The comparator benchmark assists investors with evaluating the fund's performance against short duration corporate bond returns. This benchmark has been chosen as it is believed to be appropriate given the fund's investment objective and policy.

The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with the relevant accounting standards) as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio of that day. It does not include any preliminary charge and investors may be subject to tax on distributions. The Distribution Yield is higher than the Underlying Yield because the funds expenses are charged to capital. This has the effect of increasing distributions and constraining the fund's capital performance.

Credit ratings are internal and assigned by Canada Life Asset Management. Ratings will generally be in line with the major external rating agencies and should not be higher than the highest of these. Canada Life Asset Management will assign ratings to bonds that do not have an external rating.
