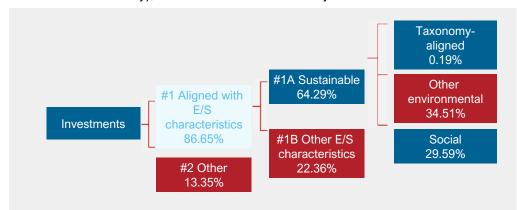

What was the asset allocation?

The fund invested in:

- 1. 86.65 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 64.29 % in sustainable investments of which 0.19 % have an environmental objective (which is aligned with the EU Taxonomy), 34.51 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.59 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 83.06% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 54.69% in sustainable investments of which 0.1% have an environmental objective (which is aligned with the EU Taxonomy), 30.61% have an environmental objective (which is not aligned with the EU Taxonomy), and 23.97% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	0.49%
Consumer Discretionary	Multiline Retail	5.44%
	Auto Components	1.11%
	Household Durables	1.07%
	Textiles & Apparel	0.98%

	It Services	1.46%
	Electronic Equipment Instruments & Components	0.29%
Materials	Chemicals	1.54%
Open Ended Fund	Closed Ended Cash Fund	0.56%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.19% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

directly enable other activities to make a substantial contribution to an environmental

Enabling activities

objective.

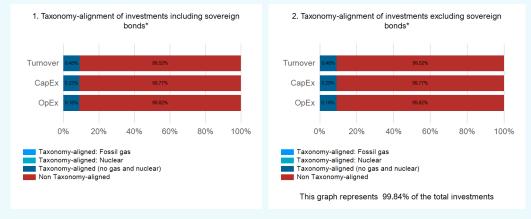

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.24%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.3%

Opex - 0.1%

Capex - 0.3%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.3%

Opex - 0.1%

Capex - 0.3%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 34.51 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.59 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Fidelity Funds - Global Technology Fund

Legal entity identifier: 549300TVS03JI4WXGJ44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? No It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and while it did not have as its an environmental objective:__% objective a sustainable investment, it had a proportion of 59.62% of sustainable investments in economic activities that qualify as with an environmental objective in environmentally sustainable under economic activities that qualify as the EU Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not with an environmental objective in qualify as environmentally economic activities that do not qualify as sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy × with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not social objective: % make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.44 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 59.62 % of the fund invested in sustainable investments;
- iv) 46.28 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.25% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 91.02% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 54.4% of the fund was invested in sustainable investments;
- iv) 38.57% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 15.6% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 59.62 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 59.62 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 1. 94.44 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 59.62 % in sustainable investments of which 0.08 % have an environmental objective (which is aligned with the EU Taxonomy), 46.28 % have an environmental objective (which is not aligned with the EU Taxonomy) and 13.25 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

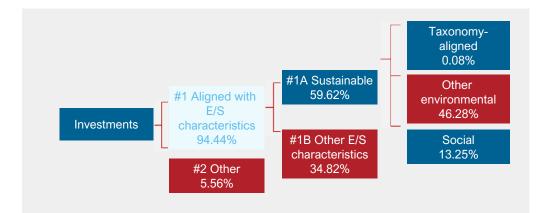

- 1. 91.02% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 54.4% in sustainable investments of which 0.22% have an environmental objective (which is aligned with the EU Taxonomy), 38.57% have an environmental objective (which is not aligned with the EU Taxonomy), and 15.6% have a social objective.

describes the share of

investments in specific

assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.08% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

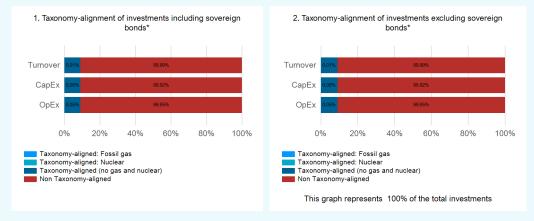

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.3%

Opex - 0.4%

Capex - 0.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.3%

Opex - 0.4%

Capex - 0.1%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 46.28 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 13.25 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Legal entity identifier: 5493007VVU2XBPB4GZ92

Fidelity Funds - Global Thematic Opportunities Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable

practices.

(EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

investment in an

contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

investment means an

economic activity that

The **EU Taxonomy** is a classification system laid down in Regulation

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.29 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 70.89 % of the fund invested in sustainable investments;
- iv) 39.67 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 28.95% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 81.36% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 59.89% of the fund was invested in sustainable investments;
- iv) 25.31% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.59% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 70.89 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 70.89 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 1. 94.29 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 70.89 % in sustainable investments of which 2.28 % have an environmental objective (which is aligned with the EU Taxonomy), 39.67 % have an environmental objective (which is not aligned with the EU Taxonomy) and 28.95 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 81.36% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 59.89% in sustainable investments of which 2.99% have an environmental objective (which is aligned with the EU Taxonomy), 25.31% have an environmental objective (which is not aligned with the EU Taxonomy), and 31.59% have a social objective.

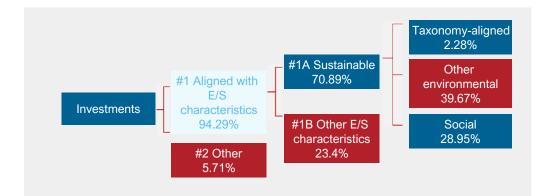

describes the share of

investments in specific

assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing,

storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

Taxonomy-aligned activities are expressed as a share of: -turnover reflecting the share of revenue from green activities of investee companies.

best performance.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

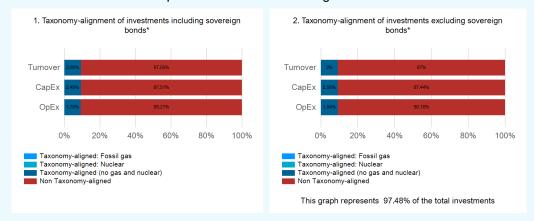

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.28% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.81%; Transitional Activity: 0.06%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The **EU Taxonomy** is a classification system laid down in Regulation

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 80.82 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 33.88 % of the fund invested in sustainable investments;
- iv) 20.66 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.22% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.45% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 35.51% of the fund was invested in sustainable investments;
- iv) 16.30% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 19.2% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 33.88 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024
00/0 //2021

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 33.88 % in sustainable investments.

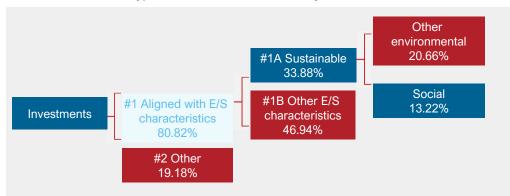

What was the asset allocation?

The fund invested in:

- 1. 80.82 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 33.88 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 20.66 % have an environmental objective (which is not aligned with the EU Taxonomy) and 13.22 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 85.45% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 35.51% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 16.3% have an environmental objective (which is not aligned with the EU Taxonomy), and 19.2% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with the EU

Taxonomy, the criteria

for fossil gas

Enabling activities

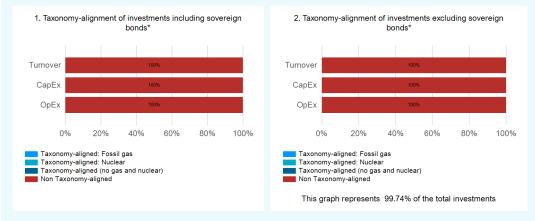

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.3%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.3%

Opex - 0%

Capex - 0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.66 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 13.22 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Funds - Greater China Fund

Legal entity identifier: 5493005EHFIWJMR7DT21

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable

practices.

