The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

VanEck Vectors™ J.P. Morgan EM Local Currency Bond UCITS ETF (the “Fund”)

a sub-fund of VanEck Vectors™ UCITS ETFs plc (the “Company”)

Share Class: USD A (ISIN: IE00BDS67326)

This Fund is managed by VanEck Investments Limited, a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The Fund's investment objective is to replicate, before fees and expenses, the price and yield performance of the J.P. Morgan GBI-EMG Core Index (the “Index”).

The Fund will seek to achieve its objective by investing in a diversified portfolio of bonds issued by emerging market governments that, as far possible and practicable, consist of the component securities that comprise the Index. The Index is comprised of fixed rate domestic currency government bonds with greater than 13 months to maturity issued by emerging market governments and denominated in the local currency of the issuer.

The Fund, using a “passive” or indexing investment approach, attempts to approximate the investment performance of the Index. The Investment Manager (Van Eck Associates Corporation) will regularly monitor the Fund's tracking accuracy.

The Fund does not purchase all of the securities in the Index. Instead, the Investment Manager utilizes a “sampling” methodology in seeking to achieve the Fund's objective. As such, the Fund may purchase a subset of the bonds in the Index in an effort to hold a portfolio of bonds with generally the same risk and return characteristics of the Index. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Index concentrates in an industry or group of industries.

The Fund may invest in ancillary liquid assets and money market instruments which may include bank deposits, certificates of deposit, fixed or floating rate instruments, commercial paper, floating rate notes and freely transferable promissory notes.

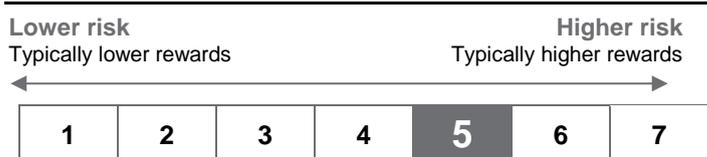

The Fund may also invest in financial derivative instruments (FDIs) for efficient portfolio management or hedging purposes. The Fund may use futures, swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the Fund. This may on occasions lead to an increase in risk profile of the Fund or result in a fluctuation in the expected level of volatility. The investment in FDIs is subject to the conditions and limits contained in the Central Bank UCITS Regulations issued by the Central Bank of Ireland.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money in a medium-to-long term (3 to 5 years).

Risk and Reward Profile

The risk and reward indicator is calculated using simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free or that the capital is guaranteed or protected.

This Fund is ranked at 5 due to the nature of the investments, i.e. emerging markets debt securities.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Bonds and bond fund decrease in value as interest rates rise. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. As the Fund may invest in securities denominated in foreign currencies and some of the income received will be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return.
- The Fund may also be subject to credit risk, interest rate risk, sovereign debt risk, tax risk, non-diversification risk and risks associated with non-investment grade securities. Non-investment grade securities may be subject to greater market fluctuations and risk of default or loss of income and principal than securities in higher rating categories.

For more information on risks, please see the “Risk Factors” section of the Company's prospectus, available on www.vaneck.com.
