iShares € Corp Bond SRI 0-3yr UCITS ETF

A sub-fund of iShares II plc

EUR (Dist) Share Class

ISIN: IE00BYZTVV78

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Funds' investments, which reflects the return of the Bloomberg Barclays MSCI Euro Corporate 0-3 Sustainable SRI Index, the Fund's benchmark index (Index). In the respect of the Fund and Index, SRI means socially responsible investing.
- ▶ The Share Class, via the Fund, aims to invest so far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the Index.
- ▶ The Index measures the performance of fixed-rate, Euro denominated corporate bonds that have a remaining time to maturity of no longer than three years and a minimum amount outstanding of €300 million. The bonds must be rated investment grade, taking the middle rating given by Fitch, Moody's and Standard & Poor's Rating Services.
- ▶ The Index includes only bonds issued by companies that meet the index provider's environmental, social and governance ("ESG") ratings, based on a series of and exclusionary and ratings based criteria.
- ▶ The investable universe of the Index is determined by three ESG screens. The Index excludes companies that are identified by the index provider as manufacturers or producers of alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, nuclear power, civilian firearms and military weapons, or where their involvement in those activities exceed the thresholds set by the index provider. Companies are also rated by the index provider based on their ability to manage their ESG risks and opportunities and are given a rating which determines their eligibility for inclusion. In addition, companies which are identified as being involved in major controversies that have an ESG impact on their operations and/or products and services are also excluded. The Index is market capitalisation weighted. Market capitalisation is the market value of the outstanding bond issuance. If the credit, or ESG ratings of the FI securities are downgraded, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.
- ▶ The Fund uses optimising techniques to achieve a similar return to its benchmark index. These may include the strategic selection of certain securities that make up the benchmark index and also the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on, one or more underlying assets). FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be distributing shares (i.e. dividend income will be paid on the shares semi-annually).
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated one due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The benchmark index's ESG rating assessment of an issuer's performance is intended to be relative to the standards of the issuer's industry peers. Investors should therefore make a personal ethical assessment of the benchmark index's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