(EU) 2020/852
establishing a list of
environmentally
sustainable economic
activities. That
Regulation does not
include a list of socially
sustainable economic
activities. Sustainable
investments with an
environmental objective
might be aligned with
the Taxonomy or not.

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The **EU Taxonomy** is a classification system laid down in Regulation

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 81.3 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 33.97 % of the fund invested in sustainable investments;
- iv) 20.88 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.09% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 86% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 35.93% of the fund was invested in sustainable investments;
- iv) 16.33% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);and
- v) 19.59% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 33.97 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 33.97 % in sustainable investments.

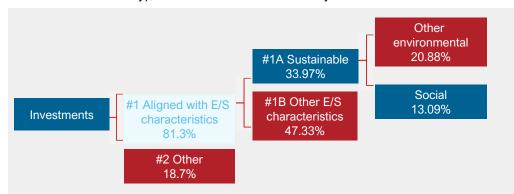

What was the asset allocation?

The fund invested in:

- 1. 81.3 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 33.97 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 20.88 % have an environmental objective (which is not aligned with the EU Taxonomy) and 13.09 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 86% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 35.93% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 16.33% have an environmental objective (which is not aligned with the EU Taxonomy), and 19.59% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with the EU

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

Taxonomy-aligned activities are expressed as a share of:

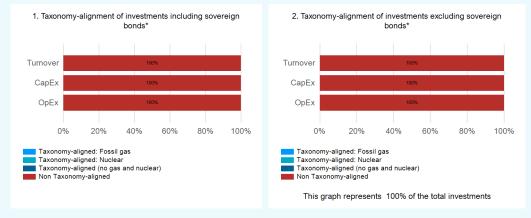

best performance.

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.2%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.2%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.88 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 13.09 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

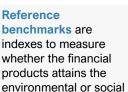

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

(EU) 2020/852
establishing a list of
environmentally
sustainable economic
activities. That
Regulation does not
include a list of socially
sustainable economic
activities. Sustainable
investments with an
environmental objective

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The **EU Taxonomy** is a classification system laid down in Regulation

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 86.39 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 56.95 % of the fund invested in sustainable investments;
- iv) 41.92 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 11.95% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 88.83% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 55.6% of the fund was invested in sustainable investments;
- iv) 32.27% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 16.96% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 56.95 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 56.95 % in sustainable investments.

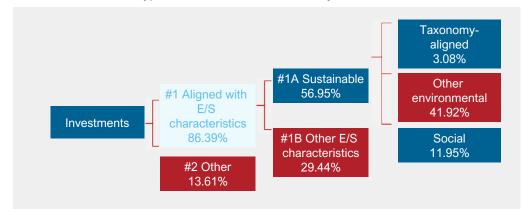

What was the asset allocation?

The fund invested in:

- 1. 86.39 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 56.95 % in sustainable investments of which 3.08 % have an environmental objective (which is aligned with the EU Taxonomy), 41.92 % have an environmental objective (which is not aligned with the EU Taxonomy) and 11.95 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 88.83% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 55.6% in sustainable investments of which 6.37% have an environmental objective (which is aligned with the EU Taxonomy), 32.27% have an environmental objective (which is not aligned with the EU Taxonomy), and 16.96% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

	Independent Power Producers & Energy Traders	1.96%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 3.08% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

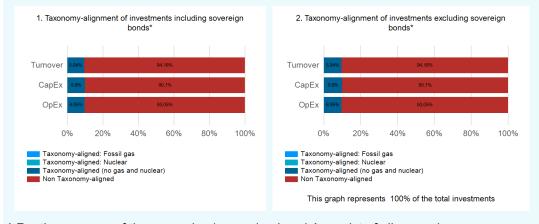

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies. The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 3.14%; Transitional Activity: 0.16%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 2%

Opex - 5.3%

Capex - 3.2%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 2%

Opex - 5.3%

Capex - 3.2%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 41.92 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 11.95 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

The **EU Taxonomy** is a

investee companies

practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No referencebenchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 86.59 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 47.84 % of the fund invested in sustainable investments;
- iv) 12.78 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.06% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 84.84% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 47% of the fund was invested in sustainable investments;
- iv) 6.73% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 40.26% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 47.84 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 47.84 % in sustainable investments.

