

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

The Fund’s objective is to achieve medium-term capital growth.

The Fund is actively managed, and seeks to achieve its objective by investing in financial derivative instruments (principally futures contracts) in order to gain exposure to the Investment Universe. The Investment Universe is comprised of currencies, government bonds and stocks or stock indices. The Fund’s exposure to the Investment Universe is based upon the application of a proprietary trading strategy.

In addition, the Fund may also invest in money market instruments (such as treasury bills) for cash management purposes.

The Fund may use investment techniques to protect the value of the assets of the Fund against changes in currency exchange rates.

Any income or gains of the Fund (net of expenses) will be accumulated and reinvested into the assets of the Fund.

Investors can buy, sell or switch shares on any day on which banks in Ireland and London are open for regular business (“Dealing Day”). Applications must be received by the Administrator by 12 noon (Irish time) on the relevant Dealing Day.

For full investment objective and policy details, please refer to the “Investment Objective” and “Investment Policies” sections in the Fund’s supplement (the “Supplement”).

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money in the short term (within 3 years). The Fund should be viewed as a medium or longer term investment.

Futures contracts: standardised contracts between two parties to buy or sell a specified asset of standardised quantity and quality for a price agreed today with delivery and payment occurring at a specified future delivery date.

RISK AND REWARD PROFILE

The Fund is in category 5 as assets it holds have historically been subject to higher levels of price fluctuation. The category shown is not guaranteed and may change over time. It is based on historical data and may not be a reliable indication of future circumstances. The lowest category does not mean a risk free investment.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

Currency Risk: changes in exchange rates may reduce or increase the value of non-USD denominated investments held by the Fund, which may impact the overall net asset value of the Fund regardless of the performance of the relevant investments themselves.

Counterparty Risk: a party with whom the Fund contracts for investments or to safekeep assets may fail to meet its obligations or become bankrupt, which may expose the Fund to a financial loss.

Credit Risk: the issuer of a financial derivative instrument held within the Fund may not pay income or repay capital to the Fund when due.

Operational Risk: human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.

These risk factors are not exhaustive. Please review the “Risk Factors” sections in the Company’s prospectus (the “Prospectus”) and Supplement.
