

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**UBS (Irl) ETF plc - MSCI USA Value UCITS ETF (the "Fund"), a sub-fund of UBS (Irl) ETF plc (the "Company"), class (USD) A-dis (ISIN: IE00B78JSG98)**

This Fund is managed by UBS Fund Management (Luxembourg) S.A., a part of UBS AG.

## Objectives and investment policy

The **Fund** seeks to track performance of the MSCI USA Value Index (the "**Index**"). The Index is designed to measure the performance of mid and large capitalisation companies which are characterised as value stock (i.e. are priced at a low level relative to what is considered to be their fundamental value) and listed on markets in the USA.

The Fund will seek to hold all of the shares of the Index, in the same proportions as the Index, so that essentially the portfolio of the Fund will be a near mirror image of the Index. The Fund may, for the purpose of reducing risk, reducing costs or generating additional capital or income, use derivative instruments. The use of derivative instruments may multiply the gains or losses made by the Fund on given investment or on its investments generally. Currency hedged share classes may also be available in the Fund.

Investors other than authorized participants may not subscribe for shares directly with UBS (Irl) ETF plc, but may purchase and sell shares, through an intermediary, on one of the stock exchanges listed for the share class on the website [www.ubs.com/etf](http://www.ubs.com/etf). In exceptional circumstances, direct redemptions with UBS (Irl) ETF plc, are however possible on each dealing day (as set out in the relevant supplement to the prospectus). Authorized participants may subscribe and redeem shares with the UBS (Irl) ETF plc under the conditions detailed in the relevant authorized participant agreement.

This class distributes its net income in order to maintain the maximum tracking accuracy of the MSCI USA Value Index.

## Risk and reward profile

### Further material risks

- The Fund may use derivatives which can reduce investor risks or give rise to market risks as well as potential loss due to failure of counterparty.
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.

### More about the risk category

- The risk category is based on the estimated future volatility of the Fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

### Why is this Fund in this Category?

The Fund is in risk category 5 because the volatility of its returns is high.

The Fund invests in equities and may therefore be subject to high volatility. This requires an elevated risk tolerance and capacity. The value of a unit may fall below the purchase price.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest<sup>1</sup>

Entry charge	0.00% <sup>2</sup>
Exit charge	0.00% <sup>2</sup>

### Charges taken from the fund over a year

Ongoing charges	0.20%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

<sup>1</sup> This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

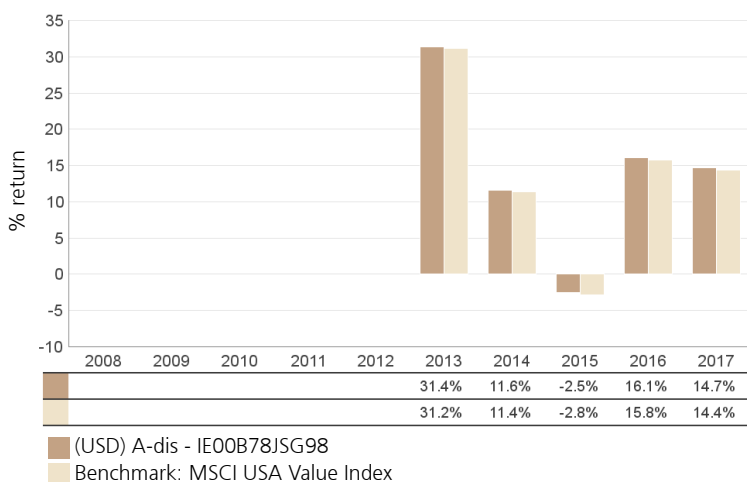

<sup>2</sup> Investors who deal on secondary markets will pay fees as charged by their stock brokers. These fees are publicly available on exchanges on which the shares are listed and traded and may also be obtained from the relevant stock brokers. Transaction costs related to dealing directly with the Fund will be payable by authorised participants.

The **ongoing charges** figure is based on expenses for the year ending 2017. This figure may vary from year to year. It generally excludes:

- Portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling units in another collective investment undertaking
- As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

For more information, please see the charges section of the Fund's prospectus, which is available at [www.ubs.com/etf](http://www.ubs.com/etf).

## Past performance

### Performance in the past is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as percentage year-end over year-end change of the class net asset value. In general any past performance takes account of all ongoing charges, but not the entry charge. If the sub-fund is managed against a benchmark, its return is also shown.

The class was launched in 2012.

The past performance is calculated in USD.

## Practical information

### Depository

State Street Custodial Services (Ireland) Limited

### Further Information