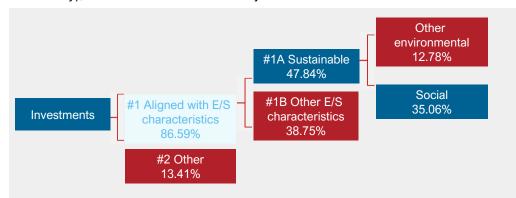

What was the asset allocation?

The fund invested in:

- 1. 86.59 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 47.84 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 12.78 % have an environmental objective (which is not aligned with the EU Taxonomy) and 35.06 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 84.84% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 47% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 6.73% have an environmental objective (which is not aligned with the EU Taxonomy), and 40.26% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

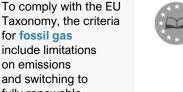

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

Enabling activities directly enable other

and waste management

rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energ
×	No	

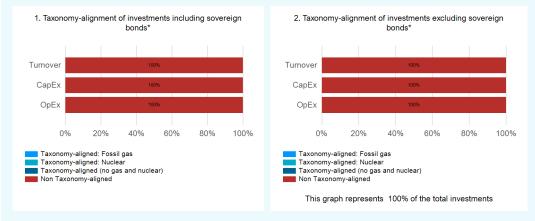

activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.25%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.3%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.3%

Opex - 0%

Capex - 0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.78 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 35.06 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Funds - Italy Fund Legal entity identifier: 549300KCMWWQDPOVF030

Environmental and/or social characteristics

Dic	Did this financial product have a sustainable investment objective?						
•] '	Yes	•	×]	No
			sustainable investments with ironmental objective:%	×	cha obje prop	ra ect po	noted Environmental/Social (E/S) cteristics and while it did not have as its ive a sustainable investment, it had a rtion of 29.95% of sustainable ments

			sustainable investments with a objective:%				noted E/S characteristics, but did not any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 72.65 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 29.95 % of the fund invested in sustainable investments;
- iv) 15.81 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.79% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 78.26% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 28.74% of the fund was invested in sustainable investments;
- iv) 15.01% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.36% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and vi) 9.37% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 29.95 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 29.95 % in sustainable investments.

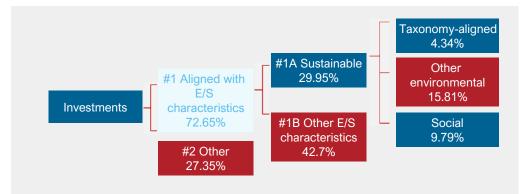

What was the asset allocation?

The fund invested in:

- 1. 72.65 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 29.95 % in sustainable investments of which 4.34 % have an environmental objective (which is aligned with the EU Taxonomy), 15.81 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.79 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 78.26% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 28.74% in sustainable investments of which 4.36% have an environmental objective (which is aligned with the EU Taxonomy), 15.01% have an environmental objective (which is not aligned with the EU Taxonomy), and 9.37% have a social objective.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations

on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

and waste management

Enabling activities

rules.

directly enable other activities to make a

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 4.34% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	□ In nuclear energy
×	No	

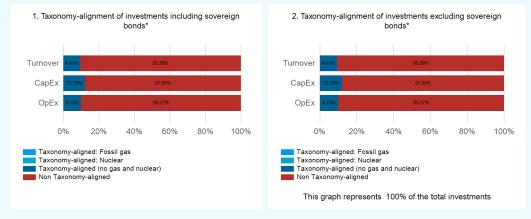

substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.78%; Transitional Activity: 0.04%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover -4.5%

Opex - 7.2%

Capex - 10.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover -4.5%

Opex - 7.2%

Capex - 10.1%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 15.81 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.79 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 56.6% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 23.85% of the fund invested in sustainable investments;
- iv) 17.87% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 5.98% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 23.85% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 23.85 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 1. 56.6 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 23.85 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 17.87 % have an environmental objective (which is not aligned with the EU Taxonomy) and 5.98 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

are activities for which low-carbon alternatives are not yet available and among others have

Transitional activities

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a

economy.
- operational
expenditure (OpEx)

transition to a green

reflecting green operational activities of investee companies.

