

Invesco Global Equity Income Advantage Fund

30 November 2024

Important Information

- The Fund invests primarily in a diversified portfolio of global equity securities and equity-linked notes (ELNs) designed to generate high income while providing downside protection as well as equity market upside participation.
- Investors should note that downside protection does not mean complete elimination of downside risk and is not a guarantee the Fund will not suffer any loss.
- Investors should note the liquidity risk, credit risk, volatility risk, currency exchange risk, equities risk, RMB currency and conversion risks, general investment risk.
- Financial derivative instruments (FDI) may be used for efficient portfolio management purposes or to hedge or reduce the overall risk of investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund.
- For certain share class(es), the Fund may at discretion pay dividend out of the capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share in respect of such share class after the monthly distribution date. (Note 1)
- In addition, investors of Monthly Distribution-1 share class that are currency hedged (MD-1 hedged) should be aware of the uncertainty of relative interest rates. The net asset value of the MD-1 hedged may fluctuate and may significantly differ from other share class due to fluctuation of the interest rate differential between the currency in which the MD-1 hedged is denominated and the base currency of the Fund and may result in a greater erosion of capital than other non-hedged share class. (Note 2)
- The value of the Fund can be volatile and could go down substantially.
- Investors should not base their investment decision on this material alone.

Objectives and investment strategy

The Fund's investment objective is to generate income and long-term capital growth. The Fund seeks to achieve its investment objective by investing primarily in a diversified portfolio of global equity securities and equity-linked notes (ELNs) designed to generate high income while providing downside protection as well as equity market upside participation.

*At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows (designed to ensure compliance with such sanctions). The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market. In addition to sanctions targeting entire countries, there are other thematic regimes, which may focus for example on human rights, cyber attacks, terrorist financing and corruption, which may apply to both individuals and/or entities/corporations.