\bigcirc

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

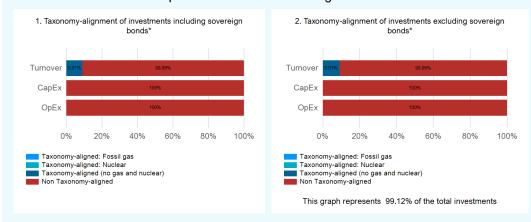

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 17.87 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 5.98 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

practices.

investment in an

investment means an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 80.58% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 37.18% of the fund invested in sustainable investments;
- iv) 28.7% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 8.23% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 37.18% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

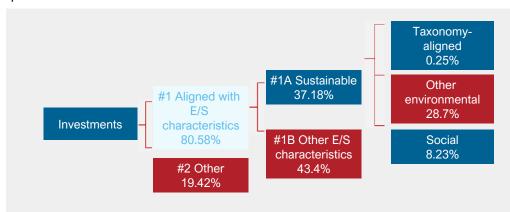

The fund invested 37.18 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 1. 80.58 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 37.18 % in sustainable investments of which 0.25 % have an environmental objective (which is aligned with the EU Taxonomy), 28.7 % have an environmental objective (which is not aligned with the EU Taxonomy) and 8.23 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.25% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include

comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

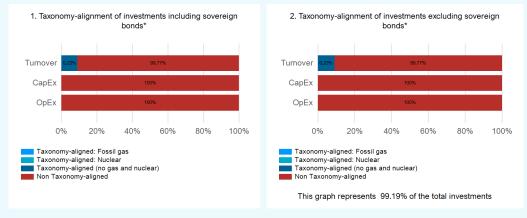

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 28.7 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 8.23 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

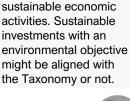

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

The **EU Taxonomy** is a classification system laid down in Regulation

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 88.59 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 32.76 % of the fund invested in sustainable investments;
- iv) 23.24 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.28% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 81.89% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 32.35% of the fund was invested in sustainable investments;
- iv) 18.77% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.14% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 32.76 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 32.76 % in sustainable investments.

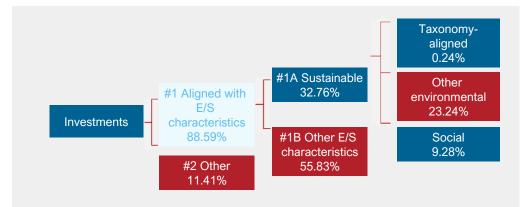

What was the asset allocation?

The fund invested in:

- 1. 88.59 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 32.76 % in sustainable investments of which 0.24 % have an environmental objective (which is aligned with the EU Taxonomy), 23.24 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.28 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 81.89% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 32.35% in sustainable investments of which 0.44% have an environmental objective (which is aligned with the EU Taxonomy), 18.77% have an environmental objective (which is not aligned with the EU Taxonomy), and 13.14% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.24% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

×	Yes	
	☐ In fossil gas	☑ In nuclear energy
	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution

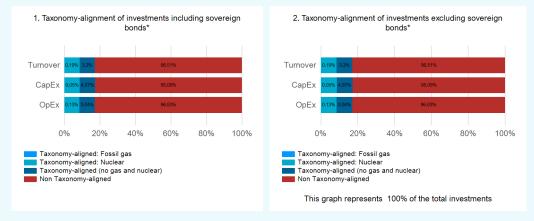

to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure

- (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.34%; Transitional Activity: 0.61%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.8%

Opex - 2%

Capex - 3.8%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.8%

Opex - 2%

Capex - 3.8%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 23.24 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.28 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

(EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 65.35 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 18.09 % of the fund invested in sustainable investments;
- iv) 8.52 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.45% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 61.08% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 20.15% of the fund was invested in sustainable investments;
- iv) 6.22% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.9% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 18.09 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation

describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 18.09 % in sustainable investments.

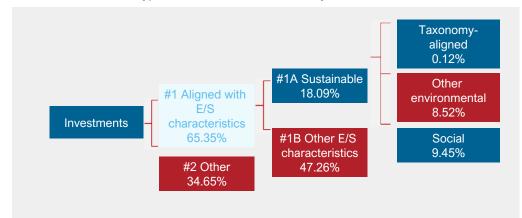

What was the asset allocation?

The fund invested in:

- 1. 65.35 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 18.09 % in sustainable investments of which 0.12 % have an environmental objective (which is aligned with the EU Taxonomy), 8.52 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.45 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 1. 61.08% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 20.15% in sustainable investments of which 0.03% have an environmental objective (which is aligned with the EU Taxonomy), 6.22% have an environmental objective (which is not aligned with the EU Taxonomy), and 13.9% have a social objective.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

economy.

M

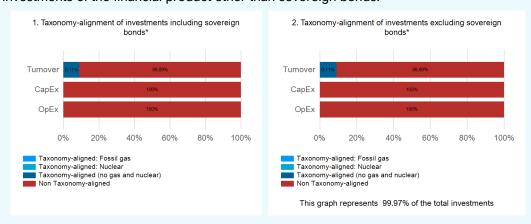

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.12% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 8.52 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.45 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

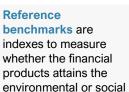

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The **EU Taxonomy** is a classification system laid down in Regulation

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 79.12 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 28.07 % of the fund invested in sustainable investments;
- iv) 12.72 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 15.35% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 84.23% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 29.61% of the fund was invested in sustainable investments;
- iv) 6.34% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 22.75% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 28.07 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iii) Exclusions We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

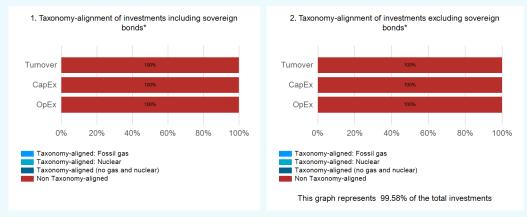

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

□ Yes □ In fossil gas □ In nuclear energy **⋈** No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.5%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.5%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.72 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 15.35 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

- 1. The fund invested in securities of issuers with favourable ESG characteristics.
- 2. The fund made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Environmental and/or social characteristics

Product name:

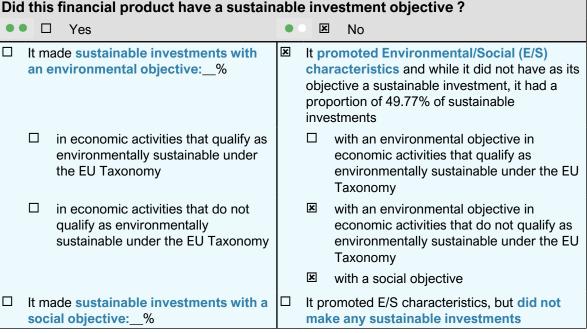

Legal entity identifier: 549300XNOLBE172DCX03

Fidelity Funds - Sustainable Asia Equity Fund

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 91.92 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 49.77 % of the fund invested in sustainable investments;
- iv) 19.81 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 29.96% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.16% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 42.79% of the fund was invested in sustainable investments;
- iv) 12.11% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 30.68% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 49.77 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.
